INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Belgium lies in north-west Europe bounded to the north by the Netherlands, to the east by Luxembourg and Germany, to the South by France, and to the west by the North Sea. The climate is temperate. Flemish, spoken in the North, and French, spoken in the South, are the official languages. The linguistic dividing line was fixed in July 1963 and runs approximately eastwest. Brussels is situated in the Flemish part and has bilingual status. Approximately 55 per cent of the population are Flemish-speaking, 45 per cent French-speaking and some 100,000 speak German. The population is overwhelmingly Roman Catholic. The flag carries three vertical stripes—black, yellow and red. The capital is Brussels.

Recent History

Since the Second World War, Belgium has emerged as one of the leaders of international co-operation in Europe. It is a founder member of the Benelux Economic Union, of Western European Union, the Council of Europe, the Organization for Economic Co-operation and Development, the European Coal and Steel Community and the European Economic Community (the Common Market). As the headquarters of EEC and Nato, Brussels has become an important European capital. Belgium granted independence to her former colony, the Democratic Republic of Congo, in 1960 and the Trusteeship Territory of Ruanda-Urundi became independent in 1962 as the State of Rwanda and the Kingdom of Burundi.

The two year old coalition government of Paul Vanden Boeynants fell in February 1968 as a result of the language dispute between the French and Flemish speaking communities, which was focused in the University of Louvain. Following indecisive general elections in March, a new coalition was formed in June with the Socialist Party by the Christian Social Party leader Gaston Eyskens. The "Conférence Linguistique" was held in autumn 1969 but failed to settle the language dispute between the French and Flemish-speaking communities. The main problem facing the Government is the linguistic issue in Brussels and its surrounding bilingual boroughs.

Government

Legislative power is vested in the King, the Senate and the Chamber of Deputies. The Senate has three classes of members: directly elected, elected by Provincial Councils, and co-opted. Members of the Chamber of Deputies are elected directly by universal adult suffrage. The members of each house are elected for four years. Proportional representation is used. There are nine provinces.

Detence

Belgium is a member of NATO and maintains an army, navy and air force. The headquarters of SHAPE was transferred to Casteau in Belgium during 1967. Military

service lasts 12-15 months and the total strength of the armed forces is 99,000, comprising Army 75,000, Navy 4,000, Air Force 20,000. Defence estimates for 1969 totalled 26,041 million Belgian francs.

Economic Affairs

Because of its geographical position, Belgium is well situated for international trade and is one of the most successful importers and exporters in the world, maintaining a large merchant fleet. Over half Belgium's external trade is with the other members of the European Economic Community (the Common Market). Since 1921 Belgium and Luxembourg have formed an Economic Union (BLEU), and in 1960 the Benelux Treaty came into force. The country is the most densely populated in Europe and is mainly industrial. Industrial activity has concentrated in recent years in the increasingly populous Flemish areas of the North. Major exports are iron and steel products, machinery, chemical and pharmaceutical goods, textiles and glass. Coal is the only important mineral. Agriculture provides Belgium with about four-fifths of its food.

The Bank Rate underwent six increases between the end of 1968 and the end of 1969, rising from 3? per cent to 7½ per cent. To avoid the risk of inflation, the introduction of the Added Value Tax imposed by the EEC, has been postponed for a year until January 1971.

Transport and Communications

The Société Nationale des Chemins de Fer Belges maintains 4,450 kilometres (2,787 miles) of main line railway. On the roads, buses and trams (Société Nationale des Chemins de Fer Vicinaux) are much used; and inland waterways are extensive. The modernised port of Antwerp (now the third biggest in the world) handles a large tonnage of inland and ocean traffic and specializes in general cargo and containers. SABENA is one of the oldest and largest airlines in the world. Belgium's merchant fleet comprised 96 ships, totalling 835,371 tons, in 1968.

Social Welfare

Social Welfare is administered by the National Office for Social Security. Contributions are paid by employers and employees towards family allowances, health insurance, unemployment and pensions. Most allowances and pensions are tied to the cost of living index. Workers and employees are entitled to 18 days holiday for every twelve month period of work. They also receive a "holiday bonus". They are also insured against accidents occurring on the work premises or on the way to and from work, though only bodily injuries are liable to such reparations. Family allowances are as follows: 617 francs for the first child, 1.040 francs for the second child and for the third and for each of the following 1.456 francs per month. Handicapped children under 25 receive a supplementary allowance.

Education

Education in Belgium is compulsory from 6-14. A characteristic of Belgian education is the co-existance of two separate education systems: the école officielle is a state secular school and the école libre is a private denominational school receiving state subsidies. Under the School Pact of 1958 primary and secondary education were provided free and parents were given the right to choose the type of education for their children; in 1967 43 per cent of school age children attended écoles officielles and 57 per cent attended écoles libres. Under the 1963 Language of Instruction Act teaching is given in the language of the region; in the Brussels district teaching is done in the mother language of the pupil.

Primary education is from 6-12; for children who do not continue with secondary education, a two-year course attached to the primary school is provided, but this is now generally being replaced by the lower secondary school.

Secondary education consists of: general education, normale (for the training of primary school teachers), technical and artistic (vocational). General education at secondary level is divided into (a) humanités anciennes, traditionally based on classical literature, the course is essentially literary though including some scientific education. (b) humanités modernes centred either on mathematics, science or economics. Both sectors are divided into two three-year cyles and pupils may change from one sector to the other during the first four years of their course.

University Education: University entrance requirements are a minimum of marks at the end of the last year of secondary school plus a maturity examination. Courses are divided into a 2-3 year course of general preparation known as degree candidature followed by 2-3 years of specialization.

The National Study Fund provides grants where necessary and nearly 35 per cent of students are receiving scholarships. In 1967 educational expenditure amounted to 950 million dollars a year or 20.3 per cent of the annual budget.

Tourism

Ostend and other seaside towns attract many visitors. The forest-covered Ardennes is excellent hill-walking country. There are towns of rich historic and cultural interest such as Bruges, Ghent, and Antwerp.

Visas are not required for nationals of the following countries: Andorra, Argentina, Australia, Austria, Bolivia, Brazil, Canada, Chile, Colombia, Costa-Rica, Cyprus, Denmark, Dominican Republic, Ecuador, El Salvador, Finland, France, German Federal Republic, Greece, Guatemala, Haiti, Honduras, Iceland, Ircland, Italy, Japan, Liechtenstein, Luxembourg, Malaysia, Mexico, Monaco, Morocco, The Netherlands, New Zealand, Nicaragua, Norway, Pakistan, Panama, Paraguay, Peru, Portugal, San Marino, Singapore, Spain, Sweden, Switzerland, South Africa, Tunisia, United Kingdom, U.S.A., Uruguay, Vatican, Venezuela.

Sport

The most popular sport is football.

THE CONSTITUTION

THE BELGIAN CONSTITUTION has been considerably modified by amendment since its origin in 1830. Belgium is a constitutional monarchy. The central legislature consists of a Chamber of Representatives, and a Senate. The Chamber of Representatives consists of 212 members, who are elected for four years unless the Chamber is dissolved before that time has elapsed. Certain articles of the Constitution are at present (January 1970) under revision.

ELECTORAL SYSTEM

Members must be twenty-five years of age, and they are elected by secret ballot according to the system of Proportional Representation. Suffrage is universal for citizens of twenty-one years or over. (A Bill giving all women electoral franchise was approved in March 1948.) Up to 1894 only 2 per cent of the people had the right to vote. In that year manhood suffrage at the age of twenty-five was enacted, and plural voting was established on grounds of income. marriage, and educational qualifications. In 1921 the age-limit for the male vote was reduced to twenty-one. Since 1893 voting has been compulsory, and abstentions from voting have fallen to 6 per cent.

The Senate, or Second Chamber, is chosen in the following manner. It is composed of:

(1) Half as many members as the Chamber of Representatives, elected directly by the same electors.

(2) Members chosen by the Provincial Councillors, in the proportion of one for every 200,000 population.

(3) Members co-opted by groups (1) and (2), up to half the number of group (2).

There are now 178 Senators.

All Senators must be over 40, with the exception of a small number of members of the Royal Family, who become Senators by right at the age of 18. Members are elected for four years.

THE CROWN

The King has the right to veto legislation, but he does not exercise it. His place in the Belgian Constitution is very similar to the position of the Crown in Great Britain. Though he is, according to the terms of the Constitution, supreme Head of the Executive, he in fact exercises his

control through the Cabinet, which is responsible for all acts of government to the Chamber of Representatives. Though the King, according to the Constitution, appoints his own ministers, in practice, since they are responsible to the Chamber of Representatives and need its confidence, they are generally the choice of the Representatives. Similarly, the Royal initiative is in the hands of the ministry.

LEGISLATION

Legislation is introduced either by the Government or the members in the two Houses, and as the party complexion of both Houses is generally almost the same, measures passed by the Chamber of Representatives are usually passed by the Senate Each House elects its own President at the beginning of the session, who acts as an impartial Speaker, although he is a party nominee. The Houses elect their own committees, through which all legislation passes. They are so well organized that through them the Legislature has considerable power of control over the Cabinet. Nevertheless, according to the Constitution (Art. 68) certain treaties must be communicated to the Chamber only as soon as the "interest and safety of the State permit." Further, the Government possesses an important power of dissolution which it uses: a most unusual feature is that it may be applied to either House separately or to both together (Art. 71).

Revision of the Constitution is to be first settled by an ordinary majority vote of both Houses, specifying the article to be amended. The Houses are then automatically dissolved. The new Chambers then determine the amendments to be made, with the provision that in each House the presence of two-thirds of the members is necessary for a quorum, and a two-thirds majority of those voting is required.

LOCAL ADMINISTRATION

The system of local government conforms to the general European practice of being based on a commutation of central officials as the executive agent and locally elected councillors as the deliberating body. The areas are the provinces and the communes, and the latter are empowered by Art 108 of the Constitution to associate for the purposes of better government.

THE JEWISH COMMUNITY

There are about 35,000 Jews in Belgium.

Consistoire Central Israélite de Belgique (Central Council of the Jewish Communities of Belgium): 2 rue Joseph Dupont, Brussels; Leadership M. Paul Philippson.

THE PRESS

In pursuance of Article 18 of the Belgian Constitution: "The Press is free; no form of censorship may ever be instituted; no cautionary deposit may be demanded from writers, publishers or printers. When the author is known and is resident in Belgium, the publisher, printer or distributor may not be prosecuted."

This juridical freedom has determined the creation of newspapers and the variety of their political tendencies. It has also given them full responsibility in such matters as prices, advertisement tariffs, investment and management.

The Press legislation has its roots in the clauses of the Constitution which provide for the freedom of the Press (see Article 18 above), and for certain guarantees of procedure in case of violation of the laws governing the Press in Article 96. Many laws and decrees have been enacted in application of these principles, such as the law of October 16th, 1830 (Freedom of the Press), the decree of July 19th, 1831 (Competence and Procedure in matter of violation of the laws governing the Press), the decree of July 20th, 1831, modified by the law of April 16th, 1847 (Violation of the laws governing the Press).

There are 43 general information dailies, 29 of which are autonomous, the remainder depending largely or totally on the former (some are only, under a different title, regional editions of a larger paper).

Of the dailies, 27 are in French, 15 in Flemish and one is in German. Seven deal with economic and financial matters, and one is devoted to sport. A slight trend towards concentration showed itself in 1966 in the acquisition by Le Soir of La Meuse and La Lanterne, bringing Le Soir's group to six daily papers totalling 530,500 copies. The only other significant group consists of five Catholic papers, with 310,000 total circulation, linked with De Standaard.

Most of the important newspapers are family concerns, and family interests predominate even when newspapers have multiple ownership. Examples of family ownership of major papers are as follows: Le Soir (Rossel), Het Laatste Nieuws (Hoste), La Libre Belgique (Jourdain), La Dernière Heure (Brébart), De Standaard and De Gentenaar-Landwacht (Sap), Het Belang van Limburg (Theelen).

It should also be mentioned that Le Peuple and De Volksgaret are semi-official organs of the Belgian Socialist Party. Het Volk and La Cité are published by the Christian Workers Movement. There are few official political organs, though newspapers without any political colour are rare.

Nearly all the Belgian dailies have political leanings and are divided between the three traditional parties: Social Christian Party, Belgian Socialist Party, Freedom and Progress Party. It is not, however, possible to establish a parallel between the supporters of the parties and the readership of the dailies. For example, the readers of the Socialist newspapers are far fewer than those who vote for that party, and though Le Soir claims its neutrality with regard to the parties, it nevertheless adopts a decided viewpoint in many cases, and has a "Tribune Libre" open each week to a spokesman of one of the three traditional parties.

Although there is no easy division of the daily papers into popular and serious press, most papers attempting to provide a serious news coverage, La Libre Belgique and De Standaard stand out amongst the most influential and respected. The widest circulating dailies in French are: Le Sair (278,000) and La Libre Belgique (180,000); and

in Flemish: Het Laatste Nieuws (295,000), De Standaard (326,000), Het Volk (216,000), and Gazet van Antwerpen (195,000). The major weeklies include: Ons Land (245,000), Le Soir Illustré (75,000), and Le Patriote Illustré (80,000), the latter two associated with the dailies Le Soir and La Libre Belgique respectively; and the cultural periodicals Pourquoi Pas? (110,000) and Europe Magazine (76,000). The popular women's periodical Femmes d'Aujourd'hui (1,250,000) has the distinction of considerable sales in France. Some periodicals are printed in French and in Flemish.

INLAND WATERWAYS

Administration des Voies Hydrauliques: 155 rue de la Loi, Brussels; Dir.-Gen. J. Verschave.

Length of Inland Waterways: 1,005 miles.

Under the Ten-Year Plan of Port Extension started in 1956: construction of several harbour docks in the Port of Antwerp; building of new giant sluice at Port Frederic, near Antwerp, to take four 30,000-ton vessels or one 100,000-ton vessel.

Under the Investment Plan started in 1957: canals and rivers widened and deepened to allow passage of 1,350-ton barges; Meuse system down to French border widened and deepened; under a new investment plan, studies for the harbour docks on the Left Bank of the Scheldt river between Antwerp and the Holland/Belgium frontier. Modernization of the ports of Ghent and Zeebrugge. Work has started on the widening and deepening of the Albert canal to allow the passage of 10,000 ore convoys (pushed convoys).

Following the ratification of the Scheldt-Rhine Treaty in April, 1965, construction is to start on a new canal, about 54 miles long, between Antwerp and Dordrecht, connecting the Scheldt with the Rhine. Construction is scheduled to take 8-10 years and 92 per cent of the cost is to be borne by Belgium.

BULGARIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Bulgaria, in the eastern Balkans, is bounded to the north by Romania and to the east by the Black Sea. Turkey and Greece lie to the south and Yugoslavia to the west. The climate is one of fairly sharp contrasts between winter and summer. The language is Bulgarian. Most people adhere to the Bulgarian Orthodox Church and there is a substantial minority of Muslims. The flag carries three horizontal stripes of white, green and red with the white uppermost. The capital is Sofia.

Recent History

Bulgaria was declared a People's Republic in 1946, Dimitrov becoming Prime Minister in a government of the Fatherland Front. In 1949, Bulgaria became a founder-member of the Council for Mutual Economic Aid (CMEA) and in 1955 she joined the Warsaw Pact. After the death of Stalin the country entered into a more liberal period. Bulgaria was admitted to the United Nations in 1955. Following the expulsion from the Communist Party of the two previous Prime Ministers, Todor Zhivkov became Prime Minister in November 1962.

Government

Bulgaria is a People's Democracy modelled on the Soviet Union. The National Assembly is the supreme organ of state power. It is elected for a four-year term and meets twice yearly. It appoints the Presidium, initiates legislation and elects the Prime Minister. The Council of Ministers is the supreme executive organ and is responsible to the National Assembly or to the Presidium between sessions. The Communist Party is the main policy-making organ and plays a leading part in government. Between Party Congresses work is carried on by the Central Committee and the Political Bureau.

Defence

Bulgaria is a member of the Warsaw Pact. National Service is for two years in the Army and three years in the Navy and Air Force. Total armed forces strength is 154,000, comprising Army 125,000, Air Force 22,000 and Navy 7,000. Para-military forces number 15,000, including border troops. There is a People's Militia of 150,000. Defence estimates for 1969 total 272 million Leva.

Economic Affairs

Bulgaria is a very fertile country and since the end of the Second World War her agriculture has been thoroughly reorganized on a large-scale co-operative and mechanized basis. Wheat, maize, beet and barley are the chief crops. Farm produce is being marketed in more than 60 countries and amongst Bulgaria's chief exports are fruit, vegetables, tomatoes and tobacco. Industry is publicly owned and has expanded rapidly in the last twenty years. Engineering, in particular, has been greatly developed, as have the chemical, fertilizer and metallurgical industries. Power output in 1967 amounted to 13,600 million kWh. Coal, iron ore, copper, lead and zinc are mined. Some oil is extracted on the Black Sea coast. Foreign trade is a state monopoly.

Transport and Communications

Inland transport is by rail, road and waterway. There are about 3,600 miles of railway track and 21,900 miles of roads. The Danube is the main waterway used by some 97 vessels with an average tonnage of 990 tons. External services link Black Sea ports to Russia, the Mediterranean and West Europe. TABSO the state airline maintains services with East European capitals and other capitals in Europe and the Middle East.

Social Welfare

State social insurance is directed by the Department of Public Insurance and the Pensions Directorate under the Ministry of Labour and Social Welfare. State insurance contributions are compulsory for all workers irrespective of the nature of their work but contribution payments, rights and benefits are scaled according to the following three categories: workers and employees, labour co-operative farmers, private craftsmen and private farmers. Insurance contributions are determined by the Council of Ministers. Depending on the category of worker, contributions are either paid by the enterprises, employers, etc., who in turn levy the employees and workers, or they are paid by the workers individually.

Insured persons are paid money compensation during the time of sick leave, the amount of compensation depending on the duration of uninterrupted years of service. Every woman who is insured is entitled to full paid leave for so many days before and after childbirth—the amount of leave allowed depending on the number of children in the family already, and the number of years the woman has been insured. In 1967 the Bulgarian government increased the size of grants paid to mothers of large families. Disablement and old age pensions are paid to those who have contributed to the insurance scheme. The amount of pension will vary according to the nature of work the disabled or retired person was formerly engaged in, his length of service and his age.

Since 1951 all medical services and treatment have been free for the whole population, and these are provided for by the state medical authorities. All medical treatment establishments and medical schools, training colleges and research institutes are controlled by the Ministry of Public Health. Departments of Public Health in the Regional People's Councils actually supervise medical work together with the Bulgarian Red Cross.

Education

The Bulgarian educational system follows the Soviet system more closely than the other Eastern European countries. Much importance has been attached to the development of education in Bulgaria, with the result that considerable progress has been made in recent years. A series of educational acts were passed between the years 1944 and 1950 and these provided for expansion in the educational field. In 1959 a law was passed for the "further development of education in the Bulgarian People's Republic".

In 1968, 378,770 children between the ages of three and

BULGARIA-(Introductory Survey, Statistical Survey)

seven years attended non-compulsory crèches (jasli) or kindergartens (detski gradini). Education is compulsory for children between the ages of seven and fifteen years, when they attend the elementary eight-class school (osnovno učilišle), and are taught both general and specialized subjects. The elementary eight-class school provides the first two stages of the "eleven-year school". Only 3,038 children (0.34 per cent) of those liable for compulsory education do not attend school. More than 95 per cent of all Bulgarian children continue with their education after the age of fifteen years, when education is no longer compulsory. There are three types of school in Bulgaria to which a student may progress after he has completed the basic school. The gimnazia provides a general education and completes the third stage of the "eleven-year school", the technikum is a vocational school offering a general curriculum together with a course leading to vocational qualifications in various branches of industry, agriculture, etc. The third type of secondary school is the profesionalno tekhničesko učilište (vocational technical school), which is equivalent to a trade or an apprentice school, and which provides a general curriculum together with practical work in factories and on farms. Each student may choose freely whichever secondary school he wishes to attend, and about 40 per cent choose the technikum, while 20 per cent choose the profesionalno tekhničesko učilište. Some 2,500 pupils attend special schools for art, ballet, foreign languages, etc.

Higher education in Bulgaria can be divided into two main categories, i.e. poluvisši instituti, which can best be described as teacher training colleges, and visši učebni zavedenija, or higher educational institutes, including universities. There are 16,000 students in poluvisši instituti including part-time students, while there are 85,270 stu-

dents in 26 higher institutes; these are all situated in Sofia except for four in Plovdiv, Russe, Svishtov and Varna.

Tourism

Black Sea resorts are very popular, visitors coming from Russia and East Europe. In 1962 the Government launched a campaign to attract tourists from the West and tourism, particularly from the United Kingdom, has increased with over a million visitors in 1965. As part of the 1967 International Year of Tourism, Bulgaria abolished visas for all foreign citizens visiting the country for 24 hours to two months and announced that Bulgaria would dispense with visas after 1967 on a basis of reciprocity. The tourist exchange rate is 4.8 Leva to £1 sterling.

Sport

Sport receives state encouragement, football being the most popular game.

Public Holidays, 1970

January I (New Year's Day), May 1, 2 (Labour Days), May 24 (Education Day), September 9, 10 (National Days), November 7 (October Revolution).

Weights and Measures

The Metric System is in force.

Currency and Exchange Rates

The currency unit is the Leva which is divided into roo Stotinki.

Notes: Leva 20, 10, 5, 2, 1.

Coins: Leva 1; Stotinki 50, 20, 10, 5, 2, 1.

Exchange rate: 2.81 Leva = £1 sterling 1.17 Leva = \$1 U.S.

THE CONSTITUTION

Bulgaria was formerly a monarchy, but on September 15th, 1946 King Simeon was deposed and Bulgaria was declared a Republic. On December 4th, 1947, a new Constitution was approved by the National Assembly. The following are its salient features:

Bulgaria is a People's Republic with a representative Government. All power derives from the people and belongs to the people, being exercised through freely elected representative organs and referenda.

All citizens of over 18 years of age, irrespective of sex, race, religion or social status, are eligible to vote and to be elected.

All representative organs of the State are elected by a general, equal, direct and secret ballot. Representatives are responsible to their electors and may be recalled.

SOCIAL-ECONOMIC ORGANIZATION

National property is the main basis of the country's economic development. The State can itself manage or concede to another the management of the means of production at its disposal.

All mineral and other underground natural resources, forests, waters, railway and air communications, posts, telegraphs, telephones, and radio broadcasting are State (national) property. All economic activity is directed by the State, and co-ordinated by a State Economic Plan.

Private property and its inheritance together with private enterprise in economy, are recognized and protected by law, but no one can exercise his right of ownership to the detriment of the public interest, and private property may be subject to compulsory restrictions or expropriation for State or public use, and against fair indemnity.

Foreign and home trade are directed and controlled by the State. The State aids and fosters co-operative associations.

The State can nationalize fully or in part certain branches of individual enterprise or industry, trade, transport and credit, and may reserve to itself the exclusive right to produce or trade in any goods which are of particular importance to national economy. Private monopoly agreements and associations such as Cartels and Trusts are prohibited.

The land belongs to those who till it. The law determines how much land private persons may own, and large landed estates are not permitted.

Co-operative farms are fostered and aided by the State and enjoy its special protection. The State may also organise State farms. Labour is the object of the State's care in every aspect, and is directly assisted by the general economic and social policy, cheap credits, tax systems and co-operative associations.

THE NATIONAL ASSEMBLY

The National Assembly is the supreme organ of State power, and the only legislative organ of the People's Republic. It is composed of elected representatives of the People's—one for every 30,000 inhabitants. It is elected for a term of four years, and is convened at least twice a year. Representatives may be recalled before their term of office has expired. The powers of the National Assembly are very far-reaching; it elects the Presidium of the

National Assembly, consisting of the President, two vicepresidents, fifteen members and a secretary; passes all laws; elects the Prime Minister: decides on the holding of referenda; votes on the general economic plan of the country and the budget; decides questions of war and peace; grants amnesties; elects the President of the Supreme Court and the Public Prosecutor; and can amend the Constitution by a two-thirds majority of the whole Assembly.

Legislative initiative belongs to the Government and to the People's Representatives, who can introduce Bills. Half the total number of representatives constitutes a quorum, and decisions are then taken by a simple majority.

THE PRESIDIUM

The Presidium is invested with the following powers: to represent the Republic in its international relations; to appoint ministers plenipotentiary; to appoint the ministers indicated by the Prime Minister; to decide the date of a general election; to convene and adjourn the National Assembly; to ratify international treaties made by the Government; to exercise the right of pardon; to exercise general control over the activities of the ministers, by requiring and receiving reports, and in case of disagreement by referring back for further consideration the orders of individual ministers or of the Council of Ministers, and to repeal all decisions and directives of the Council of Ministers which do not conform with the Constitution and the Laws.

THE GOVERNMENT

The Government (Council of Ministers) is the supreme executive administrative organ of the State. It is composed of the Prime Minister and Deputy Prime Ministers of the Council of Ministers, the Ministers, the Chairmen of the State Planning Commission and of the Committee for State Control, and the chairmen of various Committees at the Council of Ministers. The Government is responsible and gives account to the National Assembly, or to the Presidium when the Assembly is not in session. Persons who are not Representatives may be members of the Government. The Government controls the administration of the State and of its branches, is responsible for carrying through the general economic plan, and for securing public order and the observance of the laws. The Council of Ministers may take under its direct control certain branches of the administration by forming for the purpose commissions, committees, etc., and services directly subordinate to it. The members of the Government are jointly responsible for the general policy of the Government, and are individually responsible for their respective actions.

LOCAL GOVERNMENT

The territory of the Republic is divided for administrative purposes into Municipalities and Counties, which are governed by Municipal and County People's Councils, elected by the local population for a period of three years. Their function is to implement all economic, social and cultural undertakings of local significance in conformity with the laws of the country. They prepare the economic plan and budget of the Municipality and the County within the framework of the State Economic Plan and the State Budget, and direct its execution. They are responsible for the correct administration of State property and economic enterprises in their areas, and for the maintenance of law

BULGARIA—(THE CONSTITUTION, THE GOVERNMENT)

and order. These councils report at least once a year to their electors on their activities.

JUSTICE

The judicial authorities apply the law. Justice is independent and subject only to the law. Lay judges (Assessors) also take part in the dispensation of justice. Judges of all ranks and assessors are elected except in special cases fixed by law. Supreme judicial control over every kind of court is exercized by the Supreme Court of the People's Republic, which is elected by the National Assembly for a term of five years.

The Chief Prosecutor, who is also elected by the National Assembly for five years, and is answerable to it alone, has supreme supervision over the correct observance of the law by Government organs, officials, and all citizens. It is his particular duty to attend to the prosecution and punishment of crimes which are detrimental to the national and economic interests of the Republic or affect its independence.

THE RIGHTS AND DUTIES OF CITIZENS

All citizens are equal before the law. No privileges based on national origin, religion, sex or property are recognized. All preaching of racial, national or religious hatred is punishable by law.

Women have equal rights with men in all spheres, including equal pay for equal work. The State pays special attention to the needs of mothers and children. Marriage and the family are under State protection, although only civil marriage is legally valid. Children born out of wedlock have equal rights with legitimate offspring.

Labour is recognized as the basic factor of public and economic life. All citizens have the right to work, and it is their duty to engage in socially useful labour, according to their abilities. Holidays, limited working hours, pensions and medical treatment are guaranteed.

All citizens have the right to education, which is secular and democratic. Elementary education is free and compulsory. National minorities have the right to be educated in their own tongue, and to develop their national culture, although the study of Bulgarian is compulsory.

The Church is separate from the State. Citizens have freedom of religion and conscience. However, misuse of the Church and religion for political ends and the formation of religious organizations with a political basis is prohibited.

Citizens are guaranteed freedom of speech and of the Press, secrecy of correspondence, inviolability of persons and dwellings, and the right of association and assembly, except for fascist and certain other meetings.

Military service is compulsory for all male citizens.

CYPRUS

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Cyprus is an island in the eastern Mediterranean about 60 miles south of Turkey. It is the third largest Mediterranean island after Sicily and Sardinia. Climate is mild though snow falls in the mountainous south-west between December and March. About four-fifths of the people speak modern Greek and the remainder Turkish. The Greek-speaking community adhere to the Greek Orthodox Church while most of the Turks are Muslims. The flag is white with a map of Cyprus in gold in the centre garlanded by olive leaves. The capital is Nicosia.

Recent History

Cyprus was created a British Crown Colony in 1925. In 1955 Greek-Cypriot nationalists seeking independence and unification with Greece resisted British rule by force. The civil war ended in 1959 with the granting of independence. Unification with Greece and the Turkish-Cypriot demand for partition were both rejected. Britain remained in certain agreed areas to be used as military bases. Cyprus was admitted to the United Nations in 1960 and joined the Commonwealth in 1961. Serious fighting broke out between Greek and Turkish Cypriots in late 1963 and in April 1964 a United Nations Peace-Keeping force was set up and a UN Mediator appointed. As yet, no proposed solution has been acceptable to both Greek and Turkish communities.

In February 1968 President Makarios was re-elected by a large majority. Since the summer of 1968 there has been a renewal of normal social and commercial exchange between the two communities, and the United Nations force has been considerably reduced.

The fifteen Turkish members of the House of Representatives have not attended sessions since January 1964, and in their absence a number of measures have been passed which, without amending the Constitution, make temporary provisions for the administration of the country (see below, Constitution).

Government

According to the Constitution, legislative authority is vested in a House of Representatives elected by adult universal suffrage for a five-year term and consisting of 35 members from the Greek community and 15 from the Turkish community. The House exercises authority on all matters save those reserved for the Communal Chambers. These bodies, elected by both communities, deal with communal affairs such as religion, teaching and culture. Executive authority is vested in the President who is Greek-speaking and the Vice-President who is from the Turkish community. They are assisted by a Council of Ministers composed of seven Greek and three Turkish members.

Note: Turkish participation in government and legislation was withdrawn in January 1964. In March 1965 the Greek Communal Chamber was abolished and its functions taken over by the Ministry of Education. In June 1966, all Turkish judges resigned.

Defence

The National Guard has been increasingly modernized in training and equipment since its foundation in 1964. National Service is compulsory, the term of conscription has been increased from six months to two years, and all males between the ages of eighteen and fifty are liable. The Cyprus Police Force, which is armed, "is mainly employed for the maintenance of law and order, the preservation of peace and the prevention and detection of crime".

Economic Affairs

The economy is based mainly on agriculture. Principal crops are wheat, barley, vegetables and citrus fruits. Vines are cultivated and wine produced. Mining provides two-thirds of the island's exports. The most important minerals are cupreous and iron pyrites, asbestos, copper and gypsum. There is no heavy industry and manufactures are limited to food processing, textiles and woodworking. In 1966 a refinery was opened near Larnaca by a consortium of Shell, Mobil and B.P. Despite political and military troubles the country is relatively prosperous, with an estimated per capita income of £207 in 1968.

Transport and Communications

There are no railways in Cyprus. Towns and villages are linked by asphalted roads with frequent bus services. The three main ports are Famagusta, Limassol and Larnaca which provide cargo and passenger services to Greek and other Mediterranean ports. There is an international airport at Nicosia.

Social Welfare

Since the foundation of the Republic a comprehensive social insurance scheme covering every working male and female and their dependants has been established. It embraces protection against arbitrary and unjustified dismissal, industrial welfare, and tripartite co-operation in the formulation and implementation of labour policies and objectives. A second five-year plan for economic and social development was introduced in 1967. Benefits and pensions from the social insurance scheme cover unemployment, sickness, maternity, widows, orphans, old age and death.

Education

The educational system in Cyprus is centralized under the authority of the Ministry of Education. A six-year course of elementary education, starting usually at the age of six is compulsory for all children. There is a Six Year Elementary School in every community, supplemented in some areas by Lower Mixed Schools (infant) and Eight Grade Schools. About 75 per cent of all pupils progress after examination to the non-obligatory Gymnasia (secondary schools), which normally demand fees. Three years at a Lower Secondary School gives a general practical education, and a further three years of Senior Secondary School allows for specialization in classical, scientific, and commercial directions. There are also technical, vocational, and agricultural schools. A certain number of scholarships are

CYPRUS—(Introductory Survey, Statistical Survey)

granted by the Ministry of Education for secondary education. In 1969 there were 786 elementary schools, 91 secondary schools, a Pedagogical Academy, a Higher Technical Institute, a Forestry College, and a School of Nursing and Midwifery. Of the total of 973 educational establishments 108 are privately owned, and 865 owned by the state. Figures for all establishments gives an average ratio of about 1 teacher to every 28 pupils. The Turkish Education Office caters for the Turkish-speaking population and administers 10 kindergartens, 227 elementary schools, 14 junior secondary schools, 5 lycées, 3 technical schools, and 1 teacher training college.

Tourism

There are many beaches providing excellent sea bathing during the long, dry summer. Skiing is possible in the mountains during winter.

Visas are not required for nationals of the following countries: Belgium, Denmark, Finland, France, Federal Republic of Germany, Greece, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, The Netherlands, Norway, San Marino, Sweden, Switzerland, United Kingdom and British Commonwealth, U.S.A.

Sport .

Football, hockey, gymnastics and athletics are the most popular sports.

Public Holidays, 1970

The main public holidays are: January I (New Year's Day), January 6 (Epiphany), January 19 (President's Name Day), March 16 (Lent Monday), March 25 (National Day), April 3 (Good Friday) and April 6 (Easter Monday) (Orthodox Easter), May I (Labour Day), October 26 ("Ohi" Day), December 24, 25 26, (Christmas).

Weights and Measures

Weights and measures follow the standard British weights and measures (see under United Kingdom). The Metric System is also in use, as well as a special internal system as follows:

1 pic = 3 yard; 1 oke = 2.8 pounds; 1kilé = 8 Imperial gallons.

Currency and Exchange Rates

The monetary unit is the Cyprus Pound which is divided into 1,000 mils. In November 1967 Cyprus followed Britain in devaluing her currency by 14.3 per cent.

Notes: £5, £1, 500 mils, 250 mils.

Coins: Mils 100, 50, 25, 5, 3.

Exchange rate: £1 Cyprus = £1 sterling 416.6 mils = \$1 U.S.

THE CONSTITUTION

SUMMARY

The Constitution entered into force on August 16th, 1960, on which date Cyprus became an Independent Republic. In March, 1961 Cyprus was accepted as a member of the Commonwealth.

ARTICLE 1

The State of Cyprus is an independent and sovereign Republic with a presidential régime, the President being Greek and the Vice-President being Turkish, elected by the Greek and the Turkish Communities of Cyprus respectively as hereinafter in this Constitution provided.

ARTICLES 2-5

The Greek Community comprises all citizens of the Republic who are of Greek origin and whose mother tongue is Greek or who share the Greek cultural traditions or who are members of the Greek Orthodox Church.

The Turkish Community comprises all citizens of the Republic who are of Turkish origin and whose mother tongue is Turkish or who share the Turkish cultural traditions or who are Moslems.

Citizens of the Republic who do not come within the above provisions shall, within three months of the date of the coming into operation of this Constitution, opt to belong to either the Greek or the Turkish Community as individuals, but, if they belong to a religious group, shall opt as a religious group and upon such option they shall be deemed to be members of such Community.

The official languages of the Republic are Greek and Turkish.

The Republic shall have its own flag of neutral design and colour, chosen jointly by the President and the Vice-President of the Republic.

The Greek and the Turkish Communities shall have the right to celebrate respectively the Greek and the Turkish national holidays.

ARTICLES 6-35 Fundamental Rights and Liberties

ARTICLES 36-53 President and Vice-President

The President of the Republic as Head of the State represents the Republic in all its official functions; signs the credentials of diplomatic envoys and receives the credentials of foreign diplomatic envoys; signs the credentials of delegates for the negotiation of international treaties, conventions or other agreements; signs the letter relating to the transmission of the instruments of ratification of any international treaties, conventions or agreements; confers the honours of the Republic.

The Vice-President of the Republic as Vice-Head of the State has the right to be present at all official functions; at the presentation of the credentials of foreign diplomatic envoys; to recommend to the President the conferment of honours on members of the Turkish Community which recommendation the President shall accept unless there are grave reasons to the contrary. The honours so conferred will be presented to the recipient by the Vice-President if he so desires.

The election of the President and the Vice-President of the Republic shall be direct, by universal suffrage and secret ballot, and shall, except in the case of a by-election, take place on the same day but separately.

The office of the President and of the Vice-President shall be incompatible with that of a Minister or of a Representative or of a member of a Communal Chamber or of a member of any municipal council including a Mayor or of a member of the armed or security forces of the Republic or with a public or municipal office.

The President and Vice-President of the Republic are invested by the House of Representatives.

The President and the Vice-President shall hold office for a period of five years.

The Executive power is ensured by the President and the Vice-President of the Republic.

The President and the Vice-President of the Republic in order to ensure the executive power shall have a Council of Ministers composed of seven Greek Ministers and three Turkish Ministers. The Ministers shall be designated respectively by the President and the Vice-President of the Republic who shall appoint them by an instrument signed by them both.

The decisions of the Council of Ministers shall be taken by an absolute majority and shall, unless the right of final veto or return is exercised by the President or the Vice-President of the Republic or both, be promulgated immediately by them.

The executive power exercised by the President and the Vice-President of the Republic conjointly consists of:

Determining the design and colour of the flag. Creation or establishment of honours.

Appointment of the members of the Council of Ministers. Promulgation by publication of the decisions of the Council of Ministers.

Promulgation by publication of any law or decision passed by the House of Representatives.

The base areas cover 99 square miles. The Treaty also conferred on Britain certain rights within the Republic, including rights of movement and the use of specified training areas.

UNITED NATIONS PEACE-KEEPING FORCE IN CYPRUS

UNFICYP

P.O. Box 1642, Nicosia, Cyprus

Set up for three months in March 1964 (subsequently extended at intervals of three or six months to keep the peace between the Greek and Turkish communities and help to solve outstanding issues between them.

Commander: Maj.-Gen. D. PREM CHAND.

Special Representative of the UN Secretary-General: Dr. Bibiano Osorio-Tafall (Mexico).

JUDICIAL SYSTEM

Supreme Court: Nicosia.

President: Hon. Mr. Justice G. S. VASSILIADES.

Judges: Hon. Mr. Justice M. A. TRIANTAFYLLIDES, Hon. Mr. Justice J. P. Josephides, Hon. Mr. Justice A. S. Stavrinides, Hon. Mr. Justice L. N. Loizou, Hon. Mr. Justice T. Hadjianastassiou.

The Supreme Court is the final appellate court in the Republic and the final adjudicator in matters of constitutional and administrative law, including recourses on conflict of competence between state organs on questions of the constitutionality of laws, etc. It deals with appeals from Assize Courts and District Courts as well as from the decisions of its own single judges when exercising original jurisdiction in certain matters such as prerogative orders of habeas corpus, mandamus, certiorari, etc., and in admiralty and certain matrimonial causes.

Assize Courts and District Courts:

As required by the Constitution a law was passed in 1960 providing for the establishment, jurisdiction and powers of courts of civil and criminal jurisdiction, i.e. of six District Courts and six Assize Courts.

Ecclesiastical and Communal Courts:

There are seven Orthodox Church tribunals having exclusive jurisdiction in matrimonial causes between members of the Greek Orthodox Church. Appeals go from these tribunals to the appellate tribunal of the Church.

Civil disputes relating to personal status of members of the Turkish Community are dealt with by two Communal Courts. There is also a communal appellate court to which appeals may be made from the decisions of the courts of first instance.

Supreme Council of Judicature: Nicosia.

The Supreme Council of Judicature is composed of the Attorney-General, the President and the two senior Judges of the Supreme Court, the senior District Court President, the senior District Court Judge and a practising advocate of at least twelve years practice.

It is responsible for the appointment, promotion, transfer, etc., of the judges exercising civil and criminal jurisdiction in the District Courts and the Assize Courts.

RELIGION

Greeks form 80 per cent of the population and most of them belong to the Orthodox Church. Most Turks (18 per cent of the population) are Muslims.

The Orthodox Church of Cyprus: Archbishopric of Cyprus, P.O. Box 1130, Nicosia; f. 45 A.D.; the Autocephalous Orthodox Church of Cyprus, a part of the Eastern Orthodox Church, enjoys the privilege of independence with the right to elect its own Archbishop. 500,000 members.

Archbishop of Nova Justiniana and all Cyprus: Archbishop Makarios III.

Metropolitan of Paphos: Bishop YENNADIOS.

Metropolitan of Kitium: Bishop Anthimos.

Metropolitan of Kyrenia: Bishop Kyprianos.

Suffragan Bishop of Amathus: Bishop Kallinikos.

Suffragan Bishop of Constantia: Bishop Chrysostomos.

Islam: Most of the adherents in Cyprus are Sunnis of the Hanafi Sect. The religious head of the Muslim community is the Musti.

The Musti of Cyprus: Muderris Mehmet Dana.

Other Churches: Armenian Apostolic, Catholic (Maronite Rite), Roman Catholic and Church of England.

THE PRESS

The establishment and general running of newspapers and periodicals is defined in the Press law, consisting of Chapter 79 of the pre-independence Code of Law, later amended by Law 69 in 1965. Article 19 of the Constitution declares in connection with the rights of the Press: "Every person has the right to freedom of speech and expression in any form. This right includes freedom to hold opinions and impart information and ideas without interference by any public authority and regardless of frontiers." This freedom is subject to legally specified conditions and restrictions in the interest of state security, public safety, order, public health and morals, the protection of the reputation and the rights of others and the preservation of the authority and impartiality of the judiciary.

Cyprus has a small but vigorous Press, catering for all political viewpoints in the twofold community, and constituting the most influential of the communications media. Most newspapers are owned by private individuals but Patris is owned by a limited company. Although several dailies have a clear political leaning, and Haravghi is affiliated to AKEL, the Progressive Party, none is directly owned by a political party.

Of the fourteen dailies, nine are in Greek, four in Turkish and one in English. This paper, the Cyprus Mail, appears each day, but all the Greek and some of the Turkish dailies do not publish a Monday edition, when most of the weekly papers appear,

Philelephtheros, Agon and Makhi (linked with the weekly Tharros) tend to be pro-government, while Haraughi (associated with the weekly Nei Keri) reflects the views of the extreme left, and Patris those of the political right. The moderate-liberal Eleftheria, a paper of some prestige, is politically independent, like the Cyprus Mail. Bozkuri and Halkin Sesi are the chief spokesmen for the Turkish community. Eleftheria, Philelephtheros and the Cyprus Mail are the dailies most respected for their serious news coverage. Makhi and Haraughi are also very influential, as they are the most widely read, with circulations of over ten thousand. Though low by West European standards this figure is high in comparison with Middle Eastern circulation figures. Precise, reliable circulation figures are virtually unobtainable.

Among the most respected weekly newspapers are the moderate Kypros and Alithia, though Tharros and Nei Keri are very popular. There are also a number of trade union papers, headed by Ergatiko Vima, the organ of the Pan-Cyprian Federation of Labour.

TRANSPORT

RAILWAYS

There are no railways in Cyprus.

ROADS

There are about 4,500 miles of roads, of which over 1,880 miles have been asphalted. Buses run from Nicosia to the main towns and most villages, and there are taxi services between the principal towns.

SHIPPING

Famagusta is the main port of the island and has a natural harbour; vessels of an overall length of 430 feet and a maximum draught of 22 feet can be accommodated alongside the quay in the inner harbour; ships with a maximum draught of 30 ft. can be accommodated in the outer harbour. There is open-roadstead accommodation at Larnaca and Limassol. The harbours of Paphos and Kyrenia offer good anchorage to small vessels and fishing craft. There is very little coastal shipping.

There are over fifty lines running cargo and passenger services to Cyprus at approximately weekly, bi-monthly and monthly intervals.

CIVIL AVIATION

The airport at Nicosia has recently been extended: the 8,000 ft. runway is suitable for all types of aircraft, including jets, and an extension to 10,700 ft. is planned; new terminal buildings costing £1.1 million (including £500,000 from a British Government grant) were epened by President Makarios in March 1968.

Cyprus Airways: Head Office: 16 Byron Avenue, P.O.B. 1903, Nicosia; f. 1946; Chair. G. ELIADES; Gen. Man. E. SAVVA; routes to Ankara, Istanbul, Tel-Aviv, Cairo, Rhodes and Beirut; operates two Viscount 806; routes to Athens, Rome and London operated in association with B.E.A. by Trident 2E. Two Trident 2E are on order, one to be put in operation from November 1969 on routes to London, Frankfurt, Athens and the Middle East and the second from May 1970.

Cyprus is also served by the following foreign airlines: B.E.A., El Al, Interflug, K.L.M., Lufthansa, Malev, M.E.A., Olympic Airways, Sabena, Swissair, Syrian Arab Airlines, Türk Hava Yolları and United Arab Airlines.

CZECHOSLOVAKIA

INTRODUCTORY SURVEY

Location, Climato, Language, Religion, Flag, Capital

The Czechoslovak Socialist Republic lies in Central Europe between 48°-51° N latitude and 12°-23° E longitude. Its neighbours are Poland to the north, the German Democratic Republic to the north-west, the German Federal Republic in the west, Austria to the south-west, Hungary to the south-east and the U.S.S.R. in the extreme east. The state is composed of two main population groups, the Czechs (65.1 per cent of the total population) and the Slovaks (28.9 per cent). The climate is continental with warm summers and cold winters, average mean temperature 9°C (49°F). Czech and Slovak are the official languages. About 70 per cent of the people are Roman Catholics, 15 per cent Protestants and the remainder unstated. The flag is divided horizontally red and white with a blue triangle superimposed. The capital is Prague.

Recent History

The 1946 post-war elections returned the Communists as the strongest single party and in 1948 they assumed full power. The country aligned itself with the Soviet-led East European bloc and joined the Council for Mutual Economic Assistance (CMEA) and the Warsaw Pact military alliance. Government followed a rigid Stalinist pattern until 1963 when a new Government under Josef Lenárt was formed. In January 1968 Alexander Dubček succeeded Antonín Novotný as Party Secretary and in April, following Mr. Novotný's resignation as Head of State, Oldřich Černík became Prime Minister. The policies of the new government expressed a spirit of independence and liberalism and envisaged widespread reforms. On August 21st, 1968, Warsaw Pact forces occupied Prague and other major cities. The Soviet Government has since exerted heavy pressure on Czech leaders to suppress their reformist policies, and in April 1969 Alexander Dubček was replaced by Dr. Gustáv Husák as First Secretary of the Communist Party. Relations with the Soviet Union steadily strengthened throughout 1969. In January 1970 Oldřich Cerník resigned from his post as Prime Minister, to be succeeded by the conservative Lubomir Strougal.

Government

Czechoslovakia consists of the Slav nations, the Czechs and the Slovaks, united in one state and sharing equal rights.

The Head of State is the President, elected for a five-year term by the Federal Assembly, to whom he is accountable. On 1st January, 1969, Czechoslovakia became a federal state in which Czechs and Slovaks have equal representation. There is a federal government, elected for a four-year term by all over the age of 18, as well as separate Czech and Slovak governments. The administration of Slovakia is carried out from Bratislava while foreign affairs, defence and important economic questions are run from Prague.

Defence

Czechoslovakia is a member of the Eastern European Mutual Assistance Treaty, the "Warsaw Pact". Military service is compulsory and lasts for two years in the Army and three years in the Air Force. Service with the reserve lasts until the age of fifty years. The combined strength of

the Army and Air Force is 230,000 men, plus 35,000 paramilitary forces (including border troops). There is a People's Militia of up to 100,000. Defence estimates for 1969 total 13,400 million crowns. As a result of the invasion of 1968, Soviet forces have taken up permanent positions on the frontier with Federal Germany.

Economic Affairs

Agriculture has been collectivized and about 90 per cent of the land is in Agricultural Co-operatives, State Farms or Communal Enterprises.

Industry is state-owned. Until 1961 heavy industry received precedence under development plans, but under the Third Five-Year Plan, 1961-65, greater stress was laid on light industry. This Plan had to be abandoned due to economic difficulties, but elements were incorporated in a Seven-Year Plan, 1964-70; in 1966 this was superseded by the Fourth Five-Year Plan, 1966-70, which has aimed to strike a balance between industry and agriculture; power and chemical industries are to be developed, machinery building modernized and consumer services improved. Czechoslovakia is an important engineering nation with a considerable output of motor cars and motor cycles. Other important industries are glass, beer, ceramics and textiles. In 1967 the national income rose by 8 per cent, industrial production by 7.1 per cent over 1966, and agricultural production by 3.5 per cent. Figures for 1969 are not so promising, and indicate that the Czechoslovak economy is going through a difficult period. Industrial output rose by 3.4 per cent over 1968, and labour productivity rose only by 2.7 per cent. For the first half of 1969, total exports have shown an increase of I per cent.

In May 1968 Dr. Ota Šik, then Deputy Prime Minister, announced plans for radical changes in the nation's economy with the aim of making it competitive both at home and in Western markets. These plans included the complete decentralization of industry, the granting of full autonomy to individual state enterprises, and the acceptance of Western capital for joint industrial ventures. As a result of the invasion of 1968, however, these plans were shelved. In October 1969, in the first policy speech of the new government, Oldřich Cerník indicated that there would be a return to strong central management of the economy. Economic plans were being made in October for the period up to 1975.

Transport and Communications

About 60 per cent of all freight traffic is carried by the railways which have a total length of 8,250 miles, 1,484 of which are electrified. Roads carry about 70 per cent of the passenger transport. The Elbe and Danube are navigable and Czechoslovakia's overseas trade passes through East German, Polish and Black Sea ports. Civil aviation is important and there are about 60 regular internal services.

Social Welfare

A single and universal system of social security was established in Czechoslovakia after the Second World War. In 1948 a law was passed by which all workers and employees, irrespective of the nature of their work, benefited equally from the new insurance scheme. In 1966 the general

protection of health was provided for by law, with particular emphasis on the prevention of illness rather than treatment and cure. Medical care, treatment, medicines, etc. are free for the entire Czechoslovak population. The National Health Insurance Scheme is administered by the Revolutionary Trade Union Movement, which also supervises other aspects of social welfare such as protection of the individual at work, housing conditions and recreation schemes. Since 1956 sickness benefit has been paid to all those workers who are temporarily unable to work due to illness, injury, medical treatment, etc. Sickness benefit may be paid for a maximum period of two years after which time disablement pension applies. Social security is guaranteed for all through different schemes: for wagecarners, members of co-operative societies, members of agricultural co-operatives, pensioners and members of the armed forces. Benefits and rights are the same for all these groups. Great importance is attached today to maternity benefits and family allowances, which are paid according to the situation of the woman and family concerned. It is hoped that in the near future these allowances will be increased to help large families with low incomes. Plans are being made to help old people by increasing old-age pensions.

Education

Plans for the expansion of the Czechoslovak educational system were launched in 1960. Emphasis has since been laid on the lengthening of the basic school, expansion of vocational and technical education, and extra educational facilities for adults. Children between the ages of three and six years attend kindergarten (materska škola). This form of primary education has proved very popular in recent years and it is hoped that in the near future all children may be assured a place at kindergarten. Education is compulsory between the ages of six and fifteen years, when children attend the basic school (zakladní devitiletá škola). There are 10,942 basic schools with 2,052,526 pupils in attendance (1968-69). At first a general curriculum is provided, followed by more specialized subjects. Owing to lack of classroom space, the basic school suffers from overcrowding and many children in the larger towns and cities are forced to attend lessons in shifts.

The secondary school system in Czechoslovakia is similar to those of other countries in Eastern Europe. The vast majority of Czechoslovak children continue their education in some form or other after the compulsory basic school. The general secondary school (střední vsčobení vzděldvaci šhola), provides three-year courses in either mathematics and science, or languages and the social sciences. Vocational secondary schools (střední odborná škola), as their name suggests, provide a general education

together with vocational training. The apprentice school (učnovská škola) trains the student to enter a trade in industry, agriculture, etc., straight from school. Within the higher educational system there are 649 technical and teacher training colleges with 278,685 students, 35 higher institutes including 6 universities with 137,654 students. In 1959 a new type of school was set up, the střední škola pro pracující. This school is attended by workers and adults and in most cases is actually run by industrial plants for their employees. They are immensely popular and have attracted far greater numbers than was originally anticipated.

Tourism

Czechoslovakia has magnificent scenery, with winter sports facilities. Prague is the best known of the historic cities and there are famous castles and cathedrals, numerous resorts and 29 spas with natural mineral springs, notably Mariánské Lazné (Marienbad) and Karlovy Vary (Karlsbad). 4,165,957 tourists visited Czechoslovakia in 1968, including a considerable proportion from West European and overseas countries. There is a special tourist exchange rate of 38.74 koruna to £1 sterling.

Visas are required by nationals of all non-communist countries.

Sport

Two voluntary bodies, the Czechoslovak Union of Physical Training and the Czechoslovak Union for Physical Culture, plan the development of sport, conduct reseach and encourage physical training of all kinds. According to the latest available figures, there are about 7,842 sports clubs in Czechoslovakia, having a total of 1,752,460 members. The largest sections are football 367,704 members, track and field athletics with 60,397 members, handball 49,232 members, followed by backetball, ice-hockey, water sports and chess in order of popularity.

Public Holidays, 1970

January I (New Year's Day), March 30 (Easter Monday), May I (Labour Day), May 9 (Liberation Day), October 28 (Nationalization Day), December 25, 26 (Christmas).

THE CONSTITUTION

(Proclaimed on July 11th, 1960; amended October 1968.)

The Czechoslovak Socialist Republic is a unitary State of two fraternal nations possessing equal rights, the Czechs and the Slovaks.

According to the Constitution, work in the interests of the community is a primary duty and the right to work a primary right of every citizen. All citizens have equal rights and equal duties without regard to nationality and race. Remuneration for work done is based on its quantity, quality and social importance. Men and women have equal status. All citizens have the right to health protection, education and leisure after work including paid holidays. Other rights include: freedom of expression, assembly, inviolability of the person, the home, mails, etc. Everyone has the right to profess any religious faith or to be without religious conviction.

The economic foundation of the State is the Socialist economic system which excludes every form of exploitation of man by man. The means of production are socially owned and the entire national economy is directed by plan. Socialist ownership includes both national property such as mineral wealth, the means of industrial production, banks, etc., and co-operative property. The land of members of agricultural co-operatives remains the personal property of the individual members, but is jointly farmed by the co-operative. Small private enterprises based on the labour of the owner himself and excluding exploitation of another's labour power are permitted. Personal ownership of consumer goods, family houses and savings derived from labour is inviolable. Inheritance of such personal property is guaranteed.

By the Constitutional Law on Federalization, passed by the National Assembly on October 27th, 1968, the Czechoslovak Socialist Republic became, on January 1st, 1969, a federal state of two nations of equal rights—the Czechs and the Slovaks. It is composed of two republics: the Czech Socialist Republic and the Slovak Socialist Republic. Each of them has its own government.

The supreme organ of state power in the Czechoslovak Socialist Republic is the Federal Assembly (Parliament) which elects the President of the Republic for a five-year term of office. The Federal Assembly consists of two chambers of equal rights: the House of the People and the House of Nations. The composition of the House of the People corresponds to the composition of the population of the Czechoslovak Socialist Republic and of its 200 deputies, 138 are Czechs and 62 Slovaks. The House of Nations has 150 deputies on parity basis: 75 are elected in the Czech Socialist Republic and 75 in the Slovak Socialist Republic.

The President, elected by the Federal Assembly, appoints the Federal Government. The Government is the supreme executive organ of State power in Czechoslovakia; it consists of a Prime Minister, his deputies, ministers and state secretaries. It is composed of seven ministries, seven federal committees and other bodies. Of these the Ministry of Foreign Affairs and the Ministry of National Defence are within the exclusive competence of the Federation, i.e. there are no corresponding portfolios in the governments of the republics. The second group of Federal Government organs are ministries and federal committees (the federal committees are composed equally of members from the Czech Socialist Republic and the Slovak Socialist Republic), sharing authority with organs of the two re-

publics, i.e. there are corresponding portfolios in the national governments.

Each of the republics has its own parliament: the Czech National Council and the Slovak National Council. They are elected for a four-year term of office. The Czech National Council has 200 deputies, the Slovak National Council 150 deputies. The Czech Government consists of a Prime Minister, 2 deputy Prime Ministers and 18 Ministers; the Slovak Government consists of a Prime Minister, 2 deputy Prime Ministers and 16 Ministers.

National committees are the organs of popular self-government in the regions, districts and localities. They rely on the active participation of the working people of their area and co-operate with other organizations of the people. They direct local economic and cultural development, ensure the protection of socialist ownership and the maintenance of socialist order in society, see to the implementation and observance of laws, etc. They take part in drafting and carrying out the State plan for the development of the national economy and draw up their own budgets which form a part of the State budget. Commissions elected by the national committees are charged with various aspects of public work and carry out their tasks with the aid of a large number of citizens who need not be elected members of the national committees.

All representative bodies are elected, and the right to elect is universal, equal and by secret ballot. Every citizen has the right to vote on reaching the age of 18, and is eligible for election on reaching the age of 21. Deputies must maintain constant contacts with their constituents, heed their suggestions and be accountable to them for their activity. A member of any representative body may be recalled by his constituents at any time.

The execution of justice is vested in elected and independent people's courts. Benches are composed of professional judges and of judges who carry out their function in addition to their regular employment. Both categories are equal in making decisions, Judges are independent in the discharge of their office and bound solely by the legal order of the socialist State. The supervision of the observance of the laws and other legal regulations by public bodies and by individual citizens rests with the Office of the Procurator. The Procurator-General is appointed and recalled by the President of the Republic and is accountable to the Federal Assembly.

The Czechoslovak Constitution does not restrict itself to laying down a system of state organs but also sets forth the principles by which the life of society is to be guided. It is not just a Constitution of the State but a constitution for the whole of society. In economic, political and cultural life, in questions of social security and many other spheres it emphasizes the participation of citizens in the administration of public affairs and even transfers a number of functions that have hitherto pertained to state organs to the working people and their voluntary organizations.

The guiding force in society and in the State is the Communist Party of Czechoslovakia, a voluntary militant alliance of the most active and politically conscious citizens. It is associated with the other political parties, the Trade Union Movement and other people's organizations in the National Front of Czechs and Slovaks.

CZECHOSLOVAKIA—(THE GOVERNMENT)

REVISED ELECTORAL SYSTEM, 1968

By a new law passed in the National Assembly new, larger electoral districts are to be established from which from four to eight deputies will be elected. Alternative candidates may also be put forward by the National Front, permitting a choice by the electorate. Those candidates who poll the most votes will become deputies, and the

remainder will be made alternate deputies; in all cases candidates must poll more than 50 per cent of the votes. The new post of alternate deputy will give experience in the work of the representative bodies to those not elected as deputies, and will eliminate by-elections, as alternate deputies may take up vacated seats during the session of the Assembly.

THE PRESS

Although the development of the Czechoslovakian Press has been considerably affected by the events of 1968, its basic purpose is still that defined in the October 1966 Press Law (effective from January 1st, 1967): "to give as far as possible complete information . . . to advance the interest of socialist society . . . to promote the people's socialist awareness of the policy of the Communist Party as the leading force in society and state".

This law, which codified previous legislation on the rights and duties of journalists and publishers and established a new Central Administration for Publications under the Ministry of Education and Culture (later under the Ministry of Culture and Information), states that "freedom of expression and of the Press is guaranteed by the fact that publishers and press organizations... have been placed at the disposal of the working people and their organiza-tions". Hence, only political parties and such social institutions as trade unions, youth unions, cultural associations and rural co-operatives may own newspapers and periodicals. Private ownership is forbidden. Such a democratic press structure has not, however, precluded some control by the Ministry of the Interior or the Ministry of Culture. Nevertheless, for some years before 1968 freedom of publication in Czechoslovakia was unrivalled in the rest of Eastern Europe and, although only The Times and Le Monde of non-communist Western newspapers were allowed, Western books circulated in large editions.

The desires for greater freedom of expression were stimulated by cultural and literary magazines in the late 1950s and early 1960s, by the radical changes in economic policy, approved during 1964 and 1965, though not implemented until 1967, and by the increasing demands of individual writers. Demands from writers and dramatists critical of government policy reportedly reached a peak in June 1967 at the 4th Congress of the Czechoslovakian Writers' Union, where a resolution in favour of the abolition of pre-publication censorship was passed. As a result, the Ministry of Culture assumed control of the Union's influential weekly, *Literarni noviny*, which had become, it was said, "a platform for opposition political views"; and the Union's structure was decentralized. The Union of Czechoslovak Journalists at its October conference dissociated itself from the writers and criticism of censorship.

However, after the resignation of Antonín Novotný as First Secretary of the Communist Party in January 1968, the opposition of editors began to make the system of censorship unworkable, and censorship was suspended on March 5th, when the Party Presidium announced the abolition of ideological management of the press by the Ministry of the Interior's Central Publication Office, and the derestriction of sales of foreign literature. Four days earlier the Writers' Union had been allowed to resume publication of its weekly under the new title, Literarní listy.

Press censorship was officially abolished by the Czecho-slovakian National Assembly on June 26th, although the actual list of some 8,000 unpublishable items was reduced to only just under 5,000. By this time almost all circulation figures had increased substantially, in the cases of papers like *Prace* and *Mladil fronta* doubling or trebling, and the shortage of newsprint and modern printing facilities became a serious problem.

CZECHOSLOVAKIA-(THE PRESS)

Newspapers and periodicals (like radio and television), which had been influential in bringing about the resignation of President Novotný on March 22nd, were among the first targets of the occupying forces of the Warsaw Pact countries in August. However, the week following the August 21st invasion probably saw the peak of press freedom in Czechoslovakia since, with most editorial offices occupied by troops, papers were published in secret and therefore without any official controls. Special editions were often distributed free in the streets of Prague.

On August 27th Mr. Dubček announced temporary restrictions on the freedom of expression, and on September 3rd the new Government Press and Information Office published regulations limiting comment on the role of the occupying forces and on ideological questions. Censorship was officially restored on September 13th, 1968, when the National Assembly accepted government recommendations to re-impose pre-publication controls.

Throughout 1969 the Czechoslovak Government imposed restrictions on the Press-purging editorial boards, suspending and banning newspapers and periodicals. Literarni listy, the journal of the Writers' Union which ceased publication after the occupation in 1968, and reappeared as Listy in October of that year, was officially banned in May 1969. Reporter, the weekly news magazine published by the Journalists' Union, which had played an influential role in political and cultural life and had suffered temporary suspension after the occupation, was also banned in May 1969. Three other papers, Prace, Svet v Obrazech, and My 69 were suspended for three months. Smena na Nedelu, published in Bratislava, was suspended for two months in July, and Politika was banned to be replaced by Tvorba with Jiří Hajek as editor. Later in the year three other papers were banned, Doba and Filmové a Televizni in September, and Cerveny Kvet in October. Changes were made on the editorial boards of many papers including Prace, Mlada Fronta, Rudé Pravo, and Nova Svoboda (Ostrava).

The Czechoslovak people far exceed other East European nations in their consumption per head of newspapers and magazines. There are twenty-eight daily papers, including nine in Prague and nine (one in Hungarian and the rest in Slovak) in Bratislava. About 500 weekly papers and magazines and an even greater number of less frequent periodicals are also published. In addition, farms and factories produce their own daily or weekly news-sheets, dealing mainly with local issues.

The most widely read and influential papers are the Prague dailies headed by Rudé právo. This paper, modelled on the Moscow Pravda, is the chief organ of the Czechoslovak Communist Party. It is eight pages long and receives an official allocation of newsprint. Produced both in Prague and Bratislava, it has a nation-wide circulation of 900,000 copies. Its sister paper, the Slovak C.P.'s Pravda (270,000), is the leading provincial daily. The Czech and the Slovak Trade Union organs are Prace and Praca in their respective cities. Two other important metropolitan dailies are Lidova demokracie and Svobodné slovo, produced respectively by the People's Party and the Socialist Party.

There are also many small circulation periodicals—often of very high quality—dealing with specialized subjects. One should also note several very popular and colourful women's magazines, such as Vlasta (650,000), and the satirical Dikobras, famous for its political cartoons.

The Czechoslovak Union of Writers was re-formed during 1969 and has now been split into separate Czech and Slovak Unions. It is as yet undecided whether to retain the Union of Czechoslovak Writers as an umbrella organization. The Presidium of the Czech Journalists' Union resigned in September 1969, as a protest against

censorship of the Press. At the same time the Prague City Journalists' Association was dissolved—to be put in the hands of a thirty-man commission.

The national news agency, Československá Tisková Kancelář (Četeka), receives a state subsidy and is controlled by the Ministry of Information.

PUBLISHERS

In May 1949 legislation was passed making the publication, printing, illustration, and distribution of all books and music the prerogative of the State. These activities are now restricted to the Government, political parties, trade unions, and national and communal bodies. However, churches and religious bodies are permitted to publish if the State will accept their work for printing. In 1968 two new publishing associations were established, the Czech Association of Publishers and Booksellers, and the Slovak Association of Publishers and Booksellers. These operate in Czech lands and in Slovakia respectively. Almost all publishing houses are members of their appropriate association. In 1968, 5,916 titles were published.

DENMARK

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Denmark consists of the peninsula of Jutland, the islands of Zealand, Funen and Bornholm and about 400 smaller islands between the North Sea and the Baltic. Outlying possessions are Greenland, and the Faroe Islands in the North Atlantic. Denmark is low-lying and the climate is temperate with cold winters. The language is Danish. The Danish Lutheran Church is the established Church and there are small communities of Roman Catholics, Baptists and Jews. The flag carries a white cross on a red background. The capital is Copenhagen.

Recent History

In 1948 Home Rule was granted to the Faroe Islands. In 1953 Greenland became an integral part of the Danish Kingdom. In the same year the Constitution of Denmark was radically revised. The major provisions of the new Constitution were to allow female succession to the throne, abolition of the Upper House and changes in the Court of the Realm, definition of Ministerial responsibility and changes in the franchise, including provision for referenda.

Denmark is a founder member of NATO and in 1953 joined the Nordic Council. In 1961 she joined the European Free Trade Association. A minority government led by the Social Democrats held power from 1964-67. Following a General Election in January 1968, a new coalition government was formed led by Hilmar Baunsgaard (Social Radical).

Government

Denmark is a constitutional monarchy, legislative power being vested in the King in conjunction with the Folketing (Parliament). Executive power is exercised by the King through his ministers. The Folketing is unicameral, elected by and from Danish subjects of 21 and over. The Faroe Islands and Greenland are each represented by two members.

Defence

Denmark maintains an Army of 33,000 men, a Navy of 8,000 men and an Air Force of 10,000 men. The Army consists of field forces and a home guard which has a force of about 70,000 men at its disposal. The Navy has frigates, escort vessels, submarines, minelayers, minesweepers and fast patrol craft. The Air Force has fighters and fighter-bombers of American and British types. National Service lasts for 14–16 months. Denmark has been a member of NATO since 1949. Total defence expenditure for 1969 was about 2,500 million Kroner, 8.5 per cent of the national budget.

Economic Affairs

Danish agriculture is internationally competitive and is organised on a co-operative basis. Farmers and smallholders are grouped in co-operative societies which market the produce and conduct scientific research. The co-operatives are united in national federations. Butter, eggs and bacon are the main exports, for which the principal markets are the United Kingdom and the German Federal Republic. Major industries are shipbuilding, engineering, chemicals, brewing, fishing and food processing. Danish-

designed furniture, electronics, porcelain, textiles and metal goods are finding a widening foreign market. Denmark maintains a considerable merchant fleet. It is a member of the European Free Trade Association (EFTA) and the Nordic Council and in 1967 applied for membership of the European Economic Community (EEC).

Transport and Communications

There are about 2,200 miles of railways, half of them operated by the State and the rest by companies in which the State or public authorities have a financial interest. There is an extensive bus service using many bridges. Ferry services connect the principal islands and Jutland and there are services to Sweden, Norway and Germany. Danish ships, local and ocean-going, have a tonnage of over 3 million.

Social Welfare

Denmark was one of the first countries to introduce State social welfare schemes. Principal services cover unemployment, sickness, old age and disability and are financed largely by State subventions. Health insurance is compulsory for all citizens over 21.

Education

Education is compulsory and free at the primary stage between 7 and 14 years. Secondary education which offers a wide scope for transfer from one form of education to another, is also given free as, on the whole, is university and other higher education. There are three universities, a technical university and a network of Folk High Schools for adults, chiefly young farmers.

Tourism

Tourism is organised by the National Travel Association of Denmark. Receipts from tourism totalled \$233 million in 1968, and expenditure was \$227 million.

Visas are not required for nationals of the following countries: Algeria, Australia, Austria, Belgium, Canada, Cyprus, Finland, France, German Federal Republic, Greece, Iceland, Ireland, Italy, Jamaica, Japan, Kenya, Liechtenstein, Luxembourg, Malaysia, Mexico, Monaco, Morocco, The Netherlands, New Zealand, Norway, Palistan, Portugal, San Marino, Sierra Leone, Singapore, South Africa, Spain, Sweden, Switzerland, Tanzania, Thailand, Trinidad and Tobago, Tunisia, Turkey, Uganda, United Kingdom and Dependencies, U.S.A., Yugoslavia, and all countries of South and Central America.

Sport

Fifteen per cent of the population take an active part in sports. Practically all sport is amateur. The national game is football, and rowing, swimming and sailing are popular. Other sports include tennis, the Danish game of hand-ball, shooting and fishing.

Public Holidays, 1970

January 1 (New Year's Day), March 26 (Maundy Thursday), March 27 (Good Friday), March 30 (Easter Monday), April 24 (Store Bededag), May 7 (Ascension Day), May 18 (Whit Monday), June 5 (Constitution Day), December 25, 26 (Christmas).

THE CONSTITUTION

The main features of the 1953 Constitution are:

- (1) Changes in the succession law allowing a daughter to succeed to the throne in the absence of sons;
- (2) Abolition of the Upper House and the introduction of single-chamber government;
- (3) The enfranchisement of Greenland, which will in future send two members to Parliament; and
- (4) Clause 20, which enables Parliament to assign some of its rights to an international body in the interest of international co-operation.

The form of government is a limited (constitutional) monarchy. The legislative authority rests jointly with the Crown and Parliament. Executive power is vested in the Crown, and the administration of justice is exercised by the courts. The King can constitutionally "do no wrong". He exercises his authority through the Ministers appointed by him. The Ministers are responsible for the government of the country. The Constitution establishes the principle of Parliamentarism under which individual Ministers of the whole Cabinet must retire when defeated in Parliament by a vote of no confidence.

The King acts on behalf of the State in international affairs. Except with the consent of the Parliament, he

cannot, however, take any action which increases or reduces the area of the Realm or undertake any obligation, the fulfilment of which requires the co-operation of the Parliament or which is of major importance. Nor can the King, without the consent of the Parliament, terminate any international agreement which has been concluded with the consent of the Parliament.

Apart from defence against armed attack on the Realm or on Danish forces, the King cannot, without the consent of the Parliament, employ military force against any foreign power.

The Parliament is an assembly consisting of not more than 179 members, two of whom are elected in the Faroe Islands and two in Greenland. It is called the Folketing. Danish nationals, having attained 21 years of age, with permanent residence in Denmark, have the franchise and are eligible. The members of the Folketing are elected for four years. Election is by a system of proportional representation, with direct and secret ballot on lists in large constituencies. A bill adopted by the Folketing may be submitted to referendum, when such referendum is claimed by not less than one-third of the members of the Folketing and not later than three days after the adoption. The bill is void if rejected by a majority of the votes cast, representing not less than 30 per cent of all electors.

OUTLYING POSSESSIONS

THE FAROE ISLANDS

The Faroes are a group of islands in the Atlantic northwest of Scotland and constitute a self-governing com-munity within the Danish State. There are 19 islands altogether, 18 of which are inhabited. The capital is Thorshavn. A separate administration governs the Faroe Islands. The highest authority of this administration is the county prefect; there are, besides, a magistrate and a chief constable, together with 6 sheriffs who attend to local police matters. Local administration and legislation are carried out by a publicly elected body called the "Lagting", which has 29 members. The Islands elects two members to the Danish Folketing.

The economy of the islands depends chiefly on fishing and in March 1964 the islands' fishing limits were extended to 12 miles.

GREENLAND .

Greenland is the largest island in the world, with a total area of 840,000 square miles and a population of about 44,000. Principal occupations are fishing, hunting, and sheep-rearing.

All matters relating to the administration of Greenland come under the Ministry for Greenland, although there is a tendency towards autonomy and administration by Provincial Council (Landsraad), which is the highest

elected body in Greenland. Since 1967 its chairman has been democratically elected, and no law concerning Greenland can be passed by the Danish Parliament without the consultation of the Greenland Provincial Council. There are also a number of local councils, and some areas are administered by sheriffs. Under the 1953 Constitution, Greenland became part of the Danish Kingdom and has two seats in the Folketing.

POLITICAL PARTIES

Socialdemokratiske Parti (The Social-Democratic Party): Rosenorns allé 14, Copenhagen V; founded in 1871, finds its chief adherents among the industrial and farm workers; it took office in 1924, fell at the General Election in 1926, but assumed office again, in coalition with the Radical-Liberal Party, in 1929. The Social Democrat, Vilhelm Buhl, headed the coalition government from May to November 1945. The Party assumed office again in 1947–50, 1953-57. From 1957-64 it headed a coalition government, from 1964-68 a minority government. The Party's policy is a modified form of the ordinary continental Socialist programme. Number of members 260.000. Chair. Jens Otto Krag. Party organs: Abtuelt and Ny Politik (monthly).

Leading members in the Folheting: Jens Otto Krag, K. B. Andersen, Per Haekkerup.

Venstre (The Moderate-Liberal Party): Hammerichsgade 14. Copenhagen V; founded in 1870, split and reunited several times up to 1905. Its main adherents have been farmers who, from 1870 to 1901, in opposition to the Conservative Party, successfully vindicated the predominance of the Folketing over the Landsting placing the Liberals in power 1901-09, 1010-13, 1020-24, 1016-29, 1945-47, 1950-53 in a Liberal-Conservative-Coalition Government and Feb. 1968- in a coalition with the Conservative and the Radical Liberal parties. At the last General Election the Party received 530,167 votes, distri-

buted almost equally between the rural districts, the towns and built-up areas, so that it may claim to have adherents in all classes of the community. The main planks in the Party platform are free trade, a minimum of State interference, and the adoption, in matters of social expenditure, of a modern general social security system. Pres. of Party Organization Foreign Sec. Poul Hartling; Chair. Parliamentary Group Henry Christensen; Sec.-Gen. of the Party Kurt Sorensen. Chief party organs: Fyns Tidende, Vestkysten, Frederiksborg Annts Avis, Venstres Maanedsblad (monthly), Dansk Politik (monthly).

Konservative Folkeparti (Conservative Party): Nyropsgade 19, Copenhagen; founded in 1916, replacing the former Højreparti (the Right-Wing or old Conservative Party). Between 1870 and 1901 the old Conservative Party formed a number of cabinets, mainly under J. B. S. Estrup. The Party advocates free initiative and the maintenance of private property, but recoggizes the right of the State to take action to keep the economic and social balance. From 1950-53 formed coalition government with the Moderate-Liberal Party, and together with Radical Liberal Party and Moderate-Liberal Party in 1968-. Chair. K. Thestrup; Gen. Sec. JUDICIAL SYSTEM

In Denmark the judiciary is independent of the Government. Judges are appointed by the Crown on the recommendation of the Minister of Justice and cannot be dismissed except by judicial sentence.

The judicial system in Denmark consists of three "Instances": (1) Supreme Court (a President and 14 judges); (2) two High Courts, "Landsretter", the Eastern for the islands, the Western for Jutland; (3) about 100 "lower courts" spread over the country. Appeal from the lower courts is to the High Court. Important cases, however, are commenced in the High Court, from which the Supreme Court is the court of appeal. There is a special Maritime and Commercial Court in Copenhagen, consisting of a President and Vice-President with legal training and a number of commercial and nautical assessors; and also a Labour Court, which deals with labour disputes.

An Ombudsman is appointed by Parliament, after each general election, and is concerned with defects in the laws or administrative provisions. He must render to Parliament an annual report.

THE PRESS

Denmark's long press history dates from the first newspaper published in 1666, but it was not until press freedom was introduced by law in 1849 that newspapers began to assume their present importance.

The freedom of the press is embodied in paragraph 77 of the 1953 Constitution. The legal limits to press comment are wide, legislation on defamation being chiefly concerned to protect the reputation of the individual. The Law of 1938 included provision for a Board of Denials and Corrections to be established to guard the individual's right to require a newspaper to correct factual errors. This Press Law makes editors legally responsible for the contents of a paper with the exception of signed articles for which the author is responsible.

Most newspapers and magazines are privately owned and published by joint concerns, co-operatives or limited liability companies. Ownership is usually restricted in number or confined to residents of the area in which the paper circulates.

No newspaper is directly owned by a political party. A private company, in which various trade unions own the shares, publishes the eight Social Democrat papers (the most important being Aktuelt), which are heavily subsidized by the unions.

The main concentration of papers is held by the Berlingske Tidende Group which owns Berlingske Tidende, Berlingske Aftenavis, B.T., and the provincial Jydske Tidende, also three weekly magazines and a large printing works. In all, this family organization controls some 25 per cent of the total daily newspaper circulation.

Another company, Politiken A/S, owns several dailies, including *Politiken* and *Ekstra Bladet*, one weekly and a large publishing house. De Bergske Blade owns a group of six Liberal papers.

Daily newspapers have a far more influential place in Danish life than weeklies. As the largest papers have only a small circulation outside the city and suburbs of Copenhagen, e.g. 14 per cent in the case of Berlingske Tidende, they can barely claim to be national. The most popular papers give a broad and serious news coverage; there is no really sensational press. The major Copenhagen dailies in order of circulation are: Berlingske Tidende (165,000), Politiken (135,000), Ekstra Bladet (165,000), and Aktuelt (105,000). The serious evening papers Information and Berlingske Aftenavis are also rather influential. Jyllands-Posten (76,500), published at Aarhus, is the major provincial paper.

FINLAND

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Finland is a republic in Northern Europe bordered in the far north by Norway and in the north-west by Sweden. The U.S.S.R. runs along the whole of the eastern frontier. Its western and southern shores are washed by the Baltic. The climate varies sharply with warm summers and very cold winters. The annual mean temperature is 5.4° (42° F) in Helsinki and -0.4° (31° F) in the far north. There are two official languages, 93 per cent of the population speak Finnish, and 7 per cent speak Swedish. The Lapp population amount to only about 2,500 in all. 93 per cent of the people belong to the National Lutheran Church of Finland but there are small groups of Roman Catholics, Methodists, Jews and other religious groups. The flag carries a blue cross on a white background. The capital is Helsinki.

Recent History

After the Second World War Finland ceded a tenth of its territory to the U.S.S.R. and agreed to pay reparations. In 1948 President Paasikivi and Stalin signed the Finno-Soviet Pact of Friendship, which was extended for twenty years from 1955, when the U.S.S.R. relinquished its military post on the Porkkala promontory. In every other respect Finland has maintained a policy of strict neutrality, refusing to be compromised by its proximity to the U.S.S.R. In 1961 Finland joined the Nordic Council, and in the same year became an associate member of the European Free Trade Association (EFTA). Since 1969 Finland has been a full member of O.E.C.D.

Government

Parliament is unicameral and elected for four years by the system of proportional representation. The President of the Republic is voted for a six-year term by an electoral college elected by the citizens. The Council of State is the executive organ responsible to Parliament and members are appointed by the President.

Defence

The armed forces of Finland are restricted by treaty to about 42,000, mostly conscripts serving up to 11 months. Defence expenditure for 1969 was 449 million Marks (5.8 per cent of the budget), and the total strength of the armed forces in the same year was 36,400, comprising Army 31,400, Navy 2,000, and Airforce 3,000. There are also 685,000 reserves and about 3,000 frontier defence troops.

Economic Affairs

The Gross National Product in 1968 was 72,000 Marks per person, putting Finland amongst the top fifteen according to UN statistics. 42 per cent of Finland's trade is with EFTA countries, about 28 per cent with EEC, and about 20 per cent with Eastern Europe. Finland's economy is based on coniferous forests which cover 72 per cent of the land. Forestry cultivation has been intensified in recent years and the country is one of the world's leading exporters of pulp and paper. The manufacture of furniture is important. Since the war the metal-working industry

has prospered and the significance of the metal and engincering industries for output and employment by now appreciably exceeds that of wood, pulp, and paper industries. Amongst the manufacturing industries, the petroleum and chemical industries in particular have experienced a rapid growth. Cereal and dairy farming are highly mechanized.

Transport and Communications

There are about 5,717 kilometres (3,553 miles) of railways connecting Finland with Sweden and the Soviet Union. The railways are state operated, most of the trains being run on diesel engines. There are 71,048 kilometres (44,157 miles) of highway, but traffic is relatively light. Extensive use is made of the canals which connect Finland's innumerable lakes; inland waterways are navigable by ships for over 4,351 miles. The Water Bus is a characteristic feature. In winter, water communications are paralyzed by the severe frost, but ice-breakers are used to open up channels for commercial traffic.

Social Welfare

Social Security covers unemployment, social insurance (national pensions, accident insurance and sickness insurance), social assistance (maternity allowances, child allowances, care of the disabled) and social welfare (public aid). Sickness insurance compensates the patient for a considerable part of the costs of medical care outside hospital and the general hospitals charge moderate fees.

Education

Primary education is compulsory and free between the ages of 7 and 15. In 1968 there were 625 secondary schools with 291,615 pupils, and six universities including a Swedish-speaking one at Turku. There are also seven colleges of University standing and two Teacher Training colleges.

Tourism

Vast forests, numerous lakes, magnificent unspoilt scenery and the possibility of holiday seclusion are the chief attractions for the visitor to Finland. In the towns there are mediaeval churches and castles. The winter sports season is prolonged, and visitors may take the famous Finnish Sauna Bath. In 1968, about 2,500,000 people visited Finland, mostly from Sweden. In the same year receipts from tourism totalled \$64 million and expenditure \$66 million.

THE CONSTITUTION

ON December 6th, 1917, the Finnish Parliament approved a manifesto proclaiming the independence of the country. Recognition of this independence was received in December 1917 from the Russian Government; in January 1918 from France, Sweden and Germany; and later from other countries.

During the interregnum that ensued, the Parliament, having decided to exercise temporarily the authority belonging to the ruler of the State, on May 18th, 1918, authorized the Chairman of the Senate to exercise sovereign power, and thereafter, on December 12th, 1918, elected a Regent. Opinions were divided as to whether Finland should be a kingdom or a republic. But at the election of representatives in March 1919 the parties voting for a republic received a substantial majority, and a republican form of government was approved and proclaimed on July 17th, 1919.

THE PRESIDENT OF THE REPUBLIC

The President is elected for a term of six years by 300 electors. The electors are chosen by public vote in the same manner as members of the Parliament.

The President of the Republic is entrusted with supreme executive power. Legislative power is exercised by the Parliament in conjunction with the President. Both the President and the Parliament have the right of initiative in legislation. Laws passed by the Parliament are submitted to the President, who has the right of veto. If the President has not within three months assented to a law, this is tantamount to a refusal of his assent. A law to which the President has not given his assent will nevertheless come into force, if the Parliament elected at the next general election adopts it without alteration.

The President has also the right to issue decrees in certain events, to convene extraordinary meetings of the Parliament, to dissolve the Parliament, to order new elections to the Parliament, to grant pardons and dispensations, and to grant Finnish citizenship to foreigners.

The President's approval is necessary in all matters concerning the relations of Finland with foreign countries, and he is Supreme Commander of the Defence Forces of the Republic.

Such decisions as are arrived at by the President are made by him in the Council of State, except in matters pertaining to military functions and appointments.

GOVERNMENT

For the general administration of the country there is a Council of State, appointed by the President, and composed of the Prime Minister and the Ministers of the various Ministries, The members of the Council, who must

enjoy the confidence of the Parliament, are collectively responsible to it for their conduct of affairs, and for the general policy of the administration; while each member is responsible for the administration of his own Ministry.

To this Council or Cabinet the President can appoint supernumerary Ministers, who serve either as assistant Ministers or as Ministers without portfolio. The President also appoints a Chancellor of Justice, who must see that the Council and its members act within the law. If in his opinion the Council of State or an individual Minister has acted in a manner contrary to the law, the Chancellor of Justice must report the matter to the President of the Republic or in certain cases to the Parliament. In this way Ministers are rendered legally as well as politically responsible for their official acts.

THE PARLIAMENT (EDUSKUNTA-RIKSDAG)

The Parliament is an assembly of one chamber with 200 members elected for four years by universal suffrage on a system of proportional representation, every man and woman who is twenty or over being entitled to vote. It assembles yearly without special summons. The ordinary duration of a session is 120 days, but the Parliament can at its pleasure extend or shorten its session. The opposition of one-third of the members can cause ordinary legislative proposals to be deferred till after the next elections. Discussion of questions relating to the constitutional laws belongs also the Parliament, but for the settlement of such questions certain delaying conditions (fixed majorities) are prescribed. The Parliament, besides taking part in legislation, has the right to determine the estimates, which, though not technically a law, are published as a law.

Furthermore, the Parliament has the right, in a large measure to supervise the administration of the Government. For this purpose it receives special reports, the Government also submitting an account of its administration every year, and a special account of the administration of national finances. The Chancellor of Justice submits a yearly report on the administration of the Council of State. The Parliament elects five auditors, who submit to it annual reports of their work, to see that the estimates have been adhered to. The Parliament also appoints every four years an Ombudsman (Solicitor-General), who submits to it a report, to supervise the observance of the laws.

The Parliament has the right to interrogate the Government. It can impeach a member of the Council of State or the Chancellor of Justice for not having conformed to the law in the discharge of his duties. Trials are conducted at a special court, known as the Court of the Realm, of which one-half of the members, that is to say, six, are elected by the Parliament for a term of three years.

THE PRESS

The 1919 Constitution provided safeguards for press freedom in Finland. And in the same year the Freedom of the Press Act developed and qualified this principle by defining the rights and responsibilities of editors and the circumstances in which the Supreme Court may confiscate or suppress a publication. In practice there are few restrictions but the proximity of the Soviet Union casts its shadow in the form of legislation penalising defamation of foreign heads of state and anything which may endanger relations with neighbouring states. Consequently this aspect of political commentary is very restrained. Otherwise the most notable offences for newspapermen concern libel and copyright. Two notable features of the press scene are the public's legal right of access to all official documents (with important exceptions), and since 1966 the right of the journalist to conceal his source of news.

Almost all daily newspapers are independent companies, most of which are owned by large numbers of shareholders. Newspaper chains are virtually unknown. But the Finnish press is a party press. The small number of papers which are generally considered left-oriented are usually owned by the political parties concerned, by trade unions, or by other workers' associations (the Social Democratic Party's chief organ is Suomen Sosialdemokraatti; the Social Democratic Workers' Union publishes Pāivān Sanomat, and the People's Democratic League (Communist) Kansan Unitiet.) On the other hand most of the right-wing newspapers are owned by private shareholders. Some even belong to private endowments. Leading organs of the Conservative Party are Unit Suomi (90,000) and Aamalehti (102,000) in Tampere. The left-wing papers are subject to considerably closer influence from the parties to which

they are affiliated than their right-wing counterparts. Privately owned newspapers—including some of the largest such as *Helsingin Sanomat* and *Turun Sanomat*—are usually independent of political parties, and the number of votes cast by the political parties in the 1966 election bears little relation to the respective circulation totals of affiliated newspapers.

Helsinki is the only large press centre, boasting 14 daily papers and complete monopoly of the periodical field. Several large dailies are produced in provincial towns, nine of which have four each; so are a number of weekly and twice-weekly papers which provide an important news service to outlying areas. An important feature of the daily press is the large amount of space devoted to foreign news and also to commentary.

There are 102 newspapers appearing from once to seven times per week with a total circulation of 2,238,000 copies. Only 68 of them appear four or more times weekly (the remainder have very small circulations) and this group represents a daily circulation of 35.8 per hundred persons. Sixteen of the dailies are in Swedish. A further 130 small local non-daily papers are also registered.

In order of circulation the most popular daily papers are: Helsingin Sanomat (263,000), Turun Sanomat (105,000), Aamulehti (102,000), Uusi Suomi (90,000), Illa-Sanomat (71,000) and Hufvudstadsbladet in Swedish (70,000). Those most respected for their standard of news coverage and commentary are Helsingin Sanomat, an independent paper able to devote six of its twenty pages to advertising, and the smaller conservative Uusi Suomi.

Where periodicals and magazines are concerned there are signs of concentration. Two of the largest companies, under joint management (Yhtyneet Kuvalehdet Oy and Valiolehdet Oy), publish seventeen periodicals with a total circulation of 750,000 copies. Consumer co-operatives and other organizations are very important publishers and use their periodicals as information media for both their members and their customers. Thus two co-operative leagues produce the weekly Me Kuluttajat (265,000) and Yhteishyvä (385,000).

There are 1,330 periodicals of which some 300 are in the nation's second language, Swedish. Among the leading weekly periodicals are the general interest Apu (200,000) and the illustrated news magazines Suomen Kuvalehti (114,000) and Viikkosanomat (124,000). The publications of the consumer co-operatives enjoy large circulations (the largest Pirkka (400,000) is distributed free) as do the chief women's magazines Mc Naiset (223,000) and Kotoliesi (200,000). The more popular serious magazines include the fortnightly Pellervo specialising in economic affairs and Valitut Palat (the Finnish Readers' Digest).

FINANCE

Finland has had its own monetary system since 1860. The country was on the gold standard from 1877 until 1914 and again from 1926 until 1931. The Central Bank, which was founded in 1811, suspended the redemption of bank notes in gold in 1931, and at the end of 1962 this redemption was totally abolished. On 1st January 1963 the exchange rate for the Finnish mark was raised by 100 per cent, and in October 1967 the mark was again devalued, this time by 31½ per cent. Finland has been a member of the International Monetary Fund since 1948.

The Bank of Finland is the Bank of Issue under the guarantee and supervision of the Diet. Its Board of Management is appointed by the President of the Republic and the nine Bank Supervisors are elected by Parliament. The Bank has a head office in Helsinki and twelve branches in provincial towns,

The Bank of Finland has very close connections with the central banks of the other Nordic countries (Denmark, Iceland, Norway and Sweden), and in 1962 an agreement was signed on short-term credits between these countries. Each participating central bank had the right to enter at will into swap transactions with the other banks for an amount of 100 million Swedish Kronor (10 million for Iceland), with the obligation limited to 200 million at any one time. In 1967 the amount concerned was increased to 200 million Swedish Kronor and the obligation for outstanding credits to 300 million (30 million for Iceland).

In 1967 there were two large and four small commercial banks with 808 offices in the country. At that time Finland also had 353 savings banks.

An important part is played in the financial activities of the country by Co-operative Credit Societies, with their own central bank. In 1967 there were 480 credit societies and six mortgage societies. The savings departments of all co-operative stores accept deposits from the public.

The Post Office Savings Bank is also extremely important in the life of the country. It collects the petty savings from the public through the 2,872 local post offices, the 13 offices of the Bank of Finland, as well as through its own head office and fifteen branches. The National Pension Institute and sixty-four private insurance companies also granted credits in 1967.

FRANCE

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of France is situated in Western Europe and bounded to the north by the English Channel, to the east by Belgium, Luxembourg, the German Federal Republic, Switzerland and Italy, to the south by the Mediterranean and Spain and to the west by the Atlantic Ocean. Climate is temperate throughout most of the country but in the south it is of the Mediterranean type with warm summers and mild winters. The language is French. Out of a total population of some 50 million, 90 per cent are Roman Catholics. There are also other Christian, Jewish and Muslim communities. The flag carries three vertical bands of blue, white and red. The capital is Paris.

Recent History

After the liberation in 1944 there was provisional unicameral government under General de Gaulle. In 1946, following a referendum, the Fourth Republic was set up with the legislature composed of the National Assembly and the Council of the Republic. General de Gaulle retired from public life. Twenty-six cabinets were formed during the life of the Fourth Republic which came to an end in 1958 with an insurrection in Algiers and the threat of civil war facing the country. Invited by President Coty to form a government, General de Gaulle was invested as Prime Minister to rule by decree for six months. In September 1958, by an overwhelming majority in a referendum, a new constitution introducing important changes was adopted and the Fifth Republic came into being with General de Gaulle as its President. In 1962 General de Gaulle's decision to have future Presidents of the Republic elected by direct universal suffrage was taken as a breach of the Constitution. The Government was defeated by a no-confidence vote and resigned. A referendum to decide the Presidential issue and the elections for a new government were held in the autumn of 1962. They resulted in victory for de Gaulle and his supporters. In the Presidential election of December 1965, President de Gaulle was returned to power at the second ballot. In March 1967 elections for a new government resulted in a narrow victory for the Gaullist parties.

Student unrest early in 1968 led to massive demonstrations by students, university teachers and workers, violent clashes with the police and a general strike during May and June. The government was forced to promise greatly increased minimum wages, more "participation" by students and workers, greater freedom for trade unions, and educational reforms. The legislative elections of June 1968 resulted in a large Gaullist majority.

Following the defeat of the referendum held on April 27th, 1969, over the Reform of the Senate and Regionalisation, General de Gaulle resigned. Alain Poher as President of the Senate became President of the Republic ad interim (cf. Constitution), pending Presidential elections. Georges Pompidou was elected President on June 15th defeating Alain Poher in a second ballot. A new Govern-

ment was formed on June 22nd under Jacques Chaban-Delmas.

The disturbances of May and June 1968 caused a heavy drain on Franc reserves and weakened the Franc. On August 10th, 1969, the Franc was devalued by 12.5 per cent accompanied by a rigid budgetary programme and stringent economic measures. The bank rate rose during this period (June 1968-January 1970) from 3½ to 8 per cent.

Overseas, France granted independence to her former colonies after the Second World War. In Indo-China, after prolonged fighting, Laos, Cambodia and Viet-Nam became fully independent in 1954. In Africa most of the French colonies in the West and Equatorial regions attained independence between 1960 and 1961. Algeria became independent after a war lasting seven years, from 1955 to 1962, between French forces and the Front de Libération Nationale (FLN) based on Tunis. In 1962 an agreement was finally signed at Evian between France and the Algerian nationalist leaders. French forces were withdrawn from Algeria and nearly all the many French settlers decided to leave the country. France has, however, continued to give Algeria economic aid.

All the former colonies in Africa, excepting only Guinea, continue their close association with France, most remaining members of the Franc Zone. They receive considerable economic aid and technical assistance from France as well as a guaranteed market for their exports. Much aid is also channelled to these territories through the Overseas Development Fund of the European Economic Community (the Common Market).

In 1958 France became a founder member of the European Economic Community, and in 1963 President de Gaulle and Dr. Adenauer signed the Franco-German Treaty. France has been following an increasingly independent policy while remaining in partnership with her allies, and in 1964 she recognized the People's Republic of China

In August 1968 France exploded her first hydrogen bomb in the South Pacific.

Government

According to the Constitution of 1958 the executive is composed of the President of the Republic and of a Council of Ministers headed by the Prime Minister. Legislative power is exercised by Parliament composed of a National Assembly and a Senate. The National Assembly is elected by direct adult suffrage for a term of five years. Senators are elected for a nine-year term by an electoral college. One third of the Senate membership is renewable every three years. By an amendment following a national referendum in 1962 the President is henceforth elected not by an electoral college as hitherto but by direct universal suffrage for seven years. The local government areas were reformed in March 1964, when Metropolitan France was divided into 21 administrative regions containing 95 departments.

Defence

French military policy is decided by the Supreme Defence Council. Under a decree of January 1964, President Pompidou, as Chairman of the Council, has direct responsibility for command of the French nuclear forces in case of atomic warfare. Military service is compulsory and lasts for twelve months. Liability for service lasts from the twentieth to the thirty-seventh year. In 1970 the strength of the armed forces stands at 571,260 comprising: Army 398,560, Navy 68,320, and Air Force 104,380. Nuclear tests have been carried out in the Sahara and Pacific. France withdrew from the military side of NATO during 1967. Defence estimates total 27,190 million francs for 1970 or 17.6 per cent of the State Budget and 3.4 per cent of the G.N.P.

Economic Affairs

France is West Europe's leading agricultural country with more than three-quarters of its area under cultivation. Production is valued at nearly 46,000 million francs, and the manpower force is nearly 3 million strong. Cereals, fruit, vegetables, livestock, butter and cheese are abundantly produced, and national consumption of these commodities is very high. French wines are an important export. More than half of the land is worked by owner-occupiers, and a third by tenant-farmers.

Since the Second World War French industry has expanded extremely rapidly. In 1946 the Commissariat Général du Plan (General Planning Office) was set up, the rôle of which is to co-ordinate projects initiated by other departments. Subsidiary to the General Commissariat are the Modernisation Commissions which elaborate individual plans. Every major field of industry is affected by the Commissions and particular progress has been made in electronics, transport, the processing industries and housing. To encourage expansion the Government offers public loans, tax relief and development incentives in certain areas. A wide variety of services such as fashion, catering and tourism play an important part in the French economy.

The principal French industries are steel (over 19 million tons per year), motor vehicles (over a million and a half passenger cars a year), aircraft, mechanical and electrical engineering, textiles and chemicals. Large quantities of coal and iron ore are mined. France possesses valuable oil interests in the Sahara (now a part of Algeria) and an agreement between France and Algeria to exploit these deposits was signed in July 1965.

France has greatly increased its exports in recent years and also supplies much technical advice, sending experts all over the world to advise on development projects. It provides massive grants and loans to underdeveloped countries,

The first tidal power station in the world, on the River Rance, was officially opened in November 1966. This plant is now producing 544 million kWh per annum.

Transport

After the last war France had to reconstruct much of its railway system. Now there are about 40,000 kilometres of lines and French trains hold world records for speed. There are some 600,000 kilometres of highway, including 80,000 kilometres of national roads. A network of motorways is under construction and in 1965 the tunnel under

Mont Blanc, linking France and Italy, was officially opened. Air France, one of the world's largest airlines, maintains many internal and external services. The French merchant marine totalled over 4,800 vessels of over 5,200,000 tons in January 1967.

Social Welfaro

France has evolved an outstandingly comprehensive system of social security which is compulsory for all wageearners, and latterly for farmers. State insurance requires contributions from both employers and employees, and provides for sickness, unemployment, maternity, disability through industrial accident and substantial allowances for large families. War veterans receive pensions and certain privileges, and widows the equivalent of three months' salary and pension. 80 per cent of all medical practitioners adhere to the state scheme. The patient pays directly for medical treatment and prescribed medicines, and then obtains reimbursement for all or part of the cost. Sickness benefits and pensions are related to the insured person's income and the length of time he has been insured. About one-fifth of the net national product is spent in health and welfare services.

Education

Education is compulsory and free from the age of 6-16. At 11 pupils enter the first cycle of the Enseignement Secondaire with a four-year general course. At the age of 15 they may then proceed to the second cycle chosing between the cycle long leading to the Baccalaureat after three years and the cycle court leading to the brevet d'études professionnelles after two years with commercial, administrative, or industrial options. Pupils entering the cycle long are streamed into the following courses: Classics, Arts, Economics, Mathematics, Sciences or Technical. A certificat de fin d'Etudes Secondaires may be awarded to a pupil who fails the Baccalauréat but manages to obtain a minimum average of eight marks out of twenty. Alternatively they may do vocational courses of either two years leading to the certificat d'aptitude professionnel, or one year leading to the Certificat de Formation Professionnel which completes their compulsory education.

Higher education is provided by the Grandes Ecoles, the Universities and the Institutes of Technology. Entrance into the Grandes Ecoles is by competitive examination and they provide two or three-year courses of a very high standard leading to a diploma. The Baccalauréal, taken in appropriate subjects, is normally the minimum entrance requirement to one of the University faculties: Law and Economics, Medicine, Pharmacy, Sciences, Arts and Human Sciences. A bachelor's degree (licence) is taken after three years and a master's degree (maltrise) after four, after which students may proceed to a doctorate.

Primary school teachers are trained in Ecoles Normales d'Instituteurs. Secondary school teachers must have a licence or maîtrise. They may also sit competitive state examinations to obtain the Certificat d'Aptitude au Professorat de l'Etude (CAPES), or Agrégation.

France is divided into 23 educational districts, called Académics. Until 1968, each Académic included one university, and syllabuses and examinations were standardized under the control of the Ministry of Education. However, after the strikes and demonstrations of May-June 1968, the government were pressed into introducing

FRANCE-(Introductory Survey)

a bill for educational reform which includes provisions for greater autonomy for the universities, elected administrative councils, with students and junior staff composing half the membership, the replacement of faculties by "teaching and research units" providing multi-discipline courses under joint teacher-student control, the creation of 34,000 new university places, and greater freedom for students to organize political debates within the universities, subject to certain restrictions.

Expenditure on national education in 1969 will be 24.7 thousand million Francs, representing about 16.74 per cent of the total national budget. Scholarship grants totalled 19 million Francs in 1968.

Tourism

France draws tourists from all over the world. Paris is famous for its boulevards, historic buildings, theatres, art treasures, fashion houses and restaurants, and for its many music halls and night clubs. The Mediterranean and Atlantic coasts and the French Alps are the most popular tourist resorts but holidaymakers are to be found during the summer nearly everywhere. There are many ancient towns, the châteaux of the Loire, the fishing villages of Brittany and Normandy, and thousands of other attractive places. In 1968, 11 million foreign tourists visited France. Receipts from foreign tourism totalled \$1.040 million while French tourists spent \$1,097 million abroad.

Visas are not required for nationals of the following countries: Algeria, Andorra, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Cameroon, Canada, Central African Republic, Ceylon, Chad, Chile, Colombia, Congo (Brazzaville), Costa Rica, Cuba, Cyprus, Dahomey, Denmark, Dominican Republic, Ecuador, El Salvador, Finland, Gabon, German Federal Republic, Greece, Haiti,

Sport

There is a National Sports Council to advise the Government on policy regarding sport. The State makes its contribution to the development of popular education and sport through the Secretariat of State for Youth and Sports. There are 20,000 sports clubs with over two million members. Football and rugby are the two most popular games.

THE CONSTITUTION OF THE FIFTH REPUBLIC

Adopted by referendum, September 28th, 1958.

Preamble

The French people hereby solemnly proclaims its attachment to the Rights of Man and to the principles of national sovereignty as defined by the Declaration of 1789, confirmed and complemented by the Preamble of the Constitution of 1946.

By virtue of these principles and that of the free determination of peoples, the Republic hereby offers to the Overseas Territories that express the desire to adhere to them, new institutions based on the common ideal of liberty, equality and fraternity and conceived with a view to their democratic evolution.

Article 1. The Republic and the peoples of the Overseas Territories who, by an act of free determination, adopt the present Constitution thereby institute a Community.

The Community shall be based on the equality and the solidarity of the peoples composing it.

Chapter I .- On Sovereignty

Article 2. France shall be a Republic, indivisible, secular, democratic and social. It shall ensure the equality of all citizens before the law, without distinction of origin, race or religion. It shall respect all beliefs.

The national emblem shall be the tricolour flag, blue, white and red.

The national anthem shall be the "Marseillaise".

The motto of the Republic shall be "Liberty, Equality, Fraternity".

Its principle shall be government of the people, by the people, and for the people.

Article 3. National sovereignty belongs to the people, which shall exercise this sovereignty through its representatives and through the referendum.

No section of the people, nor any individual, may attribute to themselves or himself the exercise thereof.

Suffrage may be direct or indirect under the conditions stipulated by the Constitution. It shall always be universal, equal and secret.

All French citizens of both sexes who have reached their majority and who enjoy civil and political rights may vote under the conditions to be determined by law.

Article 4. Political parties and groups may compete for votes. They may form and carry on their activities freely. They must respect the principles of national sovereignty and of democracy.

Chapter II .- The President of the Republic

Article 5. The President of the Republic shall see that the Constitution is respected. He shall ensure, by his arbitration, the regular functioning of the public powers, as well as the continuity of the State.

He shall be the guarantor of national independence, of the integrity of the territory, and of respect for Community agreements and for treaties.

Article 6. The President of the Republic shall be elected for seven years by direct universal suffrage. The method of implementation of the present article shall be determined by an organic law.

Article 7. The President of the Republic shall be elected by an absolute majority of the votes east. If such a majority

is not obtained at the first ballot, a second ballot shall take place on the second following Sunday. Those who may stand for the second ballot shall be only the two candidates who, after the possible withdrawal of candidates with more votes, have gained the largest number of votes on the first ballot.

Voting shall begin at the summons of the Government. The election of the new President of the Republic shall take place not less than twenty days and not more than thirty-five days before the expiration of the powers of the President in office. In the event that the Presidency of the Republic has been vacated for any reason whatsoever, or impeded in its functioning as officially declared by the Constitutional Council, after the matter has been referred to it by the Government and which shall give its ruling by an absolute majority of its members, the functions of the President of the Republic, with the exception of those covered by Articles 11 and 12 hereunder, shall be temporarily exercised by the President of the Senate and, if the latter is in his turn unable to exercise his functions, by the Government.

In the case of vacancy or when the impediment is declared to be final by the Constitutional Council, the voting for the new President shall take place, except in case of force majeure officially noted by the Constitutional Council, not less than twenty days and not more than thirty-five days after the beginning of the vacancy or of the declaration of the final nature of the impediment.

Articles 49 and 50 and Article 89 of the Constitution may not be put into application during the vacancy of the Presidency of the Republic or during the period between the declaration of the final nature of the impediment of the President of the Republic and the election of his successor.

Article 8. The President of the Republic shall appoint the Premier. He shall terminate the functions of the Premier when the latter presents the resignation of the Government.

At the suggestion of the Premier, he shall appoint the other members of the Government and shall terminate their functions.

Article 9. The President of the Republic shall preside over the Council of Ministers.

Article 10. The President of the Republic shall promulgate the laws within fifteen days following the transmission to the Government of the finally adopted law.

He may, before the expiration of this time limit, ask Parliament for a reconsideration of the law or of certain of its articles. This reconsideration may not be refused.

Article 11. The President of the Republic, on the proposal of the Government during [Parliamentary] sessions, or on joint motion of the two Assemblies published in the Journal Officiel, may submit to a referendum any bill dealing with the organization of the public powers, entailing approval of a Community agreement, or providing for authorization to ratify a treaty that, without being contrary to the Constitution, might affect the functioning of the institutions.

When the referendum decides in favour of the bill, the President of the Republic shall promulgate it within the time limit stipulated in the preceding article.

Article 12. The President of the Republic may, after consultation with the Premier and the Presidents of the

Assemblies, declare the dissolution of the National Assembly.

General elections shall take place twenty days at the least and forty days at the most after the dissolution.

The National Assembly shall convene by right on the second Thursday following its election. If this meeting takes place between the periods provided for ordinary sessions, a session shall, by right, be opened for a fifteen-day period.

There may be no further dissolution within a year following these elections.

Article 13. The President of the Republic shall sign the ordinances and decrees decided upon in the Council of Ministers.

He shall make appointments to the civil and military posts of the State.

Councillors of State, the Grand Chancellor of the Legion of Honour, Ambassadors and Envoys Extraordinary, Master Councillors of the Audit Office, prefects, representatives of the Government in the Overseas Territories, general officers, rectors of academies [regional divisions of the public educational system] and directors of central administrations shall be appointed in meetings of the Council of Ministers.

An organic law shall determine the other posts to be filled in meetings of the Council of Ministers, as well as the conditions under which the power of the President of the Republic to make appointments to office may be delegated by him to be exercised in his name.

Article 14. The President of the Republic shall accredit Ambassadors and Envoys Extraordinary to foreign powers; foreign Ambassadors and Envoys Extraordinary shall be accredited to him.

Article 15. The President of the Republic shall be commander of the armed forces. He shall preside over the higher councils and committees of national defence.

Article 16. When the institutions of the Republic, the independence of the nation, the integrity of its territory or the fulfilment of its international commitments are threatened in a grave and immediate manner and the regular functioning of the constitutional public powers is interrupted, the President of the Republic shall take the measures required by these circumstances, after official consultation with the Premier and the Presidents of the Assemblies, as well as with the Constitutional Council.

He shall inform the nation of these measures in a message.

These measures must be prompted by the desire to ensure to the constitutional public powers, in the shortest possible time, the means of accomplishing their mission. The Constitutional Council shall be consulted with regard to such measures.

Parliament shall meet by right.

The National Assembly may not be dissolved during the exercise of exceptional powers.

Article 17. The President of the Republic shall have the right of pardon.

Article 18. The President of the Republic shall communicate with the two Assemblies of Parliament by means of messages, which he shall cause to be read, and which shall not be the occasion for any debate.

Between sessions, the Parliament shall be convened especially to this end.

Article 19. The acts of the President of the Republic, other than those provided for under Articles 8 (first paragraph), 11, 12, 16, 18, 54, 56 and 61, shall be countersigned by the Premier and, should circumstances so require, by the appropriate ministers.

Chapter III.—The Government

Article 20. The Government shall determine and conduct the policy of the nation.

It shall have at its disposal the administration and the armed forces.

It shall be responsible to the Parliament under the conditions and according to the procedures stipulated in Articles 49 and 50.

Article 21. The Premier shall direct the operation of the Government. He shall be responsible for national defence. He shall ensure the execution of the laws. Subject to the provisions of Article 13, he shall have regulatory powers and shall make appointments to civil and military posts.

He may delegate certain of his powers to the ministers. He shall replace, should the occasion arise, the President of the Republic as the Chairman of the councils and committees provided for under Article 15.

He may, in exceptional instances, replace him as the chairman of a meeting of the Council of Ministers by virtue of an explicit delegation and for a specific agenda.

Article 22. The acts of the Premier shall be countersigned, when circumstances so require, by the ministers responsible for their execution.

Article 23. The functions of Member of the Government shall be incompatible with the exercise of any parliamentary mandate, with the holding of any office, at the national level, in business, professional or labour organizations, and with any public employment or professional activity.

An organic law shall determine the conditions under which the holders of such mandates, functions or employments shall be replaced.

The replacement of the members of Parliament shall take place in accordance with the provisions of Article 25.

Chapter IV .-- The Parliament

Article 24. The Parliament shall comprise the National Assembly and the Senate.

The deputies to the National Assembly shall be elected by direct suffrage.

The Senate shall be elected by indirect suffrage. It shall ensure the representation of the territorial units of the Republic. Frenchmen living outside France shall be represented in the Senate.

Article 25. An organic law shall determine the term for which each Assembly is elected, the number of its members, their emoluments, the conditions of eligibility, and the system of ineligibilities and incompatibilities.

It shall likewise determine the conditions under which, in the case of a vacancy in either Assembly, persons shall be elected to replace the deputy or senator whose seat has been vacated until the holding of new complete or partial elections to the Assembly concerned.

Article 26. No Member of Parliament may be prosecuted, searched for, arrested, detained or tried as a result of the opinions or votes expressed by him in the exercise of his functions.

No Member of Parliament may, during parliamentary session, be prosecuted or arrested for criminal or minor offences without the authorisation of the Assembly of which he is a member except in the case of flagrants deliclo.

When Parliament is not in session, no Member of Parliament may be arrested without the authorisation of the Secretariat of the Assembly of which he is a member, except in the case of flagrante delicto, of authorised prosecution or of final conviction.

The detention or prosecution of a Member of Parliament shall be suspended if the Assembly of which he is a member so demands.

4

Article 27. Any compulsory vote shall be null and void. The right to vote of the members of Parliament shall be

The organic law may, under exceptional circumstances, authorize the delegation of a vote. In this case, no member may be delegated more than one vote.

Article 28. Parliament shall convene by right in two ordinary sessions a year,

The first session shall begin on the first Tuesday of October and shall end on the third Friday of December.

The second session shall open on the last Tuesday of April; it may not last longer than three months.

Article 29. Parliament shall convene in extraordinary session at the request of the Premier or of the majority of the members comprising the National Assembly, to consider a specific agenda.

When an extraordinary session is held at the request of the members of the National Assembly, the closure decree shall take effect as soon as the Parliament has exhausted the agenda for which it was called, and at the latest twelve days from the date of its meeting.

Only the Premier may ask for a new session before the end of the month following the closure decree.

Article 30. Apart from cases in which Parliament meets by right, extraordinary sessions shall be opened and closed by decree of the President of the Republic.

Article 31. The members of the Government shall have access to the two Assemblies. They shall be heard when they so request.

They may call for the assistance of Commissioners of the Government.

Article 32. The President of the National Assembly shall be elected for the duration of the legislature. The President of the Senate shall be elected after each partial re-election [of the Senate].

Article 33. The meetings of the two Assemblies shall be public. An in extenso report of the debates shall be published in the Journal Officiel.

Each Assembly may sit in secret committee at the request of the Premier or of one-tenth of its members.

Chapter V.—On Relations Between Parliament and the Government

Article 34. Laws shall be voted by Parliament. They shall establish the regulations concerning:

Civil rights and the fundamental guarantees granted to the citizens for the exercise of their public liberties; the obligations imposed by the national defence upon the person and property of citizens;

Nationality, status and legal capacity of persons, marriage contracts, inheritance and gifts;

Determination of crimes and misdemeanours as well as the penalties imposed therefor; criminal procedure; amnesty; the creation of new juridical systems and the status of magistrates;

The basis, the rate and the methods of collecting taxes of all types; the issue of currency.

They likewise shall determine the regulations concerning:

The electoral system of the Parliamentary Assemblies and the local assemblies:

The establishment of categories of public institutions;

The fundamental guarantees granted to civil and military personnel employed by the State:

The nationalisation of enterprises and the transfers of the property of enterprises from the public to the private sector

Laws shall determine the fundamental principles of:

The general organization of national defence;

The free administration of local communities, of their competencies and their resources;

Education;

Property rights, civil and commercial obligations;

Legislation pertaining to employment, unions and social security.

The financial laws shall determine the financial resources and obligations of the State under the conditions and with the reservations to be provided for by an organic law.

Laws pertaining to national planning shall determine the objectives of the economic and social action of the State.

The provisions of the present article may be detailed and supplemented by an organic law.

Article 35. Parliament shall authorise the declaration of war.

Article 36. Martial law shall be decreed in a meeting of the Council of Ministers.

Its prorogation beyond twelve days may be authorized

only by Parliament.

Article 37. Matters other than those that fall within the domain of law shall be of a regulatory character.

Legislative texts concerning these matters may be modified by decrees issued after consultation with the Council of State. Those legislative texts which shall be passed after the entry into force of the present Constitution shall be modified by decree only if the Constitutional Council has stated that they have a regulatory character as defined in

the preceding paragraph.

Article 38. The Government may, in order to carry out its programme, ask Parliament for authorisation to take through ordinances, during a limited period, measures that are normally within the domain of law.

The ordinances shall be enacted in meetings of Ministers after consultation with the Council of State. They shall come into force upon their publication but shall become null and void if the bill for their ratification is not submitted to Parliament before the date set by the enabling act.

At the expiration of the time limit referred to in the first paragraph of the present article, the ordinances may be modified only by the law in those matters which are within the legislative domain.

Article 39. The Premier and the Members of Parliament alike shall have the right to initiate legislation.

Government bills shall be discussed in the Council of Ministers after consultation with the Council of State and shall be filed with the secretariat of one of the two Assemblies. Finance bills shall be submitted first to the National Assembly.

Article 40. The bills and amendments introduced by the Members of Parliament shall be inadmissible when their adoption would have as a consequence either a diminution of public financial resources or an increase in public expenditure.

Article 41. If it shall appear in the course of the legislative procedure that a Parliamentary bill or an amendment is not within the domain of law or is contrary to a delegation granted by virtue of Article 38, the Government may declare its inadmissibility. In case of disagreement between the Government and the President of the Assembly concerned, the Constitutional Council, upon the request of one or the other, shall rule within a time limit of eight days.

Article 42. The discussion of bills shall pertain, in the first Assembly to which they have been referred, to the text presented by the Government.

An Assembly given a text passed by the other Assembly shall deliberate on the text that is transmitted to it.

Article 43. Government and Parliamentary bills shall, at the request of the Government or of the Assembly concerned, be sent for study to committees especially designated for this purpose.

Government and Parliamentary bills for which such a request has not been made shall be sent to one of the permanent committees, the number of which is limited to six in each Assembly.

Article 44. Members of Parliament and of the Government have the right of amendment.

After the opening of the debate, the Government may oppose the examination of any amendment which has not previously been submitted to committee.

If the Government so requests, the Assembly concerned shall decide, by a single vote, on all or part of the text under discussion, retaining only the amendments proposed or accepted by the Government.

Article 45. Every Government or Parliamentary bill shall be examined successively in the two Assemblies of Parliament with a view to the adoption of an identical text.

When, as a result of disagreement between the two Assemblies, it has been impossible to adopt a Government or Parliamentary bill after two readings by each Assembly, or, if the Government has declared the matter urgent, after a single reading by each of them, the Premier shall have the right to bring about a meeting of a joint committee composed of an equal number from both Assemblies charged with the task of proposing a text on the matters still under discussion.

The text elaborated by the joint committee may be submitted by the Government for approval of the two Assemblies. No amendment shall be admissible except by agreement with the Government.

If the joint committee does not succeed in adopting a common text, or if this text is not adopted under the conditions set forth in the preceding paragraph, the Government may, after a new reading by the National Assembly and by the Senate, ask the National Assembly to rule definitively. In this case, the National Assembly may reconsider either the text elaborated by the joint committee, or the last text voted by it, modified when circumstances so require by one or several of the amendments adopted by the Senate.

Article 46. The laws that the Constitution characterises as organic shall be passed and amended under the following conditions:

A Government or Parliamentary bill shall be submitted to the deliberation and to the vote of the first Assembly notified only at the expiration of a period of fifteen days following its introduction;

The procedure of Article 45 shall be applicable Nevertheless, lacking an agreement between the two Assemblies, the text may be adopted by the National Assembly on final reading only by an absolute majority of its members;

The organic laws relative to the Senate must be passed in the same manner by the two Assemblies;

The organic laws may be promulgated only after a declaration by the Constitutional Council on their constitutionality.

Article 47. The Parliament shall pass finance bills under the conditions to be stipulated by an organic law.

Should the National Assembly fail to reach a decision on first reading within a time limit of forty days after a bill has been filed, the Government shall refer it to the Senate, which must rule within a time limit of fifteen days. The procedure set forth in Article 45 shall then be followed.

Should Parliament fail to reach a decision within a time limit of seventy days, the provisions of the bill may be enforced by ordinance.

Should the finance bill establishing the resources and expenditures of a fiscal year not be filed in time for it to be promulgated before the beginning of that fiscal year, the Government shall urgently request Parliament for the authorisation to collect the taxes and shall make available by decree the funds needed to meet the Government commitments already voted.

The time limits stipulated in the present article shall be suspended when the Parliament is not in session.

The Audit Office shall assist Parliament and the Government in supervising the implementation of the finance laws.

Article 48. The discussion of the bills filed or agreed upon by the Government shall have priority on the agenda of the Assemblies in the order determined by the Government.

One meeting a week shall be reserved, by priority, for questions asked by Members of Parliament and for answers by the Government.

Article 49. The Premier, after deliberation by the Council of Ministers, shall make the Government responsible, before the National Assembly, for its programme or, should the occasion arise, for a declaration of general policy.

When the National Assembly adopts a motion of censure, the responsibility of the Government shall thereby be questioned. Such a motion is admissible only if it is signed by at least one-tenth of the members of the National Assembly. The vote may not take place before forty-eight hours after the motion has been filed. Only the votes that are favourable to a motion of censure shall be counted; the motion of censure may be adopted only by a majority of the members comprising the Assembly. Should the motion of censure be rejected, its signatories may not introduce another motion of censure during the same session, except in the case provided for in the paragraph below.

The Premier may, after deliberation by the Council of Ministers, make the Government responsible before the National Assembly for the adoption of a vote of confidence. In this case, this vote of confidence shall be considered as adopted unless a motion of censure, filed during the twenty-four hours that follow, is carried under the conditions provided for in the preceding paragraph.

The Premier shall have the right to request the Senate for approval of a declaration of general policy.

Article 50. When the National Assembly adopts a motion of censure, or when it disapproves the programme or a declaration of general policy of the Government, the Premier must hand the resignation of the Government to the President of the Republic.

Article 51. The closure of ordinary or extraordinary sessions shall by right be delayed, should the occasion arise, in order to permit the application of the provisions of Article 49.

Chapter VI.—On Treaties and International Agreements

Article 52. The President of the Republic shall negotiate and ratify treaties.

He shall be informed of all negotiations leading to the conclusion of an international agreement not subject to ratification.

Article 53. Peace treaties, commercial treaties, treaties or agreements relative to international organization, those that commit the finances of the State, those that modify provisions of a legislative nature, those relative to the status of persons, those that call for the cession, exchange or addition of territory may be ratified or approved only by a law.

They shall go into effect only after having been ratified or approved.

No cession, no exchange, no addition of territory shall be valid without the consent of the populations concerned.

Article 54. If the Constitutional Council, the matter having been referred to it by the President of the Republic, by the Premier, or by the President of one or the other Assembly, shall declare that an international commitment contains a clause contrary to the Constitution, the authorisation to ratify or approve this commitment may be given only after amendment of the Constitution.

Article 55. Treaties or agreements duly ratified or approved shall, upon their publication, have an authority superior to that of laws, subject, for each agreement or treaty, to its application by the other party.

Chapter VII.-The Constitutional Council

Article 56. The Constitutional Council shall consist of nine members, whose mandates shall last nine years and shall not be renewable. One-third of the membership of the Constitutional Council shall be renewed every three years. Three of its members shall be appointed by the President of the Republic, three by the President of the National Assembly, three by the President of the Senate.

In addition to the nine members provided for above, former Presidents of the Republic shall be members ex officio for life of the Constitutional Council.

The President shall be appointed by the President of the Republic. He shall have the deciding vote in case of a tie.

Article 57. The office of member of the Constitutional Council shall be incompatible with that of minister or Member of Parliament. Other incompatibilities shall be determined by an organic law.

Article 58. The Constitutional Council shall ensure the regularity of the election of the President of the Republic.

It shall examine complaints and shall announce the results of the vote.

Article 59. The Constitutional Council shall rule, in the case of disagreement, on the regularity of the election of deputies and senators.

Article 60. The Constitutional Council shall ensure the regularity of the referendum procedure and shall announce the results thereof.

Article 61. Organic laws, before their promulgation, and regulations of the parliamentary Assemblies, before they come into application, must be submitted to the Constitutional Council, which shall rule on their constitutionality.

To the same end, laws may be submitted to the Constitutional Council, before their promulgation, by the President of the Republic, the Premier or the President of one or the other Assembly.

In the cases provided for by the two preceding paragraphs, the Constitutional Council must make its ruling

within a time limit of one month. Nevertheless, at the request of the Government, in case of urgency, this period shall be reduced to eight days.

In these same cases, referral to the Constitutional Council shall suspend the time limit for promulgation.

Article 62. A provision declared unconstitutional may not be promulgated or implemented.

The decisions of the Constitutional Council may not be appealed to any jurisdiction whatsoever. They must be recognised by the public powers and by all administrative and juridical authorities.

Article 63. An organic law shall determine the rules of organization and functioning of the Constitutional Council, the procedure to be followed before it, and in particular of the periods of time allowed for laying disputes before it.

Chapter VIII.—On Judicial Authority

Article 64. The President of the Republic shall be the guaranter of the independence of the judicial authority.

He shall be assisted by the High Council of the Judiciary. An organic law shall determine the status of magistrates. Magistrates may not be removed from office.

Article 65. The High Council of the Judiciary shall be presided over by the President of the Republic. The Minister of Justice shall be its Vice-President ex officio. He may preside in place of the President of the Republic.

The High Council shall, in addition, include nine members appointed by the President of the Republic in conformity with the conditions to be determined by an organic law.

The High Council of the Judiciary shall present nominations for judges of the Court of Cassation [Supreme Court of Appeal] and for First Presidents of courts of appeal. It shall give its opinion under the conditions to be determined by an organic law on proposals of the Minister of Justice relative to the nominations of the other judges. It shall be consulted on questions of pardon under conditions to be determined by an organic law.

The High Council of the Judiciary shall act as a disciplinary council for judges. In such cases, it shall be presided over by the First President of the Court of Cassation.

Article 66. No one may be arbitrarily detained.

The judicial authority, guardian of individual liberty, shall ensure the respect of this principle under the conditions stipulated by law.

Chapter IX.—The High Court of Justice

Article 67. A High Court of Justice shall be instituted. It shall be composed, in equal number, of members elected, from among their membership, by the National Assembly and by the Senate after each general or partial election to these Assemblies. It shall elect its President from among its members.

An organic law shall determine the composition of the High Court, its rules, as well as the procedure to be applied before it.

Article 68. The President of the Republic shall not be held accountable for actions performed in the exercise of his office except in the case of high treason. He may be indicted only by the two Assemblies ruling by identical vote in open balloting and by an absolute majority of the members of said Assemblies. He shall be tried by the High Court of Justice.

The members of the Government shall be criminally liable for actions performed in the exercise of their office and rated as crimes or misdemeanours at the time they

were committed. The procedure defined above shall be applied to them, as well as to their accomplices, in case of a conspiracy against the security of the State. In the cases provided for by the present paragraph, the High Court shall be bound by the definition of crimes and misdemeanours, as well as by the determination of penalties, as they are established by the criminal laws in force when the acts are committed.

Chapter X.—The Economic and Social Council

Article 69. The Economic and Social Council, at the referral of the Government, shall give its opinion on the Government bills, ordinances and decrees, as well as on the Parliamentary bills submitted to it.

A member of the Economic and Social Council may be designated by the latter to present, before the Parliamentary Assemblies, the opinion of the Council on the Government or Parliamentary bills that have been sub-

mitted to it.

Article 70. The Economic and Social Council may likewise be consulted by the Government on any problem of an economic or social character of interest to the Republic or to the Community. Any plan, or any bill dealing with a plan, of an economic or social character shall be submitted to it for its advice.

Article 71. The composition of the Economic and Social Council and its rules of procedure shall be determined by an organic law.

Chapter XI.-On Territorial Units

Article 72. The territorial units of the Republic shall be the communes, the Departments, and the Overseas Territories. Any other territorial unit shall be created by law.

These units shall be free to govern themselves through elected councils and under the conditions stipulated by law.

In the Departments and the Territories, the Delegate of the Government shall be responsible for the national interests, for administrative supervision, and for seeing that the laws are respected.

Article 73. Measures of adjustment required by the particular situation of the Overseas Departments may be taken with regard to the legislative system and administrative organization of those Departments.

Article 74. The Overseas Territories of the Republic shall have a particular organization, taking account of their own interests within the general interests of the Republic. This organization shall be defined and modified by law after consultation with the Territorial Assembly concerned.

Article 75. Citizens of the Republic who do not have ordinary civil status, the only status referred to in Article 34, may keep their personal status as long as they have not renounced it.

Article 76. The Overseas Territories may retain their

status within the Republic.

If they express the desire to do so by decision of their Territorial Assemblies taken within the time limit set in the first paragraph of Article 91, they shall become either Overseas Departments of the Republic or, organized into groups among themselves or singly, member States of the Community.

Chapter XII .- On the Community

Article 77. In the Community instituted by the present Constitution, the States shall enjoy autonomy; they shall administer themselves and, democratically and freely, manage their own affairs.

There shall be only one citizenship in the Community.
All citizens shall be equal before the law, whatever their

origin, their race and their religion. They shall have the same duties.

Article 78. The Community shall have jurisdiction over foreign policy, defence, the monetary system, common economic and financial policy, as well as the policy on strategic raw materials.

In addition, except by special agreement, control of justice, higher education, the general organization of external and common transport, and telecommunications

shall be within its jurisdiction.

Special agreements may establish other common jurisdictions or regulate the transfer of jurisdiction from the Community to one of its members.

Article 79. The member States shall benefit from the provisions of Article 77 as soon as they have exercised the choice provided for in Article 76.

Until the measures required for implementation of the present title go into force, matters within the common jurisdiction shall be regulated by the Republic.

Article 80. The President of the Republic shall preside over and represent the Community.

The Community shall have, as organs, an Executive Council, a Senate and a Court of Arbitration.

Article 81. The member States of the Community shall participate in the election of the President according to the conditions stipulated in Article 6.

The President of the Republic, in his capacity as President of the Community, shall be represented in each State

of the Community.

Article 82. The Executive Council of the Community shall be presided over by the President of the Community. It shall consist of the Premier of the Republic, the heads of Government of each of the member States of the Community, and of the ministers responsible for the common affairs of the Community.

The Executive Council shall organize the co-operation of members of the Community at Government and ad-

ministrative levels.

The organization and procedure of the Executive Council shall be determined by an organic law.

Article 83. The Senate of the Community shall be composed of delegates whom the Parliament of the Republic and the legislative assemblies of the other members of the Community shall choose from among their own membership. The number of delegates of each State shall be determined, taking into account its population and the responsibilities it assumes in the Community.

The Senate of the Community shall hold two sessions a year, which shall be opened and closed by the President of the Community and may not last more than one month

each.

The Senate of the Community, upon referral by the President of the Community, shall deliberate on the common economic and financial policy, before laws in these matters are voted upon by the Parliament of the Republic, and, should circumstances so require, by the legislative assemblies of the other members of the Community.

The Senate of the Community shall examine the acts and treaties or international agreements, which are specified in Articles 35 and 53, and which commit the Com-

munity.

The Senate of the Community shall take enforceable decisions in the domains in which it has received delegation of power from the legislative assemblies of the members of the Community. These decisions shall be promulgated in the same form as the law in the territory of each of the States concerned.

An organic law shall determine the composition of the

Senate and its rules of procedure.

Article 84. A Court of Arbitration of the Community shall rule on litigations occurring among members of the Community.

Its composition and its competence shall be determined by an organic law.

Article 85. By derogation from the procedure provided for in Article 89, the provisions of the present title that concern the functioning of the common institutions shall be amendable by identical laws passed by the Parliament of the Republic and by the Senate of the Community.

The provisions of the present title may also be revised by agreements concluded between all states of the Community: the new provisions are enforced in the conditions laid down by the Constitution of each state.

Article 86. A change of status of a member State of the Community may be requested, either by the Republic, or by a resolution of the legislative assembly of the State concerned confirmed by a local referendum, the organization and supervision of which shall be ensured by the institutions of the Community. The procedures governing this change shall be determined by an agreement approved by the Parliament of the Republic and the legislative assembly concerned.

Under the same conditions, a Member State of the Community may become independent. It shall thereby cease to

belong to the Community.

A Member State of the Community may also, by means of agreement, become independent without thereby ceasing to belong to the Community.

An independent State which is not a member of the Community may, by means of agreements, adhere to the

Community without ceasing to be independent.

The position of these States within the Community is determined by the agreements concluded for that purpose, in particular the agreements mentioned in the preceding paragraphs as well as, where applicable, the agreements provided for in the second paragraph of article 85.

Article 87 The particular agreements made for the implementation of the present title shall be approved by the Parliament of the Republic and the legislative assembly concerned.

Chapter XIII.—On Agreements of Association

Article 88. The Republic or the Community may make agreements with States that wish to associate themselves with the Community in order to develop their own civilisations.

Chapter XIV .- On Amendment

Article 89. The initiative for amending the Constitution shall belong both to the President of the Republic on the proposal of the Premier and to the Members of Parliament.

The Government or Parliamentary bill for amendment must be passed by the two Assemblies in identical terms. The amendment shall become definitive after approval by a

referendum.

Nevertheless, the proposed amendment shall not be submitted to a referendum when the President of the Republic decides to submit it to Parliament convened in Congress; in this case, the proposed amendment shall be approved only if it is accepted by a three-fifths majority of the votes cast. The Secretariat of the Congress shall be that of the National Assembly.

No amendment procedure may be undertaken or followed if it is prejudicial to the integrity of the territory.

The republican form of government shall not be the object of an amendment.

Chapter XV .- Temporary Provisions

Article 90. The ordinary session of Parliament is suspended. The mandate of the members of the present National Assembly shall expire on the day that the Assembly elected under the present Constitution convenes.

Until this meeting, the Government alone shall have the

authority to convene Parliament.

The mandate of the members of the Assembly of the French Union shall expire at the same time as the mandate of the members of the present National Assembly.

Article 91. The institutions of the Republic, provided for by the present Constitution, shall be established within four months counting from the time of its promulgation. This period shall be extended to six months for the

institutions of the Community.

The powers of the President of the Republic now in office shall expire only when the results of the election provided for in Articles 6 and 7 of the present Constitution are proclaimed.

The member States of the Community shall participate in this first election under the conditions derived from their status at the date of the promulgation of the Constitution.

The established authorities shall continue in the exercise of their functions in these States according to the laws and regulations applicable when the Constitution goes into force, until the establishment of the authorities provided for by their new regimes.

Until its definitive constitution, the Senate shall consist of the present members of the Council of the Republic. The organic laws that shall determine the definitive constitution of the Senate must be passed before July 31st, 1959.

The powers conferred on the Constitutional Council by Articles 58 and 59 of the Constitution shall be exercised, until the establishment of this Council, by a committee composed of the Vice-President of the Council of State, as Chairman, the First President of the Court of Cassation, and the First President of the Audit Office.

The peoples of the member States of the Community shall continue to be represented in Parliament until the entry into force of the measures necessary to the implementation of Chapter XII.

Article 92. The legislative measures necessary to the establishment of the institutions and, until they are established, to the functioning of the public powers, shall be taken in meetings of the Council of Ministers, after consultation with the Council of State, in the form of ordinances having the force of law.

During the time limit set in the first paragraph of Article 91, the Government shall be authorised to determine, by ordinances having the force of law and passed in the same way, the system of elections to the Assemblies provided for

by the Constitution.

During the same period and under the same conditions, the Government may also adopt measures, in all domains, which it may deem necessary to the life of the nation, the protection of citizens or the safeguarding of liberties.

ELECTORAL LAW, 1958

The Deputies of the National Assembly for Metropolitan France are elected under a single-member constituency system, with two ballots where the first does not produce an absolute majority. A candidate requires a simple majority in the second ballot to be successful. There are 405 individual constituencies, each with approximately 93,000 electors. Any candidate polling less than 5 per cent of the votes loses his deposit.

The Overseas Territories elect their representatives under

the old system of proportional representation.

JUDICIAL SYSTEM

The Judiciary is independent of the Government. Judges of the Court of Cassation and the First President of the Court of Appeal are appointed by the executive from nominations of the High Council of the Judiciary.

Justices of the Peace (juges de paix) were abolished by the reforms of December 1958. Subordinate cases are now heard by Tribunals of Instance (tribunaux d'instance), of which there are 454, and more serious cases by Tribunals of Great Instance (tribunaux de grande instance), of which there are 175. Parallel to these Great Tribunals are the Tribunals of Commerce (tribunaux de commerce), for commercial cases, composed of judges elected by tradesmen and manufacturers among themselves. These do not exist in every district. Where there is no Tribunal of Commerce, commercial disputes are judged by Tribunals of Great Instance.

The Boards of Arbitration (Conseils de Prud'hommes) consist of an equal number of workers or employees and employers ruling on the differences which arise over Contracts of Work.

The Correctional Courts (Tribunaux correctionnels) for criminal cases corresponded to the Tribunal of Great Instance for civil cases. They pronounce on all graver offences (délits), including those involving imprisonment.

Offences committed by juveniles of under 18 years go before specialized tribunals: Tribunals for Children.

From all these Tribunals appeal lies to the Courts of Appeal (Cours d'Appel).

The Courts of Assizo (Cours d'Assises) have no regular sittings, but are called when necessary to try every important cases, for example, murder. They are presided over by judges who are members of the Courts of Appeal and composed of elected judges (jury). Their decision is final, except where shown to be wrong in law, and then recourse is had to the Court of Cassation (Cour de Cassation).

The Court of State Security (Cour de Sareté de l'Etat) was instituted by two laws on January 15th, 1963. It consists, generally, of three civil magistrates, the President and two members being general or superior officers: this court has jurisdiction over crimes and misdemeanours against the Security of the State in peace time: its decisions are then sent to the Court of Cassation (Cour de Cassation).

The Court of Cassation is not a supreme court of appeal but a higher authority for the proper application of the law. Its duty is to see that judgments are not contrary either to the letter or the spirit of the law; any judgment annulled by the Court of Cassation involves the trying of the case anew by a court of the same category as that which made the original decision.

ADMINISTRATIVE JURISDICTION

Certain cases arising between civil servants (when on duty) and the government, or between any citizen and the government are judged by special administrative courts. The Administrative Tribunals (Tribunals Administratifs) of which there are 22, are situated in the capital of each area; the Gouncil of State (Conseil d'Elat), see below, has its seat in Paris.

Tribunal of Disputes (Tribunal des Conflits): Decides whether cases shall be submitted to the ordinary or the administrative courts. It is composed of: Pres. The Minster of Justice; Vice-Pres. (Vacant); four Counsellors of the Court of Cessation and three Counsellors of State.

Cour des Comptes (Court of Accounts), 13 rue Cambon, Paris 1er: is an administrative tribunal charged with judging the correctness of public accounts. It is the judge of common law of all public accounts laid before it. The judgments of the Court of Accounts may be annulled by the Council of State.

First President: M. LÉONARD.

Presidents: MM. Estresse de Lanzac de Laborie, Le Vert. Masselin, Crépey, Béchet, Arnaud.

THE PRESS

The French Press, distinguished for its vitality and variety, has enjoyed (since the fundamental legislation of 1881) a continuous period of freedom interrupted only by the two world wars. This detailed and liberal law affirmed the right of individuals to produce newspapers and provided penalties for such abuses as defamation and the publication of false news or matter liable to provoke crime. Article 26, which has been frequently invoked in recent years, penalizes matter judged to be offensive to the Head of State. In March 1968 the author and publisher of a pamphlet designed to make public the workings of Article 26 were both found guilty of insulting the President and were fined.

A number of amendments have been introduced modifying this legislation. In 1944 it was decreed that the owner of a daily or weekly newspaper stood legally responsible for it; the director of a daily with circulation of over 50,000 or of a weekly with circulation over 10,000 may not derive his main source of income from industrial or commercial holdings, and may not be director of more than one daily paper. In 1945 an order was introduced penalizing the dissemination of inaccurate news in bad faith so as to disturb the peace. A law in 1946 authorized the confiscation of property in cases of newspapers guilty of collaboration during the Occupation. The Law concerning papers for Children and Young People in 1949 prohibited editors from presenting in an attractive light "banditry, theft, laziness, cowardice, hatred, debauchery, criminal acts or acts liable to demoralize the young or inspire racial prejudice". The status of journalists was officially defined in the law of March 1935 which gave them certain privileges in such matters as holidays, salaries and protection against dismissal.

In addition to these pieces of legislation there are a number of articles in the Penal Code affecting the Press, sometimes quite harshly. Article 75 penalizes the disclosure of defence secrets, and Article 76 penalizes any disclosure of military intelligence not officially authorized.

All periodicals appearing regularly at least four times a year and all daily papers are exempt by law from turnover tax. This privilege, which amounts to a virtual subsidy, gives papers a degree of protection from the dangers of commercial competition.

Government control of the state radio and television service before May 1968 was exercised through the Interministerial Liaison Service for Information (S.L.I.I.), which decided the items the broadcasting services could not cover and the official news they should cover. Such control came to be seen as increasingly restrictive during the crisis of May and June 1968 and, after some attempts by journalists working for the O.R.T.F. (Office de Radio et Télévision Française) to produce better coverage of developments in the streets and factories, a partial strike of O.R.T.F. employees which had begun on May 17th became a full-scale stoppage a week later. The strike lasted until July 13th, well after most of the other workers had ended their stoppages. During the crisis Le Monde's ability to provide exhaustive coverage almost doubled

its circulation in a month, so that by the end of May its sales were up to 756,000. Although the figures later dropped, they still remain at 100,000 more than at the beginning of 1968. Other papers were less able to derive advantage from the O.R.T.F.'s lack of competition. Apart from the breakdown in the normal channels of distribution (which makes Le Monde's rise in circulation evon more remarkable), papers like Figaro and Le Parisien Libéré also had to contend with stoppages in production when the printers considered editorials biased.

At the end of July 102 radio and television journalists who had taken part in the strike were dismissed "in the interests of greater efficiency". Other measures were taken to reorganize the O.R.T.F., such as the abolition of the S.L.I.I. However, the introduction of branded-goods advertising on television, beginning in October 1968, seems likely to accelerate the process of concentration in the press, since most newspapers receive at least half of their income from advertising and some, like Figaro, as much as 80 per cent.

Between 1892 and 1966 the number of French dailies has been reduced from 414 to 84, and the decrease has been especially marked since 1945.

However, no really large press groups have emerged, as in Britain or West Germany, mainly because of the importance of the provincial press, which is related in turn to the strength of the republican tradition, dating from the early days of the Third Republic, and the circumstances of the German occupation, which cut Paris off from the rest of France. Hence there are no really "national" newspapers in France. Two-thirds of the population read only provincial papers; and of the Paris papers only France-Soir exceeds a million sales, with its two closest rivals in Paris, Figaro and Le Monde, each only around the 500,000 mark, although nearly half of these sales are outside the metropolis. The increasing financial insecurity and heavy dependence on advertising has forced many papers into various schemes of rationalization. Among provincial papers the trend has been towards advertising pools, and six groups have now been formed, each centred on one or two papers, covering most of the country. The agreement between Le Progrès de Lyon group and the Dauphine Libere group of Grenoble covers not only a unified advertising administration but also common printing arrangements and the use of common copy. Other papers have sought stability by allowing staff participation in the controlling companies. Thus Le Monde in March 1968 widened the block of shares distributed among its employees under the 1951 scheme to give its journalists a controlling interest in the company's capital; and Figaro's journalists claimed ultimate control over editorial decisions and pressed their demands with a 24-hour strike in October 1968.

The weekly press has advanced strikingly in recent years, helped by the adoption of new formats and printing techniques and by the abandonment of specific political standpoints. The two best examples of this are L'Express, which remodelled itself on Time in 1964, and France-

Observateur which became Le Nouvel Observateur at about the same time, improving its presentation considerably

but still remaining committed to the Left.

In contrast to the situation before the war only three papers of the contemporary press are organs of political parties, L'Humanité (Communist), the tri-weekly Le Populaire (Socialist) and the Gaullist La Nation. All others are owned by individual publishers or by the powerful groups which have developed round either a company or a single personality. The major groups are as follows:

France Editions et Publications Group: 100 rue Réaumur, Paris 2e; France-Soir, Paris-Presse, le Journal du Dimanche, France-Dimanche, Elle, Le Jardin des Modes, Arts Ménagers, Scoop, Photogravure Réaumur. Imprimerie Réaumur have a 50 per cent holding in Télé-7-Jours.

Amaury Group (Dir.-Gen. CLAUDE BELLANGER): 124 tue Réaumur, Paris 2e; owns Le Parisien Libéré, the provincial dailies Le Courrier de l'Ouest, Le Maine Libre and the sports L'Equipe Maine, several weeklies, including Carrefour, and monthlies, including Marie-France. The group own three printing houses and two advertising agencies.

Prouvost Group (Pres. and Chief Editor JEAN PROUVOST): 51 rue Pietre Charron, Paris 8e; owns Paris-Match, Marie-Claire, la Maison de Marie Claire, Les Parents, a halfinterest in Télé-7-Jours and a large interest in the Société du Figaro, which publishes Figaro, Figaro Littéraire, etc.

Del Duca Group: owns the daily Paris Jour and several popular magazines, including Nous Deux, Intimité, La Vie en Fleurs, Festival, and women's and children's journals, including Modes de Paris and Mireille; and also Paris-Jour, Tele-Poche and Femmes d'Aujourd'hui (Brussels). The group also owns factories and has extensions in Italy, Federal Germany and the United Kingdom.

Maison de la Bonne Presse: the largest Catholic Press Group in the world; owns the national Croix and all the provincial Croix, Le Pélérin, Panorama Chrétien, important magazines for young people such as Record and Pomme d'Api, and monthlies, including Bible et Terre Sainte, Documentation Catholique, and youth and agricultural periodicals. The organization also owns two publishing houses and three printing works.

Filipacchi Group: devoted to teen-age and jazz fan readership; owns seven magazines including Salut les Copains, Mademoiselle Age Tendre, Lui, and Jazz Magazine.

Among the metropolitan dailies, the outstanding papers are Le Monde (471,000), which carries no pictures, and Le Figaro. The most popular are: France-Soir (1,200,000), Le Parisien Libéré (836,000), Le Figaro (590,000), and L'Aurore (419,000). The English language International Herald Tribune (92,057) is also a prominent feature. The major provincial dailies are Ouest-France published at Rennes (672,000), Le Progrès at Lyons (550,000), Le Dauphine Libéré at Grenoble (525,000) and La Voix du Nord at Lille (417,000), which cater for rural readership by producing local subsidiary editions.

Metropolitan weekly papers range from the popular press, such as France Dimanche (1,603,249) and lei Paris (1,100,000), through the more serious current affairs magazines like L'Express, Le Nouvel Observateur and the satirical Canard Enchaine, to the literary and cultural Figaro Littéraire. Among the popular periodicals must be mentioned the weekly illustrated Paris-Match (1,500,000) and the women's journals Marie-Claire (1,200,000), Elle (730,000) and Marie-France (796,000); and among the religious periodicals, the weekly Pélérin (567,000) and the

monthly Echo de Notre Temps (1,462,000).

RADIO AND TELEVISION

Office de Radiodiffusion et Télévision Française (ORTF):
Maison de l'ORTF, 116 ave. du Président Kennedy,
Paris 16e; f. 1939 as Radiodiffusion-Télévision Française (RTF), present name 1964; governed by an
administrative Council of 24 members, 8 appointed by
the Government and 5 ORTF staff; Pres. P. DE
LEUSSE; Dir.-Gen. J. J. DE BRESSON; Dir. of Radio
R. DHORDAIN; Dir. of Television A. François; the
Government appointed Pierre Desgraupes as
Director of the autonomous news service of the first
television network, and Jacqueline Baudrier for the
second television network.

The RTF was granted, in February 1959, a statute providing it with financial and administrative autonomy as a State public service under the Ministry of Information. By the reform of July 1964, the ORTF is no longer directly controlled by the Ministry of Information, though remaining under its tutelage. After the crisis of May 1968, 40 per cent of the news staff were dismissed. A subsequent reform reduced Ministerial influence on the news section of the ORTF. The ORTF holds a monopoly of all broadcasting in France and in the French Departments and Territories overseas. Commercial television was introduced in October 1968, allowing initially for only two minutes of advertisements per day on the first channel (since increased to four).

TRADE UNION FEDERATIONS

French trade unions, since the split in the G.G.T. and the formation of the Force Ouvrière in 1948, have been far from unified. They were organized on the basis of one union for each industry. The third major trade union organization is the Confédération Français Démocratique du Travail. There are also other autonomous splinter organizations within the framework.

Confédération Générale du Travail (C.G.T.): 213 rue Lafayette, Paris 10e; f. 1895; 2,000,000 mems. approx. The C.G.T. has been a member of the World Federation of Trade Unions since 1945.

A National Congress is held every two years.

President: BENOIT FRACHON.

Secretary-General: Georges Seguy.

ATOMIC ENERGY

Gommissariat à l'Energie Atomique (Atomic Energy Commissariat): 29-33 rue de la Fédération, Paris 15e; f. 1945; High Commr. Francis Perrin; Admin.-Gen. (Government Delegate) ROBERT HIRSCH; Dir. of the Cabinet of the High Commissioner André Gauvenet.

The Commissariat is under the direct authority of the Prime Minister. It is a public corporation with administrative and financial autonomy, with responsibilities in scientific research, technical development and industry in the nuclear field.

Under the second five-year atomic energy plan (1957-61), it was arranged that the Commissariat should cease to have sole responsibility for atomic energy in France. This responsibility is now shared by other corporations (including Electricité de France) which are entrusted with the realization and exploitation of the main productions of nuclear electricity.

Administration is in the hands of a ten-member Comité de l'Energie Atomique (Atomic Energy Committee), consisting of government officials and representatives of science and industry.

Advisory Agencies to the Commissariat
Scientific Council: Pres. Louis DE Broglie.
Mines Committee: Pres. Prof. Marcel Roubault.
Industrial Equipment Committee: Pres. Jean Blancard.
Advisory Commission for Nuclear Electricity Production:
Pres. Jean Couture.

Markets: Pres. Théodule Bossuat.

There also functions within the Commissariat the following departments:

Direction des Relations Extérieures et des Programmes (Directorate of Foreign Relations and Programmes): Dir. Bertrand Goldschuldt.

- Direction Administrative (Administrative Directorate): Dir. MAURICE PASCAL.
- Direction Financière et Comptable (Directorate of Finance and Accounts): Dir. JEAN LABUSSIÈRE.
- Direction de la Physique (Directorate of Physics): Dir. ANATOLE ABRAGAM.
- Direction des Piles Atomiques (Directorate of Atomic Piles): Dir. Jules Hozowitz.
- Direction des Matériaux et Combustibles Nucléaires (Directorate of Nuclear Material and Fuels): Dir. HENRI PIATIER.
- Direction des Productions (Directorate of Production): Dir. JACQUES MABILE.
- Direction de la Protection et de la Sureté Radiologiques (Directorate for radiological protection and security): Dir. André Gauvenet.
- Direction des Applications Militaires (Directorate of Military Uses): Dir. JACQUES ROBERT.
- Direction de la Biologie et de la Sureté Radiologique (Directorate for biology and radiological safety): Dir. ANDRÉ GAUVENET.
- Institut National des Sciences et Techniques Nucléaires (National Institute of Nuclear Science and Technology):
 B.P. 6, Gif-sur-Yvette (S.-et-O.); f. 1956; Dir. JEAN DEBIESSE; Pres. Council of Instruction Rector MALLET.
- Gentre d'Etudes Nucléaires de Saclay (GENS) (Saclay Nuclear Research Centre): B.P. 2, 91 Gif-sur-Yvette; f. 1949; Dir. JEAN DEBIESSE.
- Gentre d'Etudes Nucléaires de Fontenay-aux-Roses (Fontenay-aux-Roses Nuclear Research Centre): B.P. 6, Fontenay-aux-Roses (92); f. 1945; Dir. R. Lucien.

- Gentre d'Etudes Nucléaires de Grenoble (GEN-G) (Grenoble Nuclear Research Centre): CEDEX No. 85, 38 Grenoble/ Gare; f. 1956; staff 2,200; basic and applied research; three swimming-pool open-core reactors (30 mW., 4 mW., 100 kW.); 38 laboratories; Dir. Louis Neel.
- Centre d'Etudes Nucléaires de Cadarache (Cadarache Nuclear Research Station): B.P. 1, Saint-Paul-les-Durance, Bouche-du-Rhône; f. 1960; Dir. R. FAURE.

The National Institute of Nuclear Science and Technology organizes courses on atomic engineering, special metallurgy and accelerator techniques, radio-biology, fluid behaviour in reactors, and theoretical physics. The four Research Centres are equipped with reactors, the Grenoble Centre having been established as a means of associating the universities with the advancement of nuclear science and avoiding the over-centralisation of research.

The Centre of Nuclear Studies at Cadarache is devoted to industrial nuclear research, both for electric generation and for propulsion. Fundamental research is also carried out in the fields of radiological safety, radio ecology and radioagronomy.

- Gentre National de la Recherche Scientifique (GERN):
 There are several nuclear research centres attached to
 this institution, and the largest nuclear laboratory
 complex is situated at Strasbourg.
 - Groupe de Laboratoires de Strasbourg-Gronenbourg: rue du Loess, B.P. 20CR, 67 Strasbourg 3; f. 1957; Dirs. P. Cuer, S. Gorodetzky, G. Monsonego, Mlle M. Perey, A. Coche, J. H. Vivien.

ANDORRA

The Franco-Spanish Seigneurie of Andorra is situated in the Eastern Pyrenees.

Area, Location, Language, Population, Capital

The small principality of Andorra (founded in 1278) consists of 465 square kilometres in the Eastern Pyrenees, bounded by France and Spain, and lying about half way between Barcelona and Toulouse. The official language is Catalan. The population numbers about 18,200 of whom nearly 6,000 are Andorrans. The national colours are blue, yellow and red. The capital is Andorra la Vella.

Constitution

Andorra is a principality, under the suzerainty of France and the Spanish Bishop of Urgel. The valleys pay a biannual tax to France and to the Bishop of Urgel. France is represented in Andorra by the Viguier de France, and the Bishop by the Viguier Episcopal. Each co-ruler has set up a permanent delegation for Andorran Affairs. The Prefect of the East Pyrences is the Permanent Delegate of the French Co-Prince.

Government

Episcopal Co-Prince: H.E. Dr. RAMÓN MALLA CALL, Bishop of Urgel.

French Co-Prince: H.E. Georges Pompidou.

General Council of the Valleys

This council submits motions and proposals to the permanent delegation. The twenty-four members represent the parishes of Andorra and are elected for four years, half the Council being renewed every two years. All men of the age of 25 and over may vote. The Council nominates the First Syndic (Syndic Procureur Général) and the Second Syndic, who cease to be members of the Council on their election.

First Syndic: Francesc Escude Ferrero. Second Syndic: Eduard Rossell Pujal.

The Legal System

Civil Law: judicial power is exercised in civil matters in the first instance by two civil judges (Bayles), one appointed by the Viguier de France and the other by the Viguier Episcopal. There is a Judge of Appeal appointed alternatively by France and Spain, and in the third instance (Tercera Sala) cases are heard in the Supreme Court of Andorra at Perpignan or in the court at Urgel.

Criminal Law: is administered by Tribunal des Corts, consisting of the two Viguiers, the Judge of Appeal, the two Bayles and two members of the Council General.

Economic Affairs

Andorra's products are mainly agricultural, cereals, potatoes, tobacco and vegetables being the principal crops. Livestock is raised and there are approximately 25,000 sheep, 3,000 cattle and 1,000 horses. There is a mink farm

outside the capital. Andorra la Vella is a great market for all European goods as there are no customs. Many Catalonians and other foreigners trade in the principality.

Religion

The population is entirely Catholic and the territory is included in the Spanish Suffragan See of Urgel; Mgr. RAMÓN MALLA CALL.

Radio

Radio-Andorra: Roc des Antelletas, Andorra la Vella; Gen. Man. M. Degoy; privately owned, broadcasts neither news nor political comment; publs. La Voz de Radio Andorra (monthly), Bulletin d'Information (weekly).

Radio des Vallées d'Andorre: 7 ave. Méritxell, Andorra la Vella; Dir. JEAN HORBETTE; daily transmissions on short and medium wave-lengths.

Finance

French and Spanish currencies are in use. There is a 3 per cent levy on alcohol and motor fuels. There is no income tax, death duty or customs.

Banks

Banc Agricol i Comercial d'Andorra: B.P. 21, Andorra la Vella; f. 1930; Chair. M. CERQUEDA.

Banca Cassany: 41 Avinguda Meritxell, Andorra la Vella; f. 1958; Dir. M. DIAL; Deputy Dir. R. Moresqui.

Banca Coma: Dir. M. CARTAS BALAGUÉ.

Crédit Andorrà: Man. Dir. M. J. BANSELL.

Banca Mora: Chair. F. Mora. Banca Reig: Chair. S. Reig.

Production

Andorra produces iron, lead, alum, stone and timber. Sheep raising and tourism are important industries.

Transport

A good road connects the French and Spanish frontiers (7,800 feet). There are about 8,200 automobiles in Andorra, There is a motor bus service between Andorra la Vella and Seo de Urgel in Spain, Barcelona-Bourg-Madame and Perpignan in France.

Tourism

Sindicat d'Initiativa de les valls d'Andorra: Andorrada Vella.

Andorra is much visited by tourists, winter and summer. In winter many slopes are used for skiing and in summer the high fields are occupied by campers. There are about 800,000 visitors a year.

THE FEDERAL REPUBLIC OF GERMANY AND WEST BERLIN

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Federal Republic of Germany lies in the heart of Europe between 47° and 55° north latitude and 6° and 23° east longitude. Its neighbours to the west are the Netherlands, Belgium, Luxembourg and France, to the south Switzerland and Austria, to the east Czechoslovakia and the German Democratic Republic, and to the north Denmark. Its climate is temperate, with an average annual temperature of 48°F, although there are considerable variations between the North German lowlands and the Bavarian Alps. The language is German. Approximately half the population belongs to the Evangelical Church, 45 per cent to the Roman Catholic Church, and the remainder to smaller religious groups. The flag consists of three horizontal stripes—black, red and gold. The capital is Bonn.

Recent History

After the military defeat of the Third Reich in 1945, the Allied Powers drew up the Potsdam Agreement whereby Germany was divided into four zones of occupation. In 1949 the Federal Republic of Germany was formed from the American, British and French zones. In 1957 the Saarland was added to the Federal Republic.

By 1967 the Federal Government of Germany had paid DM 39,900 million in restitution to individual persons and countries which suffered under Nazi persecution. In May 1965 diplomatic relations were established with Israel.

Since 1949, under the Chancellorship of Dr. Konrad Adenauer and the economic leadership of Dr. Erhard, Germany has recovered dramatically from the war, becoming one of the richest countries in Europe. Dr. Erhard succeeded Dr. Adenauer as Chancellor in October 1963, and retained this position following the General Election of September 1965, which resulted in victory for the ruling CDU/CSU Party. The withdrawal of parliamentary support from Dr. Erhard's government in October 1966 resulted in the formation of a coalition government of the CDU/CSU and the SPD, under the Chancellorship of Dr. Kiesinger.

In 1968 the extreme right-wing National Democratic Party increased its following with a gain of twelve seats in the state parliament of Baden-Württemburg. It is now represented in seven of the eleven state parliaments. In September a new communist party was formed in Frankfurt (the Communist Party K.P.D. was declared unconstitutional in 1956). Although the CDU/CSU gained the majority over each of the other individual parties in the General Election of 1969, a government under the leadership of Herr Brandt was formed by a coalition of the SPD and the FDP. In particular the new government promises to be noticeably warmer in its attitudes to and in its relations with the East Bloc.

Germany has played a leading part in developing the European Economic Community (the Common Market) and in other moves towards unifying Western Europe. In recent years the Federal Republic has also increased trade and other contacts with the countries of East Europe, and in January 1967 established diplomatic relations with Romania.

Government

The Federal Republic comprises ten states (Länder). The legislative organ is the Bundestag, which is elected for four years by universal suffrage. The Länder are represented in the legislature by the Bundesrat, whose members are appointed and recalled by the Länder themselves. In addition to the ten Länder West Berlin is represented in the Bundestag and in the Bundesrat in a consultative capacity.

The Federal Government, which is headed by a Chancellor elected by an absolute majority of the Bundestag, is responsible for the foreign affairs and defence of the Republic and for such matters as citizenship, migration, currency, customs, railways, posts and telecommunications.

Each of the Länder has its own parliament, which has the right to pass laws except in such matters as are the exclusive right of the Federation. Both education and police are in the control of the Länder.

Local responsibility for the execution of Federal and State Laws is undertaken by the Gemeinden (communes) and Landkreise (counties).

Defence

As a member of the North Atlantic Treaty Organization (NATO) and the Western European Union since 1954. Federal Germany undertook to supply twelve divisions, and formation of these was completed in 1964. After the United States, Germany is the second largest financial contributor towards NATO infrastructure. Conscription has been in force since 1956 and lasts for a period of eighteen months. By 1967 the strength of the Armed Forces stood at 460,000 (Army 287,000, Air Force 98,000, Navy 33,500, Territorial Army 41,000). Defence estimates for 1968 totalled 19,097 million DM. France and Great Britain co-operate with Federal Germany in combined training schemes and military exercises. In November 1969, the Federal Republic formally renounced the manufacture, acquisition, and use of nuclear weapons by signing the nuclear non-proliferation treaty.

Economic Affairs

Since the currency reform of 1948 the Federal Republic of Germany has entirely reconstructed its economy and it today the second largest trading nation in the world. Between 1950 and 1960 industrial production was more than doubled—a rate of growth surpassing that of any other European country. Manufacturing, mining and building are the largest sectors and have expanded most; next

FEDERAL GERMANY-(INTRODUCTORY SURVEY)

in importance come trade, transport and services. Agriculture, forestry and fishing have expanded less rapidly and some farming practices remain surprisingly backward. Federal Germany has virtually full employment and in 1966 imported 1,314,000 workers from abroad, chiefly from Southern Europe. The heavy initial flow of labour from East Germany has come to an end.

The substantial Balance of Payments surplus in recent years has led to the strengthening of the mark and in late 1968 there was great pressure from international circles for the revaluation of the Deutsche Mark. After much speculation the Mark was allowed to "float" prior to and during the General Elections in autumn 1969, and was subsequently revalued a short time later.

The Federal Republic supplies much economic aid and technical assistance to underdeveloped countries and has contributed large sums to international development agencies.

Transport and Communications

The Federal Republic has a highly developed system of transport by rail, inland waterways, road and air. Over £5,000 million pounds were invested in the field of transport and communications between 1949 and 1960. Under a ten-year road-building plan 7,000 miles of Federal roads were repaired and enlarged by 1967, and 620 miles constructed, giving Germany a total of about 97,000 miles of classified roads. By the end of 1970 there will be over 3,000 miles of modern motorway (Autobahn). In the same period the motor highway system was greatly improved and lengthened. The railways have been modernized and the shipping fleet redeveloped after the run-down of the war and the immediate post-war years. The canals linking the rivers Rhine, Main and Danube are being widened and deepened to form a trading route linking the North Sea with the Black Sea. There are five international airports at Frankfurt, Berlin, Düsseldorf, Hamburg and Munich. The German airline Lufthansa offers over 900 flights per week.

Social Welfare

Social legislation in the Federal Republic, tracing its origins back to 1881, provides insurance for health, accident, old-age, disability, and unemployment. The schemes for disability, old-age and unemployment insurance are compulsory for all employees, and over 80 per cent of the population is covered by national health insurance. More than 28 per cent of the expenditure of the Federal Budget goes to social security contributions.

Education

Education is compulsory from the end of the sixth to the eighteenth year, and eight years must be full-time. Attendance at the basic school (Grundschule) is obligatory for all children during the first four years of their school life, after which they may continue in the elementary school, as do 80 per cent of the pupils, or proceed to the intermediate or high school. Primary education is free, and grants are made for secondary education wherever fees are payable. There are three types of Gymnasium (High School), specializing in Classics, Modern Languages, and Mathematics and Science. A Gymnasium school-leaving

certificate is a necessary prerequisite for University education.

There are in the Federal Republic thirty-six universities and technical colleges, as well as a number of colleges specializing in individual subjects.

Tourism

Germany's tourist attractions include spas, summer and winter resorts, mountains, the Rhineland, mediacval towns and villages. In 1968 over six million people visited Germany. 980,100 beds are available in hotels, guest houses and private houses.

Receipts from tourism totalled 3,645 million DM in 1968; and expenditure totalled DM 6,322 million.

Visas are not required for nationals of the following countries: Afghanistan, Andorra, Angola, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Burma, Burundi, Cameroon, Canada, Central African Republic, Ceylon, Chad, Chile, Colombia, Congo (Brazzaville), Costa Rica, Cyprus, Dahomey, Denmark, Dominican Republic, Ecuador, El Salvador, Ethiopia, Finland, France, Gabon, Ghana, Greece, Guadaloupe, Guam, Guinea, Honduras, Iceland, India, Indonesia, Iran, Ireland, Israel, Italy, Ivory Coast, Jamaica, Japan, Kenya, Laos, Liberia, Libya, Liechtenstein, Luxembourg, Madagascar, Malawi, Malaysia, Martinique, Mexico, Monaco, Morocco, Mozambique, Nepal, The Netherlands, New Caledonia, New Zealand, Niger, Nigeria, Norway, Pakistan, Panama, Paraguay, Peru, Philippines, Portugal, Puerto Rico, Rwanda, San Marino, Sierra Leone, Singapore, Somalia, South Africa, Spain, Sweden, Switzerland, Tanzania, Thailand, Togo, Trinidad and Tobago, Tunisia, Turkey, Uganda, United Kingdom, U.S.A., Upper Volta, Uruguay, Venezuela and Zambia.

Sport

Sport in the Federal Republic is highly organized. There were in 1966 35,600 sports clubs with a membership of 7.4 million; 14,000 football clubs, 65,000 teams and 2.6 million members; 8,000 gymnastic clubs with 2 million members. Other popular sports are athletics, shooting, handball, swimming, table tennis and tennis.

Public Holidays 1970

The main public holidays are: January 1 (New Year's Day), March 27 (Good Friday), March 30 (Easter Monday), May 1 (Labour Day), May 7 (Ascension Day), May 18 (Whit Monday), June 17 (East Berlin Rising), November 18 (Penitentiary Day), December 25, 26 (Christmas).

Weights and Measures

The Metric System is in force.

Gurrency and Exchange Rates

The principal currency unit is the Deutsche Mark (DM), which is divided into 100 pfennigs.

Coins: 1, 2, 5, 10 and 50 pfennigs; 1, 2, and 5 Deutsche Mark.

Notes: 5, 10, 20, 50, 100, 500 and 1,000 Deutsche Mark. Exchange rate: 8.78 DM = £1 sterling 3.66 DM = \$1 U.S.

THE CONSTITUTION

The Basic Law of 1949 was and is intended as a provisional Constitution to serve until a permanent one for Germany as a whole can be drawn up. The Parliamentary Council which framed it set out to continue the tradition of the Constitution read out in the Paulskirche, in Frankfurt/Main, during the revolution of 1848-49, and to preserve some continuity with subsequent German constitutions (with Bismarck's Constitution of 1871, and with the Weimar Constitution of 1919) while avoiding the mistakes of the past. It contains 146 articles, divided into 11 sections, and introduced by a short preamble:

I. Basic Rights

The opening articles of the Constitution guarantee the dignity of man, the free development of his personality, the equality of all men before the law, and freedom of faith and conscience. Men and women shall have equal rights, and no one may be prejudiced because of sex, descent, race, language, homeland and origin, faith, or religious or political opinion

No one may be compelled against his conscience to perform war service as a combatant (Art. 4). All Germans have the right to assemble peacefully and unarmed and to form associations and societies. Everyone has the right freely to express and to disseminate his opinion through speech, writing or pictures. Freedom of the press and freedom of reporting by radio and motion pictures are guaranteed (Art. 5). Censorship is not permitted.

The State shall protect marriage and the family, property and the right of inheritance. The care and upbringing of children is the natural right of parents. Illegitimate children shall be given the same conditions for their development and their position in society as legitimate children. Schools are under the supervision of the State. Religion forms part of the curriculum in the State schools, but parents have the right to decide whether the child shall receive religious instruction (Art. 7).

A man's dwelling is inviolable; house searches may be made only by Court Order. No German may be deprived of his citizenship if he would thereby become stateless. The politically persecuted enjoy the right of asylum (Art. 16).

11. The Federation and the Länder

Article 20 describes the Federal Republic (Bundesrepublik Deutschland) as a democratic and social federal state. The colours of the Federal Republic are to be black-red-gold, the same as those of the Weimar Republic. Each Land within the Federal Republic has its own Constitution, which must, however, conform to the principles laid down in the basic law. All Lander, districts and parishes must have a representative assembly resulting from universal, direct, free, equal and secret elections (Art. 28). The exercise of the power of state is the concern of the Lander, in so far as the Basic Law does not otherwise prescribe. Where there is incompatibility, Federal Law supersedes Land Law (Art. 31). Every German has in each Land the same civil rights and duties.

Political parties may be freely formed in all the states of the Federal Republic, but their internal organization must conform to democratic principles, and they must publicly account for the sources of their funds. Parties which seek to impair or abolish the free and democratic basic order or to jeopardize the existence of the Federal Republic of Germany are unconstitutional (Art. 21). So are activities tending to disturb the peaceful relations between nations, and, especially, preparations for aggressive war, but the Federation may join a system of mutual collective security in order to preserve peace. The rules of International Law shall form part of Federal Law and take precedence over it and create rights and duties directly for the inhabitants of the Federal territory (Art. 25).

The territorial composition of the Länder shall be reorganized with due regard to regional unity, territorial and cultural connections, economic expediency and social structure.

III. The Bundestag

The deputies of the Lower House or Bundestag shall be elected by the people in universal, free, equal, direct and secret elections, for a term of four years.* Any person who has reached the age of 21 is eligible to vote and any person who has reached the age of 25 is eligible for election (Art. 38). A deputy may be arrested for a punishable offence only with the permission of the Bundestag, unless he be apprehended in the act or during the following day.

The Bundestag elects its President and draws up its Standing Orders. Most decisions of the House require a majority vote. Its meetings are public, but the public may be excluded by the decision of a two-thirds majority. Upon the motion of one-quarter of its members the Bundestag is obliged to set up an investigation committee.

IV. The Bundesrat

The Federal Council or Bundesrat is the Upper House through which the Länder participate in the legislation and the administration of the Federation. The Bundesrat consists of members of the Land governments, which can appoint and recall them (Art. 51). Each Land has at least three votes; Länder with more than two million inhabitants have four, and those with more than six million inhabitants have five. The votes of each Land may only be given as a block vote. The Bundesrat elects its President for one year. Its decisions are taken by simple majority vote. Meetings are in public, but the public may be excluded. The members of the Federal Government have the right, and, on demand, the obligation, to participate in the debates of the Bundesrat.

V. The Bundespräsident

The Federal President or Bundespräsident is elected by the Federal Convention (Bundesversammlung), consisting of the members of the Bundestag and an equal number of members elected by the Länder Parliaments (Art. 54). Every German eligible to vote in elections for the Bundestag and over 40 years of age is eligible for election. The candidate who obtains an absolute majority of votes is elected, but if such majority is not achieved by any candidate in two ballots, whoover receives most votes in a

^{*} The elections of 1949 were carried out on the basis of direct election. But in January 1953, the draft of a new electoral law was completed by the Federal Government and passed shortly before the dissolution. The new law represents a compromise between direct election and proportional representation, and is designed to discourage the rise of many small parties.

further ballot becomes President. The President's term of office is five years. Immediate re-election is admissible only once. The Federal President must not be a member of the Government or of any legislative body or hold any salaried office. Orders and instructions of the President require the counter-signature of the Federal Chancellor or competent Minister, except for the appointment or dismissal of the Chancellor or the dissolution of the Bundestag.

The President represents the Federation in International Law and accredits and receives envoys. The Bundestag or the Bundestat may impeach the President before the Federal Constitutional Court on account of wilful violation of the Basic Law or of any other Federal Law (Art. 61).

VI. The Bundesregierung

The Federal Government (Bundesregierung) consists of the Federal Chancellor (Bundeskanzler) and the Federal Ministers (Bundesminister). The Chancellor is elected by an absolute majority of the Bundestag on the proposal of the Federal President (Art. 63). Ministers are appointed and dismissed by the President upon the proposal of the Chancellor. Neither he nor his Ministers may hold any other salaried office. The Chancellor determines general policy and assumes responsibility for it, but within these limits each Minister directs his department individually and on his own responsibility. The Bundestag may express its lack of confidence in the Chancellor only by electing a successor with the majority of its members; the President must then appoint the person elected (Art. 67). If a motion of the Chancellor for a vote of confidence does not obtain the support of the majority of the Bundeslag, the President may, upon the proposal of the Chancellor, dissolve the House within twenty-one days, unless it elects another Chancellor within this time (Art. 68).

VII. The Legislation of the Federation

The right of legislation lies with the Länder in so far as the Basic Law does not specifically accord legislative powers to the Federation. Distinction is made between fields of exclusive legislation of the Federation and fields of concurrent legislation of Bund and Lander. In the field of concurrent legislation the Länder may legislate so long and so far as the Federation makes no use of its legislative right. The Federation has this right only in so far as a matter cannot be effectively regulated by Land legislation, or the regulation by Land Law would prejudice other Lander, or if the preservation of legal or economic unity demands regulation by Federal Law. Exclusive legislation of the Federation is strictly limited to such matters as foreign affairs, citizenship, migration, currency, copyrights, customs, railways, post and telecommunications. In most other fields, as enumerated (Art. 74), concurrent legislation

The legislative organ of the Federation is the Bundestag nto which Bills are introduced by the Government, by members of the Bundestag or by the Bundestal (Art. 76). After their adoption they must be submitted to the Bundestal, which may demand, within two weeks, that a committee of members of both houses be convened to consider the Bill (Art. 77). In so far as its express approval is not needed, the Bundestal may veto a law within one week.

An alteration of the Basic Law requires a majority of two-thirds in both houses, but an amendment by which the division of the Federation into Lānder and the basic principles contained in Articles 1 and 20 would be affected, is inadmissible (Art. 79).

The Federal Government or the Lander Governments may be authorized by law to issue ordinances. A state of egislative emergency for a Bill can be declared by the

President on the request of the Government with the approval of the Bundesrat. If then the Bundestag again rejects the Bill, it may be deemed adopted nevertheless in so far as the Bundesrat approves it. An emergency must not last longer than six months and may not be declared more than once during the term of office of any one Government (Art. 81).

VIII. The Execution of Federal Laws and the Federal Administration

The Länder execute the Federal Laws as their own concern in so far as the Basic Law does not otherwise determine. In doing so, they regulate the establishment of the authorities and the administrative procedure, but the Federal Government exercises supervision in order to ensure that the Länder execute the Federal Laws in an appropriate manner. For this purpose the Federal Government may send commissioners to the Land authorities (Art. 84). Direct Federal administration is foreseen for the Foreign Service, Federal finance, Federal railways, postal services, Federal waterways and shipping.

In order to avert imminent danger to the existence of the democratic order, a Land may call in the police forces of other Länder; and if the Land in which the danger is imminent is itself not willing or able to fight the danger, the Federal Government may place the police in the Land, or the police forces in other Länder, under its instructions (Art. 91).

IX. The Administration of Justice

Judicial authority is invested in independent judges, who are subject only to the law and who may not be dismissed or transferred against their will (Art. 97).

Justice is exercised by the Federal Constitutional Court, by the Supreme Federal Court, by the Federal Courts and by the Courts of the Länder. The Federal Constitutional Court decides on the interpretation of the Basic Law in cases of doubt, on the compatibility of Federal Law or Land Law with the Basic Law, and on disputes between the Federation and the Länder or between different Länder. The Supreme Federal Court decides in cases where the decision is of importance for the uniformity of the administration of justice of the Higher Federal Courts. Higher Federal Courts are to be established for the spheres of ordinary, administrative, finance, labour and social jurisdiction. Extraordinary courts are inadmissible.

The freedom of the individual may be restricted only on the basis of a law. No one may be prevented from appearing before his lawful judge (Art. 101). Detained persons may be subjected neither to physical nor to mental ill-treatment. The police may hold no one in custody longer than the end of the day following the arrest without the decision of a court. Any person temporarily detained must be brought before a judge who shall inform him of the reasons of his arrest, at the latest on the following day. A person enjoying the confidence of the detainee must be notified forthwith of any continued duration of a deprivation of liberty. An act may be punished only if it was punishable by law before the act was committed, and no one may be punished more than once on account of the same criminal act. The death sentence shall be abolished.

X. Finance

The Federation has the right of exclusive legislation only on customs and financial monopolies; on most other taxes, especially on income, property and inheritance, it has concurrent legislation rights with the Lander (see VII above).

Customs, financial monopolies, excise taxes (with exception of the beer tax), the transportation tax, the turnover tax and property dues serving non-recurrent purposes,

are administered by Federal finance authorities, and the revenues thereof accrue to the Federation. The remaining taxes are administered, as a rule, by the Länder and the Gemeinden to which they accrue. The Federation and the Länder shall be self-supporting and independent of each other in their budget economy (Art. 109). In order to ensure the working efficiency of the Länder with low revenues and to equalize the differing burden of expenditure of the Länder, the Federation may, however, make grants, and take the necessary funds from specific taxes accruing to the Länder. All revenues and expenditures of the Federation must be estimated for each fiscal year and included in the budget, which must be established by law before the beginning of the fiscal year. Decisions of the Bundestag or the Bundesrat which increase the budget

expenditure proposed by the Federal Government require its approval (Art. 113).

XI. Transitional and Concluding Provisions

The Articles 116-146 regulate a number of disconnected matters of detail, such as the relation between the old Reich and the Federation, the Federal Government and Allied High Commission, the expenses for occupation costs which have to be borne by the Federation, and the status of former German nationals who now may regain their citizenship. Article 143 contains the threat of severe punishment to those who attempt to change by force the constitutional order of the Federation or of a Land, or to prevent the Federal President by force or the threat of danger from exercising his powers.

HISTORY OF MAJOR CONSTITUTIONAL AMENDMENTS

I. SOVEREIGNTY AND RESPONSIBILITY

Between July 1952, when legislation for the ratification of the E.D.C. Treaty was first put before the *Bundestag*, and March 1954, when the process of ratification was completed, the Federal Government had at intervals referred to the Constitutional Court to determine whether an amendment of the Constitution would be necessary.

On March 7th, 1953, in response to the Government's application, the Constitutional Court announced that it could give no ruling as to the constitutional legality or otherwise of the legislation until this had been passed by Parliament. Accordingly, the two Bills, one for the ratification of the E.D.C. and one for the ratification of the Bonn Conventions, were given their third reading in the Bundestag on March 9th, 1953, and both were ratified. On May 15th the ratification Bills were passed by the Bundesrat. The elections of September 1953 gave Dr. Adenauer's Government the majority necessary to make changes in the Federal Constitution, and an amending Bill was presented to the Bundestag in February 1954. This received its second and third readings on February 26th, 1954, and was passed by 334 votes to 144, the Government majority of 190 being 9 more than the two-thirds necessary to make constitutional changes.

This Bill:

(1) Laid down under an amendment to Article 73 of the Basic Law that the Federal Parliament had full powers to legislate in all matters relating to national defence "including obligatory national service for men over 18 years of age",

(2) Introduced a new article (142A) which declared that "the treaties signed in Bonn and Paris on May 26th and 27th, 1952 (i.e. the Bonn Conventions and E.D.C. Treaty) were not contrary to the Federal Constitution".

The effect of the amendment was to empower the Federal Government to raise forces for the E.D.C. or for any similar organization which might come into being, to avoid continual recourse to the Constitutional Court.

Since these Amendments to the Constitution were adopted, the treaties concerned (the Bonn Conventions and the E.D.C.) have themselves lapsed; but the Amendments apply equally to the new instruments drawn up as a result of the London Conference of September 1954.

Until September 1954 the operation of the Basic Law was conditioned by two further instruments: the first, the Occupation Statute of 1949 (with subsequent amendments) defining the rights and obligations of the United States, Great Britain and France with respect to Germany; and the second, the Bonn Conventions, designed to replace the

Occupation Statute and to grant almost full sovereignty to the German people. There was unforeseen delay in putting the Bonn Conventions into force, simply because they were linked with the European Defence Community Treaty (that is to say the two were bound to come into force simultaneously), and this E.D.C. Treaty had not been ratified by France. The position from May 1952 until September 1954 was therefore that the Occupation Statute (with Amendments) was still the ultimate legal basis for Germany's relations with the western Allies, and for her position in international law; whereas the Bonn Conventions provided the psychological atmosphere in which these relations developed, and in which the Federal Republic gradually took its place as a positive factor in European politics. The Bonn Conventions are important, for this reason, and also because, pruned and revised and divorced from the E.D.C., they were used as the basis for the new instruments of sovereignty, drawn up after the London Conference of September 1954. (See below)

The Bonn Conventions

At the Brussels Conference in December 1950 the governments of the United States, Great Britain and France declared themselves ready and willing to enter into contractual negotiations with the Federal Republic of Germany, and thereby to complete agreements which would supersede the Occupation Statute of 1949 and restore to Germany the maximum degree of sovereignty possible in the light of the international situation. The Allied governments made it clear from the outset that they did not wish this move to abolish in their entirety the Four-Power agreements of 1945, which were the remaining link between East and West Germany and which could still be the basis for settlement of the German problem by negotiation; but that they considered that the powers of the Federal Government could not be curtailed indefinitely or pending such settlement. The resulting Conventions were a product of the unique political situation which had developed in Germany since 1945, and could not in themselves do away with the division of Germany, nor overcome the facts that foreign troops will undoubtedly remain on German soil until international tension has eased, and that the final Peace Treaty continues to be deferred; and as they were linked with the European Defence Community Treaty they could not without new decisions come into force without it.

The negotiations which led to the Bonn Conventions began in May 1951, and the Conventions were signed in Bonn by the Foreign Ministers of the United States, Great Britain and France on the one hand, and the Foreign Minister of the Federal Ropublic of Germany on the other, on May 26th, 1952. Under the Conventions:

FEDERAL GERMANY—(THE CONSTITUTION)

- (1) The Occupation Statute was abolished, and the Federal Government inherited full freedom in so far as the international situation permits.
- (2) Allied forces in Germany were no longer occupation forces, but part of "the defence of the free world, of which the Federal Republic and West Berlin form a part".
- (3) A number of problems which would normally be settled by a Peace Treaty were resolved; the Conventions were in effect a provisional treaty to end the war between the Federal Republic and the Three Powers, pending a final treaty between the whole of Germany and the Four. Under this heading the following provisions were made:
 - (a) The Federal Republic would have full control over its internal and foreign affairs and relations with the Three Powers would be conducted through ambas-
 - (b) Only because of the international situation would the Three Powers claim their rights regarding the stationing of armed forces on German soil, matters concerning Berlin, the re-unification of Germany and the final Peace Treaty.

(c) The Federal Republic undertook to conduct its policy according to the principles of the United

- (d) In their negotiations with states with which the Federal Republic has no relations, the Three Powers would consult with the Federal Government.
- (e) The Federal Republic would participate in the European Defence Community.
- (f) The Three Powers and the Federal Republic agreed that a freely negotiated peace settlement for the whole of Germany was their common aim, and that determination of the final boundaries of Germany must await such a treaty.

The Conventions also included supplementary contractual agreements concerning the rights and obligations of foreign troops in Germany, taxation of the armed forces, a Financo Convention, and a Convention on the settlement of matters arising out of the war and the occupation.

The London and Paris Agreements

On August 30th, 1954, the E.D.C. Treaty was finally debated and defeated in the French National Assembly, and with it the corner stone of western policy over the previous two years was swept away. The need to fill the void was urgent; and it was generally realized that some means must be found to restore German sovereignty, and to allow for its corollary, a German contribution to western defence, in a manner which would be acceptable to France.

For this purpose a conference was held in London at the end of September, at which the Foreign Ministers of Belgium, Canada, France, the Federal Republic of Germany, Italy, Luxembourg, the Netherlands, the United Kingdom and the United States took part. This conference opened on September 28th, and on October 3rd the Final Act was signed after intense negotiation. By this it was agreed that Germany and Italy should enter an expanded Brussels Treaty Organization; that German sovereignty should be restored and that she should, on agreed terms, enter N.A.T.O.; and that an Agency for the control of armaments on the continent of Europe should be set up. Instructions were then given for the drafting of the various instruments which would be necessary to give effect to these decisions, and it was agreed that a further meeting should be held at the earliest possible opportunity to endorse them in their detailed form.

On October 20th, 1954, a conference began in Paris to complete the work of the London Conference. It was again attended by the Foreign Ministers of Belgium, Canada, France, the Federal Republic of Germany, Italy, Luxembourg, the Netherlands, the United Kingdom and the United States; and as in London the Governments of The United States, Great Britain and France, dealt with the aspects of German sovereignty for which they have special responsibilities.

It was announced on October 21st that full agreement had been reached on the outstanding issues concerning German sovereignty, and that details for the expansion of the Brussels Treaty Organization, both in scope and functions and in size, to include both Germany and Italy, had also been agreed; the expanded organization is known as Western European Union.

German Sovereignty and Western European Union

On May 5th, 1955, with the depositing of the instruments of ratification of the London and Paris Agreements, the German Federal Republic attained its sovereignty. The three-power status continues for the time being in West Berlin, but is modified by a declaration by the American, French and British Commandants. The ratification also brought into being the newly constituted Western European Union, and the Federal Republic simultaneously became a member of it and of the North Atlantic Treaty Organization.

II. EMERGENCY POWERS

In June 1968 legislation was finally passed providing for emergency measures to be taken during a time of crisis. The Bill had received much opposition, mainly from the Left, since the introduction of the first draft by Dr. Schröder in 1960.

The main provisions of this, the 17th Amendment to the Constitution, were as follows:

That the secrecy of correspondence and telecommunications might be restricted only in terms of a special Act, which when the free democratic order of the Federal Republic or a Land was threatened might specify that the person concerned need not be informed and that these measures could only be taken by bodies appointed by Parliament.

That men above 18 years of age might be compelled to serve in the armed forces, the Federal border guard, civil defence units or to render a substitute service.

A new Article 53a provided for the establishment of a committee of 33 members, two-thirds members of the Bundestag and one-third members of the Bundesrat, which must be informed by the Federal Government of any plans in the event of a defence emergency.

A new Article 80a provided that with the approval of a two-thirds majority of the Bundestag a "state of tension" might be declared and appropriate measures taken.

That in the event of a threat to the free democratic status of the Federal Republic or a Land the armed forces might be used to assist the police and border guards in the protection of civilian installations and to fight armed insurgents.

That the life of parliamentary bodies and the terms of office of the Federal President and his deputy might be extended during a defence emergency.

HAMBURG

The Constitution of the "Free and Hanseatic City of Hamburg" was passed in June 1952. As in the time of the Empire and the Weimar Republic, Hamburg once more combines the status of a German Land with that of a municipality: there is complete identity between the Town Assembly and the Land Diet on the one hand and between the Mayor and the President of State on the other.

FEDERAL GERMANY—(THE LAND GOVERNMENTS)

The Senate (Senat). The members of the Senat are elected by the City Council (Bürgerschaft) of the city. The Senat, in turn, elects the President (Erster Bürgermeister) and his deputy (Zweiter Bürgermeister) from its own ranks. The President remains in office for one year, but may offer himself for re-election. The administration consists of specialist departments, each of which is supervised by a senator.

Hesse is divided into three governmental districts (Regierungsbezirhe): Kassel, Wiesbaden, Darmstadt. The districts are divided into urban and rural districts (Stadikreise and Landkreise).

BREMEN

The Constitution of the Free Hanseatic City of Bremen was sanctioned by referendum of the people on October 12th, 1947. Its salient feature is a strict separation of constitutional powers to the detriment of the parliamentary system. All changes in constitutional law not voted unanimously by Parliament have to be decided by popular referendum. Bremen, like Hamburg, has the status of a Land of the Federal Republic. The main constitutional organs are the City Council (Burgerschaft), which corresponds to the Landiag, the Senat and the Constitutional Court.

The Senat is the executive organ, the government of the Land. It is elected by the Bürgerschaft for the duration of its own tenure of office. The Senat elects from its own ranks two Bürgermeister, one of whom becomes President of the

WEST BERLIN

On August 4th, 1950, the Berlin City Assembly passed a Constitution defining its special position under technical three-power control. Under German Constitutional Law Berlin is a Land of the Federal Republic but this law is at present suspended by three-power reservations. Nevertheless West Berlin sends representatives to the Bundestag and Bundestat in Bonn but these representatives have no vote in the plenary sessions of either House. To be valid in West Berlin, Federal Law has to be specially adopted there. The Constitution came into force on October 1st, 1950.

The House of Representatives (Abgeordnetenhaus) is the legislative body, and has 140 members. The executive agency is the Senate, which is composed of the Governing Mayor (Regierender Bürgermeister), his deputy, and at the most sixteen Senators. The Governing Mayor is elected by a majority of the House of Representatives. The Senate is responsible to the House of Representatives and dependent on its confidence.

RELIGION

The section on Religion, covering both parts of Germany, follows immediately after the chapter on the German Democratic Republic-

THE PRESS

The advent to power of the National Socialist Party in 1933 interrupted the press freedom which Germany had enjoyed under the Weimar Republic and which was not fully restored until 1949. In 1946 the Allies introduced a licensing system, considerably restricting press freedom by confining it to a limited number of approved publishers. Two years later six eminent German citizens, including Konrad Adenauer and Carlo Schmid, issued to the Allies their celebrated "Memorandum on Democracy and the Freedom of the Press"; in it they criticized the licensing system and the monopolies and curtailment of freedom that ensued, and appealed for German press freedom to be entrusted to German Law and German Courts.

This appeal became effective in 1949 when licences were abolished and the Federal Constitution was promulgated to constitute the Basic Law of the Republic. Article 5 stipulates: "Everyone has the right freely to express or to disseminate his opinion by speech, writing and pictures and freely to inform himself from generally accessible sources. Freedom of the press and freedom of reporting by radio and motion pictures are guaranteed. There shall be no censorship. These rights are limited by the provisions of the general laws, the provisions of the law for the protection of youth, and by the right to inviolability of personal honour." These last qualifications refer to the Federal law penalising the sale to young people of literature judged to endanger morality, and to articles in the Penal Code relating to defamation, in particular Article 187A concerning defamation of public figures.

There is no Federal Press Law, all legal action being normally referred back to the Constitution. But the press is subject to general items of legislation some of which may significantly limit press freedom. Article 353C of the Penal Code for example, dating from the Nazi period, prohibits the publication of official news supposed to be secret; under it a journalist may be required to reveal his sources. The Code of Criminal Procedure also constitutes a danger in that it authorizes the government to confiscate objects potentially important as evidence in a legal investigation, which may be construed to include papers, print, etc. An unsuccessful attempt was made in 1964 to pass a bill permitting prior censorship of the press and other stringent measures in times of emergency such as war.

Freedom of the press is stipulated in each of the Constitutions of the individual Länder. Many Länder have recently enacted laws defining the press's democratic role. For example the Hamburg Press Law of January, 1965, declares that "the press is free and serves free democratic order" and defines its public function as the gathering and publicizing of news, criticism, the forming of public opinion and public education. Many Länder give the press access to sources of government information. Some Länder authorize the journalist to refuse to disclose his sources; others qualify, and even withhold this right. Some permit printed matter to be confiscated on suspicion of an indictable offence only if authorized by an independent judge; others allow a district attorney or even the police to give this authorization.

The German Press Council, modelled on the English pattern, is composed of publishers and journalists. It investigates complaints against the press and enjoys a considerable standing.

The Federal German press is quite free of government control. No newspaper is directly owned by a political

party, and though some ten per cent of papers support a party line, at least two thirds of newspapers, including all the major dailies, are politically independent.

The political and economic conditions since 1949 have fostered the rapid development of a few large publishing groups. This situation, analogous to the U.K. press structure, has been criticized as "undemocratic".

The press situation has been under consideration by three government commissions, which have suggested various measures to halt the trend towards concentration. Such a measure was the tax rebate granted for one year in April 1968 to papers selling less than 160,000 copies. About 400 publications benefited by some DM 20,000 (£2,000).

The main press commission, the Günther commission, issued an interim report on May 22nd 1968. The commission laid down various limits on the proportions of circulation one group should be allowed to control: (1) 40 per cent of the total circulation of newspapers or 40 per cent of the total circulation of newspapers and magazines together; (3) 15 per cent of the circulation in one field if the proportion owned in the other field is 40 per cent. At that time Springer's estimated ownership was 39.2 per cent of newspaper circulation (65-70 per cent in Berlin) and 17.5 per cent of magazine circulation. In June Springer reduced his share of the periodical market to around 11 per cent by selling Ellern, Twen, Jasmin and Bravo (whose joint circulation is some 4,500,000), and Das Neue Blatt. Ellern, Twen and Jasmin, having changed hands again, now belong to another group in Hamburg, Gruner and Jahr, while Bravo and Das Neue Blatt are part of Heinrich-Bauer-Verlag.

Before the report of the Günther commission the most active opponents of press concentration had been the students. Their long campaign against the Springer Group culminated in April (after Rudi Dutschke's shooting) in attacks on the offices of the Group and attempts in many parts of Germany to prevent distribution of its papers. The most powerful of these is Bild Zeitung, whose mass circulation (4,700,000) was easily attracted by a formula completely new to the German press of the 1950s; bold, simple reporting and editorials, coupled with striking pictures and banner headlines. The paper's success has also been helped by Springer's ability to print it in eight different provincial centres, a great advantage in a country where the regional press has always been strong.

Axel Springer Group (Prop. AXEL CASAR SPRINGER); Kaiser-Wilhelm-Strasse, 2 Hamburg 36; the largest newspaper publishing group in continental Europe; includes five major dailies (Die Well, Hamburger Abelalt, Bild Zeitung, Berliner Morgenpost, B.Z.), two Sunday papers (Welt am Sonntag, Bild am Sonntag), a radio, television and family magazine (Hör Zn) and the Propyläen Verlag and Ullstein Verlag publishing firms.

The other principal groups are as follows:

Gruner und Jahr Group (Dirs. Herr Gruner, J. Jahr, G. Bucerius): 2 Hamburg 1 Pressehaus; owns amongst others the weekly Die Zeit; the popular illustrated periodicals Stern, Petra, Constanze, Brigitte, Es, Capitel and Schöner Wohnen; and the glossy magazines for parents and teenagers, formerly owned by the Springer Group, Ellern, Twen and Jasmin.

Süddeutscher-Verlag (Pres. Hans Dürrmeier): owns Süddeutsche Zeitung and München Abendzeitung.

Jahreszeiten-Verlag (Pres. Helmut Ganske): owns amongst others the periodicals Für Sie and Moderne Frau.

Heinrich-Bauer-Verlag (Pres. Heinrich Bauer): owns the popular illustrated magazines Quick (Munich), Neue Revue (Hamburg), Praline, Neue Post; and Das Neue Blatt and Bravo, formerly owned by the Springer Group.

Burda Druck und Verlag (Pres. Dr. Franz Burda): 7600 Offenbach/Baden; owns Bunte Illustrierte, Bild und Funk, Freundin and Das Haus.

The most important and influential daily newspapers include Frankfurter Allgemeine Zeitung and Frankfurter Rundschau (Frankfurt), Süddeutsche Zeitung (Munich) and Die Welt (Hamburg). The most popular dailies apart from Bild Zeitung are Westdeutsche Allgemeine (570,000), Hamburger Abendblatt (340,000), and B.Z. (350,000).

The most influential weeklies include Die Zeit (Hamburg), the Sunday Welt am Sonntag and Bild am Sonntag, and the political periodical Der Spiegel. Numerous popular illustrated weekly periodicals have developed, led by Hör Zu (4,300,000), Stern (1,800,000) and Quick (1,800,000).

FINANCE

(cap.=capital; p.u.=paid up; dep.=deposits; m.=million)

At the end of the Second World War devaluation had rendered the Reichmark nearly worthless. As a result the Deutsche Mark (DM) was introduced in 1948 with a parity of 4.2 DM per \$. It was subsequently revalued in 1961 at 4 DM per \$, and after much speculation in 1969 was allowed to float prior to and during the General Elections. When the D-Mark was finally fixed at the end of October, its parity had risen to 3.06 DM per \$. Confidence in the D-Mark, which is one of Europe's most stable currencies, has made it into an internationally sought after hard currency.

Until 1957 the issue of bank notes was the responsibility of the Bank Deutscher Länder; since that time the task has been carried out by the Deutsche Bundesbank (Federal Bank), with its central offices in the Länder acting as "main

administrative organs of the Federal Bank". In exercising its legal powers, the Federal Bank is not subject to control from the Government. Apart from the Federal Bank there are central financial institutions with special tasks such as the Credit Institute for Reconstruction (Kreditanstalt fix Wiederaufbau) which administers European Recovery Plan funds, the Equalization of Burdens Bank (Lastenaus-leichsbank) which administers funds for the rehabilitation of refugees, and the clearing houses of the communal banks—the German Municipal Bank, the Industrial Credit Bank, and the Agricultural Annuity Bank.

There are over 1,600 institutions with 15,000 branches in the banking sector of the Federal Republic, and the three largest banks are the Deutsche Bank, the Commer-

FEDERAL GERMANY—(FINANCE)

bank, and the Dresdner Bank. All of these three carry on the German Private bank tradition of universal banking, whereby banks offer advice and carry out all kinds of financial transaction on their customers' behalf. Although the Deutsche Bank has over 800 branches, and the Commerzbank over 570, 83 per cent of all bank-branches have less than ten employees, and there is considerable competition from the large number of small establishments. The Post Office runs a well established giro system, and there are over 850 small savings banks with 3,700 branches, mainly run by local, municipal, and rural authorities, which hold about 60 per cent of the capital in the savings sector. During the last few years the savings banks have been encroaching upon the formerly commercial bank monopoly of industrial credit. Also important are the Credit Co-operatives such as the "Volksbanken" which grant industrial credit, and the "Raiffeisenkassen" which deal in agricultural credit. The "Bayerische Hypotheken und Wechsel Bank" is a typical regional bank, and an example of a specialist bank which has rapidly grown into one of Germany's major banks is the trade-union and con-

sumer co-operatives owned "Bank für Gemeinwirtschaft" which originally specialized in the salvage of floundering business

There are about 8,900 insurance companies and 31 building societies operating in the Federal Republic, of which 910 of the former and 17 of the latter are subject to supervision by Federal Board of Control for Insurance and Building Savings; the remainder being controlled by Länder authorities. Of the insurance companies 251 specialize in forms of life insurance, 220 in pensions, 100 in accident insurance, 172 in general insurance, 85 in agriculture, 38 in shipping, and 34 in re-insurance. 168 foreign companies operate in the Federal Republic, 143 of them from OECD countries. In 1967 the receipts of all branches of insurance totalled 24.4 billion D-Marks.

There are stock-exchanges at West Berlin, Bremen, Düsseldorf, Frankfurt-am-Main (considered to be the financial capital of the Federal Republic), Hamburg, Hannover, Munich, and Stuttgart. The nominal value for stocks and shares at the end of 1968 was 67.3 billion D-Marks.

By the Law of July 26th, 1957 the former Land Central Banks and the Berlin Central Bank were merged with the Bank deutscher Länder to form the Deutsche Bundesbank. The functions of the Deutsche Bundesbank are to issue bank notes, to regulate note and coin circulation and supply of credit, and to ensure due execution by banks of both internal and external payments.

The organs of the Deutsche Bundesbank are the Central Bank Council (Zentralbankrat), the Directorate (Direktorium) and the Boards of Management of the Land Central Banks. The Central Bank Council consists of the President and Vice-President of the Deutsche Bundesbank, the other members of the Directorate and the Presidents of the Land Central Banks Its general function is to determine money and credit policies, to lay down business and administrative directives, and to state the responsibilities of the Directorate and Boards of Management. The Directorate consists of the President and the Vice-President of the Deutsche Bundesbank and of not more than eight further members. It must implement decisions taken by the Central Bank Council and manage and administer the Bank, except in matters coming within the competence of the Land Central Banks' Boards of Management. The Directorate controls Federal, foreign exchange and open market transactions.

The Deutsche Bundesbank maintains Head Offices (Hauptverwaltungen) in each Land, known as Landeszentralbanken. The Boards of Management of each of these Land Central Banks, normally consisting of the President and Vice-President, are responsible for all transactions and administrative business within the Land.

The Deutsche Bundesbank is bound, as far as is consistent with its functions, to support Government economic policy, although it is independent of instructions from the Government. The Bank may advise on important monetary policy, and members of the Federal Government may take part in the deliberations of the Central Bank Council but may not vote.

FEDERAL GERMANY—(FINANCE)

2. THE COMMERCIAL BANKS

During the banking reform of 1946-47 the three large private banking houses of Germany, the Deutsche Bank, the Dresdner Bank and the Commerzbank (known as the D-Banks), were decentralized into thirty small successor institutions, none of which might have branches outside its own Land. This arrangement was superseded in 1952 by a further reorganization; at this stage the three D-Banks formally transferred their business to nine successor institutes, and the three Berlin successors to the D-Banks were brought into the scheme. The successors to the Deutsche Bank were the Norddeutsche Bank of Hamburg, the Deutsche Bank Aktiengesellschaft West of Düsseldorf, and the Süddeutsche Bank of Munich; those of the Dresdner Bank were the Hamburg Kreditbank, the Rhein-Main Bank of Frankfurt am Main, and the Rhein-Ruhr Bank of Düsseldorf, and those of the Commerzbank, the Commerzbank Bankverein of Düsseldorf, the Commerz- und Kreditbank of Frankfurt am Main, and the Commerz- und Discontobank of Hamburg. The three Berlin successors of the D-Banks were the Berliner Disconto Bank, the Bank für Handel und Industrie, and the Berliner Commerzbank.

By a further agreement reached in April 1957 the process of decentralization was reversed to a large extent and both the Deutsche Bank and the Dresdner Bank reabsorbed their successor institutions, with the exception of their Berlin successors, the Berliner Disconto Bank and the Bank für Handel und Industrie which continue as separate subsidiary concerns of the Deutsche Bank and the Dresdner Bank respectively. This agreement did not affect the previous arrangement of 1952 with regard to the successor institutes of the Commerzbank, which still functioned as independent organizations.

A final reorganization took place in November 1958, by which the three successor institutions to the Commerzbank were merged into one organization, the Commerzbank A.G.; the Berlin successor institute, the Berliner Commerzbank A.G., continues to exist as a separate institute.

ATOMIC ENERGY

Bundesministerium für Bildung und Wissenschaft (Federal Ministry for Education and Science): 5300 Bonn 9, Houssallee 2-10, Postfach 9214; f. 1955; Minister Prof. Dr. Hans Leussink.

The Ministry is divided into four departments, the first dealing with legislation and economic matters, administration and international co-operation, the second with the general promotion of scientific research, the third with nuclear research and engineering, radiation protection, data processing, and new technologies, and the fourth with outer space research.

The Ministry's responsibility in the nuclear energy field is to promote nuclear research and nuclear engineering as well as to plan and co-ordinate the activities of all of these bodies within the framework of the German Nuclear Programme. In addition the Ministry supervises the execution of the Atomic Energy Act by the German Lander, in particular with reference to radiological protection and the safety of the population. In 1968 some \$150 million were placed at the Ministry's disposal for the fulfilment of its tasks in the nuclear energy field.

Deutsche Atomkommission (German Atomic Energy Advisory Commission): 5300 Bonn 9, Heussallee 2-10, Postfach 9124; f. 1955; Chair. Bundesminister Prof. Dr. Hans Leussink; Deputy Chairs. Prof. Dipl.-Ing. Leo Brandt, Prof. Dr. Werner Heisenberg, Prof. Dr.-Ing. Karl Winnacker.

The Commission is at present composed of 28 members, representing science, industry, the trade unions and public life. The Commission has no executive powers, its function being to advise the Federal Ministry for Scientific Research

on all important matters of nuclear research, engineering and economy.

Nuclear research is carried out in universities and technical colleges in co-operation with the Max Planck Society and in the following research centres:

- 1 Karlsruhe Research Centre.
- 2 Jülich Research Centre, Nordrhein-Westfalen.
- 3 The Geesthacht Reactor Station of the Society for the Use of Nuclear Energy in Shipping, Hamburg.
- 4 Institute for Plasmaphysics, Garching, near Munich.
- 5 German Electron-Synchroton, Hamburg-Bahrenfeld.
- 6 Hahn-Meitner Institute for Nuclear Research, Berlin.
- 7 Institutes of the Society for Radiation Research in Neuherberg, near Munich.

There are 16 research reactors and 2 critical facilities in operation, 2 research reactors are under construction; 10 further small reactors serve for training.

Three experimental power reactors are operated in Kahl (Main), Karlsruhe and Julich, 3 are under construction in Grosswelzheim near Kahl (Main), Karlsruhe and Niederaichbach (Isar). Three larger demonstration plants of about 250 MWe each are in operation in Gundremmingen (Donau), Lingen (Ems) and Obrigheim (Neckar). Two nuclear power stations with more than 600 MWe each are under construction at Stadersand (Elbe) and Würgassen (Weser), they will more than double the present nuclear capacity installed of about 900 MWe.

German industry was successful in concluding an export contract for the first nuclear power station in South America, the 318 MWe plant at Atucha, Argentine.

GERMAN DEMOCRATIC REPUBLIC AND EAST BERLIN

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The German Democratic Republic is bounded to the north by the Baltic Sea, to the west, south-west and south by the Federal Republic of Germany, to the south-east by Czechoslovakia and to the east by Poland along the line of the rivers Oder and Neisse. The climate is warm in summer with cold winters. The language is German. About 80 per cent of the population are Protestant and 10 per cent Roman Catholic. There are about 3,500 Jews. The flag carries three horizontal bands of black, red and gold. Pending final settlement by a peace treaty, the capital is in East Berlin.

Recent History

On the defeat of Germany in 1945, the central and western parts of the country were divided into four zones of occupation. The German Democratic Republic came into being in 1949 and comprises the same territory as the former Soviet-occupied zone. Although a separate peacetreaty was signed with Russia in 1955, and the Republic is recognized as a sovereign state by the countries of the Socialist Bloc, and several non-European countries, it has not been recognized as such by the Western powers.

Government

The government is that of a people's democracy on the Soviet pattern. All citizens of 18 years and over have the right to vote representatives to the Volkskammer (People's Chamber) who in turn elect the Presidium, the Council of State and its Chairman, the Head of State. Executive power is vested in the Council of Ministers nominated by the President with the approval of the Volkskammer.

In April 1968 nearly 95 per cent of the electorate voted in favour of the new Constitution which came into force immediately.

Defence

A National People's Army, comprising land, sea and air forces, was created out of the People's Police in 1956. Total strength is 137,000 comprising Army 90,000, Navy 16,000, Air Force 31,000. Military service lasts eighteen months. The state adhered to the Warsaw Pact in 1956. There are also frontier, transport and stand-by police as well as Workers' Fighting Squads totalling about 400,000. Defence estimates for 1969 totalled 6,350 million Ost Marks.

Economic Affairs

The Republic has been a member of CMEA (Council for Mutual Economic Aid) since 1949, and the economy of the country is therefore closely linked with that of the Soviet Union and other member countries. Increasing emphasis is placed on industry. Before the division of Germany, the territory was primarily agricultural. In terms of production it is now the seventh greatest industrial nation in the world. The only major natural resource in the GDR is lignite, which supplies almost 90 per cent

of its basic energy. It has the only lignite coking plant in the world, and is now building a second nuclear power station. A developing source of power is oil which comes in from the Kubischev oil fields in Russia via a 3,000 kilometre pipeline. The machine, chemical, and heavy engineering industries are leading exporters. Amongst the newer industries, electronics and shipbuilding take a prominent place. The Leipzig trade fairs are the most important centres of international trade. All farmers are members of agricultural production groups. The Democratic Republic is not agriculturally self-supporting.

Transport and Communications

There is a comprehensive transport system by rail, road, waterway and air. The principal port, Rostock, is being developed to carry more of East Europe's trade with the rest of the world. 165 ships constitute the GDR's merchant fleet, which has a capacity of more than one million tons.

Social Welfare

State social insurance is compulsory for all employees. It also covers their dependants and special classes such as students. The scheme provides for medical and dental treatment, sick pay, maternity grants, old age, disability, and bereavement pensions. A five-day working week is now constitutionally enforced, and the paid thirteen-day annual holiday can be spent at one of the 1,195 stateowned vacation centres, the majority of which are administered by the Confederation of Free German Trade Unions or other organizations. Youth services and sport receive large State subsidies.

Education

Elementary and secondary schools were abolished in 1959 and replaced by General and Polytechnic High Schools. Attendance is now compulsory for all children between the ages of 6 and 16. Older pupils spend one day a week in practical work outside school. The University Reforms of 1969, besides revising administration, state that the standard course of study will now be four years. The first two years will be dedicated to basic and general study, and the last two to specialization. There are seven universities and a number of technological institutes. The professed aim of the Republic is to integrate education into the economic, industrial, and social life of the country.

Tourism

Tourism is fostered by the State Travel Bureau. The island of Rugen off the Baltic coast has considerable tourist traffic. The mountains of Thuringia and the Erzgebirge on the Czech frontier are much visited both in summer and winter. During 1968, 498,521 tourists from 60 countries visited the G.D.R.

Sport in all forms is actively encouraged and there is a special State Committee for Physical Education and Sport.

GERMANY (D.D.R.)-(INTRODUCTORY SURVEY, STATISTICAL SURVEY)

The German Gymnastics and Athletics Association incorporates all amateur sports in 36 specialized organizations. Outside the schools, sport is sponsored by factory sports organizations and clubs. Football, swimming and tennis are among the most popular sports.

Public Holidays, 1970

The main public holidays are: January 1 (New Year's Day), May 8 (Liberation Day), October 7 (Republic Day), December 25 and 26 (Christmas).

Weights and Measures

The Metric System is in force.

Currency and Exchange Rates

The basic unit is the Mark der Deutschen Demokratischen Republik (O-Mark). The currency is not recognized by the International Monetary Fund. Currency of the German Democratic Republic is not ordinarily convertible with the f sterling or the \$U.S. abroad. In the Democratic Republic the West German Deutsche Mark (DM) is converted with the East German Mark der Deutschen Notenbank at par and other currencies are converted at a similar rate.

I mark=100 pfennig.

THE CONSTITUTION

The Constitution of the German Democratic Republic was promulgated on April 9th, 1968, replacing the original Constitution which came into force when the Republic was founded in 1949. A summary is given below.

IJFOUNDATIONS OF THE SOCIALIST STATE

Political Foundations (Articles 1-8)

The German Democratic Republic is a socialist state of the German nation. It is the political organization of the working people in town and countryside who are jointly implementing socialism under the leadership of the working class and its Marxist-Leninist party. The capital is Berlin; the State flag is black, red, and gold, and bears the State coat of arms. All political power in the Republic is exercised by the working people and all power serves their welfare. The National Front of Democratic Germany unites all political parties and mass organizations working for the development of the socialist state. Citizens exercise their political power through democratically elected people's representatives. The Republic pursues a peaceful foreign policy and fosters friendship with the U.S.S.R. and other socialist states. It strives for the eventual reunification of the two German states on the basis of socialism.

Economic Foundations, Science, Education and Culture (Articles 9-17)

The national economy is based on the socialist ownership of the means of production and is a socialist planned economy. All foreign economic relations are the monopoly of the state. All large industrial enterprises, farms, banks and means of transport are nationally owned and private ownership of these facilities is not allowed. The personal property of citizens and the right of inheritance are guaranteed. The Republic promotes culture, the arts and science and assures all citizens a high standard of education.

II CITIZENS AND ORGANIZATIONS IN SOCIALIST SOCIETY

Basic Rights and Basic Duties of Citizens (Articles 18-39)

The Republic respects the dignity and freedom of personality and guarantees to all citizens the exercise of their rights. The conditions for acquiring and losing citizenship of the German Democratic Republic are stipulated by law. All citizens are equal before the law. Men and women have equal rights and the same legal status. All citizens over the age of 18 have the right to vote and may be elected to the local people's representative bodies. Persons over the age of 21 may be elected to the People's Chamber (Volkskammer). Every citizen is obligated to service in defence of his country. The Republic can grant political asylum to citizens of other states in certain circumstances.

Freedom of speech, the press, radio and television are guaranteed, as is also the right to peaceful demonstration and assembly. The person and the liberty of every citizen are inviolable and he has the right to move freely within the state territory within the framework of the law. Postal and telecommunication secrecy is assured and may be limited only for purposes of state security or criminal prosecution. Every citizen has the right to legal protection by the organs of the state when he is abroad.

The right to work is guaranteed and every citizen is free to select his own job. Everyone has the same right to education and attendance at secondary school is obligatory. All citizens are entitled to leisure time and annual paid holiday, to medical and other social welfare benefits. Social

care is provided for the elderly and disabled. Housing is under public control and there is legal protection against eviction. Every citizen has the right of the inviolability of his home. Marriage, motherhood and the family have the special protection of the state and provision is made for large families, fatherless families, etc. Religious freedom is assured. Citizens of the German Democratic Republic of Sorb nationality have the right to cultivate their mother tongue and culture.

Enterprises, Towns and Local Communities in Socialist Society (Articles 40-42)

Enterprises, towns, local communities and associations of local communities are communities with responsibilities of their own in which citizens work and shape their social relations. They safeguard the basic rights of citizens and are protected by the constitution. The local representative bodies are elected by the people and are responsible for local affairs. The working people also co-operate in the management of enterprises both directly and with the help of their elected organs.

The Trade Unions and their rights (Articles 43-44)

The free trade unions are united in the Confederation of Free German Trade Unions. They are independent bodies, are represented at all levels of the social system and play a decisive part in the solution of problems. They conclude agreements with government authorities and enterprise managements on all questions concerning the working and living conditions of the people. They take part in the shaping of the socialist legal system and administer the social insurance system of the workers.

Socialist Production Co-operatives and Their Rights (Article 45)

These are voluntary associations of farmers for the purpose of joint production and receive government assistance. They are represented in the state organs and take an active part in the state planning. Production co-operatives on the same lines also exist among fishermen, craftsmen and gardeners.

III STRUCTURE AND SYSTEM OF STATE MANAGEMENT

The People's Chamber (Volkskammer) (Articles 48-65)

The People's Chamber is the supreme organ of state power and guarantees the enforcement of its laws. It is composed of 500 deputies elected by the people in a free and secret ballot for a period of four years. It is convened not later than the 30th day after the election. It elects its Presidium to conduct the plenary sessions for the electoral term. The People's Chamber can be dissolved before the expiration of the electoral term only on its own decision.

Committees are formed from among the members of the People's Chamber to discuss bills and to co-operate in submitting them to the voters for popular discussion. They then submit their comments to the plenary session of the People's Chamber. Laws passed are proclaimed in the Law Gazette by the Chairman of the Council of State within one month and come into force on the fourteenth day after their proclamation.

The Council of State (Staatsrat) (Articles 66-77)

The Council of State is the organ of the People's Chamber operating between sessions of the latter, and fulfils all fundamental tasks resulting from its laws and decisions. It is elected by the People's Chamber at its first session and is responsible to it for its activities. It deals with bills to

GERMANY (D.D.R.)—(THE CONSTITUTION)

be submitted to the People's Chamber and deals with all basic tasks arising from its laws and decisions. It convenes the sessions of the People's Chamber, and issues the writ for elections to the People's Chamber and other representative bodies. It makes fundamental decisions on defence matters and exercises control over the constitutionality and legality of the activities of the Supreme Court and the Prosecutor General. It determines military and diplomatic ranks and other special titles and establishes state honours. It also exercises the right of amnesty and pardon.

The Council of Ministers (Ministerrat) (Articles 78-80)

The Council of Ministers organizes, on behalf of the People's Chamber, the execution of the political, economic, cultural, social and military tasks of the socialist state. It issues regulations and decisions within the framework of the laws and co-ordinates and controls the activities of ministries and other central state organs. Its Chairman and members are elected by the People's Chamber for a period of four years and it forms the Presidium of the Council of Ministers from its own ranks. The Council of Ministers is responsible and accountable to the People's Chamber. After the electoral term has expired the Council of Ministers continues its work until the new one has been elected.

Local People's Representative Bodies and their Organs (Articles 81-85)

The elected organs of state power in the districts, towns, regions, municipal boroughs and local communities are responsible for deciding on all local issues on the basis of law. The local people's representative bodies draw up and implement the economic plan and budget for their areas, and have their own income. Their decisions are binding and must be published. All such bodies elect their own councils and committees.

IV SOCIALIST ADMINISTRATION OF JUSTICE AND LEGALITY

(Articles 86~107)

The Constitution is direct and valid law and legal regulations may not contradict it. Details of all laws and binding regulations are published, and at no time may organs other than those provided by the Constitution be allowed to exercise state power. The citizens' participation

in the administration of justice is guaranteed and it is the joint concern of socialist society to combat all violations of the law. Laws on the punishment of crimes against peace, humanity and war crimes correspond to the generally recognized norms of international law.

The administration of justice in the Republic is exercised by the Supreme Court, the District Courts, the Regional Courts and the social courts. In military matters jurisdiction is exercised by the Supreme Court, military tribunals and military courts. The Supreme Court is the highest organ of the administration of justice and is responsible to the People's Chamber. All judges are democratically elected by the people's representative bodies or by the citizens themselves and must be men of knowledge and experience who are loyally devoted to the socialist state. The public prosecutors' office safeguards socialist legality and ensures that persons who have commited crimes are called to account before the court. The public prosecutors' office is directed by the Prosecutor General and the public prosecutors of the districts and regions are appointed by him and subordinate to him.

An act is punishable only if it was covered by penal law at the time of its commission, if the offender has acted in a culpable way and if his guilt is proved beyond doubt. Persons under arrest must be brought before a judge not later than one day after their arrest and only judges are authorized to judge the admissibility of detention on remand. Nobody may be withheld from his lawful judge and special courts are inadmissible. Every citizen has the right to be heard in court and the right to be defended by a counsel is guaranteed throughout the whole criminal procedure. Any citizen or organization has the right to submit suggestions or grievances to the state organs and may suffer no disadvantages as a result. Damages inflicted on a citizen or his personal property as a result of unlawful measures by employees of state organs are to be compensated by the state organ concerned.

JUDICIAL SYSTEM

The legal system of the German Democratic Republic was reorganized after 1945, at first under four-power direction; and the principles on which the judicial system is to function are embodied in the Constitution. Judges are elected by the people's representative bodies or by the citizens directly. State Prosecuting Counsels are nominated by the Prosecutor General. Jurisdiction is exercised by the Supreme Court, by the Bezirke Courts and by the Kreis Courts. All Courts decide on the appointment of one presiding and two assistant magistrates. The Assistant Magistrates in the first instance are jurors (lay magistrates from all classes of society); the Labour Law Tribunal of the Supreme Court appoints two official judges and three lay magistrates.

Judges are independent and subject only to the Constitution and the Legislature. A judge can be recalled only if he has committed a breach of the law, grossly neglected his duties or been convicted by a court.

Lay Magistrates are elected for a period of four years after nomination by the democratic parties and organizations. Magistrates of the Krais Courts are directly elected by the people; Magistrates of the Bezirke Courts, by the Bezirkstag; Magistrates of the Labour Law Tribunal of the Supreme Court, by the Volkshammer. All are equally authorized Judges.

Attached to the *Volkskammer* is a Constitutional and Legislature Commission in which all parties are represented according to their numbers. In addition there are on the Commission three members of the Supreme Court as well as three State Law Teachers who may not be members of the *Volkskammer*. All members of the Constitutional and Legislature Commission are appointed by the *Volkskammer*,

The whole judicial and penal system was reformed on January 14th, 1968, the most important reform being the introduction of a new Criminal Code to replace the German Criminal Code of 1871. Further details will be found in the Constitution section (above).

Oberstes Gericht der Deutschen Demokratischen Republik (Supreme Court of the German Democratic Republic): 104 Berlin, Scharnhorststr. 37; Pres. Dr. Heinrich Toeplitz.

Generalstaatsanwalt der Deutschen Demokratischen Republik (General State Prosecutor of the German Democratic Republic): Dr. Josef Streit; 104 Berlin, Scharnhorststr. 37.

Ministerium der Justiz der Deutschen Demokratischen Republik: 108 Berlin, Clara-Zetkin-Str. 93; Minister Dr. Kurt Wünsche.

RELIGION

The section on Religion, dealing with both parts of Germany, will be found immediately following this chapter on the German Democratic Republic.

THE PRESS

The advent to power of the National Socialist Party in 1933 interrupted the period of press freedom which Germany had enjoyed under the Weimar Republic. When the Allies introduced their press licensing system in 1946 as a means of closely controlling the press, licences were issued in the Soviet-occupied zone to approved parties and organizations only but not to individuals wishing to publish newspapers. The strict censorship to which the press was subjected from that date continues today.

In 1947 the Presseamt (Press Administration Office) was founded, closely associated with the office of the Prime Minister. Its functions were: to issue licences to approved organizations belonging to the democratic bloc; to distribute newsprint; and to give a measure of editorial direction to non-political papers. By means of this Office the government acquired a considerable degree of control over the press, reinforced by the Press Section of the Socialist Unity Party's Central Committee whose function is to issue daily instructions to editors of political papers as to which news items require emphasis and comment. This elaborate system of directives is seen as ensuring that the press serves the interest of the whole community in furthering the socialist cause by precluding the possible self-interest and irresponsibility of private individuals.

When the German Democratic Republic was founded in 1949, Article 9 of its new Constitution included the following almost ideal declaration of press freedom: "All citizens enjoy the right to express their opinions openly and publicly, within the limits of the law applicable to everyone. No one shall be restricted from exercising this right. There shall be no censorship." But in practice this Article in no way modified the powers wielded by the *Presseamt*. Finally, the government further extended its control in 1953 when it took over the Allgemeines Deutsches Nachschlenburo (A.D.N.) news agency, which has since been a state monopoly.

All newspapers and periodicals are owned and managed by political or independent organizations such as party committees, trade unions, cultural associations, youth organizations, etc. Almost all dailies are controlled by or affiliated to a political party, such as News Deutschland (Socialist Unity Party), Der Morgen (Liberal Democratic Party), and National Zeitung (National Democratic Party). A notable exception is the officially independent Berliner Zeitung. Tribüne is the organ of the Trade Unions League. The Free German Youth publishes the daily Junge Welt and the weekly Forum.

A striking feature of the press is the rather small number of publications; some 39 dailies with a total circulation of 7.5 millions, and 27 weeklies, illustrated periodicals and magazines totalling 7 million in circulation. They embody considerably less variety in format and presentation than the corresponding Federal German press. There is no sensational popular press and though most papers' news coverage is quite serious, the breadth of coverage is restricted by the policy, enunciated by Neues Deutschland, of concentrating on news judged to be of interest and value to the public.

The most important and influential dailies are those published by the government Socialist Unity Party, headed by Neues Deutschland in Berlin, and by the Berlin organs of the other parties mentioned above. Though circulation figures are not disclosed, a very popular light paper is Berliner Zeitung am Abend. Leading dailies outside Berlin are Sāchsisches Tageblatt (Dresden), Leipziger Volkszeitung (Leipzig), Freie Presse (Karl-Marx-Stadt), and Freiheit (Halle).

The daily press is more influential, particularly in political matters, than the weekly press and periodicals. Outstanding amongst these latter categories are Sonnlag and Forum, the popular Neue Berliner Illustrierte and the women's Für Dich.

RELIGION

(This section covers both parts of Germany.)

THE PROTESTANT CHURCH

German Protestantism is mainly of Lutheran origin with strong Calvinistic elements in some areas, and three main confessional groups—the Evangelical-Lutheran, the Evangelical-Reformed, and the United Confessional-have emerged among the Protestant population. In spite of confessional differences, these Churches have similar constitutional structures: the smallest community is the parish, with its church council and pastor (Pfarrer or Pastor). Several parishes form a church district headed by a Dean (Dekan), a Provost (Propst), or a Superintendent; the districts are united in the Territorial Church (Landeshirche), whose governing organs are the Synod, the Bishop or Church President (Kirchenpräsident) and the Church Council (Landeskirchenrat) or the Church Office (Landeskirchenant). The episcopal office is of primarily administrative importance and does not imply that the Bishop receives a higher form of ordination than the pastor.

At the Conference of Eisenach (Thuringia) in 1948 the twenty-seven Protestant Territorial Churches and the Evangelical Church of the Union gave themselves a new constitution, by which the Evangelische Kirche in Deutschland was established as a federation of Churches. The Federation is estimated to number about 42 million adherents, of whom about 28 million live in the Federal Republic, including West Berlin. Fifty and a half per cent of the population of the Federal Republic and about 80 per cent of that of the Democratic Republic are members of the Evangelische Kirche, which tends to claim a greater following in Northern and Central Germany.

Outside the EKD are numerous small Evangelical Free Churches, such as the Baptists, Methodists, Mennonites and the Lutheran Free Church, with a membership of approximately 400,000 in all.

During the autumn of 1969 the EKD and VELK in the German Democratic Republic declared themselves organizationally independent of the churches in the Federal Ropublic. The Bund der Evangelischen Kirche in der Deutschen Demokratischen Republik corresponds to the EKD, and the VELK DDR corresponds to VELKD. At present the member churches of the Evangelische Kirche der Union in the Democratic Republic have made no declaration of independence.

EVANGELISCHE KIRCHE IN DEUTSCHLAND (The Evangelical Church in Germany)

The governing bodies of the EKD are its Synod of Clergy and lay members which meets at regular intervals. and the Council, composed of fifteen elected members. The EKD has an ecclesiastical secretariat of its own (the Evangelical Church Chancellery), and a special office for external relations.

- Chairman of the Council: Bishop D. H. DIETZFELBINGER; 8 Munich, Meiserstr. 13.
- Synod of the E.K.D.: 3 Hannover-Herrenhausen, Herrenhauserstr. 2A; Pres. Dr. HANS PUTTFARCKEN.

CHURCHES AND FEDERATIONS WITHIN THE E.K.D.

Vereinigte Evangelisch-Lutherische Kirche Deutschlands (V.E.L.K.D.) (The United Evangelical-Lutheran Church of Germany): (Office) Hannover, Richard-Wagner-Str. 26; f. 1948; mems. 11 million; Pres. Hugo Schnell; a body uniting the Lutheran territorial Churches within the Evangelical Church in Germany.

Two Lutheran Churches do not belong to the

V.E.L.K.D.

Presiding Bishop: Bischof D. Hans-Otto Wölber (2 Hamburg 1, Bugenhagenstrasse 21).

Evangelische Kirche der Union (E.K.U.) (Evangelical Church of the Union): is composed of Lutheran and Reformed elements. It includes the Evangelical Churches of Berlin-Brandenburg and the former provinces of Saxony, Greifswald (Pomerania), Görlitz (Silesia), Westphalia, the Rhineland, and Anhalt; Chancellery: 1 Berlin 12, Jebensstr. 3.

Chairman: Dr. Kreyssig.

Bund Evangelisch-Reformierter Kirchen (Association of Evangelical Reformed Churches): 34 Göttingen, Untere Karspüle 11.

Chairman: Praeses P. Tibbe.

Herrnhuter Brüdergemeine or Europäisch-Festländische Brüder-Unität (The Moravian Church): The Moravian Church was founded in Moravia in 1457 as one of the earliest of the Reformation movements. After many years of persecution in 1722 the rest of its members found refuge in Herrnhut, Saxony, whence their name. Their schools have a great tradition in Germany, Switzerland and the Netherlands. At present there are 20 congregations in Germany, Switzerland, Denmark and the Netherlands with approximately 11,900 members. The Herrnhut Brethren are in close contact with correspondent churches in Great Britain, U.S.A., East and South Africa, the Caribbean area and Surinam; publs. Brüderbote (monthly), Herrnhuler Arbeit daheim und draussen (quarterly).

Chairman: Pfr. Kurt TH. Wunderling (7325 Bad

Boll, Württemberg)

Reformierter Bund (The Reformed League): f. 1884; unites the Reformed territorial Churches and Congregations of Germany. The central body of the Reformed League is the "Moderamen", the elected representation of the various Reformed Congregations. The President of the "Moderamen" is the Moderator.

Moderator: D. WILHELM NIESEL, D.D. (624 Königstein,

Altkönigstr. 35).

Bekennende Kirche (The Confessing Church): is not an established Church, but a renaissance movement which arose out of the struggles with the Nazi régime. It has adherents in all Protestant Churches. The Confessing Church is guided by the Council of the Brethren of the EKD and the Council of each territorial church. Chairman: (vacant).

GIBRALTAR

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag

Gibraltar is a narrow peninsula running southwards from the south-west coast of Spain to which it is connected by a sandy isthmus about one mile long and a half-mile wide. The Rock, as it is often called, is situated in latitude 36° 7' N. and longitude 5° 21' W. and runs from north to south for a length of nearly three miles. It is three-quarters of a mile wide and has a total area of two and a quarter square miles. Five miles across the Bay to the west lies the Spanish port of Algeciras and 20 miles across the Straits, to the south, is Africa. The Mediterranean lies to the east. The climate is temperate, snow or frost being extremely rare. The mean minimum and maximum temperatures during the winter are 54°F. and 65°F. respectively and during the summer they are 55°F. and 85°F. respectively; the average annual rainfall is 35 inches. The official language is English though the population is bilingual in English and Spanish. Eighty-eight per cent of the population are Roman Catholic, 7.49 per cent Church of England and 3 per cent Jewish. The flag bears the Gibraltar coat of arms (Castle and Key) on a background the upper two thirds of which are white and the lower third red.

Recent History

25

The post-war years have been marked by considerable progress socially and economically through intensive development of the medical, educational, housing and social security services, and by the expansion of business and the encouragement of tourism. There has also been considerable constitutional development resulting in partial self-government since 1964.

The Spanish Government lays claim to Gibraltar as an integral part of her territory, whilst Britain maintains that the Treaty of Utrecht (1713) granted to Britain sovereignty over Gibraltar in perpetuity. Since 1963 the Spanish Government has intensified its campaign through the United Nations, for the cession of Gibraltar to Spain. In the meantime the Spanish Government has imposed certain restrictions on Gibraltar, including closing the land frontier imposing an air space ban affecting aircraft landing at Gibraltar, removing the Algeciras Ferry (the only remaining means of direct access to Spain), withdrawing the Spanish labour force, and cutting off telephone and telegraphic communications with Spain.

In pursuance of a UN resolution stating that the interests of the people of Gibraltar should be taken into account in the talks, Britain held a referendum in September 1967 in which the overwhelming majority (12,138 to 44) voted for retaining their link with the U.K. rather than passing under Spanish sovereignty. Another resolution calling for talks between Britain and Spain about the problem of Gibraltar was passed in 1968. The question of Gibraltar was not discussed during the 1969 session of the General Assembly. The British Government has given an undertaking to the people of Gibraltar never to hand them over to another State against their freely and democratically expressed wishes.

Government

Under the Gibraltar (Constitution) Order in Council, 1964, Gibraltar attained a large measure of internal self-government.

This Order has now been superseded by the Gibraltar Constitution Order 1969 which gives Ministers certain responsibilities in defined domestic matters. Executive authority is vested in the Governor, who is advised by the Gibraltar Council composed of five elected and four exofficio members. Council of Ministers is presided over by the Chief Minister.

Under the new Constitution the Legislative and City Councils have been merged to form the Gibraltar House of Assembly consisting of a Speaker appointed by the Governor, fifteen elected members, and two ex-officio members.

Elections take place every four years.

Defence

There is a local Defence Force—The Gibraltar Regiment—and four months' compulsory military training at the age of 18 with biennial reserve training up to the age of 28. United Kingdom Naval, Army and Air Force Units are stationed at Gibraltar which is also a NATO Sub-Command. In August 1965, a Headquarters Unit of the Royal Naval Reserve was formed to assist in manning the Maritime Headquarters in Gibraltar.

Economic Affairs

Owing to the absence of natural resources, the chief factors in the economy are the thriving tourist industry, the operation of the Admiralty Dockyard, services supplied to shipping and the re-export of manufactured goods.

A development programme for the period 1967-70 has been approved, which envisages expenditure in the public sector of approximately £3.87 million, the most important item being housing, with consequential extensions of the public utility services; in the private sector, the most important items are building luxury flats for new residents and increasing hotel accommodation. British aid to Gibraltar in the current year will amount to some £1,014,000.

Transport and Communications

769

The Port offers good anchorage for ships of all tonnages. There is ample wharf space for the landing of passengers and handling cargo. There is a commercial ship repair yard and dry dock facilities. There are frequent air services to the United Kingdom, a once-weekly service to Madrid and twice-daily services to Tangier in Morocco. Since the closing of the Suez Canal, sea communication with North European ports and Mediterranean ports is limited and there are now no regular scheduled passenger services. However, some 130 cruise ships per annum call at Gibraltar and will on occasion take passengers. Tax concessions are available to ship-owners registering their ships at Gibraltar.

GIBRALTAR—(Introductory Survey, Statistical Survey)

Social Welfare

The Social Security system consists of two contributory schemes covering employment injuries insurance and social insurance and three non-contributory schemes financed from the general revenue and covering unemployment benefits and retirement pensions, family allowances and public assistance. There are special arrangements to cater for blind persons, the aged and discharged prisoners.

Education

Education is compulsory between the ages of 5 and 15. It is provided free in 21 Government schools. There are 2 private schools and a number of nursery schools. Scholarships for university students are provided by the Government and from private sources.

Tourism

The airport and sea facilities have made Gibraltar a centre of communications for the West Mediterranean countries and North Africa. The restriction of land communications with Spain has stimulated the development of Gibraltar as a tourist centre in its own right. The expansion of hotels, the casino, the improvement of beaches and the provision of amenities have led to an increase in the length of stay. Cruise traffic is growing, and the virtually duty-free shopping facilities in Gibraltar have contributed to an increase in the number of cruise passengers taking excursions ashore.

Visas are not required except for: (a) stateless persons, (b) nationals of Albania, Bulgaria, Cuba, Czechoslovakia, Chinese People's Republic, German Democratic Republic, Hungary, Mongolia, North Korea, North Viet-Nam, Poland, Romania and the Soviet Union, who will not, however, require visas when travelling in direct transit by air.

Sport

There is a great variety of sport including fishing, swimming, and water-skiing, football, hockey, tennis, athletics, rowing and cricket.

Public Holidays, 1970

January I (New Year's Day), March 27 (Good Friday), March 30 (Easter Monday), May 25 (Commonwealth Day), June 15 (Queen's Birthday), July 13 (Spring Bank Holiday), August 31 (late Summer Bank Holiday), December 25 (Christmas Day), December 26 (Boxing Day).

Weights and Measures

Imperial weights and measures are in use (see Great Britain).

Currency

Gibraltar Government currency notes of £5, £1 and 10s. denominations and U.K. coinage are in use. U.K. notes also circulate.

THE CONSTITUTION

Gibraltar is a Crown Colony, and the supreme authority is vested in the Governor and Commander-in-Chief, who is the representative of the Queen. Relations with the British Government are maintained through the Foreign and Commonwealth Office.

In 1830 the first Charter of Justice was given to the City and a Magistracy established; thus the advantage of civil liberty was accorded to the inhabitants.

On December 1st, 1921, the creation of the City Council gave the inhabitants of Gibraltar a certain representation in the management of municipal affairs. The City Council was reconstituted on August 1st, 1945, when provision was made for an unofficial majority.

A Legislative Council, defined by an Order-in-Council of February 3rd, 1950, was inaugurated by H.R.H. The Duke of Edinburgh on November 23rd, 1950. It established a Legislative Council consisting of the Governor as President, three ex-officio mombers, two members nominated by the Governor, and five elected members. In 1956 the number of elected members was increased from five to seven and a Speaker was appointed in 1958. In September 1959 the life of the legislature was increased from three to five years. The Gibraltar (Constitution) Order, 1964, and the Gibraltar Royal Instructions provided for a Legislative Council consisting of a Speaker, cleven elected members and two ex-officio members. Election was by proportional representation, and the franchise is given to all adult British Subjects ordinarily resident in Gibraltar for a continuous period of twelve months, though provision is made for the registration of electors who may be resident in neighbouring Spanish territory during part of the qualifying period. At the fifth elections, held in September 1964, 10,342 votes were polled out of a total electorate of 13,564. From the eleven members elected to the Legislative Council, the Governor, after consultation with the Chief Minister, nominated five to serve in the Gibraltar Council. The exofficio members of the Legislative Council were the Attorney-General and the Financial Secretary. Reserve powers enabled the Governor to legislate if he considered it necessary or expedient in the interests of public order, public faith or good government (including defence).

Following a Constitutional Conference held in July 1968 a new Constitution was introduced in 1969. The Constitution contains a code of human rights and provides for its enforcement by the Courts of Gibraltar. The Legislative and City Councils were merged to produce an enlarged legislature known as the Gibraltar House of Assembly. Matters of domestic concern are devolved to ministers, with Britain responsible for matters which directly relate to external affairs, defence and internal security. The Governor has special powers, in exceptional circumstances, to refuse any advice from the Gibraltar Council which may not be in the interests of maintaining financial and economic stability.

THE GIBRALTAR COUNCIL

Gibraltar is administered in accordance with the Gibraltar (Constitution) Order, 1969 and the Gibraltar Royal Instructions, 1969 by the Governor acting generally on the advice of the Gibraltar Council consisting of four ex-officio and five elected members who are appointed by the Governor after consultation with the Chief Minister.

COUNCIL OF MINISTERS

The Council of Ministers, which is presided over by the Chief Minister, deals with domestic matters which have been defined as such under the Constitution. Heads of Departments and other government officials appearing before it when required.

HOUSE OF ASSEMBLY

With the coming into force of the Gibraltar Constitution Order 1969 and Royal Instructions 1969 on August 11th, 1969, the Legislative and City Councils were merged to form the Gibraltar House of Assembly.

This is composed of a Speaker, 15 elected members and two ex-officio members.

GREECE

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Greece is a mountainous peninsula between the Mediterranean and Aegean, bounded to the north by Albania, Yugoslavia and Bulgaria and to the east by Turkey. Numerous Greek islands lie to the south and south-east, of which the largest is Crete. The climate is Mediterranean with mild winters and hot summers. The language is modern Greek. The flag consists of blue and white horizontal stripes with a white cross in the top-left corner. The Greek Orthodox Church is the established religion. The capital is Athens.

Recent History

Civil war broke out in Greece in 1945 following the Second World War and lasted until 1949. During the Civil War in Cyprus, Greece supported the Greek-Cypriots in their fight against the British Colonial Government, but since the granting of independence to Cyprus in 1960, Greece has been on friendly terms with Great Britain. The unsettled status of Cyprus, and Greece's relations with Turkey, remain a prominent political issue. In 1961 Greece concluded an Agreement of Association with the European Economic Community.

After four consecutive terms in office since 1955, Mr. Karamanlis resigned as Prime Minister in June 1963 in protest against the Greek Royal visit to Britain, and was succeeded by Mr. Papandreou in the election of November 1963. After a series of short-lived cabinets, a non-political administration held office from December 1966, which was charged with the organization of a General Election in May 1967. This was forestalled in April 1967 by the bloodless coup d'état of a military junta in which Colonel George Papadopoulos played a prominent part. Mr. Constantine Kollias was made Prime Minister. The King failed to overthrow the junta in December 1967, and went into exile in Rome. Meanwhile Brigadier-General George Papadopoulos took over as Prime Minister and promised a plebiscite and quick return to democratic rule. Negotiations began between the Government and the King for his return to Greece.

An extensive Cabinet reshuffle took place on June 20th, 1968, the most important change being the appointment of Mr. Patilis (Lieut.-Gen. retd.) as Second Deputy Prime Minister. On July 11th the new draft Constitution was published and a copy was communicated to King Constantine in Rome. On August 13th there was an unsuccessful attempt to assassinate Mr. Papadopoulos. The draft Constitution with certain amendments was approved by the Greek Cabinet on September 14th. The Prime Minister announced that if approved by a national referendum on September 20th the Constitution would come into effect immediately, except for 12 Articles. These related mainly to individual rights. The referendum resulted in a large majority for the new Constitution and the Prime Minister promised a return to democracy and that the suspension of the 12 Articles would be provisional. On December 12th, 1969, Greece withdrew from the Council of Europe. This

action was preceded by indications from the majority of the member countries that they would vote for Greece's suspension if democracy and "normal democratic freedoms" were not immediately restored.

Government

Greece is a constitutional monarchy. In April 1967 the Chamber of Deputies was suspended by the ruling military junta, but constitutional monarchy was retained. On the flight of the King after his abortive coup d'état Lieutenant-General Zoitakis was named "Regent". Executive power is at present exercised by the military junta and the Cabinet appointed by them. Following the approval of the new Constitution by a national referendum the Prime Minister promised a gradual return to democracy.

Defence

The three arms of the forces are directed by the Ministry of Defence. Military service is compulsory and lasts two years. The Army musters about 119,000 men and the Navy 17,500; Air Force personnel number 23,500. Greece is a member of NATO. Defence estimates totalled 8,740 million drachmae in 1969.

Economic Affairs

Although the pace of industrial expansion has quickened since Greece became an Associate Member of the European Economic Community (the Common Market), the country's chief exports are still the traditional agricultural products: tobacco, olive oil, cotton, citrus fruits and wine. The following mineral deposits are exploited; coal, iron, chromite, zinc, bauxite and silver. Only about a quarter of the land is capable of cultivation, the rest being mountain and marshland. Agriculture provides for the greater part of the country's needs. Most Greek trade is with the German Federal Republic. The United States, the United Kingdom, Italy and France are other important traders. In the last few years hydro-electric power resources are being increasingly developed. Long-term economic and social needs are expected to be met by the five-year plan between 1968 and 1973. Major targets of this plan are a rise in national income at an annual rate of 7.7 per cent, a rise in productivity of 6.4 per cent annually, with particular emphasis placed upon industrial production.

Other substantial sources of income are a large merchant fleet, remittances from Greeks working abroad, and tourism.

Transport and Communications

Railways were almost destroyed by Germany and Italy between 1940 and 1945. They have now been restored to over 2,573 km. There are about 50,000 km. of roads, 21,000 km. of which are asphalted or macadamized. The three-mile Corinth Canal shortens the sea journey from the Adriatic to Piraeus (port of Athens) by 202 miles. Greece has a large mercantile marine of over 10,500,000 tons. Important towns and islands are connected by air transport.

GREECE—(Introductory Survey, Statistical Survey)

Social Welfare

There is a state social insurance scheme for wage-earners. Salaried staff are provided for by voluntary or staff insurances. Everyone is entitled to an old-age pension and sickness benefit.

Education

Education is free at all levels, and compulsory for all children between the ages of 6 and 15. Just under one million children receive primary education and some 380,000 secondary. The illiteracy rate has been reduced from 42 per cent to less than 10 per cent in the last thirty years. There are five universities, including one at Jannina, founded in 1966.

Tourism

The sunny climate, the natural beauty of the country and its great history and traditions have made Greece a magnet for tourists. There are numerous islands of archaeological interest. Increased facilities are being provided for tourists in the form of better transport and accommodation. In 1968 over one million people visited Greece.

Receipts from tourism totalled \$120 million in 1968 and expenditure amounted to \$43 million.

THE CONSTITUTION

Constitutional monarchy was instituted in Greece when the first Constitution was granted by King Otho on September 3rd, 1843. Formerly known as Prince Otto of Bavaria, he ascended the throne at the age of 18 in 1833, three years after Greece achieved her full independence from Turkey. Revolution, reaction, and foreign embroilment shook the country repeatedly. In 1862 Otho was expelled and his place was taken in 1863 by Prince William, the younger son of the King of Denmark, who assumed the title of George I. The dynasty was shaken by the ascent to the throne of his son Constantine in 1913. King George II, who came to the throne when his father, Constantine, abdicated in 1922, was compelled to leave the country on December 19th, 1923. The dethronement of the dynasty was proclaimed by the Papanastasiou Government in 1924, as a result of the crisis brought on by the disastrous termination of the Asia Minor expedition in 1922. A plebiscite held on April 13th, 1924, confirmed the republican régime, and the republican Constitution was formally promulgated in 1927.

On the restoration of the monarchy in the person of King George II in 1935, after a plebiscite, the 1863 Constitution, as amended in 1911, was again adopted, with certain changes, of which the most important was the institution of the Council of State. This supreme administrative tribunal, formed on the French model, examines the validity of decrees and tries cases between the State and private individuals, thus forming an important bulwark against arbitrary State action on the part of Government officials or departments.

Parliamentary government in accordance with the Constitution continued until August 4th, 1936, when certain basic provisions of the Constitution were suspended by the Prime Minister, General Ioannis Metaxas, with the consent of the King. This action had been preceded by a period of political deadlock and internal unrest. The Metaxas Government assumed dictatorial powers, dissolved Parliament, and suspended the main provisions of the Constitution which had hitherto protected the liberties of the Greek people, such as the freedom of the Press, freedom of assembly, parliamentary and municipal elections, habeas corpus, etc.

The dictatorship of General Metaxas lasted until the occupation of Greece by the Axis Powers in 1941. The parliamentary system was restored after the liberation of Greece in 1944. The Constitution was re-established, and the first elections held since January 1936 took place on March 31st, 1946. A revised Constitution was promulgated on January 1st, 1952. This Constitution left the fundamental provisions of the 1911 Constitution intact. The military junta headed by Col. George Papadopoulos which seized power in April 1967 suspended the constitution, but promised a quick return to democratic government.

The text of a new Constitution, consisting of 138 Articles and replacing the Constitution of 1952, was published in Athens on July 11th, 1968. It was then stated that it would be submitted to a national referendum on September 29th and would be brought into force in stages. The new draft Constitution was approved by the Greek Cabinet on September 14th, with certain amendments as set out below. The 12 Articles which will be temporarily held in abeyance relate to the holding of public meetings, formation of political parties, freedom of the Press, and inviolability of domicile. Voting in the constitutional referendum took place on September 29th and was compulsory. The result was a large majority for the new Constitution. The

Prime Minister, Mr. Papadopoulos, promised a gradual return to democracy and that the suspension of Articles in the new Constitution would be only provisional.

THE CONSTITUTION

(Text of the new Constitution published on July 11th, 1968, in force November 15th, 1968.)

GENERAL PROVISIONS

The established religion in Greece is that of the Eastern Orthodox Church of Christ. The form of Government in Greece is that of a Crowned Democracy. The legislative power is exercised by the King and Parliament; the executive power by the King and the Government; the judicial power by the courts, judicial decisions being executed in the name of the King. (Articles 1-3.)

THE STATE AND THE INDIVIDUAL

Every person within the territorial boundaries of the Greek State shall enjoy full protection of his life, honour and freedom, irrespective of nationality, creed or language. Exceptions are permitted in such cases as provided for by International Law. Every person has the right to the free development of his personality provided he does not infringe on the rights of others and does not violate constitutional order and the moral code. Personal liberty is inviolable. No one is persecuted, arrested, imprisoned or otherwise restricted, except when and as the law provides. With the exception of persons caught in the act of committing an offence, no one shall be arrested or imprisoned without a judicial warrant stating the reasons, which must be served at the moment of arrest or imprisonment pending trial, (Articles 8–10.)

The home of each person is inviolable. No house search can take place except in a time and manner provided by law. (Article 13.)

Everyone may express orally, in writing, in print or in any other way his thoughts, with due adherence to the laws of the State. The press is free and discharges a public function involving rights and duties and responsibility for the accuracy of its content, Censorship and every other preventive measure shall be prohibited. Scizure of printed matter, either before or after publication is prohibited. By exception seizure after circulation is permitted by order of the public prosecutor: (a) because of insult to the Christian and any other known religion; (b) because of insult to the person of the King, the Crown Prince, their wives and children; (c) because of a publication which discloses information on the organization, composition, armament and deployment of the armed forces, or on the fortifications of the country; is patently rebellious, or aims at over-throwing the regime, or the existing social system; or is directed against the territorial integrity of the Country or creates defeatism, or constitutes an instigation or attempt to commit a crime of high treason; intends to project or diffuse for political exploitation views of outlawed parties constitutions and (d) because of indecent publications public decency in cases provided by secreey of letters and of all other means of correspondence is inviolable. The freedom of religious conscience is inviolable. Elementary education

The Greeks have the right to assemble peacefully and unarmed as provided by law. The State may take protective measures for public gatherings, the organization of which

shall be free and compulsory for all. (Articles 15-17.)

must be duly notified forty-eight hours before they are affected. Open air gatherings may be prohibited if they endanger public order and security. The Greeks have the right to form associations with due adherence to the laws of the State. Every union of persons, the purpose or the activity of which is directed against the territorial integrity of the Country or the principles of the régime or the social order or the security of the State or the political or civil liberties of the citizen, shall be prohibited. It is dissolved by Court decree. Resort to strike for the purpose of achieving political or other ends unrelated to the material or moral interests of the workers shall be prohibited. (Articles 18 and 19.)

The exercise of civil rights and liberties shall be reserved to everyone within limits securing the enjoyment of the same rights and liberties by other citizens and protecting the interests of the society as a whole. Whoever abuses the inviolability of a home, the freedom of expression, especially in print, the secrecy of the means of correspondence, the freedom of assembly, the freedom of forming associations or co-operatives, and the right of property, for the purpose of combatting the political system of crowned democracy, the civil liberties, or of endangering the national independence and territorial integrity of the Country, shall be deprived of these rights or of all rights safeguarded under the present Constitution. The deprivation and the extent thereof shall be pronounced by the Constitutional Court as provided by law. (Article 24.)

In the case of war, mobilization due to external dangers or serious disturbance or patent threat to the public order and security of the Country from internal dangers, the King on the recommendation of the Council of Ministers may suspend by Royal Decree throughout the Country or in part thereof the operation of articles 10, 12b, 13, 14, 15, 18, 19, 111 and 112 of the Constitution or some of them and put into effect the then applicable law on "State of Siege" and to establish extraordinary tribunals. This law may not be modified while in operation. (Article 25.)

SOCIAL AND ECONOMIC RIGHTS AND DUTIES

Marriage and the family are under the protection of the State. The parents have the right and duty to raise and educate their children. The State shall take measures for the moral, intellectual and patriotic education of the minors. The State cares for the securing of employment; determines general conditions thereof and aims at the material and moral uplifting of the workers. The State cares for the creation of prerequisites and incentives for the development of the economy on national and regional scale to the end of securing a steady improvement of the living conditions of the people. (Articles 26–28.)

THE ORGANIZATION OF THE STATE THE KING

The King is the Supreme Authority of the State, the symbol of the unity of the Nation. The King and Crown Prince attain majority on completing the twenty-first year of their age; both must profess the faith of the Eastern Orthodox Church of Christ. The Government looks to it that the Crown Prince receives an education suitable to the high office for which he is destined. (Articles 30 and 31.) With the exception of the King and the Crown Prince, no other member of the Royal Family is entitled to any allowance from the Public Treasury. (Article 34.)

SUCCESSION TO THE THRONE AND REGENCY

The Greek Crown and its constitutional rights are hereditary and pass to the legitimate and lawful direct lineal descendants of the then reigning King in the order of primogeniture, preference being given to males. In the lack of such heirs, to the descendants of King George the First in the same order. (Article 35.)

Should there be no successor to the Throne in accordance with Article 35, the King appoints such with the consent of Parliament, convened for the purpose and by a vote of two-thirds of the total number of Deputies taken by open ballot. (Article 36.)

In the event of vacancy of the Throne, the royal authority is temporarily exercised by a three-member Regency, comprised of the President of Parliament, the President of the Constitutional Court and the President of the Council of State. Within two months at the latest from the date the Throne has been vacant, representatives, equal in number to the Deputies, are selected by those citizens having the right to vote as the law provides. These representatives, convening together with the Parliament, elect the King by a majority of two-thirds of the total number taken by open ballot. (Article 37.)

In the event of death or abdication of the King, if the Crown Prince is a minor, the Parliament shall convene, even if its term has expired or it has been dissolved, and shall elect a guardian by absolute majority of its entire number of members taken by open ballot. The guardian must be a Greek citizen of the Eastern Orthodox faith. (Article 39.)

Powers of the King

No act whatsoever of the King shall be valid nor shall it be executed, unless it is countersigned by the competent Minister, who by his signature alone is made responsible. The King shall appoint the Prime Minister and on his recommendation shall appoint and dismiss the members of the Government, which must enjoy the confidence of the Parliament. After general elections, the King shall appoint the leader of the party having the absolute majority in Parliament, as Prime Minister. If no party has an absolute majority, Parliament shall propose a Prime Minister, and the King shall be bound to appoint the one recommended by absolute majority vote of all members of Parliament. If no one obtains the absolute majority, the King shall then appoint the Prime Minister after first having obtained the opinion of the Council of the Nation. (Articles 42 and 43.)

The King shall have the power to suspend the work of the parliamentary session only once, by either postponing the opening or interrupting its continuation. The suspension cannot last more than thirty days and cannot be repeated during the same parliamentary session without the consent of Parliament. The King may dissolve Parliament after taking the opinion of the Council of the Nation, but the Royal decree to this effect must be counter signed by the Council of Ministers and provide for the holding of elections within 45 days. (Articles 45 and

A Bill voted on by the Parliament, but not signed and published within a month by the King, is again submitted to Parliament, and if the Parliament passes it again by absolute majority of all its members, the King shall sign, promulgate and publish it as law within a month. (Article 47-)

The King shall head the armed forces, the administration of which is exercised by the Government. (Article 49.)

The King can in certain instances convoke the Council of the Nation, under his own chairmanship. The Council of the Nation shall be comprised of the Prime Minister, the Speaker of the Parliament, the leaders of the parties in Parliament, the Presidents of the Constitutional Court, the Council of State and the Supreme Court, the Prime Ministers who had served during the last decade and had received a vote of confidence in Parliament, the Chief of the General Staff of National Defence and the Rectors of

the Universities of Athens and Thessaloniki and of the National Metsovion Polytechnic Institute. (Article 54.)

ELECTION AND CONSTITUTION OF THE PARLIAMENT

The Parliament is elected through direct, universal and secret ballot by those citizens who have completed their twenty-first year of age and have the right to vote; voting is obligatory.

There shall be a maximum of 150 Deputies. A majority of these shall be elected from electoral districts, of which there must not be less than 10 nor more than 15; each electoral district shall return not less than five Deputies. based on its population. In addition to the elected Deputies, not less than one-sixth nor more than one-fifth of the total number of Deputies shall be chosen, in a manner to be specified by law, from lists of candidates nominated by the political parties and on the basis of each party's electoral strength. The party lists shall be deposited with the Constitutional Court and published at least eight days before the elections, Candidates appearing on these lists may not also stand as candidates in the electoral districts. A party or coalition of parties which has not accumulated a certain percentage of the total valid ballots shall not be entitled to representation in Parliament. This percentage fixed by law cannot be higher than one-sixth and lower than one-tenth for the parties, and not higher than onethird and lower than one-fourth for the coalitions of parties. (Articles 56 and 57.)

Political parties shall be founded freely by Greek citizens having the right to vote. These parties through their activity shall express the will of the people and must contribute to the advancement of the national interest. The organization, the programme and the activity of the parties must be governed by national and democratic principles. The Charter of every party must be approved by the Constitutional Court and no party shall have the right to participate in elections if its Charter has not had this approval. The political parties shall be required to maintain records of income and expenses. The Constitutional Court shall have the right to dissolve any party whatsoever whenever it ascertains serious violations of the Constitution or the laws. Political parties whose aims or activities are manifestly or covertly opposed to the fundamental principles of the form of government or tend to overthrow the existing social system or endanger the territorial integrity of the Country or its public security shall be outlawed and dissolved by decision of the Constitutional Court. The Deputies of the party being dissolved shall be declared deposed of their office, and the seats held by them in Parliament shall remain vacant until the termination of the parliamentary period. (Article 58.)

The Deputies shall be elected for five consecutive years commencing from the day of the general elections. In order to be eligible for Deputy, the candidate must be a Greek citizen, must have completed his 25th year of age on the day of election, must be eligible to vote in accordance with the law, must be enrolled in an electoral list, and must possess at least a high school, general or vocational education diploma. No one may be elected Deputy for four continuous parliamentary periods, except for those who served as parliamentary Prime Ministers, or leaders of parties recognized according to the Constitution and the Rules of Parliament. Civil servants, regular officers of the armed forces and employees of public enterprises cannot be elected deputies nor be nominated as candidates unless they resign their position prior to being nominated candidates. The duties of the Deputy shall be incompatible with the duties of a director or other representative, administrative or paid legal counsel and employee of commercial companies or enterprises enjoying special

privileges or regular state subsidy based on special legislation. Those falling under any of the above categories must state their choice between the Deputy position and the above tasks within eight days after their election has been made final. The renegation of a Deputy to another party during the Parliamentary period for which he has been elected shall be prohibited and shall be considered as a resignation. A statement of party independence shall be permitted. (Articles 60-64.)

No Deputy may be prosecuted or questioned in any manner, because of an opinion or vote rendered by him during the performance of his duties as a member of the Parliament. By way of exception a Deputy shall be responsible and shall be prosecuted according to the law for insulting and defaming, slanderously or not, a person or an authority. No Deputy may be prosecuted, arrested or imprisoned during the Parliamentary session without the permission of the Body. Permission is not required for "in the act" crimes, as well as for insult and simple or slanderous defamation. (Articles 67 and 68.)

Powers and Operation of Parliament

Articles 71 to 86 cover mainly the procedure for legislation.

THE GOVERNMENT

The number of Ministers cannot be higher than twenty. No member of the Royal Family may be appointed Minister. With the exception of the Prime Minister and the Deputy Prime Ministers, no member of Parliament may be appointed member of the Government, even though he may resign his parliamentary office. No one may be appointed as member of the Cabinet if he lacks the qualifications for Deputy. (Articles 87 and 88.)

SCOPE AND RESPONSIBILITIES

The members of the Government are collectively responsible for its general policy, each one being held personally responsible for his actions or omissions within the competence of his office.

The Government must enjoy the confidence of Parliament. Within fifteen days from the date the Prime Minister has taken the oath of office, it must seek a vote of confidence by the Parliament. Parliament may, by decision taken through an absolute majority vote of all its members, withdraw its confidence from the Government or one of its members. A motion of censure cannot be submitted except after the lapse of one year from the rejection by Parliament of such a motion, or from the approval by it of a motion of confidence submitted by the Government. A motion of censure must be undersigned by at least one-sixth of the Deputies, and the points on which discussion of the motion is to take place, must be clearly specified. By exception a motion of censure can also be submitted before the lapse of one year, if it is undersigned by the half plus one of the entire number of Deputies and is accompanied by a proposal designating a new Prime Minister. (Articles 92 and 93.)

THE COURTS

Articles 95 to 119 deal with the Constitution, powers, and functioning of the courts of justice, including the Constitutional Court, the Supreme Court, and the Courts of Appeal.

ADMINISTRATION OF THE STATE

Articles 120 to 128 deal with organizational principles, of the administration and with the administrative officers of the State. Article 127 states that Parliament at the beginning of each session shall elect two legal experts of recognized professional standing, non-members of Par-

liament, as Commissioners of Administration, to assist in the parliamentary control and application by the administrative services of the principles of honest administration.

THE ARMED FORCES

The armed forces have as their mission to defend the national independence and territorial integrity of the country and the existing political and social system, against external or internal enemies. The administration of the armed forces shall be exercised by the Government through the Chief of the Armed Forces. He, as well as the Chiefs of the Army, Navy, and Air Force, is selected by the Supreme Council for National Defence. The members of the armed forces owe faith and allegiance to the country, the national ideals, and the national traditions and serve the nation. The mission and capacity of a military man is absolutely opposed to ideologies aiming at the overthrow or undermining of the existing political or social régime or the corrupting of the national conscience of the Greeks, or associated with the principles and programmes of parties outlawed. (Articles 129 and 130.)

TRANSITIONAL PROVISIONS

The Regent, who was appointed by Proclamation of the Revolutionary Committee on December 13th, 1967, shall continue to exercise his duties until such time as the first Parliamentary elections in accordance with this Constitution are held, except if the Government invites the King to return to Greece before that time. If, prior to the above time limit, the Regent ceases for any reason to exercise his duties, the Government shall appoint the new Regent. (Article 134.)

From the time this Constitution comes into effect and until the convocation of Parliament, the person exercising royal authority shall issue, on the recommendation of the Council of Ministers, legislative decrees which are not subject to the subsequent approval of Parliament.

EFFECT AND REVISION OF THE CONSTITUTION

Article 137 states that the provisions of the present Constitution which designate the form of government as a Crowned Democracy as well as the balance of the fundamental provisions thereof may never be revised. It does, however, provide for the revision of non-fundamental provisions by request of Parliament after the lapse of ten years from the approval of the Constitution by the referendum.

AMENDMENTS

(As announced by the Prime Minister on September 16th, 1968.)

The present Government will carry out the first elections and these will take place 35 days from the date the elections are decided.

The Constitution will come into effect immediately if approved by the Greek people through the September 29th Referendum, except for 12 of the 138 Articles.

The Council of the Nation will comprise only the Prime Minister, the Speaker in Parliament, the leaders of the two strongest parties in Parliament, of the Constitutional Court and the Chief of the Armed Forces.

The general provisions regarding the Monarchy remain unchanged except that the education of the Crown Prince now becomes the responsibility of both the King and the Government.

The qualification stipulated by the Draft Constitution of July 11th regarding eligibility for Parliament, that he or she must not have willingly acquired another nationality even if this was subsequently to be renounced, is now dropped.

Whereas previously the Administrative Commissioner "the ombudsman" was to have acted on instructions of the Speaker or Prime Minister, he may now act on instructions of the Speaker at the request of the Prime Minister or leader of one of the parliamentary parties.

Whereas previously a final or temporary suspension of a publication could be called for if three convictions had taken place within 10 years, it can now be imposed by Court after a second conviction within five years but only for offences under Article 14, paragraph 4.

Correspondence still remains inviolable except for reasons of national security, public order, or for investigations of crime.

POLITICAL PARTIES

The following parties were suspended by the military junta in April 1967, following the dissolution of the Chamber of Deputies in February:

Centre Union: f. 1961 by G. Papandreou; coalition of Liberals and Progressives together with several smaller groups; Sec. Nicolaides.

Liberal Democratic Centre Party: f. December 1965 as a breakaway party from the Centre Union by 45 members of the Chamber of Deputies who had supported the Government of Stephanos Stephanopoulos in September 1965; Leader Stephanos Stephanopoulos.

National Radical Union (Ethniki Rizospastiki Enosis): 1.
1956 by Constantine Karamanlis: provided the
Government elected February 1956 which lasted until
1963; policy of expanded production and economic
stability; Leader Panayotis Kanellopoulos.

E.D.A.: (Eliniki Demokratiki Aristiki): extreme left party; f. 1953; Leader Ioannis Passalides.

Progressive Party: Leader Spyro Markezinis.

JUDICIAL SYSTEM

The Courts of Law administering justice in Greece are as follows:

The Supreme Court. This is the supreme court in the State, having also appellate powers. It consists of four sections, three Civil and one Penal, and adjudicates in quorum.

Attorney General: Constantine Thanopoulos.

Gourts of Appeal. These are cleven in number. They have jurisdiction in cases of Civil and Penal Law of second degree, and, in exceptional cases, of first degree.

Gourts of First Instance. There are fifty-eight Courts of First Instance with jurisdiction in cases of first degree, and, in exceptional cases, of second degree. They are mixed courts, functioning both as Courts of First Instance and as Penal Courts.

In towns where Courts of First Instance sit there are also Criminal Courts and Juvenile Courts. Commercial Tribunals do not function in Greece, and all commercial cases are tried by ordinary courts of law. There are, however. Tax Courts in some towns.

Courts of the Justice of Peace. There are 360 of these courts throughout the country.

Magistrates' Gourts (or simple Police Courts). There are 48.

In all the above courts, except those of the Justice of Peace and the Magistrates' Courts, there are District Attorneys. In Magistrates' Courts the duties of District Attorney are performed by the Public Prosecutor.

The State Council. In addition to the above there is a State Council, with competence over the following cases: Administrative disputes

Administrative contraventions of law in force Revision of Disciplinary procedure on permanent Civil Servants (1952 Constitution, Articles 87-97).

President of the Supreme Court (Arcopagus): Athnasios Georgiou.

President of Athens Court of Appeal: Dem. RETALIS.

President of the Council of State: ALEXANDROS DEMETSAS.

RELIGION

- The Greek Orthodox Church, the Greek branch of the Holy Eastern Orthodox Church, is the established religion of Greece, to which the majority of Greeks adhere. The Church uses the Nicene Creed without the filingue clause, and administers the seven Sacraments. The Church is administered by a Synod of twelve Metropolitans (Archbishops with sees), elected annually, and representing the Episcopate of 67 Metropolitans. The President of the Synod is the Archbishop of Athens and Primate of Greece, Archbishop Hieronymos Kotsonis.
- The Roman Catholic Church: Rue Homère 9, Athens 135; comprises 7 dioceses: 3 archbishoprics (Athens, Naxos-Tinos and Corfu) and 4 bishoprics (Syra, Santorin, Chio, Crete), 1 Vicariate Apostolic (Salonica) and two exarchates (one for the Bizantin Rite and one for the Armenian Rite). Archbishop of Athens Most Rev. Benedictus Printesis. The Roman Catholic Church has 127 churches.
- The Catholic Church of the Greek Rite in Greece has one parish at Athens (Odos Acharnon 246) and another at Jannitsa (Macedonia); Exarch Apostolic Msgr. Hyacinthe Gad, titular Bishop of Gratianopolis. Odos

- Acharnon 246; the Church, Catholic exarchate of Byzantine rite, has about 3,000 adherents; publ; Katholiki (weekly), the only Catholic paper in Greece. Editor PAUL GARO; circ. 2,500.
- The Greek Evangelical Church (Presbyterian): Bd. Amélie 50, Athens; f. 1886; comprising 30 organized churches; embraces about 1 per thousand of population; member of World Alliance of Reformed Churches: Moderator Rev. Stelios Kaloterakis; publ. Star of the East (monthly).
- Muslims (their status is regulated by Law 2345, "On Minorities"); the law provides as religious head of the Muslims a Chief Mufti; the Muslims in Greece possess a number of mosques and schools.
- The Jewish Community: the Jewish population of Greece, estimated in 1043 at 75,000 people, was decimated as a result of the German occupation. In 1064 there were about 6,000 Jews in Greece. The Chief Rabbi of Athens is JACOB D. ARAR; temple and offices: 5 Melidoni Street, Athens. The officially recognised representative body for the community is the Central Board of the Jewish Communities of Greece, 8 Melidoni str., Athens; f. 1945; Pres. JOSEPH M. LOVINGER.

THE PRESS

At the beginning of 1967, 123 dailies were being published in Greece, no less than 13 being based in Athens and competing for a share in a total circulation of only 700,000. After the coup d'état of April 1967, the number of papers in Athens was halved, total circulation dropped by a third and the remainder of the press was subject to censorship.

The new Constitution of Greece guarantees freedom of expression and of the press. However, the press, according to Article 14, "discharges a public function involving rights and duties and responsibility for the accuracy of its content", so that, although censorship and other preventive measures are prohibited, "seizure after circulation is permitted by order of the public prosecutor" for a variety of reasons (see Constitution, Article 14, above). These include insults to "the Christian and any other known religion" or to the royal family; publications which are "patently rebellious" or aim "at overthrowing the régime", or the existing social system; and publications which "project or diffuse for political exploitation views of outlawed parties or organizations". (Under Articles 19 and 58 political parties or any "union of persons" directed against "the principles of the regime or the social order or the security of the State" are prohibited.)

Article 14 also lays down the procedure to be followed by the public prosecutor in dealing with press offences. For most of these offences a second conviction within five years can result in the temporary or permanent suspension of the offending publication and in suspension from the profession of the offending journalist. For other offences, such as injuring the reputation of a public officer by reference to his "private or family life" when the "public interest" is not involved, suspension of publication can follow after the third offence in ten years.

Two further sections of Article 14 state that the conditions for publication of newspapers "or other political publications", the qualifications and code of conduct of the journalist profession and the rules of operation, including compulsory financial control, of newspaper enterprises "shall be determined by law". These two sections envisage major pieces of legislation being prepared by the Government on the journalistic profession and the running of newspapers. However, such legislation will not presumably be enacted until Article 14, one of the articles of the new Constitution held in abeyance, is brought into operation. In the meantime the present system of censorship, enforced under martial law, remains.

A Press Control Service was established by decree by Colonel Papadopoulos on April 29th, 1967, following the suspension of Article 14 of the Constitution guaranteeing press freedom. Outside Athens and Salonika the functions of censorship were delegated to a local officer and official and were therefore more flexible, so that internal news not carried by the capital's papers has been published in the provinces. From January 25th, 1968, a system of post-publication control of the press has been in use instead of the pre-publication system, and editors have been allowed to determine the lay-out of their papers. Little change was made in the material it was forbidden to publish, and no change in that which it was obligatory to publish.

Eleftheros Cosmos is the leading pro-government organ, and the only paper whose circulation has increased in the period since April 1967. All the newspapers owned by Mrs. Helen Vlachos have closed down, and the formerly pro-Papandreou papers of Mr. Christos Lambrakis (the

dailies Vima and Nea and the weeklies Omada, Tachydromos and Economikos Tachydromos) now continue in much altered form.

The draft of the Press Law announced in 1968 was published in August 1969 to come into effect from January 1st, 1970. It required State supervision of the press and the compulsory registration of persons of all grades working for the press. Removal of a name from the official register implied withdrawal of the right to work as a journalist in Greece. Furthermore, newspapers wishing to employ journalists were required to apply to the Ministry of Information for staff who would be selected from the register of approved journalists. Those guilty of "professional misconduct' were to be liable to prosecution, and publications could likewise be seized, confiscated or suspended. Offences included breach of professional sccreey, inaccurate or concealed news, exploitation of news for personal belief, omission to publish "certain information". and "lack of faith and devotion to the country and the national ideals" as well as "attempting to overthrow the existing form of state or social order". Much opposition was expressed by the Greek press, and as a result copies were confiscated of the pro-government Athens daily "Vradyni", which is not subject to pre-publication censorship. According to the new Press Law of January 1st, 1970, the Government can now exercise economic control over the press. The traditional privilege of importing newsprint duty-free has been removed and although newspapers with a circulation of under 25,000 are entitled to duty-free newsprint, the number of their pages is Government fixed. Newspapers with a circulation of over 100,000 are required to pay 95% of the duty on the newsprint they consume. A second law coming into effect at the same time abolished all tax exemptions formerly enjoyed by newspapers, meaning that some of the larger papers now pay six to nine times more tax.

HUNGARY

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Hungary is a state in Eastern Europe, bounded to the north by Czechoslovakia, to the east by the U.S.S.R. and Romania, to the south by Yugoslavia and to the west by Austria. Its climate is Continental with long, dry summers and severe winters. The language is Hungarian (Magyar). Roman Catholics are the largest single religious denomination with over six and a half million adherents. Other groups are the Hungarian Reformed Church, the Lutheran Church, the Hungarian Orthodox Church and a Jewish community numbering about 80,000. The flag consists of three horizontal stripes of red, white and green. The capital is Budapest.

Recent History

In 1946 a republic was declared and this was replaced in 1949 by a people's democracy on the Soviet pattern. Nationalization of all major industry and the transport and economic systems took place. In 1956 a rising against the regime proved unsuccessful. A new government under the leadership of János Kádár was set up followed by a gradual modification of the totalitarianism associated with the previous government. In April 1967, Jenö Fock became Prime Minister in succession to Gyula Kállai, while János Kádár remained First Secretary of the Hungarian Socialist Workers' Party. Hungary is an original member of the United Nations and aligned with the countries of Eastern Europe through her membership of the Warsaw Defence Pact and the Council for Mutual Economic Assistance (CMEA).

Government

The highest organ of state power is Parliament elected every four years by all citizens over 18 years. Parliament elects the Presidential Council consisting of the President, who is the Head of State, two Vice-Presidents and 17 members. The Council exercises power between sessions of Parliament but it is responsible to it. Highest organ of state administration is the Council of Ministers, elected or removed by Parliament at the suggestion of the Presidential Council. The Hungarian Socialist Workers' Party plays an important part in government through its Central and Political Committees.

Defence

Hungary is a member of the Warsaw Pact alliance of East European States. In 1969 Hungary joined the Geneva Disarmament Commission. Military service starts at 18 years and lasts for a maximum of three years. Total regular forces number 97,000, comprising Army 90,000, Air Force 7,000; there is a flotilla of 11 patrol vessels and 14 other vessels on the Danube. There is also an armed force of 35,000 security troops and border guards known as Workers' Guards, and a Workers' Militia of 100,000. Defence estimates for 1969 total 7,952 million forints.

Economic Affairs

In 1968 a new system of economic management was introduced, known as the "new economic mechanism". The official definition of the plan is "to harmonize State planning and market development". Until then the economy had been based on the standard Soviet central planning system, but under the new scheme industry is being decentralized to a certain extent. The aim is to evolve a Socialist market economy in which business enterprises produce what they want, engage in competition on the domestic and foreign markets and share profits among the workers. Throughout 1969 the transition from the old system to the new has been smooth, and although it is too early to measure the results of the new economic system, it would appear that the changeover has been successful. In 1968 the development of the national economy continued according to plan. The national product and the national income rose by 5-6 per cent, industrial output by more than 6 per cent, retail turnover by 7-8 per cent and exports by 7-8 per cent. Prices rose by only 2 per cent. According to official figures, incomes have risen by 9 per cent in the last two years.

Hungary was formerly a predominantly agricultural country but since the war, industry has been responsible for one half of her total economy. Hungary is an exporter of engineering products, machine tools, buses, telecommunications and electrical equipment, electronic and other instruments, and shipping. She is still a large exporter of meat, fruit and vegetables and half her exports to Western European countries consists of agricultural produce. For the first time for a number of years, Hungary is exporting wheat. Three million tons of grain were harvested in 1969, and Hungary is to export 600,000 tons of wheat to Britain, Czechoslovakia, Italy, Lebanon and Switzerland. Over 97 per cent of the total arable area of the country is collectivized. Vineyards cover 500,000 acres. Chief imports are coal, iron ore, crude oil, coke, cotton and timber.

Hungary has enjoyed observer status at GATT (General Agreement on Tariffs and Trade) for the past three years. In July 1969 she submitted a formal application for membership of GATT.

Transport and Communications

The Hungarian State Railways operate 8,831 kilometres of track of which 566 kilometres are electrified. Budapest's first deep-level underground is due to start operation on April 4th, 1970, When the first 4½ miles out of a total of 6½ will open. The second section, running under the Danube and linking Pest with Buda, opens in 1973. There are 29,040 kilometres of roads. Long-distance bus routes cover about 22,500 kilometres. Navigable inland waterways total some 1,650 kilometres. There is a small merchant fleet using mainly Hungarian-built vessels of an average tonnage of 1,100 tons. These operate from the Danube to Mediterranean ports and the United Kingdom. The state airline MALEV has a wide internal network as well as a dozen international services.

Social Welfare

The management, supervision and control of social insurance comes within the jurisdiction of the Central Council of Hungarian Trade Unions, with the National Social Insurance Council acting as an advisory body. Social insurance is available for everyone, and today about 97 per cent of the population is covered. Great efforts have been made since the war to provide all workers with the same insurance scheme; previously there were different schemes for workers and employees which depended on the nature of their work. Social insurance covers sickness benefits which are available from the first day of sickness. Patients are entitled to sick pay for one year, or two years in the case of tuberculosis. All medical consultation and treatment is free, although a charge of 15 per cent of the total price is generally made for medicines and medical appliances. The social insurance scheme also covers maternity benefits-insured women are paid confinement grants for 20-24 weeks-free layettes, child care allowance (a new service which allows a mother to look after her child at home until he is 3 years old), and family allowances which vary according to the number of children in the family.

In Hungary special pension laws determine the right of employed workers, members of agricultural co-operatives. and private tradesmen to pensions. Male workers are entitled to old-age pensions at the age of 60 years (55 for women), if they have been employed for at least ten years. Workers who have been employed in heavy or unhealthy work may qualify for pension five years earlier than this. The employment period for a full pension is 25 years and this pension amounts to 50 per cent of the worker's average wage prior to retirement. Various other pensions are paid under the Hungarian social insurance scheme, these include invalid pensions, widows' pensions, and orphans' allowances. The only contribution made to social service costs by an employee is to the pension fund. This amounts to 3 per cent of wages for the average worker, though the more highly paid worker will contribute more. The employer pays 4 per cent into the pension fund for each person employed. Cost of health services and other social services are met by state subsidies and contributions from the place of work.

Education

The Educational Act of 1961 modernized the Hungarian educational system and provided the basis of the presentday system. Various changes have been made since 1961, including the revision of the basic school system in 1963, and the introduction of a uniform curriculum in the grammar school in 1965. Children under the age of 3 years attend creches (bölcsödek), and those between the ages of 3 and 6 years attend kindergartens (ovoddk). Neither of these schools is compulsory and, although attendance is increasing, they are not so well-attended as elsewhere in Eastern Europe. Compulsory education begins for the Hungarian child at 6 years of age when he attends the basic school (dltaldnes ishola). Basic education continues until the child is 14, during which time he will be taught general subjects together with some practical training. Provision is made in the basic school for talented children, particularly those who are linguistically inclined. Facilities for secondary education were improved as a result of the

1961 Educational Act. Children are now required to attend school until the age of 16 years. There are four types of secondary school, excluding special schools for the very gifted or, alternatively the backward or abnormal child. Children who do not wish to continue with their schooling after the age of 16 years attend the továbbképző iskoldk for two years, in order to complete their compulsory schooling. The majority of children prefer to continue with their education after 16 years of age. The most popular types of secondary schools are the grammar school (gimndzium) and the technikum. The gimndzium provides a four-year course of mainly academic studies, although some vocational training does figure on the curriculum. The technikum offers full vocational training together with a general education, emphasis being laid on practical work. Apprentice training schools (ipari tanulók gyakorló iskoláják), are attached to factories, agricultural co-operatives, etc., and lead to full trade qualifications. General education is less important as part of the curriculum in this type of school.

Over the past few years demand for education in Hungary has been increasing at an exceptional rate and this is reflected in the government's promotion of educational expansion. Both the number of higher educational institutes and the number of students have increased considerably since before the Second World War, and there are now 78,839 students in 87 higher institutes, including 9 universities and 5 technical universities.

Tourism

Tourism is developing rapidly. Lake Balaton is the main holiday centre for boating, bathing and fishing. The cities have great historical and recreational attractions. Budapest has numerous swimming pools watered by thermal springs. In 1968 there were 4.307,210 foreign visitors.

Nationals of Czechoslovakia, Poland, Romania, U.S.S.R. and Yugoslavia do not require visas to enter Hungary.

Sport

Football is the most popular sport. Swimming, athletics and fencing are also much favoured. Winter sports are popular. Hunting in many parts of the country attracts large numbers of foreign visitors, notably from Germany. At the 1968 Olympic Games in Mexico, Hungary won 10 gold, 10 silver and 12 bronze medals.

Public Holidays, 1970

January 1 (New Year's Day), April 14 (Liberation Day), March 30 (Easter Monday), May 1 (May Day), August 20 (Constitution Day), November 7 (October Revolution Day), December 25 (Christmas).

THE CONSTITUTION

A new Constitution was adopted in August, 1949. It declares Hungary to be a People's Republic, a State of workers and working peasants. The bulk of the means of production is publicly owned. and the right of the working peasants to their land is guaranteed. At the same time, support is given to producer agricultural co-operatives based on voluntary association and common labour. Property acquired by work is protected.

The National Assembly, the supreme legislative body, is a single-chamber parliament, consisting of one representative for 32,000 constituents. It elects, from 349 deputies to the National Assembly, the Presidential Council. It also elects the Council of Ministers, the Supreme Court, and the Attorney General and confirms the plan of the people's economy and the budget. Parliament has at least two sessions a year. Extraordinary sessions may be convened either by a decision of the Presidential Council or at the written request of at least one-third of the deputies.

The Presidential Council of twenty-one members calls the elections, concludes and ratifies international agreements, appoints and recalls diplomats, appoints senior civil servants, makes proposals to Parliament for the members of the Council of Ministers, grants amnestics, and between two sessions of Parliament, issues decrees that have the force of law.

The highest organ of State Administration is the Council of Ministers, responsible to the National Assembly.

Local organs of State power are the Councils, from whose members Executive Committees are elected.

Elections, both to the National Assembly and to the local Councils, are held every four years by universal suffrage of adults of eighteen years and over.

The Constitution also lays down the fundamental duties of the citizen as being to defend the wealth of the people, to consolidate public property, increase the economic strength of the Hungarian People's Republic, to raise the standard of living of the workers and advance their education, and to strengthen the order of the People's Democracy.

The Constitution guarantees the right to work, leisure,

medical services and education.

Citizens are equal before the law, and discrimination on

grounds of sex, religion or nationality is punishable. Women have equal rights with men. Minorities have the right to education in their own language.

Liberty of conscience and worship is guaranteed, and the Church is separated from the State. Freedom of the Press, of assembly, of speech, and the right of workers to organise themselves are guaranteed. The freedom of the individual, and the privacy of the home and of correspondence is inviolable.

JUDICIAL SYSTEM

The Hungarian judicial system was established by a law passed in 1954. The administration of justice is the function of the county district courts, the municipal district courts, the county courts, the Municipal Court of Budapest and the Supreme Court. The system of appeal is as follows: appeals against the decisions of county district courts and municipal district courts are considered by the county courts or the Municipal Court of Budapest. Appeals against the decisions of the latter are considered by the Supreme Court. The Chief Public Prosecutor and the President of the Supreme Court have the right to submit to the Supreme Court protest on legal grounds against the final decision of any court.

In the first instance, cases are judged by divisions composed of one regular judge and two lay assessors. In the second instance and at the Supreme Court, only regular judges may preside. The President and the judges of the Supreme Court are elected by Parliament, the other regular judges are appointed by the Minister of Justice. The lay assessors are elected by the local councils.

The Chief Public Prosecutor is responsible for exercising supervision over legality in all fields of the judicial system. President of the Supreme Court: Dr. Ödön Szakács.

Minister of Justice: Dr. Minkly Koron.

Chief Public Prosecutor: Dr. Géza Szénásti

THE PRESS

The Hungarian Constitution guarantees freedom of the Press and freedom of speech and many aspects of the organization of the Press including provisions of law have been established to secure these ends. Printing works, publishing houses and paper mills have been nationalized. Failures in public administration, economic, cultural and other fields, are commonly criticized in editorials and grievances publicized in letters from members of the public. Since 1963 all official institutions so criticized have been legally obliged to investigate the matter promptly. In addition close relations are maintained between journalists and readers by means of frequent conferences held in factories and farms.

Conversely, considerable legislation is designed to prevent the abuse of Press rights; Article 127 of the penal code penalizes the provoking of hatred of minorities by the Press; incitement and libel are similarly dealt with. Since a decree in 1959 persons and institutions victimized by false Press reports may claim rectification which a govern-

ment minister is empowered to enforce.

A period of growing liberalization—later castigated as the personality cult—from 1954 was brought to an abrupt end after the crisis of 1956. The following year the Information Office was founded with the functions of granting licences, guiding papers, distributing newsprint and controlling the national news agency, Magyar Távirati Iroda, which monopolizes the reception and distribution of news. The scope of the Press is further curtailed by extensive legal provisions regarding state secrets.

As in many East European countries most papers are the organs of political parties, trade unions, youth and social organizations. A wide range of specialist periodicals are published by societies, factories, scientific institutions, etc. There is no private ownership of publications but since 1957 independent commercial organizations have received

publishing licences.

The high circulation of daily papers enables publishing houses to produce high standard specialized periodicals. Moreover, the state gives direct subsidies to certain education, medicine and literature publications, to the religious press and to the four minority language papers. As a result at least six literary periodicals of 132-480 pages each are enabled to appear monthly. Some 80 per cent of newspapers

are sold by subscription.

There are 27 dailies with an average total circulation of 2,230,000. This averages sixteen dailies per hundred people which compares with twenty-eight per hundred in Czechoslovakia. Four of the five Budapest dailies sell a total of about 1,155,000 copies and circulate nationally. In order of popularity they are: Népszabadsdg (810,000), Népszava (290,000), the evening Esti Hirlap (250,000) and Magyar Nemzet (90,000). Népszabadsdg, the most important daily, central organ of the Socialist Workers' Party and required reading for members, consists of twelve pages (twenty on Sundays) and is read aloud in farm and factory and over

the radio. Otherwise the paper most respected for the quality

of its news coverage and commentary is Magyar Nemzet.

Weekly newspapers and periodicals number about 415. Among the most popular are the illustrated weeklies, among which the satirical Ludas Matyi (450,000), and the women's magazine Nök Lapja (440,000) and the political paper Szabad Föld (460,000). A news magazine giving a high standard of reporting and political discussion is Magyarország. Specialized periodicals include 20 cultural publications, 24 medical journals, 26 scientific papers, 14 agricultural and 13 religious publications. Of this last category Uj Ember, Evangélikus Elet and Uj Elet for Catholic, Lutheran and Jewish congregations respectively are representative.

PUBLISHERS

The structure of the book trade in Hungary closely resembles that of the U.S.S.R. Books are regarded primarily as vehicles for education, culture and information rather than as commercial goods, and publishers and booksellers are controlled by the state. The Board of Publishers in the Ministry for Culture is the directive organ of publishing and distribution. It controls financial matters and all publishing programmes must gain its approval. The Board expects to show a yearly overall profit but may instruct a publishing house to budget for a loss if the Board considers it socially desirable to publish certain uneconomic works. The Council of Publishers, an adjunct of the Board of Publishers, is an advisory board composed of experts, specialists, and representatives of state and social organs. It offers suggestions in connection with publishing policies and expresses opinions on annual and long-term plans of the publishing houses.

Book distribution is carried out by three enterprises, two of which, the National Enterprises for Book Distribution and Müvelt Nép (Cultured People) Company for Book Distribution, come under the immediate direction of the Board of Publishers. The third enterprise, the Co-operative Book Distributing Company, is under the direction of the National Centre of Co-operatives, which is, in turn, supervised by the Board. The National Enterprise, dealing with the distribution of books in towns, has about 146 bookshops, while Müvelt Nép, with approximately 64 bookshops, has agents working on a commission basis to sell in factories. Villages are catered for by the Co-operative Book Distributing Company through its 145 bookshops and its village commission agents (mostly teachers or other cultural workers). Bookshops are also owned by the Publishing House of the Hungarian Academy of Sciences which has its own distributive organization, and by Táncsics Publishers, the trade union's publishing house. Kossuth Publishers, of the Hungarian Socialist Workers' Party, distributes its publications in factories and other work establishments through voluntary helpers. A vast network of commission agents, built up in recent years, has proved an effective means of recruiting new readers. Circular letters have also been used to promote book distribution.

Export and import of books is handled by Kultura Hungarian Company for Books and Newspapers. Three million books a year, both Hungarian and foreign language publications, are exported by Kultura which maintains business relations with eighty countries. Five million books per year are imported, mainly from socialist countries, U.K., U.S.A., France and the German Federal Republic. Kultura also deals in periodicals, exporting about fifteen million copies and importing seven million.

Book publicity takes the form of reviews in organs of the book trade such as Könyvtájčkoztato (Library Information), in daily papers, on radio and television. Books from Hungary, published quarterly in English, French and German, serves the foreign reader. To arouse wider interest the Festive Week of the Book is held every year, mainly to promote modern Hungarian literature. Authors meet readers, sign their works, and take part in meetings. Other occasions such as the Day of Poetry, Book Months of Technical and Agricultural Publications and special sales serve a similar purpose.

The Book Publishers and Booksellers' Information Centre undertakes the general and central work of publicity as well as conducting market research, compiling bibliographies and statistics, editing the periodicals of the book trade and issuing information. Negotiations for the sale or purchase of translation rights between Hungarian authors and publishers, and foreign publishers are conducted by Artisjus. Payments to foreign authors for translation rights are usually in blocked forints which may be used in a number of ways inside Hungary but not to pay for publishing. Generally payments are subject to 20 per cent tax and 10 per cent agency commission to Artisjus.

ICELAND

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag. Capital

Iceland is a volcanic island situated near the Arctic Circle in the North Atlantic. The island lies 155 miles south-east of Greenland, 645 west of Norway and 500 miles north of Scotland. The climate is cold with average temperatures ranging from 10°C (50°F) in summer to 1°C (34°F) in winter. Icelandic is the official language. The Evangelical Lutheran Church is the established church and embraces 96 per cent of the population. The flag is blue with a red cross bordered with white. The capital is Reykjavík.

Recent History

Iceland became independent in 1944 when the Convention linking it with Denmark under the Danish throne was terminated. Iceland is a founder member of the Nordic Council (1953) and has belonged to both NATO and the Council of Europe since 1949. In 1958, as a conservancy measure, Iceland extended her territorial waters from 3 to 12 miles off-shore. The United Kingdom challenged the decision and British vessels continued to fish inside the new limits under naval protection. In 1960 they withdrew pending the decision of the United Nations Conference on the Law of the Sea. The Icelandic Government agreed to a 6-mile limit for British fishing boats until March 1964, since when the 12-mile limit has been imposed.

Iceland is governed by a coalition of the Independence Party and the Social Democratic Party. In the elections of June 1968 Dr. Kristjan Eldjarn became Iceland's President. Iceland devalued by 35 per cent in November 1968 and shortly afterwards the Icelandic Parliament voted to make an application to join EFTA. Iceland is expected to join EFTA in March 1970.

Government

Executive power is vested in the President and the Cabinet consisting of the Prime Minister and six other Ministers. The Althing (Parliament) is divided into an Upper and Lower House. The Lower House is elected by universal suffrage. The Upper House consists of members chosen by the United Althing.

Defence

Iceland has no defence forces of her own but is a member of the North Atlantic Treaty Organization (NATO). There are units of United States Forces based on the island as part of NATO defence strategy.

Economic Affairs

Iceland's economy is based on fishing which provides almost all of her exports. Only I per cent of the land area is cultivated. Farming is mainly sheep-rearing. The principal crops are hay and roots for fodder. Hot-house cultivation using thermal springs produces fruit, flowers and vegetables. Industry is largely based on the fisheries, processing and tinning the catches, and shipbuilding and repairing. The industrial potential of the thermal springs

is being investigated. The first development plan, 1963-66, provided for overall economic growth and included large subsidies for agriculture and fisheries as well as increased investment in hydro-electric power plant.

In spite of a 25 per cent devaluation in November 1967, the balance of trade continued to deteriorate during 1968. This was due to a considerable fall in catches of fish, together with a slump in world prices, while imports maintained their buoyancy. The 20 per cent import surcharge and 20 per cent tax on foreign currency purchases introduced in September 1968 did not have the desired effect and in November the Icelandic krónur was devalued by 35 per cent.

Transport and Communications

There are no railways. Much of the interior is uninhabited and the main roads follow the coast line. Regular motor coach services link the main settlements. Heavy freight is carried by coastal shipping. The development plans provide for new roads and harbour installations. Air transport is particularly important to Iceland and is used, for example, to transport agricultural produce from remote districts. There are regular air services between Reykjavík and outlying townships.

Social Welfare

There is a comprehensive system of social security providing a wide range of insurance benefits including old-age pensions, family allowances, maternity grants, widows' pensions, etc. Contributions to the scheme are compulsory. Pension and health insurance now apply to the whole population. Accident insurance applies to all wage and salary earners and self-employed persons—unless they request exemption—and unemployment insurance to the unions of skilled and unskilled workers and scamen in all towns and villages of over 300 inhabitants, as well as to several unions in villages of less than 300 inhabitants.

Education

Education is compulsory and free for all children between the ages of 7 and 15 years. There is one university and five colleges. In urban regions primary education is available in day schools. In the more remote country districts, where there is no state boarding-school, instruction is provided by the "Travelling Teacher" scheme, whereby the pupil receives education in his own home. Three to four years of ordinary secondary education are then available. A good certificate of education after three years at a middle or general secondary school entitles entry to a High School (Menniashchi) or a teachers' training college. The matriculation examination at the end of four years at High School is the qualification for University entrance.

Tourism

Iceland's main attraction for tourists lies in the ruggedness of the interior with its geysers and thermal springs. Mountaineering and pony trekking are increasingly popular

ICELAND-(Introductory Survey, Statistical Survey)

as well as skiing and the study of bird life. In 1968 receipts from tourism amounted to 3 million and expenditure to 4 million.

Visas are not required by nationals of the following countries: Austria, Belgium, Canada, Cyprus, Denmark, Finland, France, Gambia, Germany (Federal Republic), Greece, Ireland, Italy, Jamaica, Kenya, Luxembourg, Malaysia, Monaco, The Netherlands, Norway, Portugal, San Marino, Sierra Leone, Singapore, Spain, Sweden, Switzerland, Tanzania, Trinidad and Tobago, Tunisia, Turkey, Uganda, U.K., U.S.A., Yugoslavia, Zambia.

Sport

The national sport is wrestling; but football, athletics and winter sports are universally popular. All children must, by law, learn to swim.

Public Holidays 1970

January 1 (New Year's Day), March 26 (Maundy Thursday), March 27 (Good Friday), March 30 (Easter Monday),

1st day of Summer (end of April), May 1 (Labour Day), May 7 (Ascension Day), May 18 (Whit Monday), June 17 (National Day), Aug. 4 (Bank Holiday), Dec. 1 (Independence Day), December 25 and 26 (Christmas). Dec. 31 (New Year's Eve).

Weights and Measures

The Metric System is in force.

Currency and Exchange Rates

The principal unit of currency is the Krónur (Kr), which is divided into 100 Aurar.

Several years of severe inflation resulted in a 24.6 per cent devaluation in November 1967. A further 35 per cent devaluation was carried out in November 1968.

Notes: Krónur 1,000, 500, 100, 50, 25, 10, 5, 1.

Coins: Krónur 2, 1; Aurar 25, 10, 5, 2, 1. Exchange rate: 208 Kr. = £1 sterling

86 Kr. = \$1 U.S.

THE CONSTITUTION

From the year 930, when the Icelandic Free State was founded, settlement beginning in 874, until 1264 the land was an Independent Republic. In that year it lost its independence, falling first under Norwegian rule and then in 1380, with Norway, under Danish rule. When in 1814 Norway came under Sweden, Iceland remained with Denmark, and this continued until 1918, when its sovereign status was recognised. Certain subjects were reserved for joint consideration. The Order of Succession of the Crown was the most important. There was a Joint Committee which reviewed important legislation of both States and promoted bills aiming at co-operation. Citizens of both States enjoyed equal rights in the other, but were exempt from military service in the other. The union with Denmark was dissolved and a new Republican Constitution established on June 17th, 1944.

THE GOVERNMENT

The President is elected for four years by universal suffrage.

The Legislative power is jointly vested in the Althing, and the President. The Executive power is exercised by the President and other governmental authorities in accordance with the constitution and other laws of the land.

The Ministry is responsible to a bicameral legislature, the Althing, which has a regular annual session.

The Althing is composed of 60 members, 49 of whom are elected by 8 proportionately represented constituencies for a period of four years, while 11 supplementary seats are allotted to the parties on a proportional basis. The Althing is divided into two houses, the efri deild, or Upper House, and the nedri deild, or Lower House; but sometimes both Houses work together as a United

Althing. The Upper House consists of a third of the members whom the United Althing chooses from amongst the representatives, the remaining two-thirds forming the Lower House. The voting age, both for local administrative bodies and for the Althing, is reached by the electors (men and women) at 20.

The budget must be introduced in the United Althing but other bills may be introduced into either House. A bill which the Althing has already passed, may become law even if the President refuses to sign it, if the Althing passes it again by a two-thirds majority. Ministers may speak in either House, but may vote only in that of which they are members. The Ministers are responsible to the Althing and may be impeached by that body, in which case they are tried by a special Tribunal.

Substitute members are elected at the same time and in the same manner as Althing members, in such electoral districts as elect members by proportional representation. The eleven supplementary members elected at general elections take the seats allotted to the parties for equalization, intended to achieve as near a really proportional representation with regard to the total of votes gained by each party as possible, without raising the total number of members above 60.

LOCAL GOVERNMENT

For purposes of Local Government the country is divided into Provinces, Districts and Municipalities. The 8 Urban Municipalities are governed by Town Councils, which possess considerable autonomy. The Districts also have Councils and are further grouped together to form the Provinces, over each of which a centrally appointed Chief Official presides. The franchise for municipal purposes is universal above 20 years, conducted on a basis of proportional representation.

REPUBLIC OF IRELAND

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Ireland is an independent state comprising 26 of the 32 counties making up the island. The remaining six counties in the north come under the jurisdiction of the Governments of the United Kingdom and of Northern Ireland. Ireland lies in the Atlantic, 50–100 miles west of Great Britain. The climate is mild and equable, Irish is the official first language, but English is universally spoken. Official documents are printed in English and Irish. Ninety-five per cent of the population are Roman Catholic and 5 per cent Protestant. The flag consists of three vertical bands of green, white and orange. The capital is Dublin.

Recent History

The Republic remained neutral during the Second World War and has since joined no military alliances. The country has contributed to international affairs in many ways. It is a very active member of the United Nations and has sent military contingents to the Congo and to Cyprus as part of UN peace-keeping activities.

In the Presidential election of June 1966, President Eamon de Valéra was re-elected. John Lynch became Prime Minister in November 1966 and he was re-elected to that office following the general election of June 1969. In a referendum held in October 1968 the Government's proposal to change from proportional to direct election of Representatives was defeated.

Government

The President is elected by direct adult universal suffrage for a seven-year term. As Head of State he summons or dissolves Parliament which consists of the House of Representatives and the Senate. The House of Representatives is elected by universal adult suffrage for a five-year term on the basis of proportional representation. Of the 60 members of the Senate, 49 are elected and 11 nominated by the Prime Minister. Executive functions are exercised by the Government which is responsible to Parliament.

Defence

There is a permanent defence force of 13,000. Recruitment is voluntary. Defence estimates for the year ending March 1969 provide for an expenditure of £12.45 million.

Economic Affairs

The economy is based on agriculture with processed foods, live animals and woollen textiles as the chief exports. The U.K. is the principal foreign customer, and free trade between Ireland and the United Kingdom in all commodities, except certain agricultural goods, was established in July 1966, with the immediate ending of British import duties and the gradual abolition of Irish duties. In 1967 Britain took 70 per cent of the total Irish exports and provided Ireland with 50 per cent of her imports. The main industries are food and tobacco manufacture and brewing. An estimated yearly output of 150,000 tons is expected from recently discovered deposits of lead, zinc

and copper concentrates at Tynagh. In 1958 the Government published a five-year programme, which has helped the country to achieve a growth rate of 4½ per cent per annum. Although this fell to under 2 per cent from 1964 to 1966, it once more reached 4 per cent in 1967, and exports rose by 16 per cent in the same year. A third programme for economic expansion covers the period 1969-72. Ireland has applied for membership of the EEC. Industrial grants for 1967-68 rose to a total of £9,048,000 for 229 projects.

Transport and Communications

There are 1,915 miles of railways operated by the State. Diesel and diesel-electric trains have replaced steam locomotives virtually everywhere. Roads extend for 53,324 miles, 9,894 miles of which are main roads. Chief sea ports are Dublin and Dun Laoghaire, Cork and Cobh, Waterford and Galway. There is an international airport on the transatlantic route at Shannon. Air transport is provided by the Irish airline Aer Lingus.

Social Welfare

Social Welfare benefits in Ireland fall into two general categories: (1) those received under compulsory insurance schemes by contributors and their dependants and (2) those received on a non-contributory basis by people of inadequate means. Childrens' allowances are also paid to all households for each child without regard to family means.

Social Welfare Insurance is compulsory for non-manual workers whose annual earnings are less than £1,200, and for all manual workers. Non-manual workers earning in excess of £1,200 may be allowed to continue as voluntary contributors for pensions. Contributions are shared by the employer, the employee and the State. The scheme provides for widows and old-age pensions, unemployment and disability benefits, occupational injuries, etc.

People of inadequate means who are not entitled to benefit under these contributory schemes may receive non-contributory pensions or other benefits from the State or other public funds. These benefits include widows pensions, old-age pensions, home assistance, employment assistance and disablement and blind pensions.

The Health Service in Ireland operates according to income: all services are available free to lower income groups while upper income groups generally pay for their health services.

Education

Education in Ireland is compulsory from the age of 6 to 14. Most children attend a National School of their own denomination. The State entrusts the local management of primary schools as much as possible to the various religious denominations, but meets most of the cost, and maintains a large measure of control by prescribing the programme and subjecting the schools to regular inspection.

POST PRIMARY EDUCATION:

(a) Secondary Schools in contrast to primary schools are private institutions run by boards of governors or

IRELAND-(Introductory Survey)

religious communities. The Department of Education pays a grant in respect of each eligible pupil and 75 per cent of the teachers' salaries. A supplementary government grant is also paid for each pupil to schools that do not charge fees, so that in effect, all but a very small proportion of secondary schools offer free education. The programme is prescribed by the Department of Education and courses last five or six years starting at the age of 12. Pupils take the *Intermediate Certificate* at 15 or 16 and the *Leaving Certificate* at 17 or 18.

- (b) Vocational Education provides primary school leavers with a general and practical training for employment, as well as providing more specialized courses in technical training. In each county these schools come under the management of a Vocational Education Committee elected by the local authority. Two-thirds of the cost is borne by the Department of Education and the balance by the local authority.
- (c) An increasing number of comprehensive schools combine academic, technical and vocational subjects in a wide curriculum.
- (d) Regional technical colleges are at present planned to provide courses of advanced second level education, mainly for pupils of vocational schools but also open to secondary and comprehensive pupils.

The Leaving Certificate qualifies for entrance to the two universities, which are both self governing, though they receive annual state grants. The National University of Ireland is made up of University College Dublin, University College Cork and University College Galway. The University of Dublin consists of Trinity College Dublin.

The Department of Education provides university grants. The total education budget for 1969-70 is over £50 million representing over 10 per cent of government spending.

Tourism

In 1968, tourist expenditure amounted to over £75 mil-

lion. The country has numerous beauty spots, notably the Killarney Lakes and the West Coast.

Nationals of the following countries do not require a visa: Argentina, Austria, Belgium, Bolivia, Brazil, Chile, Colombia, Costa Rica, Denmark, Ecuador, El Salvador, Finland, France, German Federal Republic, Greece, Guatemala, Honduras, Iceland, Italy, Japan, Liechtenstein, Luxembourg, Mexico, Monaco, Morocco, Netherlands, Nicaragua, Norway, Panama, Paraguay, Peru, Portugal, South Africa, Spain, Sweden, Switzerland, Tunisia, Turkey, U.K. (including Commonwealth countries), U.S.A., Uruguay, Venezuela.

Sport

THE CONSTITUTION

The original Constitution of the Irish Free State came into operation on December 6th, 1922. Certain provisions which were regarded as contrary to national sentiments were gradually removed by successive amendments, with the result that by 1937 the text differed considerably from that of the original document. It was superseded by an entirely new Constitution, which was approved by Parliament (Dáil Éireann) on June 14th, 1937, and enacted by the people by means of a plebiscite on July 1st. This new Constitution came into operation on December 29th, 1937.

TITLE OF THE STATE

The title of the State is Eire or, in the English language, Ireland.

NATIONAL STATUS

The Constitution declares that Ireland is a sovereign, independent, democratic State. It affirms the inalienable, indefeasible and sovereign right of the Irish nation to choose its own form of government, to determine its relations with other nations, and to develop its life, political, economic and cultural, in accordance with its own genius and traditions.

The Constitution applies to the whole of Ireland, but, pending the re-integration of the national territory, the laws enacted by the Parliament established by the Constitution have the same area and extent of application as those of the Irish Free State.

THE PRESIDENT

At the head of the State is the President, elected by direct suffrage, who holds office for a period of seven years. He, on the advice of the Government or its head, summons and dissolves Parliament, signs and promulgates laws and appoints judges, and, on the nomination of Dáil Éireann, appoints the Taoiseach (Prime Minister) and, on the nomination of the Taoiseach and with the previous approval of Dáil Éireann, the other members of the Government. The supreme command of the Defence Forces is vested in him, its exercise being regulated by law.

In addition, the President has power to refer certain Bills to the Supreme Court for decision on the question of their constitutionality; and also, at the instance of a prescribed proportion of the members of both Houses of the Oireachtas, to refer certain Bills to the people for decision at a Referendum.

The President, in the exercise and performance of certain of his Constitutional powers and functions, has the aid and advice of a Council of State.

PARLIAMENT

The Oireachtas or National Parliament consists of the President and two Houses, viz. a House of Representatives, called Dáil Éireann, and a Senate, called Seanad Éireann. The Dáil consists of 144 members, who are elected for a five-year term by adult suffrage on the system of proportional representation by means of the single, transferable vote. Of the sixty members of the Senate, eleven are nominated by the Taoiseach (Prime Minister), six are elected by the universities, and forty-three are elected from five panels of candidates established on a vocational basis, representing: (1) National Language and Culture, Literature, Art, Education, and such professional interests

as may be defined by law for the purpose of this panel; (2) Agriculture and allied interests, and Fisheries; (3) Labour, whether organized or unorganized; (4) Industry and Commerce, including banking, finance, accountancy, engineering and architecture; (5) Public Administration and social services, including voluntary social activities.

POWERS OF THE SENATE

A maximum period of ninety days is afforded to the Senate for the consideration or amendment of Bills sent to that House by the Dáil, but the Senate has no power to veto legislation.

EXECUTIVE POWER

The Executive Power of the State is exercised by the Government, which is responsible to Dáil Éireann and consists of not less than seven and not more than fifteen members. The head of the Government is the Taoiseach (Prime Minister).

FUNDAMENTAL RIGHTS

The State recognizes the family as the natural, primary and fundamental unit group of Society, possessing inalienable and imprescriptible rights antecedent and superior to all positive law. It acknowledges the right and duty of parents to provide for the education of their children, and, with due regard to that right, undertakes to provide free education. It pledges itself also to guard with special care the institution of marriage.

The Constitution contains special provision for the recognition and protection of the fundamental rights of citizens, such as personal liberty, free expression of opinion, peaceable assembly, and the formation of associations and unions.

Freedom of conscience and the free practice and profession of religion are, subject to public order and morality, guaranteed to every citizen. No religion may be endowed or subjected to discriminatory disability. The special position of the Catholic Church as the guardian of the faith professed by the majority of the citizens is recognised by the State. The other religious denominations existing in the country at the date of the coming into operation of the Constitutions are also recognised.

DIRECTIVE PRINCIPLES OF SOCIAL POLICY

Certain principles of social policy intended for the general guidance of the Oireachtas, but not cognisable by the courts, are set forth in the Constitution. Among their objects are the direction of the policy of the State towards securing the distribution of property so as to subserve the common good, the regulation of credit so as to serve the welfare of the people as a whole, the establishment of families in economic security on the land, and the right to an adequate means of livelihood for all citizens.

The State pledges itself to safeguard the interests, and to contribute where necessary to the support, of the infirm, the widow, the orphan and the aged, and shall endeavour to ensure that citizens shall not be forced by economic necessity to enter occupations unsuited to their sex, age or strength.

AMENDMENT OF THE CONSTITUTION

No amendment to the Constitution can be effected except by the decision of the people given at a Referendum.

POLITICAL PARTIES

Fianna Fáil (The Republican Party): was formed in 1926 and provided the Government of Ireland from 1932 to 1948, from 1951 to 1954, and 1957 to date, with Éamon de Valéra. President of the organization, as Taoiseach (Prime Minister) until his election as President of Ireland in June 1959, when he was succeeded in both posts by Seán F. Lemass. John Lynch became Taoiseach and President of Fianna Fáil on the resignation of Seán Lemass in November 1966. It has 2,000 branches and 75 members in the Dáil. Gen. Sec. Senator Thomas Mullins. Offices: 13 Upper Mount Street, Dublin; Party organ: Gléas (monthly).

Fine Gae! (United Ireland Party): Formed in September 1933 by the amalgamation of Cumann na nGaedheal (the Cosgrave Party), the Centre Party (formerly the Farmers' Party), and the National Guard (formerly the Army Comrades Association). It has 50 members in the

Dail. Leader Liam Cosgrave, T.D.; Hon. Secs. Denis Jones, T.D., Patrick J. Lindsay, T.D. Offices: 16 Hume St., Dublin.

The Labour Party originated with the addition of political functions to the Trade Union Congress in 1912. At the end of 1930 it was decided to separate the political and industrial functions of the Party, and the Trade Union Congress and the Labour Party became separate bodies. The Chairman of the Party is DAN BROWNE; Leader of the Parliamentary Labour Party is B. Corisii (Deputy); Gen. Sec. Brendan Halligan. Offices: 20 Earlsfort Terrace, Dublin.

Sinn Fein: 30 Gardiner Place, Dublin; f. 1905; aims: to end British occupation of Irish Territory, to end partition rule in Ireland and to establish a Democratic Socialist Republic of all Ireland. Publ. *United Irishman*: circ. 35,000.

THE JUDICIAL SYSTEM

Justice is administered in public by Judges appointed by the President on the advice of the Government. The Judges of all Courts are completely independent in the exercise of their functions. The jurisdiction and organization of the Courts are dealt with in the Courts (Establishment and Constitution) Act 1961, and the Courts (Supplemental Provisions) Acts, 1961 to 1968.

THE SUPREME COURT

The Supreme Court, consisting of the Chief Justice and four other Judges, has appellate jurisdiction from all decisions of the High Court. The President of the Republic may, before signing any Bill, refer it to the Supreme Court, to decide whether it is constitutional.

THE COURT OF CRIMINAL APPEAL

The Court of Criminal Appeal, consisting of the Chief Justice or an ordinary Judge of the Supreme Court and two Judges of the High Court, deals with appeals by persons convicted on indictment, where leave to appeal has been granted. The decision of this Court is final unless the

Court or the Attorney-General certifies that the point of law involved should, in the public interest, be taken to the Supreme Court.

THE HIGH COURT

The High Court, consisting of the President of the High Court and six other Judges, has full original jurisdiction in, and power to determine, all matters and questions whether of law or fact, civil or criminal. The High Court on circuit acts as an appeal court from the Circuit Court. The Central Criminal Court sits as directed by the President of the High Court to try criminal cases outside the jurisdiction of the Circuit Court. The duty of acting as the Central Criminal Court is assigned, for the time being, to a Judge of the High Court.

CIRCUIT AND DISTRICT COURTS

The civil jurisdiction of the Circuit Court is limited to f600 in contract and tort, f1,000 in actions founded on hire-purchase and credit-sale agreements, f2,000 in equity, and f5,000 in probate and administration, but where the

IRELAND-(JUDICIAL SYSTEM, RELIGION)

parties consent the jurisdiction is unlimited. In criminal matters the Court has jurisdiction in all cases except murder, treason, piracy and allied offences. A Circuit Judge is assigned to each circuit and two to the Dublin circuit. The Circuit Court acts as an appeal court from the District Court, which has a summary jurisdiction in a large number of criminal cases where the offence is not of a serious nature. In civil matters the District Court has jurisdiction in contract and tort (except slander, libel, criminal conversation, seduction, slander of title, malicious prosecution and false imprisonment) where the claim does not exceed £50. In actions founded on hire-purchase and credit-sale agreements the jurisdiction extends to £100.

All criminal cases except those dealt with summarily by a Justice in the District Court are tried by a Judge and a Jury of twelve. Juries are also used in very many civil cases. In a criminal case the jury must be unanimous in reaching a verdict but in a civil case the agreement of nine

members is sufficient.

RELIGION

The religious professions of the population are approximately as follows: Roman Catholics 2,700,000; the Church of Ireland (Anglicans) 100,000; Presbyterians 20,000; Methodists 8,000; all others 10,000.

The organization of the churches takes no account of the partition of Ireland into two separate political entities. Thus the Catholic Primate of All-Ireland and the Protestant Episcopalian Primate of All-Ireland now have their seat in Northern Ireland at Armagh, and the headquarters of the Presbyterian Church in Ireland is at Belfast.

ITALY

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Italy is a peninsula extending from southern Europe into the Mediterranean Sea. The peninsula is about 730 miles long and 150 miles at its widest point. The two principal islands are Sicily to the south-west and Sardinia to the west. The Alps form a natural boundary to the north where the bordering countries are France to the north-west, Switzerland and Austria to the north and Yugoslavia to the north-east. The climate is Mediterranean. The language is Italian. German is spoken in the Alto Adige region on the Austrian border, and in the Basilicata region of eastern Italy there is an Albanian-speaking minority. Roman Catholicism is the state religion. The flag has three vertical bands of green, white and red. The capital is Rome.

Recent History

In 1946, as the result of a plebiscite, the Monarchy was abolished and a Republic officially declared in 1948. In 1952 Italy joined the European Coal and Steel Community and in 1958 was one of the founder-members of the European Economic Community (the Common Market). Since the war the Christian Democratic Party has dominated government coalitions but in the General Election of April, 1963, it lost ground to the Right and to the Communists. In November, 1963, and February, 1966, governments under Signor Moro were formed with the participation of the Socialist Party. Following the election of 1968, the centre-left coalition was dissolved and a Christian Democrat "caretaker" government under Giovanni Leone was formed. In November this government was dissolved and a coalition of Christian Democrats, Socialists and Republicans was formed under Mariano Rumor (December). This government was followed in March 1969 by another, composed of the same parties and still under Rumor. In July 1969, after the split in the Socialist Party when the former Social Democrats broke away to form the Unitarian Socialist Party, the coalition government fell and was followed in August by a minority Christian Democrat government under Mariano Rumor. Attempts to revive the coalition were continued throughout the rest of 1969. The government resigned in February 1970 and Signor Rumor agreed to try and form a new four-party coalition.

Following a severe illness President Segni resigned in December 1964, and was succeeded by Giuseppe Saragat, the former leader of the Social Democratic Party.

Flooding in November 1966 caused irreparable damage to art treasures in Florence. The foundations of Venice were also dangerously affected. An earthquake caused serious loss of life and heavy damage in Western Sicily in 1967. Throughout 1968 students organized strikes and demonstrations in favour of university reform, and nation-wide strikes by workers in November and December supported demands for higher pensions and the abolition of zonal wage differentials.

Strikes and labour unrest continued in the spring and autumn of 1969, mainly in support of demands for social reforms and for greater government action to solve the severe housing shortage. There were outbreaks of violence, instigated by extremist groups of the right and left, and a bomb explosion in a Milan bank in December killed fourteen people.

In November 1969 a Bill was passed by the Chamber of Deputies which would legalize divorce on certain grounds. The Vatican has stated that it would consider final approval of the Bill by the Senate as unilateral breaking of the Concordat.

An attempt to settle the dispute between Italy and Austria over the Alto Adige (South Tyrol) region was made in the autumn of 1969 when the Italian government agreed to grant much wider autonomy for the Bolzano area, where the German-speakers form a majority, and to ensure full equality for both languages in the region.

Government

Parliament consists of the Chamber of Deputies and the Senate. Both jointly exercise legislative functions. Deputies serve a five-year term and are elected by direct adult suffrage. Senators are elected for a six-year term on a regional basis. The President of the Republic, who is the Head of the State, is elected jointly by the Chamber of Deputies and the Senate for a period of seven years. The President nominates the Council of Ministers which forms the executive.

In five regions of Italy (Sicily, Sardinia, Trentin-Alto-Adige, Friuli-Venezia Giulia and Val d'Aosta) there is a large degree of regional autonomy. Each region has a Regional council and a Giunta regionale which holds executive power.

Defence

About 12.8 per cent of the national budget (3 per cent of the GNP) is allocated to defence. Italy, a NATO member, maintains an Army of 389,000 (including Carabinieri), a Navy of 42,400 and an Air Force of 64,500. Military service lasts 15 months in the Army and Air Force and two years in the Navy. Defence estimates for 1969 totalled 1,415,000 million lire (including Carabinieri).

Economic Affairs

Although agriculture in the past represented an important part of the Italian economy, a substantial advance has taken place since the end of the war in the proportion of the gross national product contributed by the industrial sector, particularly engineering and other manufacturing industries. This proportion was approximately 34 per cent of GNP at market prices and 38 per cent of GNP at factor cost in 1968. A Five-Year Plan, 1966-70, envisages an annual growth rate of 5 per cent in real terms. In 1968 the real rate of GNP at market prices growth reached 5.7 per cent and the estimate for 1969 is 6.8 per cent.

The industrialized northern part of the country employs thousands of Italians from the less developed regions south of Rome. These regions, including Sicily, are being strenuously developed by the Cassa per il Mezzogiorno (the state fund to develop Southern Italy).

Tourism and agriculture still have considerable importance. Net income from tourism in 1968 was about 1.112 million dollars. The proportion of the gross national pro-

duct at market prices contributed by the agricultural sector was 9.8 per cent (11.1 per cent at factor cost). The chief crops are wheat, rice, maize, grapes and olives and much wine is produced. The second Piano Verde, a five-year plan to streamline the country's agricultural sector, was approved in 1966; 893,250 million lire have been allocated for this purpose.

Many Italians work abroad and their remittances form a valuable source of income; in 1968 they totalled 741 million dollars.

Italian firms execute large civil engineering projects in many parts of the world. Italian fashion and design also have an international reputation.

Transport and Communications

There are more than 13,500 miles of railways, half of them electrified. Italy has an advanced system of motorways, which are being extended. The most important completed undertaking is the Autostrada del Sole (the Sun Highway) between Milan and Salerno. The Mont Blanc Tunnel, opened in 1965, shortens the road journey from Paris to Rome by 130 miles. The Great St. Bernard Tunnel linking Italy with Switzerland was opened in March 1964. When the section from the Brenner Pass to Verona is completed in 1970 there will be an unbroken motorway link from Northern Europe to Southern Italy. A new motorway in Sicily to link Messina and Catania is to be completed in 1970. In 1969 there were 3,200 km, of motorway in operation and 2,000 km. under construction. Alitalia, the Italian airline, operates internally and throughout the world. The merchant fleet has a gross tonnage of 6 million tons and is the world's eighth largest.

Social Welfare

The Istituto Nazionale della Previdenza Sociale (INPS) administers the following benefits to employees in the private sector and to farmers and craftsmen: Old Age Pensions, paid to employees who have been insured for at least 15 years. The minimum monthly amount is 23,000 lire. More than 3 million people draw old age pensions; Unemployment: workers who are unemployed because of slack periods and who have paid compulsory contributions for at least one year, receive for a maximum period of six months daily compensation amounting to 300 lire per day plus 120 lire for each dependent. The INPS also administers Disability Benefits and an insurance scheme against tuberculosis for workers and families. These benefits are financed by contributions from workers and employers, who pay half each, and by a state subsidy.

INPS administers Family Allowances which are paid to all employed persons for wife, children and any other dependants. These allowances, which are paid to about 7 million workers and vary in amount according to type of employment, are paid by the employer, who then recuperates the amount on the contributions which he pays to the INPS.

Medical Insurance for most employed persons in the private sector and for certain self-employed persons is administered by the Istituto Nazionale per l'Assicurazione contro le Malattie (INAM). Payment for medical treatment and prescriptions is normally made directly by the patient who then obtains total or partial reimbursement. Industrial Injuries Benefits are paid by the Istituto Nazionale per l'Assicurazione contro gli Infortuni sul Lavoro (INAIL).

The Opera Nazionale per la Protezione della Maternità c dell'Infanzia (ONMI) provides every child from birth to six years with free welfare and medical care at special clinics.

State employees and their families contribute to a compulsory insurance scheme covering medical treatment, prescriptions and maternity benefits as well as loans and scholarships, administered by the Ente Nazionale di Previdenza ed Assistenza per i Dipendenti dello Stato (ENPAS). About 2 million employees are insured under the scheme. The Ente Nazionale di Previdenza per i Dipendenti da Enti di Diritto Pubblico (ENPDEP) administers a similar scheme for employees of public bodies, such as the Institute for Industrial Reconstruction.

In 1968 government expenditure on social insurance totalled 525,243 million lire, an increase of 88,000 million lire over 1967.

Education

Education is compulsory and free between the ages of 6 and 14. Books, equipment and meals are provided for a large number of needy pupils. There is a shortage of classrooms and many schools operate on double shifts. The curricula of all Italian schools are standardized by the Ministry of Education. There are 19,508 private and state nursery schools (scuole materne) with places for nearly 1,400,000 children. After primary school, which is from 6 to 11 years, the pupil enters the lower secondary school (scuola media unificata) where the compulsory subjects are: Italian, History, Religion, Civics, Geography, Mathematics, Natural Science, Art, P.T. and a foreign language. Music and handwork are compulsory only in the first year. Latin, which is optional, is first taught in the third year. An examination at the end of three years leads to a lower secondary school certificate, which gives access to all higher secondary schools. Pupils wishing to enter a classical lycée (liceo classico) must also pass in Latin.

Higher secondary education is provided by Classical, Artistic and Scientific Lycées, Training Schools for Elementary Teachers and Technical Institutes (industrial, commercial, nautical, etc.). After five years at a lycée the student sits an examination for the higher secondary school certificate (maturità) which qualifies him for automatic entry into any university faculty, except the Faculty of Humanities, which requires the maturità classica from the Classical Lycée. Special four-year courses are provided at the Teachers' Training Schools and the diploma obtained permits entry to a special university faculty of education, the magistero, and a few other faculties. The istituti tecnici provide practical courses which prepare students for a specialized university faculty.

University courses last for a minimum of four years. Examinations, which are mainly oral, are held three times a year. The student may sit an examination when he feels fully prepared for it and there is no limit to the number of times he may re-sit in a particular subject. After examinations in the prescribed number of subjects have been passed, the student presents a written thesis in order to obtain his degree. There are 31 universities and 26 other Institutes of Higher Education. In 1968-69 there were 496,356 students enrolled in higher education in Italy; 98,129 of these were fuori corso, students who are partitime or who have completed the prescribed period of study but who have not sat all the examinations.

ITALY-(Introductory Survey, Statistical Survey)

Tourism

With Alpine and Mediterranean scenery, a sunny climate, Roman buildings, Renaissance towns and palaces, paintings and sculpture, and famous opera houses, Italy is a perfect land for tourists. During 1968 about 11 million foreign visitors went to Italy for a total of 60,200,000 days and spent 867,000 million lire, representing an increase of 3.8 per cent over the 1967 figure. There are about 1,730,000 hotel beds.

Visas are not required for nationals of the following countries: Algeria, Australia, Austria, Belgium, Bolivia, Brazil, Canada, Ceylon, Chile, Cyprus, Denmark, Finland, France, Federal Republic of Germany, Greece, Iceland, Ireland, Japan, Liechtenstein, Luxembourg, Malaysia, Malta, Monaco, Morocco, The Netherlands, New Zealand, Norway, Peru, Portugal, Singapore, Spain, Sweden, Switzerland, Tanzania, Tunisia, Turkey, Uganda, United Kingdom, U.S.A., Uruguay.

THE CONSTITUTION

The Constitution of the Republic of Italy was approved by the Constituent Assembly on December 22nd, 1947, and came into force on January 1st, 1948. The fundamental principles are set out in Articles 1-12 as follows:

Italy is a democratic republic based on the labour of the people.

The Republic recognises and guarantees as inviolable the rights of man, either as an individual or in a community, and it expects in return devotion to duty and the fulfilment of political, economic and social obligations.

All citizens shall enjoy equal status and shall be regarded as equal before the law, without distinction of sex, race, language or religion, and without regard to the political opinions which they may hold or their personal or social standing.

It shall be the function of the Republic to remove the economic and social inequalities which, by restricting the liberty of the individual, impede the full development of the human personality, thereby reducing the effective participation of the citizen in the political, economic and social life of the country.

The Republic recognises the right of all citizens to work, and shall do all in its power to give effect to this right.

The Republic, while remaining one and indivisible, shall recognise and promote local autonomy, fostering the greatest possible decentralisation in those services which are administered by the State, and subordinating legislative methods and principles to the exigencies of decentralised and autonomous areas.

The State and the Catholic Church shall be sovereign and independent, each in its own sphere. Their relations shall be governed by the Lateran Pact ("Patti Lateranensi"), and any modification in the pact agreed upon by both parties shall not necessitate any revision of the Constitution.

All religious denominations shall have equal liberty before the law, denominations other than the Catholic having the right to worship according to their beliefs, in so far as they do not conflict with the common law of the country.

The Republic shall do all in its power to promote the development of culture and scientific and technical research. It shall also protect and preserve the countryside and the historical and artistic monuments which are the inheritance of the nation.

The juridical system of the Italian Republic shall be in conformity with the generally recognised practice of international law. The legal rights of foreigners in the country shall be regulated by law in accordance with international practice.

Any citizen of a foreign country who is deprived of democratic liberty such as is guaranteed under the Italian Constitution, has the right of asylum within the territory of the Republic in accordance with the terms of the law, and his extradition for political offences will not be granted.

Italy repudiates war as an instrument of offence against the liberty of other nations and as a means of resolving international disputes. Italy accepts, under parity with other nations, the limitations of sovereignty necessary for the preservation of peace and justice between nations. To that end she will support and promote international organisations. The Constitution is further divided into Parts I and II, in which are set forth respectively the rights and responsibilities of the citizen and the administration of the Republic.

PART I

SECTION I-Civic Clauses (Articles 13-28)

The liberty of the individual is inviolable and no form of detention, restriction or inspection is permitted unless it be for juridical purposes and in accordance with the provisions of the law. The domicile of a person is likewise inviolable and shall be immune from forced inspection or sequestration, except according to the provisions of the law. Furthermore, all citizens shall be free to move wheresoever they will throughout the country, and may leave it and return to it without let or hindrance. Right of public meeting, if peaceful and without arms, is guaranteed. Secret organisations of a directly or indirectly political or military nature are, however, prohibited.

Freedom in the practice of religious faith is guaranteed. The Constitution further guarantees complete freedom of thought, speech and writing, and lays down that the Press shall be entirely free from all control or censorship. No person may be deprived of civic or legal rights on political grounds.

The death penalty is not allowed under the Constitution except in case of martial law. The accused shall be considered "not guilty" until he is otherwise proven. All punishment shall be consistent with humanitarian practice and shall be directed towards the re-education of the criminal.

Section II—Ethical and Social Clauses (Articles 29-34)

The Republic regards the family as the fundamental basis of society and considers the parents to be responsible for the maintenance, instruction and education of the children. The Republic shall provide economic assistance for the family, with special regard to large families, and shall make provision for maternity, infancy and youth, subject always to the liberty and freedom of choice of the individual as envisaged under the law.

Education, the arts and science shall be free, the function of the State being merely to indicate the general lines of instruction. Private entities and individuals shall have the right to conduct educational institutions without assistance from the State, but such non-State institutions must ensure to their pupils liberty and instruction equal to that in the State schools. Institutions of higher culture, universities and academies shall be autonomous within the limitations prescribed by the law.

Education is available to all and is free and obligatory for at least eight years. Higher education for students of proven merit shall be aided by scholarships and other allowances made by the Republic.

Section III-Economic Clauses (Articles 35-47)

The Republic shall safeguard the right to work in all its aspects, and shall promote agreement and co-operation with international organisations in matters pertaining to the regulation of labour and the rights of workers. The rights of Italian workers abroad shall be protected.

The worker shall be entitled to remuneration proportionate to the quantity and quality of his work, and in any case shall be ensured of sufficient to provide freedom and a dignified standard of life for himself and his family.

The maximum working hours shall be fixed by law, and the worker shall be entitled to a weekly day of rest and an annual holiday of nine days with pay.

Women shall have the same rights and, for equal work, the same remuneration as men. Conditions of work shall be regulated by their special family requirements and the needs of mother and child. The work of minors shall be specially protected.

All citizens have the right to sickness, unemployment and disability maintenance.

Liberty to organise in trade unions is guaranteed and any union may register as a legal entity, provided it is organised on a democratic basis. The right to strike is admitted within the limitations of the relevant legislation.

Private enterprise is permitted in so far as it does not run counter to the social well-being nor constitute a danger to security, freedom and human dignity.

Ownership of private property is permitted and guaranteed within the limitations laid down by the law regarding the acquisition, extent and enjoyment of private property. Inheritance and testamentary bequests shall be regulated by law.

Limitation is placed by law on private ownership of land and on its use, with a view to its best exploitation for the benefit of the community.

The Republic recognises the value of mutual co-operation and the right of the workers to participate in management.

The Republic shall encourage all forms of saving, by house, purchase, by co-operative ownership and by investment in the public utility undertakings of the country.

SECTION IV-Political Clauses (Articles 48-54)

The electorate comprises all citizens, both men and women, who have attained their majority. Voting is free, equal and secret, and its exercise is a civic duty. All citizens have the right to associate freely together in political parties, and may also petition the Chambers to legislate as may be deemed necessary.

All citizens of both sexes may hold public office on equal

Defence of his country is a sacred duty of the citizen, and military service is obligatory within the limits prescribed by law. Its fulfilment shall in no way prejudice the position of the worker nor hinder the exercise of his political rights. The organisation of the armed forces shall be imbued with the spirit of democracy.

All citizens must contribute to the public expenditure, each in proportion to his capacity.

All citizens must be loyal to the Republic and observe the terms of the law and the Constitution.

PART II

Sections I, II and III (Articles 55-100)

These sections are devoted to a detailed exposition of the Legislature and legislative procedure of the Republic.

Parliament shall comprise two Chambers, namely the Chamber of Deputies and the Senate of the Republic. The Chamber of Deputies is elected by direct universal suffrage, the number of Deputies being six hundred and thirty. All voters who on the day of the elections are twenty-five years of age, may be elected Deputies.

Scats are apportioned by dividing the number of inhabitants of the Republic, as shown in the last general census, by six hundred and thirty, and allocating the seats proportionally to the population of each constituency.

The Senate of the Republic is elected on regional basis, the number of eligible Senators being three hundred and fifteen. No Region shall have less than seven Senators. Val d'Aosta has only one Senator.

Seats are allocated proportionally among the Regions in the same way as for the Chamber of Deputies.

The Chamber of Deputies and the Senate of the Republic are elected for five years.

The term of each House cannot be extended except by law and only in the case of war.

Members of Parliament shall receive remuneration fixed by law.

The President of the Republic must be a citizen of at least fifty years of age and in full enjoyment of all civic and political rights. He shall be elected for a period of seven years (Articles 84-85).

The Government shall consist of the President of the Council and the Ministers who themselves shall form the Council. The President of the Council, or Prime Minister, shall be nominated by the President of the Republic, who shall also appoint the Ministers on the recommendation of the Prime Minister (Article 92).

SECTION IV (Articles 101-113) sets forth the judicial system and procedure.

Section V (Articles 114-133) deals with the division of the Republic into regions, provinces and communes, and sets forth the limits and extent of autonomy enjoyed by the regions. Under Article 131 the regions are enumerated as follows:

Piedmont Molisc Lombardy Veneto Campania : Puglia . Liguria Basilicata Emilia-Romagna Calabria Tuscany Sicily Umbria Sardinia Trentino-Alto Adige Marche Friuli-Venezia Giulia Lazio Abruzzi Val d'Aosta

The last five-named regions shall have a wider form of autonomy based on constitutional legislation specially adapted to their regional characteristics (Article 116). Each region shall be administered by a Regional Council, in which is vested the legislative power and which may make suggestions for legislation to the Chambers, and the "Giunta regionalo" which holds the executive power (Article 121).

The final articles provide for the establishment of the "Corte Costituzionale" to deal with constitutional questions and any revisions which may be found necessary after the Constitution has come into operation.

JUDICIAL SYSTEM

Corte Costituzionale: Palazzo Della Consulta, Piazza del Quirinale 41, Rome; consists of 15 judges, one third nominated by the President of the Republic, one third elected by Parliament in joint session, one third by the ordinary and administrative supreme courts; Pres. Prof. Avv. Giuseppe Branca; Sec.-Gen. Dott. Marcello Carlomagno.

Consiglio Superiore della Magistratura: Piazza della Indipendenza 6, Rome; Pres. the President of the Republic; Vice-Pres. Avv. Alfredo Amatucci.

Consiglio di Stato: Palazzo Spada, Piazza Capo di Ferro 13, Rome; established in accordance with Article 10 of the Constitution; has both consultative and judicial functions; Pres. Gaetano Vetrano.

Gorte dei Conti: Via Baiamonti 25, Rome, and Via Barberini 38, Rome; functions as the court of public accounts; Pres. Dott. FERDINANDO CARBONE; Sec.-Gen. Dott. EDUARDO GRECO.

Gorte Suprema di Gassazione: Palazzo di Giustizia, Rome; supreme court of civil and criminal appeal; First Pres. Dott. Silvio Tavolaro; Vice-Pres. Dott. Mario Petrocelli.

The Constitutional Court was established in 1956 and is an autonomous organ of the Constitution, standing apart from the judicial system. Its most important function is to pronounce on the constitutionality of legislation both subsequent and prior to the present Constitution of 1948. It also judges accusations brought against the President of the Republic or ministers of state.

At the base of the system of penal jurisdiction are the Preture (District Courts), where offences carrying a fine or a sentence of up to three years imprisonment are tried. Above the Preture are the Tribunali (Tribunals) and the Corti di Assise presso i Tribunali (Assize Courts attached to the Tribunals), where the graver offences are dealt with. From these courts appeal lies to the Corti d'Appello (Courts of Appeal) and the parallel Corti di Assise d'Appello (Assize Courts of Appeal). Final appeal may be made, on juridical grounds only, to the Corte Suprema di Cassazione.

Civil cases may be taken in the first instance to the Giudici Conciliatori (Justices of the Peace), Preture or Tribunali, according to the seriousness of the offence. Appeal from the Giudici Conciliatori lies to the Preture, from the Preture to the Tribunali, from the Tribunali to the Corti d'Appello, and finally, as in penal justice, to the Corte Suprema di Cassazione on juridical grounds only.

Special departments for cases concerning labour relations or young persons may be attached to both penal and civil courts. Cases concerned with the public service and its employees are tried by the Consiglio di Stato.

RELIGION

More than 90 per cent of the population of Italy profess the Roman Catholic faith.

Under the terms of the Lateran Pact, signed in 1929 between Mussolini and the Papal Secretary of State, Cardinal Gasparri, the Catholic Apostolic Roman Religion was recognised as the official religion of Italy, and instruction in the Roman Catholic doctrine became compulsory in Italian schools. The Holy See was accorded sovereign rights in the Vatican City, which was granted sextraterritorial rights as an independent State. Furthermore, the person of the Pope was declared sacred and inviolable, and Cardinals were granted honours formerly only accorded to princes of the blood royal. In this way the dispute between the Papacy and the Italian Government, which had begun in 1870 with the creation of a united Italy, was terminated.

The question of relations between the Roman Catholic Church and the Italian State arose in a sharpened form during the debates on the Constitution in the post-war Constituent Assembly. Article 5 of the draft Constitution, which formally accepted the Lateran Pact of 1929 in its entirety, occasioned a prolonged and heated debate, but was finally accepted on March 26th, 1947, by 350 votes to 149.

In October 1968 the Holy See agreed to pay taxes on its Italian shareholdings amounting to over 100,000 million lire, thus ending a five-year old controversy between Church and State.

THE PRESS

In view of Italy's population the number of daily newspapers at about 83 is rather small, with the bulk of them (48, of which 10 in Milan) appearing in the industrial north, some 20 in central Italy (including 16 in Rome), six in the south and the remainder on the islands. Between 1944 and 1967 no less than 161 newspapers ceased publication. The total daily circulation is 4.7 million, less than 10 per 100 people but the northern third of the population takes two thirds of this circulation. Of the 17 dailies with over 100,000 copies each, only three exceed 200,000 each and two exceed 400,000. Eleven of these appear in the north, five in central and one in southern Italy. There are also 15 medium-sized dailies selling 50-100,000 copies and 61 small dailies with less than 50,000 copies each.

Rome and Milan are the only real press centres with 16 and 10 dailies each respectively. Only two dailies manage to sustain a national circulation, Corriere della Sera and Il Giorno, both in Milan, followed by Turin's La Stampa circulating in the north and centre. Otherwise the large dailies circulate in and reflect their own region; e.g. La Nazione serves Florence and its region, Il Tempo Rome and the centre, Genoa's Il Secolo XIX extends throughout the Italian riviera, Il Mattino serves the Naples region and l'Ora Palermo. Such papers make up for a general lack of smaller dailies; there are, however, many weekly papers.

Political controversy receives great emphasis in the press as most papers reflect some shade of the political spectrum. Foreign news is well covered—frequently, owing to the availability of agency reports, better than local news. Dailies are generally characterized by a conservatism of printing and layout except for *Il Giorno*, one of the newer dailies. Most papers have a traditional literary page or "terza pagina" devoted to short stories, travelogues and articles by essayists and critics. All dailies have a weekly page devoted to book reviews.

Most newspapers are independent of political parties, only 17 per cent of the total circulation of dailies having political affiliations. Furthermore the number of official party organs has declined to very few; among them Avanti and Unità, the chief organs of the Socialist and Communist parties respectively, each produce editions in Milan and Rome; Il Popolo belongs to the Christian Democrat party.

The daily press is experiencing economic difficulties at the present time and a few evening papers have been forced to close. A consequent tendency to concentration of ownership is beginning to be detectable. Large industrial groups own 54.9 per cent of the total circulation of dailies; Catholic organizations own 9.3 per cent. A further 10 per cent is independently owned. Most of the important dailies, including nine of the seventeen papers with over 100,000 copies each, are owned by groups of industrial enterprises or by the owners of such enterprises. Thus Corriere della Scra is associated with F.lli Crespi, La Stampa and Stampa Sera with Fiat, Il Messaggero and Il Secolo XIX with F.lli Perrone, La Nazione and Il Resto del Carlino with Eridiana, La Notte with Italcementi, etc. The Confederation of Italian Industries has a controlling interest in some fourteen smaller papers including the important Il Sole|24 Ore and Il Globo.

Another category of papers comprises those supported by official organizations such as E.N.I. or I.R.I. or by financial institutions. Examples are: Il Giorno (E.N.I.) and Il Mattino and Gazzetta del Mezzogiorno (both by Banco di Napoli). Finally the Catholic and Christian Democrat organizations have a controlling interest in about

a dozen papers; Avvenire (formerly L'Italia; Milan) is owned totally by the Church.

The most popular dailies in order of circulation are Milan's Corriere della Sera (493,000), Turin's La Stampa (404,000), L'Unità (Milan edition 350,000; Rome edition 150,000), Rome's Il Tempo (226,000), and Il Messaggero (225,000), Milan's Il Giorno (218,000), Florence's La Nazione (200,000), Bologna's Il Resto del Carlino (185,000) and Rome's Paese Sera (181,000). The three dailies accorded most prestige for the standard of their articles and news coverage are the nationally circulating Corriere della Sera, La Stampa and Il Giorno, although the latter includes light features and cartoons. The most serious Rome daily is Il Tempo, and the Vatican daily L'Osservatore Romano has a world-wide Catholic readership. The leading financial paper is Milan's Il Sole|24 Ore closely followed by Il Globo in Rome.

There are some 430 non-daily newspapers and over 4,000 periodicals. The illustrated weekly papers and magazines frequently have higher sales than the average daily. Ten of the largest appear in Milan, five in Rome and one in Turin. Many tend towards sensationalism, particularly the popular Domenica del Corriere, which has a circulation of over one million, and the right wing Oggi and Gente. Other weekly illustrated periodicals with a large circulation include Tempo, Epoca, Seltimana Incom and Europeo. Among the serious and influential magazines should be mentioned Panorama, Il Borghese, the financial Mondo Economico, the small circulating political and cultural Il Ponte, the Socialist L'Espresso and the Communist Vie Nuove and Rinascita.

CASSA PER IL MEZZOGIORNO

SOUTHERN ITALY DEVELOPMENT FUND

Piazzale Kennedy 20, Eur, Rome

President: Prof. Gabriele Pescatore.

The Fund was set up in 1950 to develop the Southern areas of the country. By the end of 1965 contracts for public works worth 1,522,000 million lire had been awarded. The Fund was extended in June 1965 until 1980, with the task of implementing 5-year plans co-ordinated with the national economic plan. During the 1965-69 period, the Fund was endowed with 1,900,000 million lire. The following are completed projects supervised by the Fund:

Land Reclamation and Irrigation: More than 7,400 kilometres of river channel control, embankments and drains have been completed. Over 940,000 hectares of land have been drained or protected from floods, and 11,478 kilometres of irrigation canals and networks laid, 6,917 kilometres of new agricultural roads constructed and 2,024 kilometres improved.

Aqueducts: The Fund has tackled the drinking water supply problem by laying 13,279 kilometres of mains and constructing 2,533 water towers with a capacity of about 1,485,675 cubic metres.

Transport and Communications: 3,409 kilometres of new trunk roads have been built and 16,070 kilometres improved; also the construction of 819 kilometres of motor highways is nearing completion. The tracks of numerous railway lines have been doubled. Fifty-one port improvements have been approved with an expenditure of 39,000 million lire. Construction is nearing completion. For the improvement of the airfield and port system in the South, projects totalling 7.7 billion lire have been approved.

Hospitals: 29 hospitals have been completed and 34 are under construction with an approved expenditure of 41,500 million lire, in centres of the Southern Regions.

Industry: Numerous projects have been approved for setting up industrial estates in selected areas, the Fund's contributions towards this total being 46,464 million lire. In the private sector the Fund has operated a two-fold industrialization project: (a) credit is extended through three specialized institutes in the South (ISVEIMER for Southern Italy, IRFIS for Sicily, and CIS for Sardinia); 6,238 loans of 1,457,501 million lire were approved; also, loans for a total amount of 1,136,571 million lire have been granted by other industrial credit banks. (b) Straight grants to 8,691 small and medium-sized enterprises of about 248,757 million lire. 93,186 loans valued at 27,281 million lire have been granted to the handicraft industries.

Private Land Improvement: By the end of 1968 the Fund had approved the construction of: 7,763 kilometres of farm roads; 64,161 wells, tanks and reservoirs; 2,097 kilometres of transmission lines; 76 cheese factories; 436 olive oil mills; 540 wine factories. In addition about 218,339 hectares have been prepared for farming and 230,677 hectares have been irrigated. A large portion of coastal population has been supported with 14,401 contributions totalling 37,931 million lire for the fishing industry.

Education: The Fund has completed 147 schools for industrial training and 21 agricultural schools with 120 branches have been opened. 604 kindergartens have been completed to a value of over 14,000 million lire. 6,175 loans for school buildings to a value of 8,070 million lire have been granted.

Tourism: Projects to the value of 57,003 million lire have been completed. They include: local and sightseeing roads, archeological excavations, modern museums, monument restorations, and improvements to grottees and spas. The Fund has also financed 1,727 loans for the construction of 51,003 rooms with 94,465 beds in a hotel project.

TRANSPORT

Ispettorato Generale della Motorizzazione Civile e del Trasporti in Concessione: Rome, Viale del Policlinico 2; Dir.-Gen. Ing. PAOLO CARLUCCI; publ. CULTURAL ORGANIZATIONS

Ministry of Education:

Consiglio Superiore delle Antichità e Belle Arti (Higher Council of Antiquities and Fine Arts).

Consiglio Superiore delle Accademia e delle Biblioteche (Higher Council of Academies and Libraries): Viale Trastevere, Rome, and Piazza Marconi 25, 0144-EUR, Rome.

Ministry of Tourism and Entertainment:

Consiglio Centrale del Turismo (Central Council of Tourism): Via della Ferratella 51, Rome.

PRINCIPAL THEATRES

Operas of: Rome, Milan (La Scala, Administrator Antonio Ghiringelli), Palermo (Teatro Massimo), Naples (Teatro di San Carlo), Venice (Teatro Comunale) and Florence (Teatro Comunale, Administrator Dr. Remicio Paone).

PRINCIPAL ORCHESTRAS.

Orchestra del Maggio Musicale Fiorentino: Teatro Comunale, Via Solferino 15, 50100 Florence.

Orchestra dell'Accademia Nazionale di S. Ceclia: Via Vittoria 6, Rome; Principal Conductor Maestro F. PREVITALI.

Orchestra dell'Accademia Musicale Chigiana: Via di Città 89, Siena; Principal Conductor Maestro M. FABRRI. Also the four orchestras of the Radio Television System, at Turin, Rome, Milan and Naples.

MUSIC FESTIVALS

Bolzano: "Claudio Monteverdi", State Music Conservatory Bolzano; International Pianoforte Competition "F. Busoni".

Florence: Maggio Musicale Fiorentino; Opera season in May and June; Dir. Dr. REMIGIO PAONE.

Genoa: International Violin competition "Nicolò Paganini", Palazzo Tuisi, Via Garibaldi 9; Dir. Luigi Correse.

Rimini (Forli): Music festival at the Malatesta Temple.

Spoleto (Perugia): Festival of Two Worlds; Pres. GIAN CARLO MENOTTI; Gen. Dir. MASSIMO BOGIANCHINO.

Verona (Arena): Opera season in summer.

ATOMIC ENERGY

Comitato Nazionale per l'Energia Nucleare—CNEN (National Committee for Nuclear Energy): Rome, Via Belisario 15; f. 1960; Pres. On. Giulio Andreotti; Vice-Pres. Prof. Carlo Salvetti.

In August 1960 CNEN succeeded the National Committee for Nuclear Research (CNRN), which was set up in 1952.

The new Committee inherits the tasks of pure and applied research, and must also maintain technical control over industrial nuclear power plants which are being built in increasing numbers. It promotes and encourages the development of industrial applications of nuclear energy, and co-operates internationally.

CNEN, which has a staff of about 2,700, owns the research centres of Frascati, Casaccia, Saluggia, Rotondella, Bari and Bologna. It prospects for uranium, undertakes research into the production of nuclear materials, constructs prototype power reactors, applies nuclear energy to agriculture and medicine, and trains personnel. Research is being carried out on two lines of advanced reactors and on the CNEN-CISE CIRENE project, a heavy water moderated reactor. Other projects include the ROVI 200 MW reactor for desalination and on an 18,000-ton nuclear ship.

CNEN advises the Foreign Ministry about policy in discussions with the International Atomic Energy Agency, the European Nuclear Energy Agency and EURATOM.

Istituto Nazionale di Fisica Nucleare—INFN (National Institute of Nuclear Physics): Casella Postale 70, 000,44
Frascati, Rome; f. 1951; eight sections in Universities of Turin, Milan, Padua, Bologna, Pisa, Rome, Genoa and Naples; sub-sections in Universities of Florence, Trieste, Bari and Public Health Institute in Rome; groups in Universities of Catania, Messina and Palermo, forming the Sicilian section, in University of Pavia, Politecnico of Milan and at the National Centre for Photogrammetry in Bologna; Pres. Prof. Giorgio Salvini.

Since 1952 the Institute has been financed by CNEN, for whom it conducts basic research.

AGIP Nucleare S.p.A.: P.O.B. 1629, Milan; f. 1968; develops processes concerning nuclear fuel cycles and nuclear reactors, and operates on an industrial scale in the field of nuclear fuel cycles.

Associaziono Nazionale di Ingegneria Nucleare (ANDIN):
Piazza Sallustio 24, Rome; studies problems in the
engineering construction of nuclear installations; Pres.
Prof. Noverino Faletti.

Gomitato Permanente per i Problemi dell'Impiego Pacifico dell'Energia Nucleare e per i Rapporti con EURATOM (Committee on the Peaceful Uses of Atomic Energy): Piazza Venezia 11, Rome; working groups which elaborate the Italian industrial point of view on nuclear problems which may arise in Italy or Europe; Pres. VITTORIO DE BIASI.

National Laboratory at Frascati: Casella Postale 70, Frascati, Rome; equipped with 1,100-MeV electron synchrotron since 1959, with a 450-MeV electron and positron linear accelerator and with a 2 × 1500 MeV electron and positron storage ring ("Adone") which is being set up; Dir. Prof. Ruggero Querzoli.

There are eleven other smaller accelerators elsowhere in Italy.

Casaccia Centre for Nuclear Studies: C.P. 2400, 00100 Rome, S. Maria di Galeria; Director: Dr. Ing. Gianfranco Franco.

The Centre, which is particularly concerned with nuclear applied research, is equipped with the following reactors:

A Triga Mark II reactor, whose original power was of roo kW, has already been modified for operation at r MW. Fuelled by 20 per cent enriched uranium, it is used for research and training.

The Rana reactor, a swimming-pool graphite (reflected and natural) cooled reactor with an operating power of 10 kW, is particularly suited to neutron physics measurements.

The Rospo reactor, an Organic moderated and cooled Zero power experimental reactor, used for the study of cores using organic cooling and moderating.

The Ritmo reactor, a swimming-pool, zero power experimental reactor, used within the framework of the neutron physics of water systems.

The Tapiro reactor, a fast neutrons source reactor, now in an advanced stage of construction, will be used for experimental purposes within the framework of the Italian fast-reactors programme.

The Centre also develops biological research—for which laboratories and a gamma-field have been installed—concerned with animal radiobiology studies, health physics, applications of nuclear energy to agriculture.

At Casaccia there are also electronic laboratories planning the electronic instrumentation for experiments at the CNEN research centre and the Frascati National Laboratory, geomining analysis laboratories, chemistry and metallurgical facilities, hot cells for work on "hot" materials, and a waste disposal laboratory.

Gentro Informazioni Studi Esperienze (GISE) (Information, Study and Experiment Centre): Mailing address; Casrella Postale 3986, 20100 Milan; location: Via Redecesio 12. Segrate, Milan; f. 1946; Pres. Prof. Arnaldo M. Angelin; Man. Dir. Prof. Corrado Genesio; Gon. Man. Prof. Enrico Cerrat; publ. Energia Nucleare (monthly). Sponsored by ENEL (Ente Nazionale per l'Energia Elettrica); devoted to research and development in nuclear reactor engineering and technology, advanced electronics, nuclear physics.

ITALY—(Atomic Energy, Universities)

Gentro di Studi Nucleari "Enrico Fermi" (Enrico Fermi Centre for Nuclear Studies): Polytechnic School, Via Ponzio 34/3, 20133 Milan; f. 1957; Dir. Prof. GIUSEPPE BOLLA.

Equipped with a 50 kW research reactor.

Gentro Siciliano di Fisica Nucleare e di Struttura della Materia (GSFN & SM) (Sicilian Centre of Nuclear Physics and Structure of Matter): 57 Corso Italia, 95129 Catania; f. 1955; equipped for experiments on nuclear spectroscopy, photonuclear reactions, nuclear fission and theoretical nuclear physics, positron annihilation and structure of matter; Pres. Prof. I. F. Quercia.

Ente Nazionale per l'Energia Elettrica (ENEL): Rome, Via G.B. Martini (Piazza Verdi); The Italian State Power Agency has nuclear stations in operation in the following areas:

Latina: a 210 MWe (gas-graphite) plant. Garigliano: a 160 MWe (BWR) plant. Trino Vercellese: a 272 MWe (PWR) plant.

Laboratori Elettronici e Nucleari, S.p.A. (LABEN) (Electronic and Nuclear Laboratories): Via Bassini 15, 20133 Milan; multi-channel analysers for nuclear spectrometry. Analogue-to-digital converters and auxiliary

units for digital computers. Scalers, programmers, nuclear counting chains. Industrial digital instrumentation. PCM telemetry for satellites. Spaceborne instrumentation for space research; Dir. Dr. CARLO BONSIGNORI.

SNAM Progetti S.p.A.: P.O.B. 4169, S. Donato Milanese, Milan; f. 1966; designs chemical, petrochemical and nuclear plants, acts as contractor for drilling operations and conducts research in the chemical and petrochemical fields.

Società Elettronucleare Nazionale (SENN): 6 Via Torino, Rome, f. 1957; State controlled; nine public utility companies, five industrial companies are shareholders; will own and operate Garigliano river plant of 150 MW; Pres. TOMMASO ZERBI.

Società Ricerche Impianti Nucleari (SORIN): Saluggia, Vercelli; formed under agreement between Fiat and Montecatini-Edison; Dirs. Dott. Ing. S. Custodero, Dott. Ing. G. Vacchelli.

The Centre is equipped with a 7 MW swimming-pool reactor; radiochemistry; nuclear engineering; scientific and industrial research; production of radioisotopes for industrial and medical uses; nuclear equipment; biomedical research and development, production of cardiac implantable pacemakers and devices for peritoneal dialysis.

SAN MARINO

The republic of San Marino is situated in central Italy on the slopes of Mount Titano in the Apennines. It was founded in A.D. 301. A treaty of friendship with Italy was first signed on June 28th, 1861, and was last renewed on April 20th, 1953.

Area: 61 sq. km.

Population: 1953 census; 13,500; 1966 estimate: 18,000; San Marino (capital) 4,000; 1969 estimate: 19,000; San Marino (capital) 4,500.

Finance: Budget balanced at Lire 7,391,051,365 in 1969.

Main Products: Wheat and wine.

Industrial Products: Textiles, cement, paper, leather, furs.

Education: 18 elementary schools and a high school.

CONSTITUTION AND GOVERNMENT

Legislative Power is vested in a *Grand Council* of 60 members, elected every five years by popular vote. In the elections held in September 1969 the results were as follows:

| | - | SEATS |
|---|-------------|-------|
| • | | 27 |

Defections from the Communist Party in 1957 led to a bloodless revolution after which the Christian Democrats came to power. Citizens of San Marino living in the United States were given the right to vote by post in 1958. In January 1960 a new Electoral Law was passed giving the women of San Marino the right to vote.

Two members of the Grand Council are appointed to act as Regents every six months. The Regents exercise power in conjunction with the Council of State—Congresso di Stato, which is made up of ten departments. There is no Prime Minister, but Dott. Federico Bigi, the Sceretary of State for Foreign Affairs, is virtual leader of the coalition between the Christian Democrats and the Social Democrats, which was re-established in November 1966 after a period of over 3 months of governmental crisis. The dispute was over the postal vote law of 1958. There are also various commissions for art, sport, tourism, etc.

JUDICIAL SYSTEM

Judicial Authority is exercised by the Council of Twelve —Consiglio dei XII.

FINANCE

Italian and Vatican City currency are in general use in the Republic, which also issues its own coins and postage stamps.

EXTERNAL TRADE

Principal exports are wine, woollen goods, furniture, ceramics and building stone quarried in Mount Titano. Also over 1,500,000 postcards were sent from San Marino in 1966.

TRADE UNION CONFEDERATIONS

Confederazione Generale Democratica dei Lavoratori Sammarenesi: Piazza del Teatro, San Marino; 1,800 mems.; affiliated to IFCTU.

Confederazione Generale del Lavoro Sammarinese: San Marino,

COMMUNICATIONS

San Marino is connected with Rimini and the Adriatic coast by funicular from the capital, San Marino, to Borgo Maggiori, a mile away, and thence by helicopter to Rimini. There is also a bus service, and a new highway down to the coast at Rimini.

TOURISM

Ente Governativo per il Turismo, Sporto e Spettacolo (Government Tourism, Sport and Entertainment Board): Palazzo del Turismo, San Marino; Dir. GIOVANNI VITO MARCUCCI.

MUSEUMS

Government Museum, Picture Gallery, Library and Archives: Valloni Palace; library of 40,000 vols.; Garibaldi exhibition, archaeological remains, numismatic collection, collection of ancient arms.

There are also the following museums and galleries:

LIECHTENSTEIN

Liechtenstein is a principality on the Upper Rhine between Austria and Switzerland.

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Liechtenstein lies between the Austrian province of Vorarlberg and the Swiss cantons of the Grisons and St. Gall. It measures 24 km. from north to south and 9 km. from east to west. The climate is mild. The official language is German, of which a dialect—Alemannish—is spoken. The population is largely Roman Catholic. The flag consists of a royal blue and a red stripe horizontally divided, with a princely crown in the royal blue part. The capital is Vaduz.

Recent History

Liechtenstein has been an independent state since 1719, except while under Napoleon's domination. After 42 years as dominant party in the Government coalition, the Progressive Citizens' Party was ousted by the Fatherland Union in the General Elections of February 1970.

Government

The constitution of the hereditary principality provides for a unicameral parliament (Landtag), composed of 15 members who are elected for four years. The Government consists of the Chief of Government, the Deputy Chief of Government and three Councillors (elected for four years). Liechtenstein is united in a Customs Union with Switzerland, which also represents the principality abroad.

Defence

There is no army, and only a small police force of twenty-six men.

Economic Affairs

The economy is mainly industrial. A variety of products, such as cotton yarn, small machinery, ceramics and leatherware are manufactured.

TOURISM

(1968)

Transport and Communications

A tunnel connecting the Rhine and Samina valleys was opened in 1947. Transport is mainly by road.

Social Welfare

Social welfare is organized on lines similar to Switzerland.

Education

There were 14 elementary and 5 secondary schools in 1967.

Tourism

Liechtenstein has a perfect Alpine setting in the Upper Rhine area. The valley produces excellent wine. The princely residence, Schloss Vaduz, stands on a crag overlooking the city. There is a celebrated postal museum, a National Museum and the Prince's Art Gallery at Vaduz.

Public Holidays, 1970

January I (New Year's Day), January 2 (Bank Holiday), March 19 (St. Joseph's Day), March 27 (Good Friday), March 30 (Easter Monday), May 7 (Ascension), May 18 (Whit Monday), May 28 (Corpus Christi), August 15 (The Assumption), November I (All Saints'), December 25, 26 (Christmas).

Weights and Measures

The Metric System is in force.

Currency and Exchange Rates

Liechtenstein uses Swiss currency.

Exchange rate: 10.36 francs = £1 sterling

4.32 francs = \$1 U.S.

AGRICULTURE AND INDUSTRY

The chief agricultural products are corn, wine, fruit, wood, potatoes, cattle and cabbages. The most important industries are hardware, machines, cotton weaving and spinning, leather goods, pottery, canned goods, sausage cases, furniture, high frequency installations, heaters, artificial teeth. Cattle rearing is highly developed.

THE CONSTITUTION

The Principality of Liechtenstein is a Sovereign State consisting of the two former counties of Schellenberg and Vaduz, which came into the possession of the House of Liechtenstein in 1699 and 1712 respectively. From 1815 to 1866 the Principality formed part of the German Confederation.

By the Constitution of October 5th, 1921, the monarchy is hereditary in the male line. The reigning Prince, or during his absence a Prince of his House, exercises the legislative right jointly with a Diet of fifteen members elected for four years by general and secret ballot. All male citizens of over 20 years have been eligible to vote since the voting age was lowered by a year in October 1969.

In the case of adjournment or dissolution, the Diet is replaced by a National Committee consisting of the President of the Diet and four Deputies. The chief of the Government and his deputy are nominated by the Prince for six years on the motion of the Diet. Three Counsellors are elected for four years by the Diet.

By a Treaty made with Switzerland in 1923 Liechtenstein is incorporated in Swiss Customs territory, and uses Swiss currency, customs and postal administration.

HEAD OF THE STATE

Prince Francis Josef II, Prince of Liechtenstein, Duke of Troppau and of Jagerndorf, Count of Rietberg, succeeded July 25th, 1938.

Prince's Court: Director of the Cabinet Dr. Gustav WILHELM.

THE GOVERNMENT

Chief of Government: (vacant*).

Vice-Chief of Government: Dr. A. HILBE.

President of the Diet: (vacant*).

Vice-President of the Diet: Dr. FRANZ NAGELE.

THE GRAND DUCHY OF LUXEMBOURG

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Grand Duchy of Luxembourg lies south-east of Belgium between France and Germany. The climate is temperate. French is the official language and is generally used for administrative purposes, while German is commonly used as a written language. The spoken language is Letzeburgish, a German-Moselle-Frankish dialect. Ninety-seven per cent of the population are Roman Catholic and I per cent Protestant. The flag consists of three horizontal stripes—red, white and blue. The capital is Luxembourg.

Recent History

There has been a customs union between Luxembourg and Belgium since 1921, except for the period 1940 to 1944 when the Grand Duchy was annexed by Germany. In 1944 Luxembourg and Belgium joined the Netherlands in the Benelux Economic Union which came into force in 1960. The Grand Duchy is a member of the European Economic Community and has played a full part in the post-war moves toward European integration. In November 1964, Grand Duchess Charlotte abdicated after a reign of 45 years, and was succeeded by her son, Prince Jean. After the fall of the Government in October 1968 general elections were held in December. A new government was formed under Pierre Werner.

Government

The Grand Duchy of Luxembourg is a constitutional hereditary monarchy. The Parliament comprises a Chamber of Deputies and a Council of State. The country is divided into 12 cantons.

Defence

Luxembourg is a member of the Western European Union and since 1954 of the North Atlantic Treaty Organization. Compulsory military service was abolished by a law passed by Parliament in June 1967. By the same law Luxembourg maintains a battalion-size army of volunteers enlisted for three years.

Economic Affairs

The country enjoys great prosperity due to the iron and steel industry situated in the south-west. Large deposits of minette (iron ore) are found in this region. This ore, however, is insufficient to supply all the needs of industry and iron ore is also imported, as is the coal necessary for iron and steel manufacture. About 4½ million tons of crude iron and 4.8 million tons of crude steel are produced annually, as well as 3.7 million tons of rolled steel. Luxembourg is a member of the European Economic Community, the European Steel and Coal Community and EURATOM.

Agriculture is a source of livelihood for a third of the population. Barley, oats and potatoes are grown in the north, and wheat, fruit and wine in the south. Cattleraising is well-developed. There is full employment in the Grand Duchy.

Transport and Communications

The railway system covers 328 km. The roads are modern and total 4,942 km. There is an airport at Luxembourg, served by Luxair, Sabena and other international lines.

Social Welfare

Although virtually all types of employment are subject to compulsory social insurance, the Government does not itself operate the Social Services. They are administered by semi-public bodies, composed of Government representatives, and elected representatives of employers and employees. Social Service benefits are also guaranteed to foreigners in accordance with International Conventions signed with individual countries. Social insurance falls into four categories:

- (a) Accident Insurance is normally compulsory for all employers; contributions are paid by the employer. Benefits cover refund of the cost of medical treatment, compensation for loss of pay, widow and orphans' pension.
- (b) Health Insurance is compulsory for industrial workers, employees, etc. and voluntary schemes cover most other categories of people. Employees pay two-thirds of the contribution and employers one-third.
- (c) Invalid and Old Age Pensions: Contributions amount to 12 per cent of the salary shared equally by employer and employee. There is a minimum guaranteed pension of 24,000 francs.

Family Allowances: Birth Allowances of 4,200 francs for the first child and 2,500 for each subsequent child are paid. There are also contributary allowances of approximately 370 francs per child under 19 (25 in the case of students).

Unemployment benefit amounting to 60 per cent of net wages is paid.

Education

Education in Luxembourg is compulsory from 6 to 15 years. German is the initial language of instruction at primary level. French is added to the programme in the second year and becomes increasingly important until it replaces German as the language of instruction at secondary level.

Pupils are selected for secondary school at the age of 12 on the basis of an entrance examination in French, German and arithmetic. The first year of secondary school is a general orientation course on comprehensive lines, which is then followed by a choice between two sections:

- (a) Classical Section, Latin is taught from the second year on, and English from the third year with an option in the fourth year between Greek and English. After the third year this section is again divided into Latin/Languages and Latin/Science sections.
- (b) Modern Section, with no Latin but compulsory English starting in the second year. After the third year pupils are divided into Modern Languages and Modern Languages/Science subsections.

LUXEMBOURG-(Introductory Survey, Statistical Survey)

The completed secondary course lasts seven years and leads to the *Diplôme de Fin d'Etudes Secondaires* which qualifies for University Entrance. For pupils who do not wish to attend Secondary School there are three-year supplementary classes.

There is no university in Luxembourg, so students attend foreign universities mainly in France, Germany, Belgium or Switzerland. In 1969 a Centre Universitaire

was created offering:

- (a) Cours Universitaires corresponding to the first year of University and leading to the Certificat d'Etudes entitling the student to enter the second year of a foreign university.
- (b) Cours Complémentaires provide instruction in certain subjects specific to Luxembourg, e.g. Law, Teaching, etc.

Tourism

Luxembourg is famous for the beauty of its scenery. Many tourist resorts have grown up round the ruins of mediaeval castles such as Clerf, Esch/Sauer, Vianden and Wiltz

Sport

Football is the most popular game.

MALTA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The island of Malta, with the smaller islands of Gozo and Comino, is situated in the central Mediterranean 60 miles south of Sicily and 200 miles north of the African coast. Climate is warm; winter temperatures do not fall below 40°F (4.4°C); summer temperatures rise to 98°F (36.6°C). English and Maltese are the official languages though Italian is widely spoken. The state religion is Roman Catholicism. The flag consists of two vertical bands of white and red, the white band bearing the George Cross in the top-left corner. The capital is Valetta.

Recent History

Malta was awarded the George Cross by King George VI for the heroism of her people during the Second World War. Under the Constitution of 1947 self-government was granted to the island except in certain matters reserved to the Governor. Civil disturbances followed the resignation of the Mintoff Labour Government of 1958 and a state of emergency was declared, the Governor assuming direct administration. In 1961 a new constitution was adopted and elections held which returned the Nationalist Government of Dr. Borg Olivier. As a result of the London conference of August 1963, Malta became an independent monarchy within the Commonwealth on September 21st, 1964 and in the following year was admitted to the Council of Europe and the United Nations.

An agreement on the proposed decrease of British forces in Malta was negotiated in March 1967. Under this agreement, the U.K. will cut annual defence outlays from £12.5 million to £6 million, but the cuts will be made over a period of five years. The dispute over the £23 million still outstanding from the £51 million aid to development agreed to by the British Government in 1964 has yet to be settled.

Malta applied for association with the European Economic Community in September 1967. In September 1968 Malta became a member of the International Monetary Fund. A general election is anticipated for spring 1971.

Government

The Constitution of 1964 provides for Malta to have complete independence within the Commonwealth. H.M. the Queen is represented by the Governor-General. There is a fifty-member House of Representatives elected by proportional representation. Government is by a Cabinet which is responsible to the House.

Defence

There are small local forces which are being built up with British assistance, and Malta has signed a mutual defence agreement with the United Kingdom. Malta's position in the Central Mediterranean makes it a vital part of the strategic defence of Britain and NATO. There are Royal Air Force airfields at Luqa, Ta'Qali and Hal Far. The Grand Harbour at Valetta is still an important naval base.

Economic Affairs

Principal crops are onions, grapes, wheat, barley and fodder. Fresh vegetables and potatoes are the main cash crops. Most raw materials have to be imported. Industry centres on ship repairing and building but there are light industries producing foodstuffs, footwear, clothing, paint, refrigerators and boats. Many Maltese emigrate to Australia and the United Kingdom.

In April 1968 the Malta Parliament passed the Malta Dockland Bill, providing for the nationalization of the firm of Bailey (Malta) Ltd. and the formation of the Malta Drydock Corporation. The British Government has agreed to settle the dockyard's outstanding liabilities and to provide a £3 million development grant.

The Maltese Government has accepted plans to build a free port zone in Marsaxlokk Bay. The project, to make Malta a distributing base in the Mediterranean, should start operating by 1971. The third five-year development plan covers 1969-74.

Transport and Communications

There are some 560 miles of roads. The international airport is at Luqa. The main harbour, Valetta is used annually by some 2,100 vessels of over three million tons.

Social Welfare

Social security is provided under the 1956 National Insurance Act. There is reciprocity in social insurance between Malta and the United Kingdom.

Education

Education is compulsory between the ages of 6 and 14, and given in Roman Catholic Government schools. Instruction is in Maltese and English. Secondary School Education (Grammar and Technical) is available to a limited number of children from the age of 10; admission is through a qualifying entrance examination. There are two teacher training colleges, a college of technology, and one University. Numbers of pupils receiving education in 1967-68 were: primary 44,000; secondary 8,000; technical and vocational 1,688; higher 1,148; teacher training 392.

Tourism

The Government is providing f1 million to build a tourist industry. The island has climatic, scenic and historical assets. Excavations indicate the existence of an advanced culture dating from 2000 B.C. There are fine beaches. Tourism is rapidly becoming a major source of Malta's income. In 1968 there were just under 100,000 visitors of which nearly 80 per cent came from Britain.

Sport

Football is the most popular game.

Weights and Measures

The Imperial System of weights and measures is in force. (See under Great Britain.)

Currency and Exchange Rates

The monetary unit is the Maltese Pound which is at par with the Pound Sterling.

In 1968 Malta issued her first bank notes since independence. Both British and Maltese currencies are used.

Notes: £5, £1, 10 shillings (10/-). Coins: same currency as U.K.

Exchange rate: $f_1 = U.S. 2.40 .

THE CONSTITUTION

The Independence Constitution was presented in draft form to the Legislative Assembly on the 31st March, 1964, and a referendum was held in May 1964 asking the people whether the Constitution as presented by the Government and endorsed by the House met their approval. The result of the poll was 65,714 "yes" and 54,919 "no" with 9,016 invalid votes. After prolonged talks between the Prime Minister of Malta and the Secretary of State for the Colonies, the draft Constitution prepared by the Government of Malta, with minor agreed amendments, was approved by the British Government. The Malta Independence Act was approved by the United Kingdom Parliament on the 28th July, 1964 and received Royal assent on the 31st of that month.

The Malta Independence Constitution adopts a monarchical system with a Governor-General representing Her Majesty The Queen. Maltese citizens are also citizens of the Commonwealth. Provisions in the new Constitution provide for the protection of the Roman Catholic Church and of the fundamental rights and freedoms of the

individual; for Education to be compulsory in primary schools and free in those which are state-run; for elections to be free; for the independence of the Judicature and for the setting up of an independent Public Service Commission. Sound and vision broadcasts are under the control of an independent Authority.

The Government concluded a Defence Agreement and a Financial Agreement with the United Kingdom Govern-

ment for a period of ten years.

MONACO

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Principality of Monaco occupies 11 square kilometres on France's south-eastern Mediterranean coast. The climate is fine and warm with very mild winters. The languages are French and Monégasque (a mixture of French and Italian). Roman Catholicism is the religion of the nation. Flag: red and white (horizontal). Capital: Monte Carlo.

Recent History

In 1962 a new Constitution was introduced granting more power to the elected National Council. Also in 1962 the French Government set up a customs barrier outside the Principality to exercise stricter control on the movement of goods between the two countries. In May 1963 the barrier was lifted and a new Convention was signed bringing many French companies established in Monaco under the fiscal authority of France.

Government

Legislative power is exercised by the Prince and the National Council, which consists of eighteen members elected for a term of five years by universal suffrage. Executive power is vested in the hereditary Prince and the Ministers of State assisted by four Government Councillors. The Prince represents the principality in its relations with foreign powers; he signs and ratifies treaties.

Economic Affairs

Revenue is derived mainly from transactional laws, the sale of tobacco, postage stamps and tourism.

Tourism

The pleasant climate and the amenities of Monte Carlo, including the world famous Casino, have made Monaco a leading centre for tourism both in summer and winter.

Public Holidays, 1970

THE CONSTITUTION

This small Principality has been in existence since about 968. It was abolished under the French Revolution and First Empire, but it was re-established in 1814; and in 1815 was placed under the protection of the Kingdom of Sardinia by the Treaty of Vienna. In 1848 Mentone and Roccabruna asserted their independence, and in 1861 Charles III ceded his rights over the two towns to France. With the concurrent withdrawal of the Sardinian garrison. Monaco ceased to be a Sardinian protectorate and became an enclave of France. On January 7th, 1911, Prince Albert, great-grandfather of the reigning sovereign, Prince Rainier III, promulgated a Constitution (modified November 18th, 1917), which provided for a National Council elected by a panel of 30 members composed of delegates of the municipality, and 21 electors appointed by universal suffrage. The legislative power was exercised by the Prince and the National Council, which contained 18 members elected for five years. The executive government was exercised, under the authority of the Sovereign, by the Minister of State, assisted by the three members of the Council of Government.

On January 29th, 1959, the Constitution was provisionally suspended by Prince Rainier. The duties of the National Council were to be carried out by the Council of State, an official body, and those of the Municipal Council, the other elected body in the Principality, by an eightmember delegation appointed by Royal Ordinance.

In February 1961 the National Council was restored and an Economic Advisory Council was set up to assist it.

On December 17th, 1962, a new Constitution was promulgated by Prince Rainier. Any future amendments to this may be made only with the approval of the elected National Council. The new text maintains the traditional hereditary monarchy though the principle of divine right is renounced. The right of association, trade union freedom and the right to strike are guaranteed. The Supreme Tribunal safeguards fundamental liberties. The new Constitution also bestows the franchise on women.

THE NETHERLANDS

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of the Netherlands is situated in Western Europe, bounded to the east by Germany and to the south by Belgium. Its northern and western shores are washed by the North Sea. Much of the land lies below sea level. Climate is temperate. The language is Dutch. About 40 per cent of the population is Protestant, 40 per cent is Roman Catholic and 18 per cent does not profess any religion. The flag carries three horizontal bands of red, white and blue. The capital is Amsterdam but the government seat is The Hague, the third largest city.

Recent History

During the Second World War the Netherlands abandoned her neutral policy later signing the Brussels Pact along with the other Western powers. Economically she became a member of Benelux (Belgium, Netherlands, Luxembourg). Indonesian forces in the Dutch East Indies opposed the return of the administration in 1945 and in 1949 independence was granted to the archipelago which became known as the Republic of Indonesia. In 1962 Indonesia laid claim to Dutch New Guinea and responsibility for the colony was handed over by the Netherlands in April, 1963.

The Cabinet of Dr. Marijnen resigned in February 1965 over the question of commercial advertising on radio and television. The coalition Government of Dr. Cals took office in April, the Labour Party participating in the Government for the first time since 1959. In October 1966 this cabinet resigned and a caretaker government took office. In April 1967, following General Elections, Mr. Piet de Jong formed a coalition government dedicated to the restoration of a well-balanced economy.

Government

The Netherlands is a constitutional monarchy. Parliament is bicameral, consisting of the Lower Chamber or Second House elected by all citizens of over 21 years of age voting on a basis of proportional representation. The First Chamber or Upper House is elected by Provincial Representatives' Councils. The Cabinet holds executive power. The Upper Chamber can accept or reject legislation but only the Lower Chamber can amend it. The Sovereign gives assent to all Bills.

Defence

The Netherlands is a member of NATO. Military service is compulsory between the ages of 20 and 35 for a period of at least 18 months. Total strength of the armed forces is 128,000, comprising Army 86,000, Navy 20,500 and Air Force 21,500. Defence estimates for 1970 totalled 3,989 million guilders.

Economic Affairs

Despite high population density there is a surplus of agricultural produce made possible by land reclamation, intensive scientific cultivation and co-operative crop distri-

bution. Seed crops, bulbs, horticultural and dairy products account for one quarter of exports. About 40 per cent of the working population is in industry which, because of the shortage of home-produced raw materials, is mainly processive. Oil and natural gas fields under territorial waters are being explored, while an estimated 1,100,000 million cubic metres of natural gas, discovered below the northern province of Groningen, is being exploited. Output includes steel, metals, transport equipment, chemicals, oil, radios, textiles and ships. Chocolate, biscuits, margarine and other foodstuffs are also important. Amsterdam is the centre for the trade in tobacco, diamonds, precious metals and art treasures. The Netherlands is a founder member of the European Common Market.

In 1969 as a result of strains on the economy due to inflationary pressures the bank rate rose in three stages from $4\frac{1}{6}$ to 6 per cent.

Transport and Communications

Most freight is carried on inland waterways of which there are about 4,000 miles. There are 2,000 miles of state-operated railways providing mainly passenger services. The Netherlands is one of the world's leading shipping countries, freighters constituting 58 per cent of the total tonnage. In 1969 the merchant marine numbered 21 passenger ships, 353 freighters, 741 coasters and 103 tankers. Royal Dutch Airlines (KLM) is the world's oldest commercial airline and has services to all parts of the world.

Social Welfare

The Netherlands' first Social Insurance Act was passed in 1901. Since that time, and particularly since the Second World War, numerous advances have been made in making coverage more comprehensive. The 1967 Health Insurance Act now covers incapacity to work for up to one year, regardless of cause. After this time, compensation is paid (at 80 per cent of the previous income) according to the Working Incapacity Act of 1967. Health insurance is compulsory for wage earners, and voluntary for non-wage earners whose incomes are less than fl.13,200. Contributions are made jointly by employer and employee. There are four general National Insurance acts covering Old Age Pensions, Widows' and Orphans' Pensions, Children's Allowances, and Special Sickness Expenses. A further four acts, applicable specifically to workers, cover Health Insurance, Working Incapacity Insurance, Unemployment Benefits, and Family Allowances.

Education

There are two types of school in the Netherlands: (1) public schools maintained sometimes by the state, but more frequently by municipalities and attended by about 30 per cent of all school children; (2) private schools which are for the most part denominational and are attended by 70 per cent of the school-going population; they are subsidized by the State often up to 100 per cent. Schools are administered by school boards, responsible to the local

THE NETHERLANDS-(INTRODUCTORY SURVEY)

authorities or to the private organizations that run them, thus providing teachers with considerable freedom. The Minister of Education and Science is responsible for educational legislation and its enforcement. In matters of general education he is advised by an *Education Council* made up of University representatives.

Education is compulsory in the Netherlands from 7 to 15. The primary school course lasts six years and is followed by various types of secondary education. (1) Pre-University Schools provide various six-year courses that prepare pupils for University Education: (a) The Gymnasium teaches Latin and Greek. In their final two years children are divided into A classes specializing in Classics and B classes specializing in Mathematics and Science; (b) The Atheneum does not teach classics; in their final three years children are divided into A sections specializing in economic and social sciences and B sections specializing in Mathematics and Science; (c) The Lyceum combines the above two types of school on comprehensive lines. (2) General Secondary Education comprises higher, middle and lower secondary schools, providing 5, 3-4 and 2-year courses respectively; it does not prepare for University, though middle and higher secondary schools may be followed by section courses at pre-university schools. Lower secondary schools are replacing the two-year continued primary schools and are now generally being incorporated into lower vocational training schools. (3) Vocational Schools are run on similar lines to the general secondary schools and provide courses in all aspects of secondary and higher technological education.

University Education is provided at six universities and seven institutes.

Tourism

The chief attractions are the out-lying islands, the old towns, the canals, the cultivated fields of spring flowers, the art galleries and modern architecture.

Receipts from tourism totalled 770 million guilders in 1969.

Visas are not required for nationals of the following countries: Belgium, Denmark, Finland, France, Germany (Federal Republic), Greece, Ireland, Italy, Luxembourg, Norway, Austria, Portugal, Spain, Sweden, Switzerland, United Kingdom.

Sport

Football is the most popular sport, closely followed by gymnastics and skating.

Public Holidays, 1970

The main public holidays are: January 1 (New Year's Day), March 30 (Easter Monday), April 30 (Queen's Birthday), May 7 (Ascension Day), May 18 (Whit Monday), December 25 and 26 (Christmas).

THE CONSTITUTION

THE NETHERLANDS KINGDOM

Under the Constitution the State (the Kingdom) of the Netherlands consists of territories in Europe (the Realm in Europe of the Netherlands), in the West Indies, Surinam (Dutch Guiana) and the Netherlands Antilles. Under the Statute of the Realm signed by Queen Juliana in 1945, the Netherlands Surinam and the Netherlands Antilles were constituted as a single realm under the House of Orange, thereby ending the former colonial status of Surinam and the Netherlands Antilles.

POWER OF THE MONARCHY

The Netherlands is a kingdom with responsible and popular government. The Constitution regulates the succession and regency in great detail. When no heir exists, the last Sovereign and a Joint Assembly of the States-General (of a size augmented to double the usual numbers) shall designate the successor, and the Joint Assembly shall act of itself if the Sovereign previously dies. Normally the succession is in the direct male line or, failing a male, in direct female line. The age of majority of the Sovereign is 18.

HISTORY

Independent constitutional life began in the Eighty Years' War (1568-1648), in the course of which seven provinces of the Netherlands seceded from the Spanish Habsburg Monarchy and united themselves in the Dutch Republic under the sovereignty of the States-General. During the following centuries Princes of the House of Orange intermittently held high office in the Republic as Stadhouders, a function somewhat similar to that of Chancellors and Commanders-in-Chief. The Napoleonic era saw the Netherlands first as a Kingdom under one of Napoleon's brothers (1806 to 1810) and later (1810-1813) as an integral part of France. At the Restoration of 1814 the Netherlands became an independent Monarchy with the House of Orange as constitutional Sovereigns. The union with Belgium in the United Kingdom of the Netherlands lasted until the secession of Belgium in 1830. The democratic principle of ministerial responsibility to Parliament was introduced under a revision of the Constitution in 1848. The capital of the Netherlands is Amsterdam. The seat of the Government is at The Hague.

ELECTORAL SYSTEM

In 1919 and 1922 electoral reform laws swept away the limited categories of voters, designed in 1887 and 1896 to give the vote to those of required "aptitude and social condition", and gave the suffrage to all men and women over 25. The age was reduced in 1945 to 23 and in 1966 to 21. Attendance at the ballot is compulsory.

The Parliamentary Assemblies are called the States-General and consist of two Chambers, a First and a Second Chamber. The Second Chamber is composed of 150 members, and is elected for four years on a system of Proportional Representation. The First Chamber is composed of 75 members, elected, since 1848, by the Provincial Councils for a term of six years, one-half retiring every three years. All Netherlanders who have reached the age of 30 are eligible for election to the States-General.

MINISTERIAL RESPONSIBILITY

For all the political actions of the King the ministers are responsible to the States-General. Consequently the power of the Crown (i.e. the King and ministers) to dissolve either or both Chambers is ultimately subject to the judgment of public opinion as interpreted by the States-General and the Cabinet itself. A revision of the Constitution in 1922 made the right of the King to declare war and conclude international agreements (treaties, etc.), dependent upon prior parliamentary sanction. New clauses laying down the conditions under which sovereign powers may be transferred to international organizations, and acknowledging the supremacy of international law, have recently been included in the Constitution.

The Constitution says nothing about a Prime Minister or a Cabinet: it merely declares that the King establishes ministerial departments, and appoints and dismisses the ministers. Democratic development has enforced upon the Crown the principle that the King shall appoint a Cabinet through the choice of a Cabinet-former, who usually, though not necessarily, will have a majority in Parliament.

Ministers have the right to speak in both Chambers, but not to vote. They are submitted to the questioning and criticism customary in democratic legislatures. The States-General has one ordinary session annually, which normally lasts the whole year, and the King, through the Cabinet, can call others. Legislative power is in the joint authority of the States-General and the Crown (i.e. King and Ministers). The two Chambers must agree on legislation, but while the First Chamber has a power of acceptance or rejection, only the Second Chamber has the power of amendment. The budget, like all common laws, is first presented in the Second Chamber. Revision of the Constitution is possible after two readings in Parliament, and a two-thirds majority on the second reading.

THE COUNCIL OF STATE

There is a Council of State, presided over and appointed by the Sovereign, usually from notable personages, and the Cabinet and King consult this body on legislative and administrative policy, and upon the issue of decrees.

LOCAL GOVERNMENT

The Netherlands consists of eleven provinces. The administrative organs are the Provincial States, the "Deputy States" and the Governor of the province. The Provincial States—directly elected, as is the Second Chamber, on a basis of proportional representation—form as it were the Parliament of the provinces. From its members each elects a college of Deputy States to act as Executive Committee of the province. The Governor is the representative of the Crown in the province and is appointed, as well as discharged by the Crown. He is Chairman of the Provincial and Deputy States. By virtue of the Constitution, the Provincial States have the right of making their own decisions on measures in the interest of the province.

The municipalities (about one thousand in number)—each governed by a burgomaster (also appointed by the Crown), assisted by aldermen (chosen from and by the Council) and the Council elected by the local inhabitants—have the right to make local regulations.

JUDICIAL SYSTEM

- De Hoge Raad der Nederlanden (The Supreme Court of the Netherlands): The Hague; f. 1838. For appeals in cassation against decisions of courts of lower jurisdiction. As a court of first instance the Supreme Court tries offences committed in their official capacity by members of the States-General, Ministers and other high officers. Dealing with appeals in cassation a court is composed of five justices (raadsheer). Pres. Supreme Court F. J. DE JONG; Vice-Pres. M. A. VAN RIJN VAN ALKEMADE, G. J. WIARDA, H. T. A. VAN DER LOOS; Attorney-Gen. G. E. LANGEMEIJER; Deputies Att.-Gen. P. S'JACOB, M. S. VAN OOSTEN, W. P. BAKHOVEN, W. J. M. BERGER, J. L. REMMELINK; Sec. of the Court M. J. C. REYERS.
- Gerechtshoven (Courts of Appeal): 5 courts: Amsterdam, Arnhem, 's-Hertogenbosch, Leeuwarden, The Hague. A court is composed of three judges (raadsheer); appeal is from decisions of the District Courts of Justice. Fiscal Divisions (Belastinghamers) of the Courts of Appeal deal with appeals against decisions relating to the enforcement of the fiscal laws (administrative jurisdiction). The court at Arnhem has a tenancy division (Pachthamer) composed of three judges and two assessors (one tenant and one landlord) and hears appeals from decisions of all Canton Tenancy Divisions.
- Arrondissementsrechtbanken (District Courts of Justice): 19 courts for important civil and penal cases and for appeals from decisions of the Canton Judges. A court is composed of three judges (rechter); no jury; summary jurisdiction in civil cases by the President of the Court;

simple penal cases, including economic offences, generally by a single judge (*Politierechter*). Offences committed by juveniles are (with certain exceptions) tried by a specialized judge (*Kinderrechter*), who is also competent to take certain legal steps when the upbringing of a juvenile is endangered.

Kantongerechten (Canton Courts): 62 courts for civil and penal cases of minor importance. A court consists of a single judge, the Canton Judge (Kantonrechter). Each Canton Court has a Tenancy Division (Pachthamer), presided by the Canton Judge who is assisted by two assessors, one a landlord and one a tenant.

Justices and judges must have graduated in law at a Dutch university, and are nominated for life by the Crown. The justices of the Supreme Court are nominated from a list of three compiled by the Second Chamber of the States-General.

ADMINISTRATIVE JURISDICTION

- Centrale Raad van Beroep (Central Appeal Council):
 Utrecht; tries in supreme instance appeals against decisions of the Appeal Councils and the Civil Service Courts; Pres. H. L. HOOGENHUIS; Sec. JIR. A. BAUD.
- Raden van Beroep (Appeal Councils): 10 courts to hear appeals against decisions enforcing social insurance legislation.
- Amhtenarengerechten (Civil Service Courts): 10 courts for civil service arbitration. The Civil Service Court at The Hague also acts as Military Service Court for military service arbitration.

RADIO AND TELEVISION

RADIO

Nederlandse Omroep Stichting (Netherlands Broadcasting Foundation): P.O.B. 10, Hilvorsum; Chair. E. A. SCHÜTTENHELM.

The Foundation was set up in 1969 by the union of Nederlandse Radio-Unie (N.R.U.) with the television organization Nederlandse Televisie Stichting (N.T.S.).

There are six associate companies (Algemene Vereniging Radio-Omrocp, Nederlandse Christelijke Radio Omrocp, Omroepvereniging VARA, Katholieke Radio-Omroep, Vrijzinning Protestantse Radio-Omroep, Televisie Radio Omroep Stichting, all f. 1925) who in 1947 agreed upon a Charter by which their various possessions-studios, technical equipment, records, and music libraries-were merged for joint use into one foundation called the Netherlands Radio Union (Nederlandsche Radio Unie). The members of this Union still retain individual autonomy in planning and broadcasting their programmes during the hours allotted to them by the Government decree. Since October 1966 the Nederlandsche Radio Unie has provided a joint programme (25 per cent of total broadcasting time) through a transitional system connected with the coming Broadcasting Act. A new organization (Televisic Radio Omrocp Nederlands) has been allowed broadcasting time and has joined the foundation NOS.

The licence fee for radios is 24 guilders per annum. Advertising started in March 1968.

There is no preventive censorship.

The total number of registered radio sets in the Netherlands at the end of 1969 was 4,035,599.

LAND RECLAMATION AND DEVELOPMENT

Ministry of Transport, Water Control and Public Works: The Hague Dr. Plesmanweg 1-6; is the authority responsible for land reclamation and waterways.

Without intensive land protection schemes nearly the whole of the north and west of the Netherlands (about 40 per cent of the total area of the country) would be inundated by sea-water twice a day. A large part of the country (as, for example, the Zuyder Zee) has already been drained by the creation of polders—a piece of land surrounded by a dike from which all superfluous water can be drained off into a canal or the sea by the aid of pumps. Despite the vast system of sea-dikes, such as the Weskapelse Sea-Dike on the Island of Walcheren, and the Hondsbosse and Pettemer Sea-Dike to the north of Alkmaar in the province of North Holland, storm-tides can still create disaster. The great disaster of February 1953, in which 1,835 people lost their lives, and 450,000 acres of land were flooded, resulted in the formation of the Delta Commission to investigate a project for "scaling off" the Rhine and the Scheldt estuaries of Zeeland and South Holland.

The Delta Plan, which was accepted by the Second Chamber of the States General in 1957, will shorten the southern coastline by 435 miles and protect the estuaries of Zeeland and Southern Holland. The Scheme consists of 4 closing dams across the mouths of the Eastern Scheldt and 4 regulating dams, three in the Scheldt estuary and one on the Hollandsche Ijssel. Roads crossing the dams will link the islands of the Scheldt estuary to the mainland. The whole scheme is expected to take 25 years to complete.

The main works under the Plan are:

- Haringvliet Closing Dam: between Voorne and Goerce Overflakkee; date of completion 1971.
- Brouwershavensche Gat Closing Dam: between Goeree Overflakkee and Schouven Duiveland; date of completion 1972.
- Eastern Scheldt Closing Dam: between Schouven Duiveland and Noord Beveland; date of completion 1978.

THE NETHERLANDS-(LAND RECLAMATION, TRANSPORT)

- 4. Veeregat Closing Dam: between Noord Beveland and Walcheren; closed by means of seven 5,000-ton caissons 1961; a dike in which the caissons disappear has been constructed.
- 5. Three Secondary dams: Volkerak (between the Hollandschdiep and the Eastern Scheldt estuary); Grevelingen (between Goeree Overflakkee and Schouven Duiveland); Zandkreek (between Noord and Zuid Beveland). This dam, together with the Veeregat, forms the Three Islands Plan, linking the islands of Noord and Zuid Beveland and Walcheren. Dates of completion of all secondary dams 1961-70.
- Kapelle Moveable Flood Barrier: on the Hollandsche Ijssel east of Rotterdam. This barrier was finished in 1958.

The whole scheme is also designed to create a fresh-water lake in the Eastern Scheldt estuary thereby improving water supplies and permitting the reclamation of saltings and other saline land.

The total cost is estimated at about 2,500 million guilders (£250 million). Part of the cost will be defrayed by the use of counterpart funds, accumulated out of American economic aid to the Netherlands between 1948 and 1953. By agreement with the United States the money will be distributed as follows:

Delta Plan: 40m. guilders; Reinforcement of dikes: 30m. guilders; Road Construction: 30m. guilders; Tunnel

under the North Sea near Velsen: 10.78m, guilders; fina recovery of Walcheren Island: 5m, guilders.

The Plan does not affect the Western Scheldt Channel, which gives access from the Belgian port of Antwerp to the North Sea through Dutch territorial waters, and on which freedom of navigation is guaranteed to Belgium under international treaty.

Europoort: The original plan was put forward in 1955 to build an extensive port west of Rotterdam on the coast, at a cost of some 1,000 million guilders. A number of oil refineries have been built between the Europoort and Rotterdam and a channel in the North Sea bed is being dredged to accommodate the new giant tankers of up to 225,000 tons. Existing land area is not sufficient and new areas are being consolidated from dredged material, and projected uses of this land include additional refineries, steelworks, shipyards for the repair of giant tankers and ore carriers and depots for repairing and refuelling the freighters of the future. The first 200,000 tons tanker arrived December 1969.

Natural Gas has been found in extensive quantities in the Northern provinces of the Netherlands, and in the North Sea. A pipeline system has been extended throughout the country and natural gas is used in nearly all Dutch homes. Agreements have been signed to export natural gas to Belgium, Germany, and France and negotiations are taking place with Austria and the United Kingdom.

TRANSPORT

RAILWAYS

Nederlandso Spoorwegen: Moreelsepark 1, Utrecht; length of lines 3,148 km.; Pres. Ir. J. Lohmann; Gen. Man. Ir. P. H. Bosboom.

All railway lines in the Netherlands are operated by the Nederlandse Spoorwegen, a limited liability company of which the State is the sole shareholder, and which company was formed by the amalgamation of the Maatschappij tot Exploitatie van Staatsspoorwegen and the Hollandsche IJzeren Spoorweg Maatschappij. Half the Dutch railway network is electrified; the remaining track carries diesel electric stock.

INLAND WATERWAYS

Ministry of Transport, Water Control and Public Works: Dr. Plesmanweg 1-6, The Hague; responsible for all waterways, water control construction of dykes and land reclamation.

An extensive network of rivers and canals has led to an outstanding development in Dutch inland shipping. Approximately 50 per cent of goods transported inside the Netherlands are carried on the canals and waterways. Dutch inland shipping has access to Germany along the Rhine and its branch rivers, and to France and Belgium along the Meuse. Ocean traffic reaches Rotterdam via the New Waterway, and Amsterdam is connected to the North Sea by the 18-mile-long North Sea Canal.

De Nederlandse Operastichting (Netherlands Opera Foundation): Stadsschouwburg, P.O.B. 1519, Amsterdam; f. 1965; Intendant Dr. M. Huisman; Admin. Dir. Dr. J. DEN DAAS; publ. Opera (bi-monthly).

Stichting Het Nationale Ballet (National Ballet Foundation): Stadsschouwburg, Amsterdam; Artistic Dirs. R. van Dantzig, R. Kaesen; Man. A. L. Gerritsen.

PRINCIPAL ORCHESTRAS

Goncertgebouworkest: Jacob Obrechtstraat 51, Amsterdam; Principal Conductor Bernard Haiting.

Residentie-Orkest: Statenlaan 28, The Hague.

Rotterdams Philharmonisch Orkest: c/o De Doelen, Kruisstraat 2, Rotterdam-2; Conductors Jean Four-NET, EDO DE WAART.

All these and 10 others receive State subsidies.

ATOMIC ENERGY

Contrale Raad voor de Kernenergie (Central Council for Nuclear Affairs): Duinweg 24, P.O.B. 5086, The Hague; f. 1963 to advise the Government on nuclear affairs; Chair. Prof. Ir. H. J. de Wijs; Council: Prof. Dr. J. N. Bakhuizen van den Brink, Prof. Dr. H. G. van Bueren, Ir. C. J. van Daatselaar, Ir. A. van Ganswijk, Prof. Dr. J. A. Goedkoop, Dr. N. J. A. Groen, Ir. W. Schuffelen, Prof. Ir. H. W. Slotboom, J. W. Thiessen; Sec. Mrs. E. A. C. Meijlink.

Wetenschappelijke Raad voor de Kernenergie (Scientific Council for Nuclear Affairs): Duinweg 24, P.O.B. 5086, The Hague; f. 1962; to advise state and private institutions on nuclear research; Chair. Prof. Dr. H. G. VAN BULEREN; Members Prof. Dr. J. N. BAKHUIZEN VAN DEN BRINK, Dr. T. J. BARENDREGT, Prof. Dr. H. W. JULIUS, Prof. Ir. D. G. H. LATZKO (Dep. Chair.), Dr. L. M. VAN PUTTEN, Ir. H. RINIA, Prof. Dr. A. C. SCHUFFELEN, Prof. Ir. H. J. DE WIJS; Sec. Mr. W. ANTHEUNISSEN.

Industrial Council for Nuclear Energy: 123 Laan van Nieuw Oost-Indie, The Hague; to advise the ministers on the industrial application of nuclear energy and ionizing radiation; Members: H. H. Wemmers (Pres.), H. W. Bloemers, ll.d. (Vice-Pres.), Ir. A. van Ganswijk, Ir. W. A. de Haas, Dr. E. L. Kramer, Ir. A. E. Lindo, Ir. L. F. Otto, Ir. J. C. van Reenen, Prof. Ir. H. W. Slotboom.

The first nuclear power plant, a 54 MW boiling-water reactor, at Dodeward (nr. Nijmegen), was brought into operation at the end of 1968. A second power plant with a 450 MW pressurized water reactor is being built at Borssel (nr. Flushing); expected completion date December 1973.

THE NETHERLANDS-(ATOMIC ENERGY, UNIVERSITIES)

reactor, is planned for completion at Dodewaard in 1969. A much larger (300-400 MW) reactor will be located at Dodewaard or Flushing East; completion date December 1973.

Public Health Council: 8 Dr. Kuyperstraat, The Hague; to inform the ministers on the current state of science as it regards public health, including nuclear aspects.

Interdepartmental Committee on Nuclear Energy: c/o
Ministry of Economic Affairs (Directorate of Nuclear
Energy), 123 Laan van Nieuw Oost Indie, The Hague;
f. 1964; co-operation between various ministries as to
measures to be taken towards peaceful uses of nuclear
energy; members: representatives of most ministries.

Stichting voor Fundamenteel Onderzoek der Materie (FOM)
(Foundation for Fundamental Research on Matter):
Lucas Bolwerk 4, Utrecht; Dir. Dr. A. A. BOUMANS.

In the FOM Institute for Atomic and Molecular Physics at Amsterdam work on fundamental atomic physics with ion beams is carried out. The FOM Institute for Plasma Physics at Jutphaas (Utrecht) is a centre for thermonuclear research, established 1959. FOM organises research on nuclear physics, atomic physics, metals, molecular physics, solid state physics, high energy physics, and thermonuclear reactions.

Stichting Instituut voor Kernphysisch Onderzoek (Foundation Institute for Nuclear Physics Research): Ooster Ringdijk 18, Amsterdam; Exec. Dir. Prof. Dr. R. VAN LIESHOUT.

The Institute is equipped with a 180-cm. cyclotron, a 85 MeV linear electron accelerator and a 14 MeV neutron generator. Both the Institute and FOM (above) also undertake radioisotope research.

Nederlandscho Centrale Organisatie voor Toegepastnatuurweienschappelijk Onderzoek (TNO) (Netherlands Organization for Applied Scientific Research): Head Office, Juliana van Stolberglaan 148, P.O. Box 297, The Hague; 4,300 employees; Chair. Prof. Dr. H. W. Julius.

Industrial Liaison Dept. TNO, P.O.B. 215, Delft; research services.

Materials and engineering research pertaining to nuclear reactors (with emphasis on research connected with coolants, e.g. helium, terphenyls, sodium); radioisotope applications including labelled molecules, radiobiology.

Operation of a 50 MW sodium test installation.

Association Euratom—ITAL (Institute for Atomic Sciences in Agriculture): Kevenbergseweg 6, Wageningen; 1. 1957; 110 mems.; Dir. Dr. D. De Zeeuw; Tech. Dir. Drs. W. F. Oosterheert.

Irradiation facilities include a 100-kW reactor especially designed for agricultural research, a 1.7 MeV electron generator, gamma sources of 300 and 3,000 Curie Cs. 137, X-ray machine.

Stichting Kernvoortstuwing Koopvaardijschepen—(SKK)
(Foundation for Nuclear Propulsion of Merchant Vessels): 18 Wassenaarseweg, The Hague; f. 1957; Chair.
J. P. Kruseman.

Established by members of the Royal Netherlands Ship-Owners Association and a number of shipyards and engineering industries to carry out studies on nuclear ship propulsion.

Reactor Centrum Nederland (RCN) (Netherlands Reactor Centre): Scheveningseweg 112, The Hague; f. 1955; Chair. Dr. E. L. Kramer; Man. Dirs. Prof. Dr. J. A. Goedkoop, Prof. Ir. J. Pelser, Dr. R. W. R. Dee.

The RCN organises and finances applied nuclear research. It is a foundation in which the government, electricity producing companies, a number of Dutch industries and the Foundation for Fundamental Research on Matter are represented. The RCN has a scientific and technical centre at Petten, with laboratories for chemistry and physics and a 10-kW research reactor. A laboratory for metallurgy and a laboratory for highly radioactive objects have been built.

A 30 MW materials testing reactor has been built, but has been handed over to Euratom on the understanding that the RCN continues to operate and to maintain the reactor. Furthermore, a coupled fast thermal reactor system has been built. RCN also undertakes research on radioisotopes and organizes specialized training courses and a technical information centre.

In collaboration with the nuclear research centres at Karlsruhe (Germany) and Mol (Belgium) RCN undertakes research on fast breeder reactors.

An agreement with EURATOM was concluded in July 1961 to set up a nuclear research centre in Petten, adjacent to the RCN centre.

NORWAY

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Norway forms the western part of Scandinavia in Northern Europe. Within the Arctic Circle a section of Norwegian territory adjoins Finland and the U.S.S.R. A long, indented coast faces the Atlantic. Climate is temperate on the west coast but colder inland. There are two forms of the Norwegian language, which are officially recognized as equal. About 80 per cent of children in schools learn the older form Bohmāl as their principal language, whereas only 20 per cent learn the newer form Landsmāl (Neo-Norwegian). The Evangelical Lutheran State Church is the established religion. The flag carries a blue cross with white borders on red. The capital is Oslo.

Recent History

Norway remains a full participant in the Western alliance. In 1953 it became a founder member of the Nordic Council. During many years of rule by the Labour Party, a Conservative administration took over for less than a month in 1963. The non-socialist coalition government of Per Borten took office following the general election of September 1965. The Coalition government remained in power with a narrow majority of two seats in the general election of September 1969. In July 1967 Norway applied to join the European Economic Community.

Government

The Kingdom of Norway is a constitutional monarchy. Executive power is nominally vested in the King, legislative power lies with the Storting (Parliament) and judicial power with the judicature. The King's executive power is exercised through the Government, headed by the Prime Minister. The King appoints the Government in accordance with the will of the Storting, which is elected for a four-year term by adult universal suffrage. The Storting votes a quarter of its number to form the Lagling, the remaining three-quarters being the members of the Odelsting.

Defence

Norway is a full member of NATO. Out of a total expenditure of 20,524 million kroner in 1970, 2,759 million kroner is allocated to defence. There is compulsory national service, lasting a minimum of twelve months, to which all men between the ages of 20 and 44 are liable. The total strength of the Armed Forces is 35,000, comprising Army 19,000, Navy 7,400, and Air Force 9,000. There is also a mobilization reserve of 110,000 and a Home Guard of 80,000.

Economic Affairs

Foreign trade plays a dominant role in Norway's economy. Two-thirds of her exports go to European countries.

Norway's chief exports are aluminium and other nonferrous metals, woodpulp, paper and fish. She also produces metal ore and steel. Her merchant fleet is the world's fourth largest at 19 million gross registered tons. Norway is a member of the European Free Trade Association and has applied to join the European Economic Community.

An economic plan for the four years 1966 to 1969 produced an average annual growth rate of 4.2 per cent, with considerable increases in industrial production, investment and civilian consumption.

Transport and Communications

The Norwegian State Railways have a total length of 2,637 miles, more than half of which is electrified. There are about 43,000 miles of road, half of which are main roads. The Norwegian merchant fleet numbered 2,281 ships (Dec. 1968), totalling nearly 19.1 million gross tons. Norwegian Airlines has a two-sevenths share in the Scandinavian Airlines System (SAS).

Social Welfare

A compulsory National Pension Scheme came into force in January 1967, and covers old age, disability, widows, widowers, children, and rehabilitation. Existing health insurance and other compensation schemes will be incorporated. Financed by premiums from those covered, employers' contributions and grants from local and central government, the Scheme provides a basic pension, irrespective of former income, as well as an additional pension calculated on previous earnings. Since the office was introduced by law in 1963, an Ombudsman has been elected by the Storting every four years. The Ombudsman provides a free service to all citizens to "try and ensure against the public administration committing any injustice to the individual citizen" and "that civil-servants and others employed in the state administration do not make mistakes or fail in their duties". His field of activity does not cover private legal affairs, and he does not have the right to reverse an official decision. In practice, however, his pronouncements are normally complied with. A separate organization, the Trygderetten deals with complaints concerning state insurance and pension schemes.

Education

Education is compulsory for all children between the ages of 7 and 16. In 1967 there were 390,071 children receiving primary, 232,323 secondary and 24,355 higher education. There are three universities and six colleges of university standing. The new university at Trondheim is now operating, and the University at Tromso is expected to commence in 1970.

Tourism

Norway is a popular resort for tourists who prefer holidays in rugged, peaceful surroundings. It is also a centre for winter sports. Receipts from tourism in 1968 amounted to \$103 million and expenditure to \$95 million.

Visas are not required for nationals of the following countries: Algeria, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Canada, Chile, Colombia, Costa Rica, Cuba, Cyprus, Denmark, Dominican Republic, Ecuador, El Salvador, Finland, France, Gambia, Greece, Guatemala, Haiti, Honduras, Iceland, Ireland, Italy, Jamaica, Japan, Kenya, Liechtenstein, Luxembourg, Malaysia, Malta, Mexico, Monaco, Morocco, The Netherlands, New Zealand, Nicaragua, Pakistan, Panama, Paraguay, Peru, Portugal, San Marino, Sierra Leone, Singapore, South Africa, Spain, Sweden, Switzerland, Thailand, Trinidad and Tobago, Tunisia, Turkey, Uganda, United Kingdom, U.S.A., Uruguay, Venezuela, Yugoslavia, Zambia.

THE CONSTITUTION

THE Constitution of the Kingdom of Norway was promulgated on May 17th, 1814, by the National Assembly at Eidsvold.

According to the Constitution, Norway is a "free, independent, indivisible, inalienable Kingdom"; its form of government a "limited and hereditary monarchy". The Evangelical-Lutheran religion is the established religion of the State.

Executive power is vested in the King, legislative power in the Storting (the Parliament), and judicial power in the Iudicature.

EXECUTIVE POWER

The King exercises his power through the Statsråd (State Council). The State Council (the Government) is composed of a Prime Minister and not less than seven other Councillors of State, all above thirty years of age. The business to be dealt with in State Council is prepared by the various executive Ministries, each with a State Councillor at its head. These executive departments conduct the administrative work of the country.

The Government submits the budget estimates and introduces bills in the Storting.

Formally, the King appoints the Government, but since the introduction of the parliamentary system in 1884 it is the practice for him to act in accordance with the will of the Storting.

LEGISLATIVE POWER

The Storting is elected quadrennially by universal suffrage. All Norwegian citizens, men and women, who have completed their twentieth year, are eligible to vote. By a law passed in 1948 they are also, at the age of 21, eligible for election to the Storting. The Storting has 150 members, who elect one-fourth of their own body to constitute the Lagting; the other three-fourths compose the Odelsting. All bills must first be introduced in the Odelsting, either by the Government through a State Councillor or by a member of the Odelsting. Should the bill be passed by the Odelsting it is sent to the Lagting, who may adopt it or return it with amendments. If a bill be passed twice by the Odelsting and rejected on both occasions by the Lagting, it is submitted to the entire Storting and decided by a two-thirds majority. When a bill has thus been passed it must receive the royal assent in State Council.

Bills for the revision of the Constitution must be introduced in the first, second or third session after a new election. But only the Storting, after the following next election, has power to decide whether the proposed alteration should be adopted. Bills relating to the Constitution are dealt with only by the united Storting. For the adoption of a bill of this nature a two-thirds majority is required, and the measure becomes law without the royal assent.

The Storting votes all State expenditure and determines State revenue, taxes, customs tariffs and other duties; the Odelsting exercises control over government administration, government appointments and so forth.

The Storting prepares its business through its committees and settles such business, with the exception of bills, in plenum. The State Councillors (Ministers) may attend the Storting, having the right of speech but not of voting.

The Storting determines the duration of each session. It is opened and prorogued by the King each year. The Storting cannot be dissolved either by the King or by its own resolution until the expiry of the quadrennial period for which it has been elected.

CIVII

In each municipality there is a Conciliation Council (Forliksråd) consisting of three members elected by the municipal council for four years. As a rule, no case may be taken to a court of justice without mediation having been attempted by a Conciliation Court. In addition to mediation, the Conciliation Court has a judicial capacity and is intended to settle, in a simple manner without great expense to the parties involved, minor cases.

The ordinary lower courts are the District and Town Courts (Herredsrett, Byrett), which decide all cases not adjudicated upon by the Conciliation Court, and they also act as courts of appeal from judgments given in the Conciliation Court. The cases are adjudicated by a judge or magistrate, who sits either alone or with two lay judges.

Judgments delivered in the District and Town Courts may be taken, on appeal, to the Courts of Appeal (Lagmannsrett or "Lagmann's" Courts) or to the Supreme Court (Höyesterett). In the Courts of Appeal cases are judged by three qualified judges, but if requested by one of the parties, lay judges may be summoned.

The Supreme Court sits in Oslo and decides cases in the last instance. Five judges here participate in judging an appeal case.

CRIMINAL

The criminal courts are: Examining Courts (Forhörsretten), the District and Town Courts, Courts of Appeal (Lagmannsrett) and the Supreme Court. In the Examining Courts the professional judge presides alone, but in the District and Town Courts two lay judges also sit. The more serious criminal cases must be brought directly before the "Lagmann's" Court. Cases originating in the lower courts may be retried by the Courts of Appeal (Lagmannsrett) when the question of guilt is at issue; otherwise they are appealed directly to the Supreme Court. The "Lagmann's" Court is presided over by three legally qualified judges, who judge the case with the assistance of a jury of ten jurymen. For the accused to be pronounced guilty, at least seven jurymen must vote that he is so.

The Supreme Court (Höyesterett) is the Court of Final Appeal. In criminal cases the competence of the Court is, however, limited to questions concerning the application of the law, the nature of the penalty, and procedural errors of the lower court.

Capital punishment has been abolished, except for certain military and treasonable offences in time of war.

RELIGION

The Evangelical Lutheran Church is the established Church of Norway and is endowed by the State. The King is the head of the Church and nominates its elergy. There are 10 dioceses, 91 archdeaconries and 562 elerical districts.

The salary and pensions of clergy are fixed by law, and clergymen are economically independent of the members of their congregation.

The Evangelical Lutheran State Church: Bishops: Fridtjov Birkeli, Oslo; Alex Johnson, Hamar; Per Lonning, Borg; Dagiinn Hauge, Tunsberg; K. Stöylen, Agder; F. Birkeli, Stavanger; Per Juvkam, Björgvín; T. Godal, Nidatos; Bjarne O. Weider, Sör-Hálogoland; Monrad Norderval, Nord-Hálogoland.

The Methodist Church: Northern Europe Area, which includes Denmark, Finland, Norway and Sweden; f. 1856; 25,000 ments.; Bishop Dr. Odd Hagen, Sibyllegat 18, Stockholm.

The Norwegian Baptist Church: f. 1860; 7,000 members; Gen. Sec. H. ASAK KRISTIANSEN, Hausmannsgt. 22, Oslo.

The Norwegian Evangelical Lutheran Free Church: f. 1877; 19,160 mems.; Head and Chair. of Synod Rev. Leir Nilsen, Jonas Liesgt. 13, 1700 Sarpsborg; Sec. Rev. Ole Bjorn Hoiesen, Synod Office, Josefines gt. 5, Oslo 3.

The Norwegian Mission Covenant Church: 8,340 members.

The Roman Catholic Church: 8,000 members; Diocese of Oslo (est. 1953): Bishop Rt. Rev. J. W. Gran. Akersveien 5, Oslo; Vicariate Apostolic of Central Norway (est. 1953): Bishop Rt. Rev. Johannes Roth, Prinsengate 2 a 2, Trondheim; Vicariate Apostolic of North Norway (est. 1955): Bishop Rt. Rev. Johannes Wember, Storgaten 94, Tromso.

THE PRESS

The principle of press freedom is safeguarded in the Norwegian Constitution. There is no law specifically dealing with the Press; newspapermen are subject like any other citizen to the penal and other laws. Editors bear wide responsibility in law for the content of their papers, especially regarding such matters as libel. Although a journalist is legally entitled to conceal his source he may be required to disclose this information under penalty of imprisonment; but such instances are rare.

A three-member Council of Conduct gives judgements in cases of complaint against a paper or of disputes between papers. It has no powers of enforcement but its judgements are highly respected. The Press Association has a Code of Ethics aimed at maintaining the standards and reputation of the profession.

Norway has 158 newspapers with a total circulation of 1,730,000. Of these 84 are dailies accounting for some 1,385 copies. A few very large papers are responsible for the bulk of this circulation; the average daily sells some 5,000 copies. The non-dailies mostly appear three times a week, averaging 3,000 copies.

The Eastern region is the scene of most press activity. Oslo has nine dailies (circulation 500,000) which are especially influential throughout this area, and three of these—Aftenposten, Dagbladet and Arbeiderbladet—have a national readership. Nevertheless, in Norway's chief cities the large local dailies easily lead in their own districts. There are no Sunday newspapers but on Saturday the dailies usually have an extra large edition.

Daily and non-daily newspapers are characterized by a high proportion of serious and informative matter such as cultural, historical and economic articles, for the newspaper profession in Norway has traditionally felt its mission to be partly educational.

There are almost 2,000 periodicals with an estimated total circulation of two million copies. Women's magazines are particularly popular and make up over a quarter of this circulation figure.

There are no publishing chains although in 1967 the owners of Aftenposten bought Verdens Gang which was in financial difficulties. Newspapers are mainly privately owned. Most of the big papers are owned by corporations whose shares are held by individuals and political parties. The Labour Party and the National Trade Union Federation (LO) own and subsidize the labour press. Certain papers with Conservative sympathies such as Morgenbladet are subsidized by the Conservative holding company, Libertos, but many Conservative papers insist on being financially independent.

Papers tend to have strongly marked political allegiances. The Conservative Party with 43 papers leads the circulation with 560,000 copies, followed by the Liberal and Independent Liberal Parties whose 31 papers have a 406,000 circulation, and the Labour Party with 41 daily papers and 402,000 copies. These circulation figures do not correspond closely with the percentages of votes polled by the respective parties in the 1969 elections, which were Conservative 19.4 per cent, Liberal 9.3 per cent and Labour 46.7 per cent. The chief organs of the parties are respectively, Astenposten, Arbeiderbladet and Dagbladet.

A number of medium-sized papers which have been experiencing economic difficulties receive financial help from private individuals, parties and other organizations. Some papers economize by engaging in a form of cooperation by which two papers sometimes with different

political views, share the news copy while carrying different headings, editorials and sometimes one or two different pages.

In order of circulation the most popular daily newspapers are Oslo's Aftenposten (morning 185,994, evening 157,133) and Dagbladet (94,890), the Bergens Tidende (77,335) at Bergen, Adresseavisen (72,816) at Trondheim, Oslo's Arbeiderbladet (71,200) and Verdens Gang (46,600) and Stavanger's Aftenblad (45,000).

The privately owned Conservative Aftenposten leads in prestige, having some of the standing of the U.K. Times. It is followed by Arbeiderbladet and Dagbladet, both having a high standard of news coverage, though the latter is more of a popular family paper. Outside the capital one should note among the serious papers Slavanger Aftenblad and Bergens Tidende.

POLAND

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Situated in Eastern Europe the Polish People's Republic is bounded to the north by the Baltic Sea, to the west by the German Democratic Republic, to the south by Czechoslovakia and to the east by the U.S.S.R. The climate is temperate in the western region, but to the east it is of the continental type with hot summers and severe winters. Most of the population is Roman Catholic but there are 13 other religious denominations, the largest being the Polish Autocephalous Orthodox Church. The language is Polish. The flag carries two horizontal bands of white and red. The capital is Warsaw.

Recent History

A people's democracy was set up after the defeat of the German forces in 1944. Under the Potsdam Agreement signed by the major Allied powers in 1945, the former German territories along the line of the rivers Oder and Neisse and now forming one-third of Poland's total area, came under Polish sovereignty. Poland is in alliance with the U.S.S.R. and the countries of Eastern Europe. In April 1968 President Edward Ochab retired, and was replaced by Marshal Marian Spychalski.

Government

The supreme legislative organ is the Seym (Parliament), a unicameral body elected by all citizens of 18 years and over for a four-year term. From its number the Seym elects the 15 members of the Council of State, the President of which is the Head of State. Supreme executive power lies with the Council of Ministers, who are appointed or recalled by the Seym. The Council of Ministers is responsible for its activities to the Seym and to the Council of State between sessions of parliament. Also responsible to the Seym is the Supreme Board of Control, an independent body examining and controlling the legality, efficiency and usefulness of general legislation and administration.

Defence

Poland is a member of the Eastern European Mutual Aid Treaty (the Warsaw Pact). The strength of the armed forces is 275,000 comprising Army 185,000, Navy 20,000, Air Force 70,000. Military service lasts for two years in the Army, and for three years in the Navy and Air Force. There are also 45,000 security and border troops. Defence estimates for 1969 total 31,936m. Zlotys.

Economic Affairs

Although a number of state farms exist, 87 per cent of agricultural land remains in private hands. In 1967 the government embarked on an agricultural reform designed to consolidate small inefficient parcels of land and to buy small farms from private owners. The principal crops are tye, wheat, oats, and potatoes. Industry is publicly owned, private industry accounting for less than 1 per cent of total production. Poland is one of the world's richest countries in copper and sulphur deposits, and there are also deposits of natural gas. Coal output was 120 million tons in 1968, of which nearly one-fifth was exported.

Poland ranks among the world's leading ten shipbuilding nations and is the fourth largest exporter of ships. Other important industries are textiles, engineering, steel, cement, chemicals and foodstuffs. Chief exports are raw and processed materials, machinery and plant, and foodstuffs, A new Five-Year Plan was introduced in 1966 aiming to increase industrial production by more than 40 per cent by 1970. As a result of this Plan, industrial output has increased by more than one-third since 1965 and agricultural production by 17 per cent. Priorities include raising the living standard, modernizing economic structure and further expanding trade with capitalist countries and the Soviet Union. Further emphasis has been placed on the industrialization of the country in the years following inauguration of the latest Five-Year Plan. Industrial enterprises have become more sophisticated and more highly developed, particularly the chemical plants which successfully exploit Poland's natural resources, and the power, steel and coal industries. According to official statistics, industrial output increased by 9.3 per cent and agricultural output by 4 per cent in 1968. The national income increased by almost 8 per cent. Poland is a member of the Council for Mutual Economic Assistance (CMEA), and a contracting party to the General Agreement on Tariffs and Trade (GATT).

Transport and Communications

Transport is by rail, road, inland waterway and air. There are nearly 27,000 km. of railways, 3,206 km. of which are electrified. Roadways extend for some 122,039 km., and there are more than 4,600 km. of navigable waterways. The Polish airline LOT maintains internal and international services to the United Arab Republic, Turkey, Lebanon and throughout Europe. There are three large ports on the Baltic coast at Gdynia, Gdańsk and Szczecin. A merchant fleet of 211 ships with a total tonnage of over 1,440,000 tons has services to Great Britain, the Middle East, South America, the Far East and Scandinavia.

Social Welfare

The Polish social welfare system is controlled by the Ministry of Health and Social Welfare. Locally the system is administered by the Health and Social Welfare Departments of the Presidiums of the People's Councils. Medical care and treatment is provided free of charge to all workers. Over the past few years great efforts have been made to offer a universal free health service to all citizens who need medical attention, and it is hoped that in the near future this plan will be fulfilled. Health services for pregnant women have improved; now women in Poland may successfully combine work with motherhood, as they receive maternity leave with full pay, free time for nursing, and free medical care. Social relief benefits are available to all who are in need. These benefits take the form of either cash payments, goods or services. Cash payments are paid to invalids, old people without retirement pay, recently released prisoners, those suffering from ill-health who are unable to work, or any person who is unable to provide for himself. Benefits in kind are supplied to the needy; these

POLAND-(INTRODUCTORY SURVEY)

take the form of food, clothing, fuel, medicine, dressings, etc. The Polish Red Cross organizes and carries out the care of the sick at home and general home assistance to those who are incapacitated through ill-health, etc. Alimony is organized by the Polish Committee of Social Relief in conjunction with the League of Women. Pensions are organized and managed by the Union of Pensioners, Invalids and Retired Persons. Special houses for social relief are a basic part of the Polish social welfare system. These include homes for pensioners and the aged, homes for blind people, for the mentally deficient, and for those suffering from chronic disease. Many voluntary social organizations contribute to the system in addition to those already mentioned. These include the Union of War Invalids, the Polish Union of the Blind, the Polish Union of the Deaf and Dumb and the Polish Scouting Union.

Education

Education is free and compulsory for children between the ages of 7 and 14 years. Before the age of 7, children may attend crèches (złobki) and kindergartens (przedskoła); however, there are not enough of this type of school to meet the demand. Basic schooling begins at 7 years of age when a child enters the eight-year school (szkola podstawowa). Curricula are uniform throughout Poland and prepared with a view to continuity between each level. There is a small number of private schools run under state supervision. On completing his compulsory education at the eight-year school the child is free to go to work. Secondary education is free to candidates successful in the entrance examination and more than 78 per cent of pupils continue their studies. Of these, 75 per cent go to vocational and technical schools (technika zawodowa), or to basic vocational schools (zasadnicze szkoly). The latter kind, organized by both the government and by work establishments, provide three-year courses consisting of three days theoretical and three days practical training per week, and in addition some general education is given. Those leaving the basic vocational school generally go straight into industry, agriculture, etc. Vocational technical schools provide five-year courses of general education and vocational training together, and can lead to qualifications for entering higher educational establishments. The remaining 25 per cent of children who leave the eight-year school to continue with

their education enter general secondary schools (liceum ogólnoksztatcące), where four-year courses lead to college or university entrance. Here, as in vocational technical schools, the student may receive his leaving certificate (Matura). There are 74 higher educational establishments in Poland, including eight universities and nine technical universities. Total investments in education for the period 1966-70 were expected to exceed 8,700m. Zlotys.

Tourism

The Polish Tourist Society is responsible for tourism and itself maintains eight hotels and 226 hostels throughout the country. Poland is rich in historic cities such as Wrocław, Cracow and Warsaw. There are 30 health and climatic resorts while the mountains, forests and rivers provide splendid scenery and excellent facilities for sporting holidays. Poland was visited by 1,566,800 foreign tourists in 1967.
